Any supplemental writing related to an agenda item for an open session of a regular meeting that is distributed to all or a majority of all members of the Commission less than 72 hours before the meeting will be posted concurrently on the City's website at www.cityofvallejo.net/agendas Written material distributed during the meeting, will be available at the meeting if prepared by the City or after the meeting if prepared by someone else. Such materials may be obtained from the Commission Secretary

Vallejo City Council Chambers is ADA compliant. Devices for the hearing impaired are available from the Staff Secretary. Requests for disability related modifications or accommodations, aids or services may be made by a person with a disability to the Staff Secretary's office by contacting via email Dalia.Vidor@cityofvallejo.net or via telephone at (707) 648-4326 no less than 72 hours prior to the meeting as required by Section 202 of the Americans with Disabilities Act of 1990 and the federal rules and regulations adopted in implementation thereof

AGENDA

1. CALL TO ORDER

2. PLEDGE OF ALLEGIANCE

3. ROLL CALL

4. CONSENT CALENDAR AND APPROVAL OF THE AGENDA

Consent Calendar items appear below, with the Secretary's or City Attorney's designation as such. Members of the public wishing to address the Commission on Consent Calendar items are asked to address the Secretary and submit a completed speaker card prior to the approval of the agenda. Such requests shall be granted, and items will be addressed in the order in which they appear in the agenda. After making any changes to the agenda, the agenda shall be approved. All matters are approved under one motion unless requested to be removed for discussion by a commissioner or any member of the public.

A. **APPROVAL OF THE AGENDA**

B. **APPROVAL OF THE MINUTES**

Recommendation: By motion, approve the December 15, 2025, regular meeting mintues.

5. REPORT OF THE CITY COUNCIL LIAISON

6. COMMUNITY FORUM

Anyone wishing to address the Commission on any matter for which another opportunity to speak is not provided on the agenda, and which is within the jurisdiction of the Commission to resolve, is requested to submit a completed speaker card to the Secretary. When called upon, each speaker should step to the podium, state his/her name and address for the record. The conduct of the community forum shall follow those as the City Council and shall be limited to a maximum of fifteen (15) minutes, with each speaker limited to three minutes pursuant to Vallejo Municipal Code Section 2.20.300. The Commission may take information but may not take action on any item not on the agenda.

7. PUBLIC HEARING

A. **CONTINUE THE PUBLIC HEARING TO CONSIDER ADOPTING A RESOLUTION RECOMMENDING THE CITY COUNCIL ADOPT AN ORDINANCE AMENDING THE VALLEJO MUNICIPAL CODE BY ADDING A NEW CHAPTER 16.216 TO TITLE 16 (ZONING) AND AMENDING THE ZONING MAP TO ESTABLISH A BY-RIGHT HOUSING OVERLAY DISTRICT FOR HOUSING ELEMENT INVENTORY SITES: #41 (APN 0052110140); #42 (APN 0051250230); AND #55 (APN 0069032240) TO IMPLEMENT HOUSING ELEMENT PROGRAMS A1.1.6 AND A1.1.7**

Project Summary: The Project consists of amendments to Title 16 (Zoning) of the Vallejo Municipal Code and the Official Zoning Map to establish a By-Right Housing Overlay District (BRH Overlay) applicable to three Housing Element inventory sites identified in the 2023–2031 Housing Element (Sites #41, #42, and #55). The proposed amendments would implement

	State housing law and Housing Element Programs A 1.1.6 and A 1.1.7 by: (1) establishing a minimum residential density of 20 dwelling units per acre; (2) limiting allowable uses on these parcels to residential uses only (with mixed-use allowed if at least 50 percent of floor area is residential); and (3) consolidating previously adopted by-right approval provisions for qualifying lower-income housing developments into a new Chapter 16.216 (By-Right Housing Overlay District).
Application Number:	PLN25-0222
Location:	Housing Element Sites Inventory – Sites #41 (APN 0052110140); #42 (APN 0051250230); and #55 (APN 0069032240)
Applicant:	City of Vallejo Planning and Development Services Department
Owners:	TRA Lending LLC (Site #41); Param Dhillon (Site #42); and Michael & Beverly Garton (Site #55)
General Plan Land Use Designation:	Primarily Multi-Family (R-MF)
Zoning District:	Residential High Density (RHD)
CEQA:	An Addendum to the General Plan 2040 FEIR was adopted by the City Council for the 2023–2031 Housing Element pursuant to the California Environmental Quality Act (CEQA). The current request is within the scope of that project. Accordingly, no further environmental review is required.

B. **ADOPT A RESOLUTION OF THE PLANNING COMMISSION MAKING A RECOMMENDATION TO CITY COUNCIL TO (1) ADOPT A SUBSEQUENT MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM PURSUANT TO CEQA GUIDELINES SECTION 15162 AND PUBLIC RESOURCES CODE SECTION 21166 AND (2) APPROVE A TENTATIVE MAP (TM23-0001), PLANNED DEVELOPMENT (PD24-0001), DEVELOPMENT REVIEW (DVR23-0017), DESIGN REVIEW (DR23-0006) AND LANDSCAPE REVIEW (LR23-0002) FOR THE DEVELOPMENT OF 51 SINGLE-FAMILY RESIDENCES ("VISTA COVE SUBDIVISION") ON A 20.13 ACRE SITE AT THE NORTHEAST CORNER OF SHADY LANE AND WILDFLOWER AVENUE (APNs: 0079-171-170 & 0079-120-100)**

Project Name:	**Vista Cove Subdivision**
Project Summary:	
	The proposed project includes a Tentative Map, Planned Development (rezoning), Development Review, Design Review, and Landscape Review to allow the subdivision of two vacant parcels totaling

	approximately 20.13 acres into 57 parcels for the development of 51 detached single-family residences, and four parcels for open space and bioretention, one parcel for a new private roadway network, and one parcel for a new sewer pump station. The new single-family homes would include four distinct modern farmhouse-style floor plans ranging in size from 2,494 to 2,674 square feet, each featuring an attached two-car garage and driveway parking. The development also includes construction of a new private street, sidewalks, curbs and gutters, private alleys, street lighting, landscaping, and other related site improvements to support the proposed residential neighborhood.
Project Number(s):	Tentative Map (TM23-0001) Planned Development (PD24-0001) Development Review (DVR23-0017) Design Review (DR23-0006) Landscape Review (LR23-0002)
Location:	Northeast corner of Shady Lane and Wildflower Avenue APNs:0079-171-170 & 0079-120-100
Applicant:	Sancerra Vista Cove, LLC
Owner(s):	Litton Chen, Tammy Dong, Terrence F. Wei, Thomas Chen, Tiffancy Chen Herrero, Timothy Wei, Tina T. Dong, Troy Chuang, Tyler C. Chung
General Plan Land Use Designation:	Primarily Single-Family and Mix of Housing Types/Medium Density
Zoning District:	Residential Low Density and Residential Medium Density
CEQA:	Pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15162 (“Subsequent EIRs and Negative Declarations”), the City of Vallejo has prepared a Subsequent Mitigated Negative Declaration (MND).

I, Dalia Vidor, Staff Secretary do hereby certify that I have caused a true copy of the above notice and agenda to be delivered to

Anthony Taylor, (Chair)
Donald Douglass, (Vice-Chair)
Phillip Balbuena
Eric Blind
Tara Beasley-Stansberry
Wanda Madeiros
Chris White,

at the time and in the manner prescribed by law and that this agenda was posted at City Hall, 555 Santa Clara Street, CA at 5:00 PM, January 16, 2026.

Dated: January 16, 2026	*Dalia Vidor* Dalia Vidor, Staff Secretary

CITY OF VALLEJO PLANNING COMMISSION
REGULAR MEETING MINUTES
COUNCIL CHAMBERS
December 15, 2025

1. CALL TO ORDER

The meeting was called to order at 7:04 p.m.

2. PLEDGE OF ALLEGIANCE

3. ROLL CALL

Present: Vice-Chair Douglass, Commissioners Blind, Madeiros, Beasley-Stansberry, Balbuena, White

Absent: Chair Taylor

Staff present: Assistant City Attorney Zagaroli, Planning and Development Services Director Pollot, Planning Manager Orozco and Planning Manager Rojas.

4. CONSENT CALENDAR AND APPROVAL OF AGENDA

A. APPROVAL OF THE AGENDA
B. APPROVAL OF Minutes

Action: Commissioner Madeiros, second by Commissioner Beasley-Stansberry, and carried unanimously approved the agenda and the November 3, 2025 – regular meeting minutes.

5. REPORT OF THE CITY COUNCIL LIASION

See Secretary's Report.

6. COMMUNITY FORUM – Paul T.

7. PUBLIC HEARING

A.

PROJECT TITLE:	Vista Cove Subdivision
RECOMMENDATION:	Continue the public hearing to consider a resolution recommending the City Council approve a Tentative Map (TM23-0001), Planned Development (PD24-0001), Development Review (DVR23-0017), Design Review (DR23-0006), and Landscape Review (LR23-0013) for

DRAFT

the development of 51 single-family residences)"Vista Cove Subdivision") at Shady Land and Wildflower Avenue (APNs:0079-171-170 & 0079-120-100) to January 21, 2026 at 7:00 p.m.

Action: Moved by Commissioner Madeiros, Second by Commissioner Blind, to continue the public hearing to consider a resolution recommending the City Council approve a Tentative Map (TM23-0001), Planned Development (PD24-0001), Development Review (DVR23-0017), Design Review (DR23-0006), and Landscape Review (LR23-0013) for the development of 51 single-family residences)"Vista Cove Subdivision") at Shady Land and Wildflower Avenue (APNs:0079-171-170 & 0079-120-100) to January 21, 2026 at 7:00 p.m, by the following vote:

AYES: Douglass, Blind, Madeiros, Beasley-Stansberry, White
NOES: Balbuena
ABSENT: Taylor
ABSTAIN: None

B.

PROJECT TITLE: By-Right Housing Overlay District Ordinance

RECOMMENDATION: Hold a public hearing to consider adopting a resolution recommending the City Council adopt an ordinance amending the Vallejo Municipal by adding a new Chapter 16.216 to Title 16 (Zoning) and amending the zoning map to establish a By-Right Housing Overlay District for Housing Element inventory sites: #41 (APN:0052110140); #42 (APN:0051250230) and #55 (APN0069032240) to implement Housing Element programs A1.1.6 and A1.1.7.

Planning Manager Rojas presented the item.

Planning Commissioners asked questions and staff responded.

Vice Chair Douglass opened the public hearing.

Speakers: Matthew S. and Dana P.

Vice Chair Douglass closed the public hearing.

Commissioners deliberated, made comments and asked questions.

DRAFT

Action: Moved by Vice-Chair Douglass, second by Commissioner Madeiros, and carried unanimously to continue the public hearing to consider adopting a resolution recommending the City Council adopt an ordinance amending the Vallejo Municipal by adding a new Chapter 16.216 to Title 16 (Zoning) and amending the zoning map to establish a By-Right Housing Overlay District for Housing Element inventory sites: #41 (APN:0052110140); #42 (APN:0051250230) and #55 (APN0069032240) to implement Housing Element programs A1.1.6 and A1.1.7. to January 21, 2026 – Regular Planning Commission Meeting.

8. WRITTEN COMMUNICATIONS - NONE

9. REGULAR REPORTS

A. SECRETARY'S REPORT

City Council Member Matulac shared the great feedback he has received regarding the recent joint meeting the Planning Commission and City Council had regarding the inclusionary housing ordinance and suggested the commission listen to the commissions and City Council meetings.

Planning Manager Orozco reminded the commission about a special joint meeting with the Architectural Heritage and Landmark Commission and pulled the commission for their availability, reminded them regarding a training video they received via email and for the upcoming training held by the League of California Cities.

B. CITY ATTORNEY'S REPORT - NONE

C. REPORT OF THE PRESIDING OFFICER AND MEMBERS OF THE PLANNING COMMISSION - NONE

D. REPORT OF THE SUBCOMMITTEES – None

10. ADJOURNMENT

The meeting was adjourned at 8:15 p.m.

STAFF REPORT – PLANNING
CITY OF VALLEJO
PLANNING COMMISSION

DATE: January 21, 2026
TO: Planning Commission
FROM: Hector Rojas, Long-Range Planning Manager
SUBJECT: **CONTINUE THE PUBLIC HEARING TO CONSIDER ADOPTING A RESOLUTION RECOMMENDING THE CITY COUNCIL ADOPT AN ORDINANCE AMENDING THE VALLEJO MUNICIPAL CODE BY ADDING A NEW CHAPTER 16.216 TO TITLE 16 (ZONING) AND AMENDING THE ZONING MAP TO ESTABLISH A BY-RIGHT HOUSING OVERLAY DISTRICT FOR HOUSING ELEMENT INVENTORY SITES: #41 (APN 0052110140); #42 (APN 0051250230); AND #55 (APN 0069032240) TO IMPLEMENT HOUSING ELEMENT PROGRAMS A1.1.6 AND A1.1.7**

PROJECT INFORMATION

Project Summary:	The Project consists of amendments to Title 16 (Zoning) of the Vallejo Municipal Code and the Official Zoning Map to establish a By-Right Housing Overlay District (BRH Overlay) applicable to three Housing Element inventory sites identified in the 2023–2031 Housing Element (Sites #41, #42, and #55). The proposed amendments would implement State housing law and Housing Element Programs A 1.1.6 and A 1.1.7 by: (1) establishing a minimum residential density of 20 dwelling units per acre; (2) limiting allowable uses on these parcels to residential uses only (with mixed-use allowed if at least 50 percent of floor area is residential); and (3) consolidating previously adopted by-right approval provisions for qualifying lower-income housing developments into a new Chapter 16.216 (By-Right Housing Overlay District).
Application Number:	PLN25-0222
Location:	Housing Element Sites Inventory – Sites #41 (APN 0052110140); #42 (APN 0051250230); and #55 (APN 0069032240)
Applicant:	City of Vallejo Planning and Development Services Department
Owners:	TRA Lending LLC (Site #41); Param Dhillon (Site #42); and Michael & Beverly Garton (Site #55)
General Plan Land Use Designation:	Primarily Multi-Family (R-MF)
Zoning District:	Residential High Density (RHD)
CEQA:	An Addendum to the General Plan 2040 FEIR was adopted by the City Council for the 2023–2031 Housing Element pursuant to the California Environmental Quality Act (CEQA). The current request is within the scope of that project. Accordingly, no further environmental review is required.

RECOMMENDATION

Continue the public hearing to February 18, 2026, at 7:00 p.m., to consider adoption of a Resolution recommending that the City Council adopt an ordinance amending Title 16 (Zoning) of the Vallejo Municipal Code by adding new Chapter 16.216 and amending the Zoning Map to establish a by-right housing overlay district for Housing Element Inventory Sites #41 (APN 0052110140), #42 (APN 0051250230), and #55 (APN 0069032240).

BACKGROUND AND DISCUSSION

Background

On November 29, 2022, the applicant, Sancerra Vista Cove, LLC, ("applicant") submitted a Preliminary Review request pursuant to California Senate Bill (SB) 330, "the Housing Crisis Act of 2019," which was found to be in compliance with the SB330 preliminary review checklist on December 28, 2022.

On February 13, 2023, the applicant formally applied for a Tentative Map, Development Review, Design Review, Landscape Review and Minor Use permit, to develop 51 detached single-family homes under the "small lot development" standards of the Vallejo Municipal Code ("VMC", Section 16.202.05). The project plans were routed to various city departments and outside agencies for review, and the application was determined to be complete on December 18, 2023.

On May 16, 2024, the applicant revised the project description to withdraw the Minor Use Permit application and add a request for a Planned Development and Zoning Map amendment to amend the Zoning Map from Residential Low Density and Residential Medium Density Zoning District to Planned Development with a proposed "Vista Cove Planned Development Plan."

On August 1, 2024, an environmental consultant was selected to begin the process of preparing an Environmental Impact Report (EIR) for the project. A public EIR Scoping Session was held on April 10, 2025, to solicit comments on the planned environmental analysis. However, after completion of the Initial Study, it was determined that there is no substantial evidence that the Project would result in significant environmental impacts because any potential impacts could be mitigated to a less-than-significant level, thereby supporting preparation of a Subsequent Mitigated Negative Declaration (SMND) in lieu of an EIR.

On July 10, 2025, the Design Review Board (DRB) held a duly public noticed public hearing to consider testimony and evidence, both written and oral, as well as other documents contained in the record of the proceedings relating to the project. Following the public hearing, the DRB voted 3-0, with one absence, to adopt Resolution No. DRB25-02, recommending approval of Design Review (DR23-0006) and Landscape Review (LR23-0002) to the Planning Commission.

On November 10, 2025, the final draft of the SMND was circulated for a 30-day public comment period extending from November 10, 2025 to December 10, 2025.

On December 15, 2025, the Planning Commission held a duly public noticed public hearing to consider testimony and evidence, both written and oral, as well as other documents contained in the record of the proceeding relating to the project. Staff requested the project be continued to the January 21, 2026, Planning Commission regular meeting to allow additional time for staff and the CEQA consultant provide responses to comments received on the SMND and finalize the conditions of approval on the project. The Planning Commission voted 5-1 to continue the meeting to the January 21, 2026 PC regular meeting.

Location and Land Use Context

The project site is located at the intersection of Shady Lane and Wildflower Avenue. It is surrounded by existing residential roadways and open space. The subject site is bounded to the north by Interstate 780 (I-780), across from which are the California Highway Patrol Office, Benicia Road, and Saint Vincent's High School. Immediately east and

south of the site is a large area of city-owned open space (designated 'Parks, Recreation & Open Space' in the General Plan, and located within the 'Resource Conservation' zoning district), beyond that to the east is the existing city limit line, followed by the Benicia State Park which extends down to the Carquinez Strait. To the west and southwest (beyond the open space areas) are existing single-family residences. (see Figure 1).

I-780 is approximately 0.1 miles to the north and Interstate-80 (I-80) is approximately 1.7 miles to the west. Each provides regional access to the project site, while the intersection of Shady Lane and Wildflower Avenue provides direct access to the project site. The immediate vicinity of the project site is characterized by existing single-family residential uses and open space. The site's General Plan 2040 Land Use Designation is Primarily Single Family (R-SF) and Mix of Housing Types (R-MH) which is implemented by the Residential Low Density and (RLD) Residential Medium Density (RMD) Zoning District.

The project site is made up of undulating hills and flat areas, with elevations ranging from approximately 70 feet above mean sea level (amsl) in low lying areas along the eastern portion of the project site up to approximately 290 feet amsl along the southwestern boundary of the project site. The southern portion of the site is generally lower in elevation and increases in elevation towards the west.

Figure 1 – Location and Land Use Context

Project Description

The proposed project consists of a Tentative Map, Planned Development, Development Review, Design Review, and landscape review for the Vista Cove Subdivision. The project includes a tentative map to subdivide two vacant parcels, totaling 20.13-acres, into a total of 57 new parcels. Of the 57 new parcels proposed, four would be dedicated to open spaces and bio-retentions swales, one is proposed for the new private roadway network, one is proposed for a sewer sanitary pump station, and the remaining 51 would be for detached single-family residences (see Figure 2). To facilitate the proposed development plan with special development standards crafted for the unique site conditions, the project includes a request for rezoning to Planned Development (PD). The PD zone allows for one or more properties to be developed under a plan that would provide better opportunities for coordinated development, while still ensuring substantial compliance with, and implementation of, the applicable land use and density policies of the General Plan.

Development of the 51 detached single-family residences and associated infrastructure, such as the private roadway network, would be concentrated on the northern 10.39-acres of the total 20.13-acre site, while the southern half would remain as un-developed open space. The 51 single-family lots are proposed to be developed with four different floor plans to be dispersed throughout the subdivision, each offering a modern farmhouse architectural variation. The four different floor plans range from 2,494 square feet to 2,674 square feet with an overall maximum building height of 30 feet and four inches. The base model floor plan has a total of three bedrooms and two and half bathrooms. The second model has an additional bedroom and bathroom, and the third and fourth models have an additional bedroom and bathroom plus a loft. Each model floor plan would have an attached two-car garage, approximately 444 square feet, and there would be two uncovered parking spaces within the driveway on each lot.

In addition to the residential units, the proposed subdivision would include development of new private streets, sidewalks, curbs and gutters, new lighting, various bioretention basins, and open space areas. New landscaping, including street trees, shrubs and ground cover, is also proposed for installation within all new residence front yards.

Figure 2 – Proposed Site Plan

Code Compliance

I. Required Entitlements and Findings

The project requires a Tentative Map[1] for the creation of 57 parcels, a Planned Development[2] for the rezone of the subject property and to facilitate the project development, Development Review[3] for the construction of 51 single-family residences, Design Review[4] for a residential project of 51 units or more, and Landscape Review[5] for the proposed landscaping throughout the project.

The Planning Commission will consider the recommendations of the Design Review Board in its recommendation for the full project entitlement, including Tentative Map, Planned Development, Development Review, Design Review, and Landscape Review, with final actions subject to City Council approval.

a. Tentative Map Findings

VMC Section 15.08.050 – Required Findings, requires the review authority make the following findings:
[That the Project:]

1. Is consistent with the goals and policies of the Vallejo general plan and any applicable specific plans; and
2. Conforms with this title and the zoning ordinance; and
3. Conforms with the Subdivision Map Act.

b. Planned Development Findings

VMC Section 16.610.03 – Required Findings, states that the proposal shall only be approved if the city council, based on a recommendation from the planning commission, makes the following findings:

1. The proposed development is consistent with the general plan, including the density and intensity limitations that apply;
2. The subject site is physically suitable for the type and intensity of the land use being proposed;
3. Adequate transportation facilities and public services exist or will be provided in accord with the conditions of development plan approval, to serve the proposed development; and the approval of the proposed development will not result in a reduction of traffic levels of service or public services so as to be a detriment to public health, safety, or welfare;
4. The proposed development will not have a substantial adverse effect on surrounding land uses and will be compatible with the existing and planned land use character of the surrounding area;
5. The development generally complies with applicable adopted design guidelines; and

[1] VMC Chapter 15.08 – Tentative Maps
[2] VMC Chapter 16.610 – Planned Development Districts
[3] VMC Chapter 16.605 – Development Review
[4] VMC Chapter 16.604 – Design Review
[5] VMC Chapter 16.504 - Landscaping

6. The proposed development is demonstratively superior to the development that could occur under the standards applicable to the underlying base district, and will achieve superior community design, environmental preservation, and/or substantial public benefit. In making this determination, the following factors shall be considered:
   a. Appropriateness of the use(s) at the proposed location.
   b. The mix of uses, housing types, and housing price levels.
   c. Provision of units affordable to persons and families of low and moderate income or to lower income households, if applicable.
   d. Provision of infrastructure improvements.
   e. Provision of open space.
   f. Compatibility of uses within the development area.
   g. Quality of design, and adequacy of light and air to the interior spaces of the buildings.
   h. Overall contribution to the enhancement of neighborhood character and the environment of Vallejo in the long term.
   i. Creativity in design and use of land; and
7. The proposed PD rezoning and planned development plan has been reviewed in compliance with the California Environmental Quality Act, if applicable, and the requirements of this chapter.

c. Development Review Findings

VMC Section 16.605.03 – Required Findings, requires the review authority to make findings with regard to the project, to confirm that the project:

1. Complies with all applicable specific standards and criteria of this Zoning Code;
2. Is consistent with the general plan and any applicable approved specific plan or planned development;
3. Complies with any design conditions, standards, or requirements imposed by a discretionary approval including but not limited to a major or minor use permit, variance, specific plan, planned development, or tentative map applicable to the project or the location where it is proposed;
4. Is in substantial compliance with any applicable adopted design guidelines;
5. Will serve to achieve groupings of structures that are well related one to another and which, taken together, will result in a well-composed urban design, with consideration given to site, height, arrangement, texture, material, color and appurtenances, the relation of these factors to other structures in the immediate area, and the relation of the development to the total setting as seen from key points in the surrounding area; only elements of design which have some significant relationship to outside appearance shall be considered;
6. Will be of a quality and demonstrates thoughtful site planning that will serve to protect the value of private and public investments in the area; and
7. That the project has been reviewed in compliance with the California Environmental Quality Act, if applicable, and the requirements of this chapter.

d. Design Review Findings

VMC Section 16.606.03 (B) – Required Findings, requires the review authority to make findings with regards to the project, to confirm that the project:

1. Is consistent with the purposes of this chapter, the design policies of the general plan and any applicable specific plan, any adopted applicable design guidelines;
2. Is consistent with any planning are zoning approvals by the director or the planning commission;
3. Complies with any other relevant city policies or regulations; and
4. Meets the following criteria:
    a. The aesthetic design, including its exterior design and landscaping, is appropriate to the function of the project and will provide an attractive and comfortable environment for occupants, visitors, and the general community.
    b. Project details, colors, materials, and landscaping are fully integrated with one another and used in a manner that is visually consistent with the proposed architectural design.
    c. The project has been designed with consideration of neighboring development.
    d. The project contributes to the creation of an attractive and visually interesting built environment that includes well-articulated structures that present varied building facades, rooflines, and building heights and encourages increased pedestrian activity and transit use.
    e. Street frontages are attractive and interesting for pedestrians, address the street and provide for greater safety by allowing for surveillance of the street by people inside buildings and elsewhere.
    f. The proposed design is compatible with the historical or visual character of any area recognized by the city as having such character.
    g. The aesthetic design preserves significant public views and vistas from public streets and open spaces and enhances them by providing areas for pedestrian activity.
    h. The proposed landscaping plan is suitable for the type of project and will improve the appearance of the community by enhancing the building, minimizing hardscape and softening walls; and the landscape plan incorporates plant materials that are drought-tolerant, will minimize water usage, and are compatible with Vallejo's climate.
    i. The project has been designed to be energy efficient including, but not limited to, landscape design and green or eco-friendly design and materials.
    j. The project design protects and integrates natural features including creeks, open space, significant vegetation, and geologic features.

e. Landscape Review

VMC Section 16.504.09 (E) requires approval of a Landscape Review Permit to confirm consistency with applicable code requirements; however, there are no findings required to be made in conjunction with that permit.

II. Staff Analysis

Staff believe all the applicable Tentative Map, Planned Development, Development Review and Design Review findings listed above can be made for the proposed project. A summary of staff's analysis is included below, with specific analyses associated with each required finding included in the attached Resolution (Attachment 3).

a. General Plan Consistency

The project site has a General Plan Land Use Designation of Primarily Single-Family (P-SF) and Mix of Housing Types/Medium Density (R-MH). The General Plan provides the following description for the P-SF land Use Designation:

> *The R-SF designation applies to residential neighborhoods primarily characterized by detached single-family homes, although some older areas have attached dwellings and small stores. Dwellings typically have front and rear yards, as well as side setbacks. Permitted land uses include single-family homes, in some instances duplexes, triplexes, fourplexes, and small commercial spaces, and public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. The maximum permitted residential density in the R-SF designation is nine dwelling units per acre; however, in single-family areas where accessory dwelling units are allowed, maximum permitted residential density is 12 dwelling units per acre.*

The General Plan provides the following description for R-MH land Use Designation:

> *The R-MH designation applies to residential neighborhoods largely characterized either by 1) single-family homes but with a mix of other housing types, including duplexes, triplexes, fourplexes, some smaller scale apartment buildings and small commercial spaces; or 2) primarily single-use, multi-family developments with common outdoor spaces. The residential neighborhoods with single-family and other housing types are typically located in the central and more historic parts of Vallejo. Dwellings typically have front and rear yards, as well as side setbacks. Zero side lots (zero lot lines) may be appropriate where they can be visually integrated into the existing neighborhood context. Permitted land uses include single-family homes; in some instances duplexes, triplexes, fourplexes, smaller scale apartment buildings, and small commercial spaces; and public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. For primarily single-use, multi-family development, the R-MH designation applies to residential areas primarily characterized by parcels and buildings containing multiple residences, sometimes on several floors, and, in some instances, small commercial spaces. They are similar in character to those permitted in Primarily Multi-Family (R-MF), but with a lower residential density. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre.*

The proposed project includes the development of 51 detached single-family residences on a vacant 20.13-acre site with proposed side yard setbacks ranging from three to 11-feet, and front yard setbacks ranging from seven to 14-feet. With regard to density, the proposed project would yield an overall average density of 2.5 dwelling units per acre (du/ac) if calculating for the entire 20.13-acre site, or 4.9 du/ac if calculating for only

the northern 10.39-acres proposed to be developed. In either measurement, the proposed project would meet the maximum density allowed for the site as set forth in the General Plan.

The subject site has been identified as housing opportunity site number 85 in the Housing Element (HE) Sites Inventory List (adopted on December 30, 2024). The Sites Inventory List envisions the site to accommodate 51 units, which is consistent with the proposed project. The proposed project is therefore implementing the HE. In addition to meeting the density for the land use designations, the project is also consistent with General Plan and HE Policies and Actions as illustrated in Exhibit B of the recommended resolution for the project.

b. Zoning Code Compliance

The applicant has requested a rezoning of the subject site from Residential Low Density (RLD) and Residential Medium Density (RMD) to Planned Development (PD) zoning district in accordance with VMC Chapter 16.610. The rezoning request includes a Draft Planned Development Plan (See Exhibit D of the recommended Resolution for the project) which would impose new development standards specific to the site. This request requires City Council approval, with the Planning Commission as the recommending body for the action.

The proposed project complies with all applicable base zoning development standards and supplemental regulations of the RLD and RMD zoning districts, with the exception of minimum lot size, front yard setbacks, garage setbacks, lot coverage, rear setbacks, design standards for single-unit housing, and parking location from the street facing property line. To address these deviations, the applicant is requesting the following special Planned Development zoning standards (as adjustments to the base zoning), as part of the proposed Planned Development Plan:

1. Minimum Lot Size: The minimum lot size in the RLD and RMD zoning district is 5,000 square feet. The PD Plan proposes a minimum lot size of 2,800 square feet to accommodate the proposed development.

2. Front Yard Setbacks: The minimum front yard set back in the RLD and RMD zoning district is 15 feet. The PD Plan proposes a minimum front yard setback from the street of seven feet, and zero feet for residences accessed off alleys.

3. Garage Setbacks: The minimum garage setback is 20 feet in the RLD zoning district and 40 feet in the RMD zoning district. The PD Plan proposes a garage setback of seven feet from the street, and zero feet for residences accessed off alleys.

4. Lot Coverage: The maximum lot coverage is 50 percent in the RLD zoning district and 60 percent in the RMD zoning district. The PD Plan proposes a maximum coverage of 85 percent for all residential lots.

5. Rear Setbacks: The minimum rear yard setback is five feet in the RLD zoning district and 10 feet in the RMD zoning district. The PD Plan proposes a rear yard setback of 10 feet for all residential lots, to be consistent with the RMD zoning district.

6. Design Standards for Single-Unit Housing: VMC Section 16.202.03 provides design standards for single-unit housing (detached and attached), including: (i) requiring building entrances to incorporate a minimum

projection or recess of five feet; (ii) prohibiting garage frontages from exceeding fifty percent of the width of the front façade of the building; and (iii) imposing a maximum amount of paving in street-facing yards of 50 percent. The project is: (i) satisfying the five-foot minimum recess standard for building entrances, (ii) proposing to allow the garage frontages to constitute 75 percent of the front façade, and (iii) satisfying the front yards not exceed the 50 percent pavement standard for street-facing yards.

7. Parking location from the street facing property line: The minimum distance for the location of parking in the RMD zoning district is 40 feet from the front property line. The project is proposing to allow parking located in adjoining front driveways, which would be less than 40 feet from front property lines.

c. Architecture

As previously mentioned, the proposed 51 single-family residences would be developed with four different floor plans to be dispersed throughout the subdivision, each offering a modern farmhouse architectural variation (see figure 3). The architectural character of the project draws on the project site's proximity to California's wine country and the community's natural topography. The proposed architectural style integrates traditional rural forms with modern design elements to create a cohesive and contemporary residential expression. The design is made up of seven different features, such as Building Massing, Main Entrances and Porches, Roofs, Window Openings, Garage Doors, exterior materials and colors and architectural detailing. Below is a description of each element:

1. Building Massing

The proposed two-story homes are designed with appropriately articulated wall planes on all four sides, featuring recessed windows that enhance visual depth and interest. Entry porticos are positioned forward of the garage plane to create a more welcoming and pedestrian-oriented streetscape. The building massing incorporates varying projections that provide shadow, depth, and visual relief, contributing to a dynamic overall composition. The homes feature clean, simple forms consistent with the architectural characteristics of the Modern Farmhouse style and utilize complementary exterior finish materials that reinforce the intended architectural character.

2. Main Entrances and Porches

The entries are designed as focal points by using covered porches, recessed entryways, or trellises. These elements not only provide functional shelter and shade but also reinforce a welcoming, pedestrian atmosphere.

Figure 3 – Architectural Style

3. Roofs

The roofscape is designed to be visually consistent with the modern farmhouse character. Homes feature varied roof forms including hip, gable, and shed roofs, deliberately avoiding styles that fall outside the rural aesthetic such as gambrel, flat or mansard roofs. To avoid uniformity and promote interest, multiple plate heights and slopes are utilized where appropriate. A diversity of roofing materials and colors, such as concrete tiles and shakes, contributes to a varied yet harmonious neighborhood composition.

4. Window Openings

Windows are integral design elements of the proposed homes, providing both architectural articulation and natural light and ventilation for occupants. To ensure consistency with the overall design intent, windows set within stucco walls are recessed a minimum of two inches from the wall plane to create depth and shadow. Window types may include casement, slider, single-hung, and fixed glass styles, with any window grids or divided lights designed to complement the architectural character of the home. Frame colors are selected to match or harmonize with each home's color scheme, and any shutters are

appropriately sized and shaped to align with the corresponding window openings. Reflective glass is prohibited in all locations to maintain visual cohesion and reduce glare.

5. Garage Doors

The design of the proposed two-story homes incorporates measures to minimize the visual prominence of garage doors and enhance the pedestrian orientation of street-facing elevations. Garage doors are recessed a minimum of six inches from the adjacent wall plane to introduce shadow lines and reduce massing impacts. Additional architectural articulation is provided at the garage openings to further define and soften the visual transition between the garage and primary building façade. The overall building design utilizes garage-recessed and house-forward configurations, in which entry porches, porticos, or habitable spaces are positioned forward of the garage plane. In certain instances, second-floor projections are located above garage doors to provide additional shading, visual relief, and architectural definition consistent with the overall design intent.

6. Exterior Materials and Colors

The proposed two-story homes utilize a variety of exterior materials and colors to create an architecturally cohesive and visually appealing streetscape consistent with the Modern Farmhouse style. Exterior surface materials and treatments are designed to appear as integral components of the building architecture rather than as applied finishes, with materials wrapping columns, porches, and balconies in their entirety. Color and material transitions occur at inside corners, and materials applied to any elevation turn the outside corner and terminate at logical points that align with rooflines, building masses, or wall returns. The field color at the base of walls extends to finished grade to ensure visual continuity, and where masonry veneer is used, the exposed wall surface below the weep screed is painted to closely match the veneer above. Exterior materials may include, but are not limited to, stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay-resistant wood, all selected to reinforce the intended architectural character and material quality of the development.

The architectural vision for Vista Cove subdivision is grounded in the principles of Wine Country Agrarian designs. Through thoughtful massing, material quality and variation, and detailed craftsmanship, the homes at Vista Cove subdivision would contribute to and enhance the aesthetic of the existing surrounding development.

d. Landscaping and Open Space

The project site has existing trees located primarily near the perimeter of the site. An arborist report was prepared for the existing site, and a total of 83 trees were assessed, identifying seven different tree species, e.g. Coast Live Oak, Plum Cherry, Apple, Monterey Pine, Valley Oak, Toyon, and Strawberry Tree, with Coast Live Oak as the most common species. The trees ranged from poor to good condition. The report concluded with a recommendation for removal of 69 of the 83 existing on-site trees, which is reflected in the development plans.

VMC Section 16.504.07(C) - Replacement of Significant Trees Required states, *Trees shall be replaced at a ratio of at least three new trees for every tree removed except for the fire-prone species identified above. The minimum size of a replacement tree shall be fifteen gallons. Exceptions to this requirement may be approved by the director when site conditions warrant. Replacement trees shall be planted in the following order of priority:*

1. *On the project site;*
2. *On any adjacent property subject to approval of the owner; or*
3. *In the public right-of-way adjacent to the property subject to approval of the director of public works.*

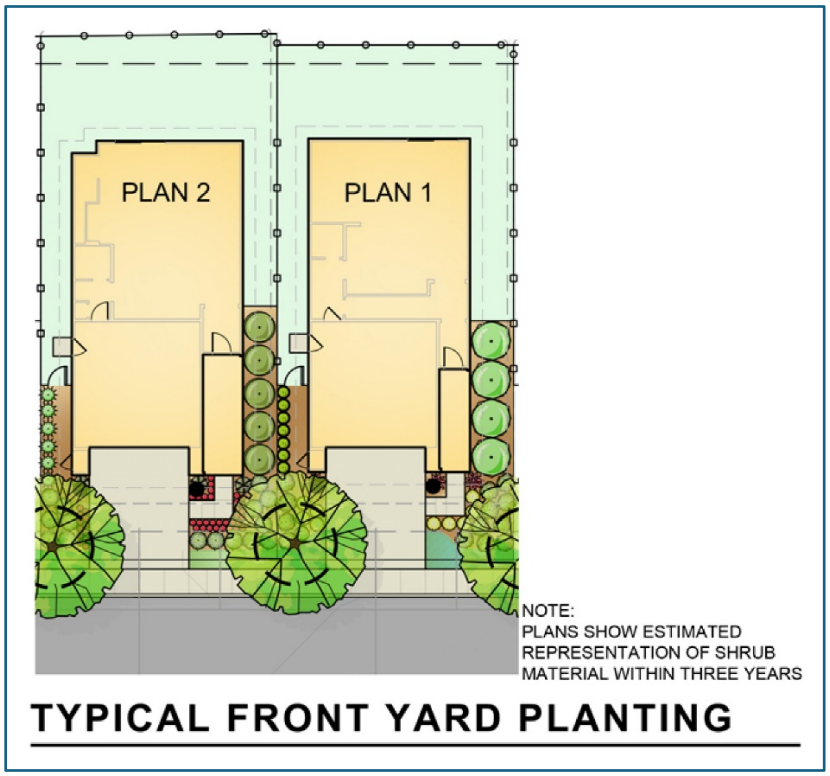
Of the 69 trees proposed to be removed, 47 of the trees are considered to be significant (as defined in VMC 16.701) and as such, shall be replaced at a three to one ratio. A total of 141 new trees are proposed as part of the project, to be planted throughout the project site (see Figure 4). Primary trees would include Armstrong Red Maple, Autumn Gold Maidenhair Tree, Coast Live Oak, Valley Oak, Skyrocket English Oak, and Greenspire Littleleaf Linden.

Figure 4 – Proposed Landscaping

New landscaping would be provided in the front yards of each new residential lot. The proposed landscape plan includes a typical front yard landscape design and layout for both interior and corner lots. Each lot would

include one shade tree, small shrubs, and ground cover (see Figure 5). The project also includes stormwater detention basins that would be improved with landscaping including a native ornamental bioswale seed mix and would contain tree and shrub buffers adjacent to the basins.

Figure 5 – Front yard landscaping



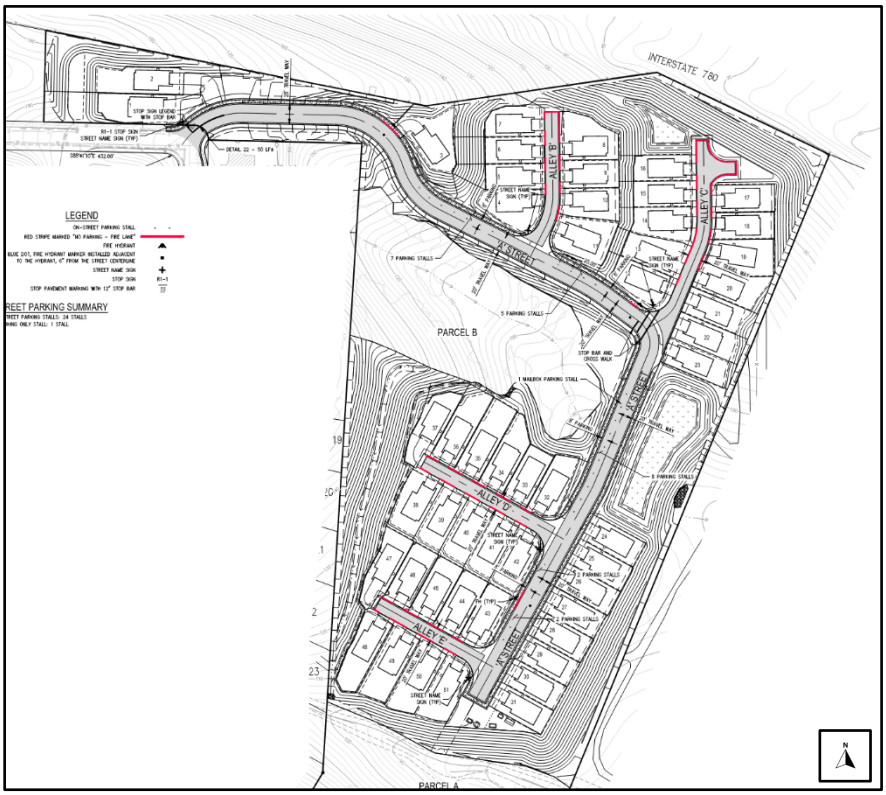
As proposed, the project includes a total of 9.74 acres of undisturbed open space across two parcels: Parcel A (8.36-acres) and Parcel B (1.38-acres). These undisturbed open space areas would be fenced with access via private gates to facilitate maintenance activities only, and they would have signage installed to prevent trespassing. Future development would not be allowed on either of the two parcels. The project would also include 3.55 acres of common open space, across two parcels (Parcel C and D), that would include one bioretention area, walkways, a loop walk around a flexible use turf area, and a vista overlook for residents. The proposed landscape design includes drought-tolerant and native landscaping to transition between the proposed residential area and adjacent open space.

e. Access, Circulation and Parking

Primary access to the new subdivision would be provided via a new private street ("A Street") located at the corner of Shady Lane and Wildflower Avenue. The new street would extend from west to east, curve slightly south, and then continue southward. From this street, a total of four private alleys ("Alleys B-E") would provide direct access to the new single-family residences, except for the first two residences, which would be

accessed via a private driveway. The new street would include a 40-foot right-of-way, consisting of two 14-foot travel lanes and 4.5-foot attached sidewalks, with limited parking on one side only, in certain areas (see Figure 6). The new alleys would include a 21-foot right-of-way, consisting of two 10.5-foot travel lanes, with no on-street parking permitted (see Figure 6).

Figure 6 – Proposed Circulation



Each dwelling unit would include two off-street parking spaces within an attached 444-square-foot garage, as well as two additional uncovered parking spaces on the driveway pad directly in front of each garage, providing a total of 204 off-street parking spaces. In addition, a total of 24 on-street parking spaces and one mail-bay parking space would be provided with the development, for a total of 229 parking spaces within the subdivision.

ENVIRONMENTAL REVIEW

The City retained LSA to prepare a Subsequent Mitigated Negative Declaration (SMND) to the existing Vallejo General Plan 2040 Environmental Impact Report (EIR) (State Clearing House [SCH]#20141120356), certified by the City Council on August 29, 2017, to evaluate whether the proposed project would result in any new or substantially more adverse significant effects or require new mitigation measures not identified in the General Plan 2040 EIR. The SMND by LSA is included as Exhibit A to the recommended Resolution for the Environmental Review.

Given the analysis contained in the SMND, development of the project would not cause any new or substantially more sever significant environmental effects that were not previously examined in the Cerfitied EIR and would not require additional mitigation measures. Therefore, no further environmental analysis is required pursuant to California Environmental Quality Act (CEQA) Guidelines Section 15162 and Public Resources Code 21166.

NOTICE AND COMMENTS

On November 24, 2025, pursuant to VMC Section 16.602.08(A), a notice of this hearing was published in the Times Herald, mailed to all active neighborhood groups, all property owners within 1,500 feet of the subject property, any other interested parties, the Vallejo Unified School District, local agencies expected to provide water, wastewater treatment, and/or other essential facilities or services to the project, the property owner's, the applicant, and electronically sent to the members of the Planning Commission. Additionally, a notice for the hearing was posted at the site at three different locations.

As of writing this report, staff has received several public comments regarding the proposed project.

CONCLUSION

Based on the analysis contained in this staff report, staff recommend that the Planning Commission adopt:

1. A resolution recommending City Council to adopt a Subsequent Mitigated Negative Declaration to the certified EIR for General Plan 2040, after making findings pursuant to CEQA guidelines Sections 15162 and public resources code 21166; and

2. A Resolution recommending City Council approve Tentative Map (TM23-0001), Planned Development (PD24-0001), Development Review (DVR23-0017), Design Review (DR23-0006), and Landscape Review (LR23-0002) for the development of 51 single-family residences ("Vista Cove Subdivision"), subject to the conditions of approval as Exhibit A to the Resolution for the project.

LEVINE ACT: GOVERNMENT CODE 84308

This item is subject to the Levine Act. City elected and appointed officials, including candidates for City elected office, (City Officers) who have received a campaign contribution of more than $500 within 12 months prior from a party, participant, or their representatives involved in this proceeding may do either of the following: (1) disclose the contribution on the record and recuse themselves from this proceeding; OR (2) return the portion of the contribution that exceeds $500 within 30 days from the time the elected official knew or should have known about the contribution and participate in the proceeding.

All parties, participants, and their representatives must disclose on the record of this proceeding any contribution of more than $500 made to the City Officers, such as the mayor and/or Councilmembers, within 12 months prior to the date of the proceeding. City Officers are prohibited from accepting, soliciting, or directing a contribution of more than $500 from a party, participant, or their representatives during a proceeding and for 12 months following the date a final decision is rendered.

CITY OF VALLEJO PLANNING COMMISSION

RESOLUTION NO. PC 26-XX

A RESOLUTION OF THE PLANNING COMMISSION RECOMMENDING CITY COUNCIL ADOPT A SUBSEQUANT MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM PURSUANT TO CEQA GUIDELINES SECTION 15162 AND PUBLIC RESOURCES CODE 21166 FOR THE DEVELOPMENT OF 51 SINGLE-FAMILY RESIDENCES ("VISTA COVE SUBDIVISION") ON A 20.13-ACRE SITE AT THE NORTHEAST CORNER OF SHADY LANE AND WILDFLOWER AVENUE (APNs: 0079-171-170 & 0079-120-100)

* *

WHEREAS, on August 29, 2017, the City Council adopted General Plan 2040 and certified the Environmental Impact Report (EIR); and

WHEREAS, on June 22, 2021, the City Council adopted a new Zoning Code and Zoning Map; and

WHEREAS, on November 29, 2022, Sancerra Vista Cove, LLC., the applicant, submitted for a Preliminary Review Application pursuant to California Senate Bill (SB) 330, "the Housing Crisis Act of 2019," for development of a vacant 20.13-acre site located near the intersection of Shady Lane and Wildflower Avenue (APNs:0079-171-170 and 0079-120-100) ("Subject Property"); and

WHEREAS, on December 28, 2022, the SB 330 Preliminary Review Application was found to satisfy the checklist as listed in California Government Code Section 65941.1; and

WHEREAS, the Subject Property has a current General Plan 2040 land use designation of Primary Single-Family (R-SF) and Mix of Housing Types/Medium Density (R-MH), and a zoning designation of Residential Low Density (RLD) and Residential Medium Density (RMD); and

WHEREAS, on February 13, 2023, the applicant formally submitted an application for Tentative Map (TM23-0001), Development Review (DVR23-0017), Design Review (DR23-0006), Landscape Review (LR23-0002) and Minor Use Permit (MUP23-0010), to develop 51 detached single-family homes on the Subject Property (the "Project"); and

WHEREAS, on December 18, 2023, after multiple rounds of review, the Project was deemed complete; and

WHEREAS, on May 16, 2024, the applicant revised the Project description to withdraw the Minor Use Permit application and add a request for a Planned Development zoning map amendment (PD24-0001) to change the project site's zoning districts from RLD and RMD to Planned Development (PD) with a proposed "Vista Cove Planned Development Plan;" and

WHEREAS, on July 24, 2024, the application for the revised Project was deemed complete; and

WHEREAS, the City of Vallejo (City), as the lead agency, believed the Project would require an Environmental Impact Report (EIR) in compliance with the California Environmental Quality Act ((CEQA) California Public Resources Code, Section 2100 et. Seq.) and Title 14 of the California Code of Regulations (CEQA Guidelines); and

WHEREAS, on March 20, 2025, a Notice of Preparation (in accordance with CEQA Guidelines Section 15082) and Notice of Public Scoping Meeting was prepared and provided to adjacent property owners, all interested agencies, and to all members of the public who had previously requested notification and was posted at City Hall and on the City's Website, notifying them that the City of Vallejo was preparing an Environmental Impact Report (Draft EIR) for the proposed Project and comments should be submitted to the City commencing March 20, 2025 through April 19, 2025; and

WHEREAS, the City held a Public Scoping meeting on April 10, 2025 at 5:30 p.m. at the Vallejo Room of the John F. Kennedy Library; and

WHEREAS, an EIR was initially considered for the Project based on earlier information indicating the potential for significant environmental effects; however, after completion of the Initial Study, it was determined that there is no substantial evidence that the Project would result in significant environmental impacts because any potential impacts can be mitigated to a less-than-significant level, thereby supporting preparation of a Subsequent Mitigated Negative Declaration (SMND) in lieu of an EIR; and

WHEREAS, a Notice of Intent to adopt a SMND, which is attached hereto as Exhibit A and incorporated herein, was prepared and provided to adjacent property owners, all interested agencies, to all members of the public who had previously requested notification, and posted at City Hall and on the City's website, notifying all parties of the availability of the SMND and the 30-day public review period commencing November 10, 2025 and ending on December 10, 2025; and

WHEREA, the SMND identified potentially significant impacts to the environment including specific impacts to Air Quality, Biological Resources, Cultural Resources, Geology and Soils, Greenhouse Gas Emissions, Hazards and Hazardous Materials, and Tribal Cultural Resources, which would be avoided or mitigated to less than significant levels through adoption and implementation of the mitigation measures included in the Mitigation

Monitoring and Reporting Program (MMRP), which is attached hereto as Exhibit C and incorporated herein; and

WHEREAS, on November 24, 2025, pursuant to Vallejo Municipal Code Section16.602.08(A), notice of this hearing was published in the Times Herald and mailed to all active neighborhood groups and property owners within 500 feet of the Subject Property, the property owners, the Vallejo City Unified School District and any other local agency expected to provide water, wastewater treatment, streets, roads, schools, or other essential facilities or services to the Project and electronically mailed to the members of the Planning Commission, to the applicant and interested parties; and

WHEREAS, the Planning Commission conducted a duly noticed public hearing on December 15, 2025, to consider the proposed Project, including the recommended environmental review determination prepared pursuant to CEQA; and

WHEREAS, the staff requested to continue the Project to a date certain of January 21, 2026, Planning Commission regular meeting, and voted 5-1 to continue the meeting; and

WHEREAS, the Planning Commission conducted a public hearing on January 21, 2026, to consider the proposed Project, including the recommended environmental review determination pursuant to CEQA

NOW, THEREFORE, LET IT BE RESOLVED that the Planning Commission hereby finds, determines and resolves as follows:

Section 1. Recitals

The foregoing recitals are true and correct, and the same are incorporated herein by reference.

Section 2. Record

The Record of Proceedings ("Record") upon which the Planning Commission bases its decisions on the Project includes but is not limited to: (1) the staff reports, City files and records, and other documents prepared for and/or submitted to the City relating to the Project; (2) the evidence, facts, findings and other determinations set forth in this resolution; (3) Vallejo General Plan 2040 and its certified final Environmental Impact Report (“GP EIR”); the 2021 Zoning Code and its Initial Study and Mitigated Negative Declaration; the Vallejo 2023-2031 Housing Element and the Addendum to the GP EIR dated September 2025 and prepared by Environmental Science Associates; the Vallejo Municipal Code; (4) all designs, plans, studies, data and correspondence submitted to the City in connection with the Project; (5) all documentary and oral evidence received at public meetings, hearings, or submitted to the City during the comment period relating to the Project; and (6) all other matters of common knowledge to the Planning Commission

including, but not limited to, City state, and federal laws, policies, rules, regulations, reports, records, and projections related to development within the City of Vallejo and its surrounding areas.

The location and custodian of the records is the Planning and Development Services of the City of Vallejo, 555 Santa Clara Street, Vallejo, California 94590.

Section 3. Initial Study/Subsequent Mitigated Negative Declaration Considered.

Based upon information in the Subsequent Mitigated Negative Declaration (SMND), incorporated herein by reference, the Record as described above, and all other matters deemed material and relevant prior to adopting this resolution, the Planning Commission hereby recommends adoption of a Subsequent Mitigated Negative Declaration for the Project based on the following:

a. The SMND has been completed in compliance with the California Environmental Quality Act (Public Resources Code Section 21166 and CEQA Guidelines Sections 15162);

b. The Planning Commission considered the GP EIR and SMD before making its decision to recommend approval of the Project; and

c. The SMND reflects the City's independent judgment and analysis as Lead Agency.

Section 4. California Environmental Quality Act Findings.

The Planning Commission further finds that none of the circumstances set forth in CEQA Guidelines Section 15162 are present with respect to the project and no further environmental review is required based on the following findings:

1. **Substantial changes *are not* proposed in the project which will require revisions of the GP EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects.**

   Facts in Support: *The Project proposes a land use that is consistent with the existing GP designations. The characteristics of the proposed Project are the same as previously assumed in the General Plan EIR. Impacts analyzed in the General Plan EIR would remain the same with the proposed Project. Thus, the proposed Project does not require a major revision to the EIR and does not substantially increase the severity of previously identified significant effects.*

2. **Substantial changes have *not* occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects**.

Facts in Support: *The circumstances under which the proposed Project would occur are not changed from what was assumed in the General Plan EIR, nor does the proposed Project result in a new or substantial increase in the severity of significant impacts in the General Plan EIR, as demonstrated in the Environmental Checklist in Section 4 of the SMND. No notable circumstances pertaining to the Project site or its surroundings have occurred since the General Plan EIR analysis was prepared. While updates and changes have occurred to certain CEQA criteria, thresholds, and/or analysis approaches as a result of amendments to the CEQA Guidelines, caselaw, or other regulations or adopted standards and/or guidance, these are disclosed in the Checklist for public information and discussed to clarify that none are considered changed circumstances for purposes of this Section.*

3. ***No*** **new information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the GP EIR was adopted, shows any of the following:**

    A. **The Project will have one or more significant effects not discussed in the GP EIR;**

    Facts in Support: *The GP EIR identifies significant and unavoidable impacts for air quality, GHG emissions, noise, and transportation. Because development of the proposed Project of 51 residential units on the Project site was factored into the GP EIR analysis, the Project would not exceed what was analyzed in the GP EIR, which considered a much greater level of citywide development. The proposed Project does not result in a significant effect that was not discussed in the previous GP EIR.*

    B. **Significant effects previously examined will be substantially more severe than shown in the GP EIR;**

    Facts in Support: *As explained above, because development of the proposed Project of 51 residential units on the Project site was factored into the GP EIR analysis, the Project would not exceed the General Plan EIR impacts, which considered a much greater level of citywide development of which the proposed Project is a part. The proposed Project does not result in a significant effect that is substantially more severe than shown in the previous GP EIR.*

    C. **Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or**

    Facts in Support: *The Project is not proposing any changes that would affect the feasibility of previously discussed mitigation measures or alternatives. No mitigation measures or alternatives in the GP EIR are changed in the Checklist to the Addendum, and not all of the mitigation measures are required or pertain to the proposed Project.*

D. **Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.**

Facts in Support: There are no new mitigation measures or alternatives from those adopted in the GP EIR that would substantially reduce one or more significant effects on the environment. No mitigation measures or alternatives in the GP EIR have changed in the Checklist, and not all of the mitigation measures are required or pertain to the proposed Project.

Section 3. Decision

NOW, THEREFORE, LET IT BE RESOLVED that the Planning Commission hereby recommends that the City Council adopt the Initial Study/Subsequent Mitigated Negative Declaration (IS/MND), attached as Exhibit "A," and, based thereon and on the Record as a whole, find that all potentially significant environmental effects of the Project have been eliminated or reduced to a less-than-significant level as set forth in the IS/MND, such that the Project and its associated actions will not have a significant effect on the environment.

BE IT FURTHER RESOLVED that The Planning Commission further recommends that the City Council adopt the mitigation measures identified in the IS/MND and incorporated into the Mitigation, Monitoring, and Reporting Program (MMRP), attached as Exhibit "C," which is designed to ensure implementation and compliance with all required project changes and mitigation measures to avoid or substantially lessen the significant effects identified in the IS/MND and said mitigation measures are described in the MMRP included therein and incorporated herein by reference.

Section 4. Time Limitations & Indemnity

a. Developer shall defend, indemnify, and hold harmless the City and its agents, officers, attorneys, and employees from any claim, action, or proceeding brought against the City or its agents, officers, attorneys, or employees to attack, set aside, void, or annul the action(s) at issue herein. This indemnification shall include damages or fees awarded against the City, if any, costs of suit, attorneys' fees, and other costs and expenses incurred in connection with such action whether incurred by the Developer, the City, and/or parties initiating or bringing such action.

b. Developer shall defend, indemnify, and hold harmless the City and its agents, officers, attorneys, and employees for all costs incurred in additional investigation of or study of, or for supplementing, preparing, redrafting, revising, or amending any document, if made necessary by said legal action and the developer desires to pursue securing such approvals, after initiation of such litigation, which are

conditioned on the approval of such documents in a form and under conditions approved by the City Attorney.

c. In the event that a claim, action, or proceeding described in paragraphs a. or b. above is brought, the City shall promptly notify the developer of the existence of the claim, action, or proceeding, and the City will cooperate fully in the defense of such claim, action, or proceeding. Nothing herein shall prohibit the City from participating in the defense of any claim, action, or proceeding; the City shall retain the right to: (1) approve the counsel to so defend the City; (ii) approve all significant decisions concerning the manner in which the defense is conducted; and (iii) approve any and all settlements, which approval shall not be unreasonably withheld. The City shall also have the right not to participate in said defense, except that the City agrees to cooperate with the developer in the defense of said claim, action, or proceeding. If the City chooses to have counsel of its own to defend any claim, action, or proceeding where the developer has already retained counsel to defense the City in such matters, the fees and expenses of the counsel selected by the City shall be paid by the City. Notwithstanding the immediately preceding sentence, if the City Attorney's Office participates in the defense, all City Attorney fees and expenses shall be paid by the developer.

d. The Applicant, property owner and/or any successor(s) in interest, whether in whole or in part, to either of them, indemnifies the City for the City's costs, fees, and damages which the City incurs in enforcing the above indemnification provisions.

e. Pursuant to VMC Section 16.602.14, the Applicant, or any party adversely affected by the decision of the Planning Commission, may, within ten days after the Planning Commission's decision, appeal in writing to the City Council by filing a written appeal with the City Clerk. Such written appeal shall state the reason or reasons for the appeal and why the applicant believes he or she is adversely affected by the decision of the Planning Commission. Such appeal shall not be timely filed unless it is actually received by the City Clerk or designee no later than the close of business on the tenth calendar day after the date of the decision. Fees for the appeal established by the Master Fee Schedule shall be paid by the appellant. In the event the appeal period ends on a Saturday, Sunday, or any other day the city is closed, the appeal period shall end at the close of business on the next consecutive business day.

f. The conditions of approval applicable to the Project include certain fees, dedication requirements, reservation requirements, and other exactions. Pursuant to Government Code Section 66020(d)(1), the conditions constitute written notice of a statement of the amount of such fees and a description of dedications, reservations, and other exactions. Developer is hereby further notified that the 90-day approval period in which it may protest these fees, dedications, reservations, and other exactions pursuant to Government Code Section 66020(a) has begun. If you fail to file a protest within this 90- day period complying with all of the

requirements of Section 66020, you will be legally barred from later challenging such exactions.

PASSED AND ADOPTED at a regular meeting of the Planning Commission of the City of Vallejo, State of California, on the 21st day of January 2026 by the following vote, to-wit:

1.0 PROJECT INFORMATION

1. **Project Title:**

   Vista Cove Planned Development Project

2. **Lead Agency Name and Address:**

   City of Vallejo
   Planning and Development Services
   555 Santa Clara Street
   Vallejo, California 94590

3. **Contact Person and Phone Number:**

   Cesar Orozco, Planning Manager
   (707) 648-5436
   cesar.orozco@cityofvallejo.net

4. **Project Location:**

   The 20.13-acre project site is located at the northeast corner of Shady Lane and Wildflower Avenue (Assessor's Parcel Numbers [APNs] 0079-171-170 and 0079-120-100) in Vallejo, Solano County. Vallejo is approximately 20 miles northeast of San Francisco, along the eastern end of San Pablo Bay. The project site is in southeastern Vallejo, west of the eastern boundary with the city of Benicia, in an area consisting primarily of residential, recreational, and public and semi-public uses.

5. **Project Sponsor's Name and Address:**

   Sancerra Vista Cove, LLC
   2618 San Miguel Drive, Suite 1223
   Newport Beach, California 92660

6. **General Plan Designation:**

   Mix of Housing Types (R-MH) and Primarily Single Family (R-SF)

7. **Zoning:**

   Residential Medium Density (RMD) and Residential Low Density (RLD)

8. **Description of Project:**

   The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would be retained as undeveloped open space. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. To facilitate development of the project as proposed, the site would be rezoned to the Planned Development (PD) district. Individual components of the proposed project are further described in Section 2.0, Project Description.

9. Surrounding Land Uses and Setting:

The project site is generally surrounded by residential, recreational, and public and semi-public uses.

10. Other Public Agencies Whose Approval is Required (e.g., permits, financial approval, or participation agreements):

See Section 2.3, Project Approvals.

11. Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resource Code section 21080.3.1? If so, is there a plan for consultation that includes, for example, the determination of significance of impacts to tribal cultural resources, procedures regarding confidentiality, etc.?

In August 2024, the City of Vallejo (City) provided formal notification to those California Native American tribes that are traditionally and culturally affiliated with the geographic area within which the proposed project is located pursuant to the consultation requirements of Assembly Bill (AB) 52. Letters were sent to all tribal representatives identified by the Native American Heritage Commission (NAHC). The City met with one tribe, Yocha Dehe Winton Nation, for consultation in January 2025.

2.0 PROJECT DESCRIPTION

This chapter describes the proposed Vista Cove Planned Development Project (project) submitted by Sancerra Vista Cove, LLC (the project sponsor) and evaluated in this document. An overview of the project site and surrounding land uses is followed by the details of the proposed project itself. A summary of required approvals and entitlements and intended uses of this document is also provided. The City of Vallejo is the Lead Agency for environmental review.

2.1 PROJECT SITE

The following describes the project's local and regional context, existing site characteristics, and surrounding land uses.

2.1.1 Project Site Location and Access

The 20.13-acre project site is located at the northeast corner of Shady Lane and Wildflower Avenue (APNs 0079-171-170 and 0079-120-100) in Vallejo, Solano County. Vallejo is approximately 20 miles northeast of San Francisco, along the eastern end of San Pablo Bay. The project site is in southeastern Vallejo, west of the eastern boundary with the city of Benicia, in an area consisting primarily of residential, recreational, and public and semi-public uses.

Regional vehicular access to the project site is provided by Interstate 780 (I-780), located immediately north of the project site. The closest on- and off-ramps to the project site are located along Glen Cove Road, approximately 0.45 mile west of the project site. Direct local access to the project site is via Shady Lane and Wildflower Avenue, which border the site immediately to the southwest.

The project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site.

Figure 2-1 shows the regional and local context of the project site, and **Figure 2-2** depicts an aerial photograph of the project site and surrounding land uses.

2.1.1 Existing Site Conditions

The project site is made up of undulating hills and flat areas, with elevations ranging from approximately 70 feet above mean sea level (amsl) in low lying areas along the eastern portion of the project site up to approximately 290 feet amsl along the southwestern boundary of the project site. The southern portion of the site is generally lower in elevation and increases in elevation towards the west.

Non-native annual grassland and scattered mature trees primarily occupy the vacant project site. There are 83 mature trees on the project site. The project site also includes one intermittent stream, connected to a seasonal wetland located in a low-lying area in the middle of the project site, and one linear freshwater marsh.[1] There is an existing access easement from Wildflower Avenue to provide access to APN 0079-120-100 from APN 0079-171-170.

2.1.2 Existing Land Use and Zoning

The City of Vallejo General Plan 2040 designates the project site as Mix of Housing Types (R-MH) and Primarily Single Family (R-SF), as shown on **Figure 2-3**. Permitted land uses within the R-MH and R-SF designations are similar and include single-family homes. In addition, the land use designations allow duplexes, triplexes fourplexes, smaller-scale apartment buildings, and small commercial spaces, as well as public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre, and nine dwelling units per acre in the R-SF designation; however, in single-family areas where accessory dwelling units are allowed, maximum permitted residential density is 12 dwelling units per acre.

The project site is zoned Residential Medium Density (RMD) and Residential Low Density (RLD). The RMD Zoning District allows a mix of housing types, including attached and detached structures, and small apartment buildings. Development in these zones is subject to density limits (up to 25 dwelling units per acre) and design and development standards to ensure land use compatibility. The district also allows mixed-use development with residential and small commercial spaces, a variety of neighborhood supportive services, public and educational facilities, open spaces, and community facilities. In undeveloped areas of the city, it is the intent of this district to encourage the creation of multi-unit residential neighborhoods with a variety of housing types.

The RLD Zoning District is intended for low-density residential areas in which permanent single unit residences, including detached and attached (duplexes and townhouses) units are the primary use. This district also allows other residential types, including cottages and bungalows around courts, small neighborhood-serving retail, a variety of neighborhood supportive services, public and educational facilities, open spaces, and community facilities. The maximum permitted residential density is nine dwelling units per acre, excluding accessory dwelling units.[2]

2.1.1 Surrounding Land Uses

The project site is generally surrounded by residential, recreational, and public and semi-public uses, as depicted on **Figure 2-2**, above, and further described below.

- **North.** The project site is bordered to the north by I-780 and vacant land that is zoned for Public and Semi-Public uses. Farther north are a variety of Public and Semi-Public uses, including a California Highway Patrol office and Saint Patrick Saint Vincent High School, as well as single- and multifamily residential uses.

- **East.** The project site is bordered immediately to the east by vacant, undeveloped land zoned for Resource Conservation and the Benicia State Park. Farther east are commercial uses and single- and multifamily residential uses.

- **South.** The project site is bordered immediately to the south by vacant undeveloped land owned by the City and zoned for parks, recreation and open space, and resource conservation. Farther south are single-family residential uses and Glen Cove Elementary School.

- **West.** The project site is bordered immediately to the west by a 141-unit single-family residential subdivision. Farther west are commercial uses and single-family residential uses.

2.2 PROPOSED PROJECT

This section provides a description of the proposed project as identified in the application materials submitted by the project sponsor to the City, dated May 2024.[3,4,5] The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would be retained as undeveloped open space. The residential portion of the proposed project would include 51 residential lots, undeveloped open space, water quality basins, and related infrastructure improvements. To facilitate development of the project as proposed, the site would be rezoned to the Planned Development (PD) district. Individual components of the proposed project are further described below.

Figure 2-4 shows the conceptual site plan for the proposed project and the conceptual building elevations are shown in **Figure 2-5**. The conceptual landscape plan is shown on **Figure 2-6**.

Vista Cove Planned Development Project

Conceptual Landscape Plan

This page intentionally left blank

2.2.1 Rezoning

To facilitate development of the project as proposed, the project site would be rezoned as PD. As outlined in Chapter 16.209 of the City of Vallejo Municipal Code, the PD zone allows for one or more properties to be developed under a plan that would:

- Provide opportunities for coordinated development;
- Ensure substantial compliance with and implement the land use and density policies of the General Plan and any applicable Specific Plan;
- Provide for efficient and cost-effective public facilities and services;
- Allow for creative and experimental approaches to land development projects that incorporate design features that are more sensitive to site conditions;
- Facilitate projects that provide greater amenities than would likely result from conventionally planned development; and
- Protect public health, safety, and general welfare without unduly inhibiting developers attempting to secure the advantages of modern large-scale site planning for residential, commercial, or industrial purposes.

2.2.2 Proposed Building Program

Approximately 10.39 acres of the proposed developed residential space would include 51 single-family residential units and associated improvements, including front and rear yards, front driveways, two-car garages, fencing, and landscaping. The residential component of the proposed project would have an overall density of 4.9 dwelling units per acre (du/ac).[6] The proposed residential units would front new internal private roadways. The residences would consist of four different floor plans, with three elevations for each floor plan. The proposed buildings would be two stories and would not exceed 35 feet in height. A consistent architectural style is proposed for the buildings, which would consist of a modern farmhouse design. A conceptual design is shown on **Figure 2-5**.

2.2.3 Proposed Open Space and Landscaping

The proposed project would include 9.74 acres of undisturbed open space that would consist of two parcels: Parcel A would be an approximately 8.36-acre parcel and Parcel B is approximately 1.38 acres (refer to **Figure 2-4**). These areas would be fenced and have signage installed to prevent trespassing. The open space area would only be accessible via private gates to facilitate maintenance activities. Specifically, future development is not allowed on the two parcels, which would remain undeveloped open space.

The project site would also include 3.55 acres of common open space that would include one bioretention area, walkways, a loop walk around a flexible use turf area, and a vista overlook for residents. The proposed landscape design includes drought-tolerant and native landscaping to transition between the proposed residential area and adjacent open space. Landscaping would

[6] 51 units/10.395 acres.

primarily consist of trees along the internal roadways and shrubs and groundcover along the internal roadways and between the residential units. Landscaping would also be arranged to screen views of I-780. Street trees would be planted in private yards and lighting would meet City Site Development Standards.[7]

A total of 69 trees would be removed, including 47 significant trees that are protected under the City's tree protection ordinance.[8] Trees would be replaced at a ratio of 3 new trees for every significant tree removed, for a total of 141 trees that would be planted. **Figure 2-6** depicts the overall conceptual landscape plan.

2.2.4 Proposed Access, Circulation, and Parking

As shown on **Figure 2-4**, vehicular access to the project site would be provided by one full-access residential street through an established community to the west of the intersection of Shady Lane and Wildflower Avenue. The proposed project would include private internal residential streets that would be 28 feet wide curb to curb, with parking on one side as well as a 4.5-foot attached sidewalk. The project would also include private alleys, which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting onto them. Private alleys would include a 33-foot public utility easement/planting easement and a 10-foot travel way in each direction, with no parking allowed. The proposed project would provide 102 covered garage spaces (2 per unit), 102 driveway stalls (2 per unit), 24 on-street stalls, and 1 mailbox parking stall, for a total of 229 parking spaces.

2.2.5 Utilities and Infrastructure

The project site is located in an urban area that is currently served by existing utilities, including water, sanitary sewer, storm drainage, electricity, gas, and telecommunications infrastructure. The infrastructure to be provided would be a combination of public and private systems. Existing and proposed utility connections are discussed below.

2.2.5.1 Water

Water service for the proposed project would be provided by the City of Vallejo. A new 8-inch water main line would connect to an existing 8-inch water main in Shady Lane at two locations, for a looped system. The water system would be designed and installed to City of Vallejo Water Department standards.

2.2.5.2 Wastewater

The Vallejo Flood and Wastewater District (VFWD) maintains existing sanitary sewer lines within the vicinity of the project site. A new 8-inch sewer lateral would connect to the existing 8-inch public sanitary sewer main line located in Shady Lane at the northwestern corner of the project site. The sanitary sewer would be designed and installed to VFWD standards. The project would also include

[7] Vallejo, City of. n.d.-f. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part V – Site Development Standards, Chapter 16.506 – Lighting and Glare.*

[8] Vallejo, City of. n.d.-g. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part V – Site Development Standards, Chapter 16.504 – Landscaping, Section 16.504.07 – Tree protection.*

the replacement of the existing sewer lift station that currently serves the 141 single-family home development to the west of the proposed project site with an upgraded system to serve both communities. The lift station would be owned and maintained by the VFWD.

2.2.5.3 Stormwater

Under existing conditions, the project site consists entirely of pervious surface area consisting primarily of grassland. There is no existing stormwater infrastructure on the project site; however, under existing conditions, the project site drains from west to east to Benicia State Park, where stormwater runoff converges and is directed to the Carquinez Strait.[9]

Upon construction of the proposed project, approximately 3.95 acres (19.6 percent) of the project site would be covered by impervious surfaces and approximately 16.18 acres (80.4 percent) would be covered by pervious surfaces, consisting of landscaped areas, undeveloped open space, and bioretention areas. The proposed project would include two detention basins and approximately 7,617 square feet of bioretention space, made up of two bioretention facilities located at the northwest corner of the site and the middle east border of the site that would collect drainage from the proposed on-site stormwater infrastructure and be used for stormwater control and treatment before discharging to an 18-inch storm drain pipe which outfalls to the existing marshland area adjacent to Benicia State Park. The storm drain system would be designed and installed to VFWD standards.

2.2.5.4 Electricity and Gas

Electricity and gas service is provided to the project site by Pacific Gas and Electric Company (PG&E). The proposed project would include connections to the existing electricity and natural gas lines that run adjacent to the project site along Shady Lane and Wildflower Avenue. Additionally, the proposed sewer lift station would be designed to have a standby diesel generator with an automatic transfer switch. The generator would be housed in a weatherproof enclosure and would provide backup power in case of an electrical outage.

2.2.6 Operations and Maintenance

Within the residential areas, the individual lots, open space, common open space areas, and water quality basin would be privately owned by a dedicated homeowners association (HOA). The streets that serve the residential lots would also be dedicated to the HOA for private ownership and maintenance. The other remaining 10 acres of open space would be privately owned, managed, and maintained by the HOA.

Utility infrastructure located within the private streets would be dedicated and maintained by the City/VFWD, while infrastructure within the private alleys/paseos would be owned and maintained by the HOA.

[9] DK Engineering. 2023. *Drainage Study for Vista Cove in Vallejo, California.* May 3.

2.2.7 Grading and Construction

The proposed project would not require any demolition activities, as the site is currently undeveloped. It is anticipated that 58,700 cubic yards of soil would be cut and 59,300 cubic yards would be used for fill, resulting in a total soil import of 600 cubic yards. A total of 10.3 acres of soil would be disturbed during construction activities and excavation depths would reach up to 24 feet below the ground surface to accommodate foundations and utility infrastructure. Grading would be completed consistent with the City of Vallejo's Hillside Development Standards.[10] Cut and fill would be constructed with rounded corners to eliminate sharp angles of slopes at the contour intersections. Contour grading would also be utilized to create rounded, undulating slopes between street levels and building pads, and in transition areas from natural slopes to graded slopes. Slope gradients would vary, where feasible, to produce a more natural appearance. Construction of the proposed project is anticipated to begin in June 2026 and would occur over an approximately 1-year period.

2.3 PREVIOUS CEQA APPROVALS

The City of Vallejo General Plan 2040[11] was adopted by the City of Vallejo City Council on August 29, 2017, while the General Plan 2040 and Sonoma Boulevard Specific Plan Draft Environmental Impact Report (General Plan EIR) was certified on August 29, 2017 (SCH number 2014112035). The proposed project is consistent with the development density established by existing zoning and policies contained in the General Plan EIR.

This Initial Study has been prepared for the proposed project pursuant to the rules for supplemental environmental review under Public Resources Code (PRC) Section 21166 and *State CEQA Guidelines* Section 15162. Section 15162 states that "no subsequent EIR shall be prepared for that project unless the lead agency determines … one or more of the following:

1. Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
2. Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
3. New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or negative declaration was adopted, shows any of the following:
    a. The project will have one or more significant effects not discussed in the previous EIR or negative declaration;

[10] Vallejo, City of. n.d.-h. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part II – Districts and Development, Chapter 16.212 – Hillside Development Standards.*

[11] City of Vallejo. 2017. *Propel Vallejo General Plan 2040*. August 29. Amendments through July 24, 2018.

b. Significant effects previously examined will be substantially more severe than shown in the previous EIR;

c. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or

d. Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative."

This Initial Study analyzes whether development of the proposed project would result in any new or substantially more severe significant environmental impacts than those analyzed in the prior California Environmental Quality Act (CEQA) document and the reasons for the City's conclusion that the project and associated environmental effects do not meet the conditions described in CEQA Guidelines Section 15162 requiring preparation of a subsequent EIR.

2.4 PERMITS AND APPROVALS

A number of permits and approvals would be required to allow development of the proposed project. As Lead Agency for consideration of the proposed project, the City of Vallejo would be responsible for the majority of the approvals required for project development. Other agencies also may have some authority related the proposed project and its approvals. A list of required permits and approvals, including the discretionary actions described above, which may be required by the City and other agencies, is provided in **Table 2.A**.

Table 2.A: Potential Permits and Approvals

Lead Agency	Permits/Approvals
City of Vallejo	• Zoning Amendment to Planned Development • Environmental Review Permit • Development Review • Design Review • Landscape Review • Tentative Map Approval • EIR Certification • Adoption of Findings and potential Statement of Overriding Considerations • Use Permit • Zoning Compliance Review
Other Agencies	
City of Vallejo Fire Department	• Review/approve fire truck access and site fire flow design
City of Vallejo Water District	• Connection to water system • Connection to wastewater system • Approval of water improvements and connection permits
City of Vallejo Building Division	• Issuance of building permits for new home construction
PG&E	• Connection of electricity service • Approval of electric improvements and connection permits

3.0 ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist in Chapter 3.0.

☐ Aesthetics	☐ Agriculture and Forestry Resources	☐ Air Quality
☐ Biological Resources	☐ Cultural Resources	☐ Energy
☐ Geology/Soils	☐ Greenhouse Gas Emissions	☐ Hazards & Hazardous Materials
☐ Hydrology/Water Quality	☐ Land Use/Planning	☐ Mineral Resources
☐ Noise	☐ Population/Housing	☐ Public Services
☐ Recreation	☐ Transportation	☐ Tribal Cultural Resources
☐ Utilities/Service Systems	☐ Wildfire	☐ Mandatory Findings of Significance

3.1 DETERMINATION

On the basis of this initial evaluation:

☐ I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

☒ I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A SUBSEQUENT MITIGATED NEGATIVE DECLARATION will be prepared.

☐ I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

☐ I find that the proposed project MAY have a "Potentially Significant Impact" or "Potentially Significant Unless Mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

☒ I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier ENVIRONMENTAL IMPACT REPORT or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

4.1 AESTHETICS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Except as provided in Public Resources Code Section 21099, would the project:					
a. Have a substantial adverse effect on a scenic vista?	☐	☐	☒	☐	☒
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway	☐	☐	☐	☒	☒
c. In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	☐	☐	☒	☐	☒
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	☐	☐	☒	☐	☒

4.1.1 Prior Environmental Analysis

Chapter 4.1 of the General Plan EIR analyzed potential impacts to aesthetics with build out of the City's General Plan, and determined that either no impact or less than significant impacts would occur due to existing regulatory requirements included in the Vallejo Municipal Code and General Plan policies and actions. No mitigation measures were prescribed. However, the General Plan includes the following goals, policies, and actions related to aesthetics which would be applicable to the proposed project:

- **Policy NBE-1.5: Scenic Vistas**: Protect and improve scenic vistas, including views from Interstate 80 and State Route 37 in Vallejo.

- **Policy NBE-2.3: Inviting, Compatible Design:** Promote attractive development that is compatible with surrounding uses.

    - **Action NBE-2.3A**: Continue to utilize development approval conditions to achieve compatibility between nearby uses and scale and style of buildings, and to establish limitations on activities that could create potential adverse effects.

- **Policy NBE-3.13: Neighborhood Character:** Preserve the character of existing single-family residential neighborhoods.

- **Action NBE-3.13B:** Continue to allow a mix of housing types along the interconnected linear street grid that contributes to the charm and walkability of Vallejo's central residential neighborhoods, where appropriate.

- **Policy NBE-3.14: Neighborhood Corridors:** Connect the community with mixed use corridors that function as neighborhood main streets for adjacent residential areas.

4.1.2 Background

The project site is located at the northeast corner of Shady Lane and Wildflower Avenue in the southeastern portion of Vallejo in Solano County, California. The areas surrounding the project site consist of a mix of land uses, including residential, recreational, and public and semi-public uses. Local access to the project site is provided by Shady Lane and Wildflower Avenue which border the site immediately to the southwest. Circulation in the surrounding area is provided by one-lane roadways.

4.1.2.1 Existing Visual Character of the Project Site

The project site consists of undulating hills and flat areas, with elevations ranging from approximately 70 feet above mean sea level (amsl) in low lying areas along the eastern portion of the project site up to approximately 290 feet amsl along the southwestern boundary of the project site. The southern portion of the site is generally lower in elevation and increases in elevation towards the west. The vacant project site is covered primarily with non-native annual grassland and scattered mature trees. There are 83 mature trees on the project site. The project site also includes one intermittent stream, connected to a seasonal wetland located in a low-lying area in the middle of the project site, and one linear freshwater marsh.[12] Representative photos of the project site are shown in **Figure 4.1-1**.

Because the project site is vacant and undeveloped, there are no existing sources of light and glare on the project site. Existing sources of light and glare in the project vicinity are typical of residential areas and include vehicle headlights on nearby roadways, streetlights in the nearby vicinity, and residential exterior and interior lighting. Lighting from existing distant development within Vallejo also contributes to the background lighting in the project vicinity.

4.1.2.2 Visual Character of the Surrounding Area

The project area is characterized by urban development with some open space and recreational uses in the nearby vicinity. Representative photos of the surrounding area are shown in **Figure 4.1-2**. The project site is bordered to the north by I-780 and vacant land that is zoned for Public and Semi Public uses. Farther north is a variety of public and semi public uses, including a California Highway Patrol Office and Saint Patrick Saint Vincent Catholic High School, and single- and multi-family residential uses. The project site is bordered immediately to the east by vacant, undeveloped land zoned for resource conservation and the Benicia State Park. Farther east are

This page intentionally left blank

commercial uses and single- and multi-family residential uses. The project site is bordered immediately to the south by vacant undeveloped land owned by the City and zoned for parks, recreation and open space and resource conservation. Farther south are single-family residential uses and Glen Cove Elementary School, which is approximately 0.4 mile southwest of the project site. The project site is bordered immediately to the west by a 141-unit single-family residential subdivision. Farther west are commercial uses and single-family residential uses. Light-sensitive uses near the project site include the residential uses to the west.

According to the California Scenic Highway Mapping System, there are no California Department of Transportation (Caltrans) designated scenic highways in proximity to the project site.[13]

There are no officially designated scenic vistas in Vallejo; however, the General Plan recognizes the waterfront, hillside and mountain areas, and natural areas surrounding the city as important scenic views in the city. These views include San Pablo Bay, Mare Island Strait, the Vallejo waterfront, Sulphur Springs Mountain, Vaca Mountains, White Slough, Napa River Wetlands, and Sky Valley. In order to preserve these scenic views, the City established residential view district zoning regulations for some residential neighborhoods located on the hills in Vallejo. Additionally, the Solano County General Plan recognizes "agricultural landscapes, the delta and marshlands, and the oak and grass covered hills" as valuable scenic vistas.

The project site is located approximately 0.85 mile northwest of the Carquinez Strait. The Carquinez Strait is partially visible to the southeast from the project site and surrounding areas. Undeveloped hillside and mountain areas are also visible to the northeast and south from the project site and surrounding areas. Additionally, the Benicia State Park is located approximately 0.3 mile southeast of the project site.

4.1.2.3 Views from the Project Site

Views from within the project site to surrounding areas are variable due to the topography and varying elevation at the project site. From some portions of the project site, views are largely obstructed due to existing off-site development, topography, and mature trees, while expansive views of the surrounding area are available from other portions of the project site with higher elevations.

- **Views to the North:** Foreground views to the north primarily consists of undeveloped vegetated areas, I-780, and the public and semi-public and residential uses north of I-780. Middle-ground views to the north primarily consist of surrounding hillsides that are partially undeveloped and partially developed with residential uses.

- **Views to the East:** Foreground views to the east primarily consist of undeveloped vegetated areas, the Benicia State Recreation Area, and I-780. Middle-ground views to the east primarily consist of the Benicia State Recreation Area and surrounding hillsides that are partially

[13] California Department of Transportation (Caltrans). n.d. California Scenic Highway Mapping System. Website: https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa (accessed March 5, 2025).

undeveloped and partially developed with residential uses. Mount Diablo is visible in background views to the southeast.

- **Views to the South:** Foreground views to the south primarily consist of undeveloped vegetated areas. Middle-ground views to the southeast include the Benicia State Recreation Area and the Carquinez Strait, while middle-ground views to the south/southwest include undeveloped vegetated hillside and residential development. Background views to the south include undeveloped hillsides south of the Carquinez Strait.

- **Views to the West**: Foreground views to the west primarily consist of undeveloped vegetated areas and residential development. Middle-ground and background views are not largely available to the west due to dense residential development and surrounding topography.

4.1.2.4 Views of the Project Site

As previously discussed, the project site is made up of undulating hills and flat areas covered primarily with non-native annual grassland and scattered mature trees. Therefore, views of the project site are consistent from each orientation due to the uniform nature of the site. Views of the project site from areas that do not immediately border the site are generally limited due to the developed nature of areas immediately surrounding the project site, including existing mature trees and the topography of the surrounding area.

There are no significant visual resources present on the project site and the project site is not located within the residential view district as defined by Chapter 16.213 of the Vallejo Municipal Code (VMC).[14] While the project site includes undeveloped hills, the project site is not largely visible from surrounding areas due to intervening topography, existing development, and mature trees. Based on the General Plan the project site is not considered a scenic vista or important scenic view within the city.[15]

4.1.3 Impact Analysis

a. Would the project have a substantial effect on a scenic vista? ***(Less than Significant Impact, No New Impact)***

Development projects have the potential to impact scenic vistas in two ways: (1) a development could physically alter a designated scenic resource (e.g., disturb or develop upon a ridgeline, hillside, or other designated scenic resource), or (2) could block a view corridor or "vista" of the scenic resource from public view. Important factors in determining whether a project would block scenic vistas include the project's proposed height, mass, and location relative to surrounding land uses and travel corridors. These potential effects are discussed below.

[14] City of Vallejo. n.d. Zoning Map. Website: https://www.arcgis.com/apps/View/index.html?appid=7638bbc2a29d4c4387366372429f6daa&extent=-122.3063,38.0807,-122.2239,38.1134 (accessed June 12, 2025).

[15] City of Vallejo. 2017. *Propel Vallejo General Plan 2040*. August 29.

Alter Scenic Vistas. The area surrounding the project site is characterized by urban development with some open space and recreational uses in the nearby vicinity. The project site is located approximately 0.85 mile northwest of the Carquinez Strait. The Carquinez Strait is partially visible to the southeast from the project site and surrounding areas. Undeveloped hillside and mountain areas are visible to the northeast and south from the project site and surrounding areas. The Benicia State Recreation Area is located approximately 0.3 mile southeast of the project site. However, none of these features are identified as a scenic vista or significant visual resource in the City's General Plan. San Pablo Bay, Mare Island Strait, the Vallejo Waterfront, Sulphur Springs Mountain, Vaca Mountains, White Slough, Napa River Wetlands, and Sky Valley, the resources designated as scenic vistas, are not visible from the project site or nearby vicinity. These features are located over two miles from the project site and views of these resources are obstructed by intervening development, topography, and mature trees. The project site and surrounding areas are not located within the residential view district and would not impact scenic vistas of designated views; therefore, no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR. **Block Views of Scenic Resources.** The proposed residential project at the northeast corner of Shady Lane and Wildflower Avenue lies within a well-established, lower-density residential neighborhood of southeastern Vallejo. Per the Vallejo General Plan, while the city does not identify *official* scenic view corridors, it recognizes valued vistas toward features like the hillsides, San Pablo Bay, the Napa River wetlands, and Sulphur Springs and Vaca Mountains However. The project site is shielded from such views by existing nearby housing, mature tree canopy, and naturally varied topography, meaning it is not largely visible from public vantage points tied to recognized scenic resources. The proposed two-story, modern farmhouse style homes, that would be approximately at 35 feet in height, match the prevailing scale and massing of residences to the west. While development of this previously vacant parcel would alter its current visual character, there are no high-quality scenic vistas presently visible from the site or immediate surroundings, and it does not block or degrade landscapes noted in the General Plan. Accordingly, the project would not result in a substantial adverse effect on views of scenic vistas, and no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway? ***(No impact, No New Impact)***

There are no officially listed or eligible State Scenic Highways in the vicinity of the project site.[16] The nearest eligible State Scenic Highway in Vallejo is a portion of State Route 37 (SR-37) that is located approximately 4.7 miles northwest of the project site. The nearest officially designated State highway is a portion of State Route 24 (SR-24) that is located approximately 13 miles south of the project site. Due to distance, topography, and intervening development, no portion of the project site or surrounding area is visible from the eligible portion of SR-37 or the officially designated portion of SR-24. Therefore, the proposed project would not substantially damage scenic resources,

[16] California Department of Transportation (Caltrans). n.d. California Scenic Highway Mapping System. Website: https://caltrans.maps.arcgis.com/apps/webappviewer/index.html?id=465dfd3d807c46cc8e8057116f1aacaa (accessed March 5, 2025).

including but not limited to trees, rock outcroppings, and historic buildings within a State Scenic Highway, and no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. In non-urbanized areas, would the project substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality? ***(Less than Significant Impact, No New Impact)***

The City of Vallejo General Plan 2040 designates the project site as Mix of Housing Types (R-MH) and Primarily Single Family (R-SF), as shown in **Figure 2-3** in Section 2.0, Project Description. Permitted land uses within the R-MH and R-SF designation are similar and include single-family homes. In addition, the land use designations allow duplexes, triplexes, fourplexes, smaller scale apartment buildings, and small commercial spaces; and public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre, and the density in the R-SF designation is nine dwelling units per acre; however, in single-family areas where accessory dwelling units are allowed, the maximum permitted residential density is 12 dwelling units per acre.

The project site is zoned Residential Medium Density (RMD) and Residential Low Density (RLD). The RMD Zoning District allows a mix of housing types, including attached and detached structures, and small apartment buildings. Development in these zones is subject to density limits (up to 25 dwelling units per acre) and design and development standards to ensure land use compatibility. The district also allows mixed-use development with residential and small commercial spaces, a variety of neighborhood supportive services, public and educational facilities, open spaces and community facilities. In undeveloped areas of the city, it is the intent of this district to encourage the creation of multi-unit residential neighborhoods with a variety of housing types.

The RLD Zoning District applies to low-density residential areas in which permanent single unit residences, including detached and attached (duplexes and townhouses) units are the primary use. This district also allows other residential types including cottages and bungalows around courts, small neighborhood serving retail, a variety of neighborhood supportive services, public and educational facilities, open spaces and community facilities. The maximum permitted residential density is nine dwelling units per acre, excluding accessory dwelling units.[17]

General Plan. The City of Vallejo General Plan guides future growth and development in the city. The R-MH and R-SF General Plan land use designations are similar and allows single-family homes. The land use designations also allows duplexes, triplexes, fourplexes, smaller scale apartment buildings, and small commercial spaces; and public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. The maximum

[17] City of Vallejo. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part II – Districts and Development, Chapter 16.202 – Residential Districts.*

permitted residential density in the R-MH designation is 25 dwelling units per acre, and nine dwelling units per acre in the R-SF designation. In single-family areas where accessory dwelling units are allowed, the maximum permitted residential density is 12 dwelling units per acre. The proposed project would develop approximately 10 acres of the project site with 51 residential units, resulting an overall density of 4.9 dwelling units per acre, which meets the residential density standard for both the R-MH and R-SF designations.The following General Plan policies and action statements related to aesthetics and scenic quality would apply to the proposed project:

- **Policy NBE-2.3: Inviting, Compatible Design:** Promote attractive development that is compatible with surrounding uses.
    - **Action NBE-2.3A**: Continue to utilize development approval conditions to achieve compatibility between nearby uses and scale and style of buildings, and to establish limitations on activities that could create potential adverse effects.

The proposed project proposes a consistent architectural style of a modern farmhouse design. The proposed project would be required to undergo Development Review and Design Review consistent with Sections 16.604 and 16.605 of the VMC, which would provide for the review of the physical improvements to the project site, to ensure compatibility and compliance with City requirements. With the approval of a Development Permit, the proposed project would be consistent with the General Plan land use designation. Therefore, the proposed project would be consistent with the City's General Plan as it relates to aesthetics and scenic quality, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Zoning Code. Title 16 (Zoning Ordinance) of the VMC is the primary tool that shapes the form and character of physical development in Vallejo. The Zoning Ordinance contains all the Zoning Districts, and identifies land use standards, site development regulations, and other general provisions that ensure consistency between the General Plan and proposed development projects. The PD District is established to encourage the arrangement of a compatible variety of uses on suitable lands in such a manner that the resulting development will be in accord with the policies of the VMC Chapter 16.209 to provide flexibility by allowing diversification in regulations such as building relationships, setbacks, height limitations, lot sizes, types of structures, parking and the amount and location of open space[18]. As outlined in Chapter 16.209 of the VMC, the PD zone allows for one or more properties to be developed under a plan that would: Provide opportunities for coordinated development;

- Ensure substantial compliance with and implement the land use and density policies of the General Plan and any applicable Specific Plan;

- Provide for efficient and cost-effective public facilities and services;

[18] City of Vallejo. *Vallejo, California – Municipal Code*, Title 16 – Zoning, Part II – Districts and Development Types, Chapter 16.209 – Planned Development District.

- Allow for creative and experimental approaches to land development projects that incorporate design features that are more sensitive to site conditions;

- Facilitate projects that provide greater amenities than would likely result from conventionally planned development; and

- Protect public health, safety, and general welfare without unduly inhibiting developers attempting to secure the advantages of modern large-scale site planning for residential, commercial, or industrial purposes.

The project site is 20.13 acres and, as discussed above, the proposed development would be consistent with the existing General Plan land use designations and would not exceed the allowable densities associated with the R-MH and R-SF designations. Minimum lot area, yard requirements, building heights, and other physical development standards would be as prescribed by the PD Plan, outlined in Chapter 3.0, Project Description. The proposed project would be consistent with the development regulations of the PD Zoning District. The project is subject to Development Review and Design Review as required by VMC Sections 16.604 and 16.605. These procedures are mandatory for new construction and ensure that all proposed physical improvements to the site—including building orientation, architectural design, grading, landscaping, and lighting—are evaluated for consistency with the City's zoning regulations, design objectives, and adopted plans.

Pursuant to VMC Section 16.604.02, Design Review evaluates projects for compatibility with adjacent development in terms of scale, massing, materials, and overall visual character, as well as conformance with the City's adopted design guidelines. Approval of the project through these processes is required prior to the issuance of any building permits. The proposed project must comply with all applicable standards and any conditions of approval imposed during the review process. As the proposed project would require building permits, a use permit, Landscape Review, and Tentative Map Approval, it would neither substantially degrade the visual character of the project site nor conflict with applicable zoning and other regulations governing scenic quality. The proposed project would have a less than significant impact related to conflicts with applicable zoning and other regulations governing scenic quality. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project create a new source of substantial light or glare which would adversely affect day or nighttime views in the area? ***(Less than Significant Impact, No New Impact)***

Because the project site is vacant and undeveloped, there are no existing sources of light and glare on the project site. Existing sources of light and glare in the project vicinity are typical of residential areas and include vehicle headlights on nearby roadways, streetlights in the nearby vicinity, and residential exterior and interior lighting. Lighting from existing distant development within Vallejo also contributes to the background lighting in the project vicinity. Potential impacts to light and glare during construction and operation of the proposed project are discussed separately below.

Construction. Construction activities would occur only between the hours of 7:00 a.m. and 6:00 p.m. Any construction-related illumination during evening and nighttime hours would be used for safety

and security purposes only, would be downlit to minimize light spillage onto adjacent properties, and would occur only for the duration required for the temporary construction process. Because any necessary night lighting resulting from construction activities would be minimal, would not spill onto adjacent properties, and would be temporary, it would not substantially impact sensitive uses, substantially alter the character of surrounding uses, or interfere with the performance of off-site activities. Construction activities associated with the proposed project would not introduce flat or highly reflective surfaces capable of producing significant solar glare. While limited glare may occur from sunlight reflecting off construction equipment and vehicle windshields, such effects would not result in adverse visibility impacts for the following reasons: (1) construction activity would involve a relatively small number of vehicles and equipment—estimated at no more than nine units during peak building phases—and (2) the construction site would be enclosed with fencing and temporary screening that would substantially limit public visibility from adjacent roadways and pedestrian areas. Furthermore, construction operations would be restricted to daytime hours, and no artificial lighting or vehicle activity would occur during nighttime periods that could contribute to glare or light spill. As such, construction of the proposed project would not introduce a new or substantial source of light or glare that would adversely affect daytime or nighttime views. Impacts related to construction-period light and glare would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Operation. Project lighting would be required to comply with Section 16.506 of the VMC, which requires that lighting be confined to the project site and that adjacent properties are protected from glare. The proposed project would include streetlights and exterior wall-mounted light fixtures on the residences that would be dark-sky compliant and aimed away from neighbors to avoid light trespass.[19] All project lighting would be hooded or shielded to focus the light downward and prevent light spillage onto adjacent properties. All new lighting would comply with applicable regulations of the 2019 State Building Energy Efficiency Standards (Title 24). Because the project site is vacant and undeveloped, there are no existing sources of light and glare on the project site. Existing sources of light and glare in the project vicinity are typical of residential areas and include vehicle headlights on nearby roadways, streetlights in the nearby vicinity, and residential exterior and interior lighting. Lighting from existing distant development within Vallejo also contributes to the background lighting in the project vicinity. Therefore, sources of light and glare associated with the proposed project would be consistent with the existing surrounding uses during both daytime and nighttime hours.

The proposed building materials (e.g., stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, wood, and glass) and uses of these materials are typical of those found in the surrounding areas and are not anticipated to create unusual or isolated glare effects that would affect daytime visibility or views in the project vicinity. The proposed structures would not include large or expansive areas of glass, polished metal, or other reflective surfaces and therefore, are not anticipated to collectively generate significant amounts of glare onto adjacent properties.

Overall, sources of light and glare associated with the proposed project would be consistent with the existing surrounding uses during both the daytime and nighttime hours. Furthermore,

[19] Sancerra. 2024. *Vista Cove Planned Development, Vallejo, California*. May.

compliance with the applicable lighting standards set forth in Section 16.506 of the VMC and General Plan and adherence to Title 24 requirements would ensure that the proposed project would not create a new source of substantial light or glare that would adversely affect day or nighttime views in the area. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.2 AGRICULTURE AND FORESTRY RESOURCES

In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment Project; and the forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	☐	☐	☐	☒	☒
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?	☐	☐	☐	☒	☒
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))?	☐	☐	☐	☒	☒
d. Result in the loss of forest land or conversion of forest land to non-forest use?	☐	☐	☐	☒	☒
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	☐	☐	☐	☒	☒

4.2.1 Prior Environmental Analysis

The topic of agriculture and forestry resources was discussed in Chapter 6.0 of the General Plan EIR, which determined that no impact to agriculture or forestry resources with build out of the General Plan would occur because there are minimal farmland and forest land areas located within the city and future development would generally occur in previously urbanized areas that are not designated as farmland or forest land. No mitigation measures were prescribed. There are no General Plan goals, policies, or actions related to agriculture and forestry resources which would be applicable to the proposed project.

4.2.2 Background

The project site consists of undeveloped grassland with scattered mature trees with no existing development or improvements. No agricultural uses are located within or adjacent to the project site. The project site is classified as "Grazing Land" and "Urban and Built-Up Land" by the DOC.[20] The project site is currently zoned Residential Medium Density (RMD) and Residential Low Density (RLD) on the City Zoning Map and would be rezoned to Planned Development (PD), none of which are intended for agricultural uses. The project site is not subject to a Williamson Act contract.

4.2.3 Impact Analysis

a. Would the project convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use? ***(No Impact, No New Impact)***

The project site consists of undeveloped grassland with scattered mature trees with no existing development or improvements. No agricultural uses are located within or adjacent to the project site. Further, the project site is classified as "Grazing Land" and "Urban and Built-Up Land" by the DOC.[21] Therefore, the site is not classified as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (collectively known as "Important Farmland"). As such, the proposed project would not result in the conversion of Important Farmland to another use. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project conflict with existing zoning for agricultural use, or a Williamson Act contract? ***(No Impact, No New Impact)***

The project site is currently zoned Residential Medium Density (RMD) and Residential Low Density (RLD) on the City Zoning Map and would be rezoned to Planned Development (PD), none of which are intended for agricultural uses. The project site is not subject to a Williamson Act contract. Therefore, development of the proposed project would not conflict with existing zoning for agricultural use, or a Williamson Act contract. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code Section 12220(g)), timberland (as defined by Public Resources Code Section 4526), or timberland zoned Timberland Production (as defined by Government Code Section 51104(g))? ***(No Impact, No New Impact)***

The project site is currently zoned RMD and RLD on the City's Zoning Map and would be rezoned to PD. No parcels adjacent to or near the project site are zoned for forest land, timberland, or

[20] California Department of Conservation (DOC). 2018. Division of Land Use Resource Protection. California Important Farmland Finder. Website: maps.conservation.ca.gov/dlrp/ciff (accessed February 28, 2025).

[21] Ibid.

timberland production. The proposed project would not conflict with existing zoning for, or cause rezoning of, forest land or timberland. As such, no new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project result in the loss of forest land or conversion of forestland to non-forest use? ***(No Impact, No New Impact)***

The project site consists primarily of undeveloped grassland with scattered mature trees. There is no forestland on site, and no parcels adjacent to or near the project site are zoned for forest land, timberland, or timberland production. As such, the proposed project would not result in the loss of forest land or conversion of forest land to nonforest uses. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use? ***(No Impact, No New Impact)***

Please refer to Sections 4.2.a. and 4.2.c. The project site is located within an urbanized area in Vallejo and would not result in the conversion of farmland to nonagricultural uses or forest land to nonforest uses. The proposed project would also not result in the conversion of forestry resources to nonforest uses. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.3 AIR QUALITY

Where available, the significance criteria established by the applicable air quality management district or air pollution control district may be relied upon to make the following determinations.

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Conflict with or obstruct implementation of the applicable air quality plan?	☐	☒	☐	☐	☒
b. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non- attainment under an applicable federal or state ambient air quality standard?	☐	☒	☐	☐	☒
c. Expose sensitive receptors to substantial pollutant concentrations?	☐	☒	☐	☐	☒
d. Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	☐	☐	☒	☐	☒

4.3.1 Prior Environmental Analysis

Chapter 4.2 of the General EIR analyzed potential impacts related to air quality. The General Plan EIR determined that implementation of the General Plan would reduce vehicle miles traveled (VMT) per population and VMT per service population and would not conflict with the control measures identified in the Bay Area Air District's (Air District) 2010 Clean Air Plan[22]. In addition, the General Plan EIR found that build out of the General Plan would have the potential to exceed regional significance thresholds during construction and operation activities and prescribed **Mitigation Measures AQ-2a, AQ-2b.1, and AQ-2b.2**. **General Plan EIR Mitigation Measures AQ-2a and AQ-2b.2** require a technical assessment evaluating potential operational and construction air quality impacts if a project exceeds the screening sizes in the Air District's CEQA Guidelines, and **General Plan EIR Mitigation Measure AQ-2b.1** requires compliance with the current Air District basic control measures for reducing construction-related fugitive dust emissions. However, the General Plan EIR found that construction and operational emissions would be significant and unavoidable.

In addition, the General Plan EIR concluded that implementation of the General Plan could expose sensitive receptors to substantial concentrations of air pollutants and, therefore, identified **Mitigation Measures AQ-3a and AQ-3b** to reduce these impacts. **General Plan EIR Mitigation Measure AQ-3a** requires preparation of a health risk assessment (HRA) for non-residential land uses that would generate 100 or more diesel truck trips per day or have 40 or more trucks with operating diesel-powered refrigeration units within 1,000 feet of a residential receptor. As such, **General Plan EIR Mitigation Measure AQ-3b** requires that residential and other sensitive land uses within 1,000 feet of a major source of toxic air contaminants (TACs) prepare an HRA. **General Plan EIR**

[22] Bay Area Air Quality Management District. 2010. *Bay Area 2010 Clean Air Plan*. September 15. Website: https://www.baaqmd.gov/~/media/files/planning-and-research/plans/2010-clean-air-plan/cap-volume-i-appendices.pdf (accessed September 2025).

Mitigation Measures AQ-3a and AQ-3b would not be applicable to the proposed project as they apply to non-residential land uses or land uses within 1,000 feet of a major source of TACs. The General Plan EIR found that even with implementation of these mitigation measures, impacts to sensitive receptors would be significant and unavoidable. In addition, the General Plan EIR determined that build out of the General Plan would not create objectionable odors that could affect a substantial number of people.

Additionally, the General Plan includes the following goals, policies, and actions related to air quality which would be applicable to the proposed project:

- **Policy CP1.12: Clean Air**: Protect the community from harmful levels of air pollution.
    - **Action CP-1.12C**: Provide information regarding advances in air-quality protection measures to schools, homeowners, and operators of "sensitive receptors" such as senior and child care facilities.
    - **Action CP-1.12D**: Periodically review and update City regulations to comply with changes in State law and Air District Guidelines pertaining to coal or wood-burning devices.
    - **Action CP-1.12E**: Periodically review the Building Code for consistency with the latest California Green Building Standards Code, and assess the need for updates to require new construction and remodels to employ best practices and materials to reduce emissions, both during and after construction.

4.3.2 Background

The project site is within the jurisdiction of the Air District, which regulates air quality in the San Francisco Bay Area. Air quality conditions in the San Francisco Bay Area have improved significantly since the Air District was created in 1955. Ambient concentrations of air pollutants and the number of days during which the region exceeds air quality standards have fallen substantially. In Vallejo, and the rest of the air basin, exceedances of air quality standards occur primarily during meteorological conditions conducive to high pollution levels, such as cold, windless winter nights or hot, sunny summer afternoons.

Within the Air District, ambient air quality standards for ozone, carbon monoxide (CO), nitrogen dioxide (NO_2), sulfur dioxide (SO_2), particulate matter (particulate matter less than 10 microns in size [PM_{10}], and particulate matter less than 2.5 microns in size [$PM_{2.5}$]), and lead (Pb) have been set by both the State of California and the federal government. The State has also set standards for sulfate and visibility. The Air District is under State non-attainment status for ozone and particulate matter (both PM_{10} and $PM_{2.5}$) standards. The Air District is classified as non-attainment for the federal ozone 8-hour standard and non-attainment for the federal $PM_{2.5}$ 24-hour standard.

4.3.3 Impact Analysis

a. Would the project conflict with or obstruct implementation of the applicable air quality plan? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

The applicable air quality plan is the Air District's 2017 Clean Air Plan (Clean Air Plan),[23] which was adopted on April 19, 2017. The Clean Air Plan is a comprehensive plan to improve Bay Area air quality and protect public health. The Clean Air Plan defines control strategies to reduce emissions and ambient concentrations of air pollutants; safeguard public health by reducing exposure to air pollutants that pose the greatest health risk, with an emphasis on protecting the communities most heavily affected by air pollution; and reduce GHG emissions to protect the climate. Consistency with the Clean Air Plan can be determined if the project: (1) supports the goals of the Clean Air Plan; (2) includes applicable control measures from the Clean Air Plan; and (3) would not disrupt or hinder implementation of any control measures from the Clean Air Plan.

Clean Air Plan Goals. The primary goals of the 2017 Clean Air Plan are to attain air quality standards, reduce population exposure and protect public health in the Bay Area, and reduce GHG emissions and protect climate.

The Air District has established significance thresholds for project construction and operational impacts at a level at which the cumulative impact of exceeding these thresholds would have an adverse impact on the region's attainment of air quality standards. The health and hazards thresholds were established to help protect public health.

As discussed below, implementation of the proposed project would result in less than significant operation-period emissions and, with implementation of **General Plan EIR Mitigation Measure AQ-2b.1**, as detailed under Criterion AIR-2, the project would result in less than significant construction-period emissions. Per **General Plan EIR Mitigation Measure AQ-2b.1**, the project must implement Basic Best Management Practices (BMPs) throughout all phases of construction. Measures include watering exposed surfaces, covering haul trucks, limiting vehicle speeds on unpaved roads, using wet power sweepers, and suspending work during high winds. Additional requirements involve paving surfaces promptly, washing vehicles before site exit, stabilizing unpaved access roads, and posting contact information for dust complaints. Therefore, the project would not conflict with the Clean Air Plan goals.

In addition, the project site was identified as a housing opportunity site in the General Plan EIR. As discussed in Section2.0, Project Description, the General Plan designates the project site as R-MH and R-SF. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre and nine dwelling units per acre in the R-SF designation; however, in single-family areas where accessory dwelling units are allowed, maximum permitted residential density is 12 dwelling units per acre. To facilitate development of the project as proposed, the project site would be rezoned as PD and would result in 51 new residential units. As such, the proposed project would introduce fewer residential uses and a lower density than previously assumed in the General Plan

[23] Bay Area Air Quality Management District (Air District). 2017. *Clean Air Plan*. April 19.

EIR; therefore, the proposed project would not result in new impacts or substantially more severe significant impacts when compared to those analyzed in the General Plan EIR.

Clean Air Plan Control Measures. The control strategies of the 2017 Clean Air Plan include measures in the following categories: Stationary Source Measures, Transportation Measures, Energy Measures, Building Measures, Agriculture Measures, Natural and Working Lands Measures, Waste Management Measures, Water Measures, and Super-GHG Pollutants Measures, which are discussed in more detail below.

- **Stationary Source Control Measures:**The Stationary Source Control Measures, which are designed to reduce emissions from stationary sources such as metal melting facilities, cement kilns, refineries, and glass furnaces, are incorporated into rules adopted by the Air District and then enforced by the Air District's Permit and Inspection programs. Since the project would not include any stationary sources, the Stationary Source Control Measures of the Clean Air Plan are not applicable to the project.

- **Transportation Control Measures:**The Air District identifies Transportation Control Measures as part of the Clean Air Plan to decrease emissions of criteria pollutants, TACs, and GHGs by reducing demand for motor vehicle travel, promoting efficient vehicles and transit service, decarbonizing transportation fuels, and electrifying motor vehicles and equipment. The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10.39 acres would be developed, while the remaining acreage would be undeveloped and open space. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding residential, recreational, and public and semi-public uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation. As such, the proposed project would not conflict with the Air District's initiatives to increase the use of alternative means of transportation.

- **Energy Control Measures:**The Clean Air Plan also includes Energy Control Measures, which are designed to reduce emissions of criteria air pollutants, TACs, and GHGs by decreasing the amount of electricity consumed in the Bay Area, as well as by decreasing the carbon intensity of the electricity used by switching to less GHG-intensive fuel sources for electricity generation. The proposed project would comply with current California Energy Code and California Green Building Standards Code (CALGreen Code) standards regarding energy conservation and green building standards. As such, the proposed project would not conflict with the Energy Control Measures of the Clean Air Plan.

- **Building Control Measures:**The Air District has authority to regulate emissions from certain sources in buildings such as boilers and water heaters but has limited authority to regulate the

buildings themselves. Therefore, the strategies in the control measures for this sector focus on working with local governments that do have authority over local building codes to facilitate the adoption of best GHG control practices and policies. As identified above, the proposed project would be required to comply with current Energy Code and CALGreen Code standards. Therefore, the proposed project would not conflict with the Building Control Measures of the Clean Air Plan.

- **Agriculture Control Measures:**The Agriculture Control Measures are designed to primarily reduce emissions of CH_4. Because the project does not include any agricultural activities, the Agriculture Control Measures of the Clean Air Plan are not applicable to the proposed project.

- **Natural and Working Lands Control Measures:**The Natural and Working Lands Control Measures focus on increasing carbon sequestration on rangelands and wetlands, as well as encouraging local governments to enact ordinances that promote urban-tree plantings. Because the project does not include the disturbance of any rangelands or wetlands, the Natural and Working Lands Control Measures of the Clean Air Plan are not applicable to the proposed project.

- **Waste Management Control Measures:**The Waste Management Control Measures focus on reducing or capturing CH_4 emissions from landfills and composting facilities, diverting organic materials away from landfills, and increasing waste diversion rates through efforts to reduce, reuse, and recycle. Future occupants of the project would be subject to compliance with local requirements for waste management (e.g., recycling and composting services). Therefore, the project would be consistent with the Waste Management Control Measures of the Clean Air Plan.

- **Water Control Measures:**The Water Control Measures focus on reducing emissions of criteria pollutants, TACs, and GHGs by encouraging water conservation, limiting GHG emissions from publicly owned treatment works (POTWs), and promoting the use of biogas recovery systems. Because the proposed project would be required to comply with the latest CALGreen Code standards, which includes a variety of different measures, including reduction of wastewater and water use, the proposed project would not conflict with the Water Control Measures.

- **Super-GHG Control Measures:**The Super-GHG Control Measures are designed to facilitate the adoption of best GHG control practices and policies through the Air District and local government agencies. Because these measures do not apply to individual projects, the Super-GHG Control Measures are not applicable to the proposed project.

Clean Air Plan Implementation. As discussed above, the proposed project would generally implement the applicable measures outlined in the Clean Air Plan, including Transportation Control Measures; therefore, the project would not disrupt or hinder implementation of a control measure from the Clean Air Plan, and this impact would be **less than significant**.

In addition, as demonstrated below, construction and operation of the proposed project would not result in the generation of criteria air pollutants that would exceed the Air District's thresholds of significance. As discussed below, **General Plan EIR Mitigation Measure AQ-2b.1** would be required

to ensure the proposed project implements the Air District's Basic BMPs throughout all phases of construction. Measures include watering exposed surfaces, covering haul trucks, limiting vehicle speeds on unpaved roads, using wet power sweepers, and suspending work during high winds. Additional requirements involve paving surfaces promptly, washing vehicles before site exit, stabilizing unpaved access roads, and posting contact information for dust complaints. Implementation of **General Plan EIR Mitigation Measure AQ-2b.1** would further ensure that the proposed project would not disrupt or hinder implementation of a control measure from the Clean Air Plan. Therefore, this impact would be less than significant, and no new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

The Air District is currently designated as a nonattainment area for State and federal ozone standards and federal particulate matter ambient air quality standards. The Air District's nonattainment status is attributed to the region's development history. Past, present, and future development projects contribute to the region's adverse air quality impacts on a cumulative basis. By its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to, by itself, result in nonattainment of ambient air quality standards. Instead, a project's individual emissions contribute to existing cumulatively significant adverse air quality impacts. If a project's contribution to the cumulative impact is considerable, then the project's impact on air quality would be considered significant.

In developing thresholds of significance for air pollutants, the Air District considered the emissions levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts to the region's existing air quality conditions. The following analysis assesses the potential construction- and operation-related air quality impacts and CO impacts of the proposed project.

Construction Emissions. During construction, short-term degradation of air quality may occur due to the release of particulate matter emissions (i.e., fugitive dust) generated by grading, hauling, and other activities. Emissions from construction equipment are also anticipated and would include CO, NO_X (nitrogen oxides), ROGs (reactive organic gases), directly emitted particulate matter ($PM_{2.5}$ and PM_{10}), and TACs.

Site preparation and project construction would involve grading, paving, and other activities. Construction-related effects on air quality from the proposed project would be greatest during the site preparation phase due to the disturbance of soils. If not properly controlled, these activities would temporarily generate particulate emissions. Sources of fugitive dust would include disturbed soils at the construction site. Unless properly controlled, vehicles leaving the site would deposit dirt and mud on local streets, which could be an additional source of airborne dust after it dries. PM_{10} emissions would vary from day to day, depending on the nature and magnitude of construction activity and local weather conditions. PM_{10} emissions would depend on soil moisture, silt content of

soil, wind speed, and the amount of operating equipment. Larger dust particles would settle near the source, while fine particles would be dispersed over greater distances from the construction site.

Water or other soil stabilizers can be used to control dust, resulting in emission reductions of 50 percent or more. The Air District requires the implementation of the Basic Best Management Practices for Construction-Related Fugitive Dust Emissions (Basic BMPs). With the implementation of these Basic BMPs, fugitive dust emissions from construction activities would not result in adverse air quality impacts.

In addition to dust-related PM_{10} emissions, heavy trucks and construction equipment powered by gasoline and diesel engines would generate CO, SO_2, NO_X, ROGs, and some soot particulate ($PM_{2.5}$ and PM_{10}) in exhaust emissions. If construction activities were to increase traffic congestion in the area, CO and other emissions from traffic would increase slightly while those vehicles are delayed. These emissions would be temporary and limited to the immediate area surrounding the construction site.

Construction emissions were estimated for the project using CalEEMod, consistent with the Air District's recommendations. The CalEEMod modeling evaluated construction of the proposed project based on construction initiation in June 2026 and would occur over an approximately 1-year period. Project grading would result in approximately 58,700 cubic yards of soil cut and 59,300 cubic yards for fill, resulting in a total soil import of 600 cubic yards. This analysis utilizes the default construction equipment list and assumes use of Tier 2 construction equipment. All other construction details are not yet known; therefore, default assumptions (e.g., construction worker and truck trips and fleet activities) from CalEEMod were used. Construction-related emissions are presented in **Table 4.3.A**. CalEEMod output sheets are included in **Appendix A**.

Table 4.3.A: Project Construction Emissions

Project Construction	Average Daily Pollutant Emissions (pounds per day)					
	ROG	NO_X	Exhaust PM_{10}	Fugitive Dust PM_{10}	Exhaust $PM_{2.5}$	Fugitive Dust $PM_{2.5}$
2026	0.3	8.6	0.3	0.4	0.3	0.2
2027	4.0	4.6	0.2	<0.1	0.2	<0.1
Maximum Average Daily Emissions	**4.0**	**8.4**	**0.3**	**0.4**	**0.3**	**0.2**
Air District Thresholds	54.0	54.0	82.0	BMPs	54.0	BMPs
Exceeds Threshold?	**No**	**No**	**No**	**No**	**No**	**No**

Source: Compiled by LSA (April 2025).
Air District = Bay Area Air District
BMPs = best management practices
NO_X = nitrogen oxides
PM_{10} = particulate matter less than 10 microns in diameter
$PM_{2.5}$ = particulate matter less than 2.5 microns in diameter
ROGs = reactive organic gases

As shown in **Table 4.3.A**, construction emissions associated with the project would be less than significant for ROG, NO_X, $PM_{2.5}$, and PM_{10} exhaust emissions. There are no adopted thresholds for

fugitive dust ($PM_{2.5}$ and PM_{10}) emissions; however, as shown in **Table 4.3.A**, the Air District requires the implementation of Basic BMPs to ensure that impacts are reduced to a less than significant level with mitigation. In addition to the Air District regulations, the General Plan EIR identified **General Plan EIR Mitigation Measure AQ-2b.1**, which requires development projects to implement the Air District's current Basic BMPs. Measures include watering exposed surfaces, covering haul trucks, limiting vehicle speeds on unpaved roads, using wet power sweepers, and suspending work during high winds. Additional requirements involve paving surfaces promptly, washing vehicles before site exit, stabilizing unpaved access roads, and posting contact information for dust complaints. These measures would ensure that short-term impacts associated with the generation of particulate matter and fugitive dust would be reduced to the extent feasible and would ensure that this impact would be less than significant.

With implementation of **General Plan EIR Mitigation Measure AQ-2b.1**, construction of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in nonattainment under an applicable federal or State ambient air quality standard. With implementation of **General Plan EIR Mitigation Measure AQ-2b.1**, no new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR

Operational Emissions. Long-term air pollutant emission impacts are those associated with mobile sources (e.g., vehicle trips), energy sources (e.g., natural gas), area sources (e.g., architectural coatings and the use of landscape maintenance equipment), and stationary sources (e.g., backup generator) related to the proposed project.

Mobile source emissions include ROGs and NO_X emissions that contribute to the formation of ozone. Additionally, PM_{10} emissions result from running exhaust, tire and brake wear, and the entrainment of dust into the atmosphere from vehicles traveling on paved roadways.

Energy source emissions result from activities in buildings for which natural gas is used. The quantity of emissions is the product of usage intensity (i.e., the amount of natural gas) and the emission factor of the fuel source.

Typically, area source emissions consist of direct sources of air emissions located at the project site, including architectural coatings, consumer products, and the use of landscape maintenance equipment. In addition, stationary source emissions would be associated with use of the standby backup generator.

Emissions estimates for operation of the project were calculated using CalEEMod. Model results are shown in **Table 4.3.B**. Trip generation rates for the project were based on the project's trip generation estimates as identified in Section 4.17, Transportation and Traffic. Based on the trip generation estimates, the proposed project would generate approximately 481 average daily trips. In addition, the proposed project would have a standby diesel backup generator. Therefore, this analysis conservatively assumes that there would be a 500-horsepower diesel generator that would run up to 50 hours annually. Where project-specific data were not available, default assumptions (e.g., electricity usage, water usage, and solid waste generation) from CalEEMod were used to estimate project emissions.

Table 4.3.B: Project Operation Emissions

	ROGs	NO_X	PM_{10}	$PM_{2.5}$
Pounds Per Day				
Mobile Source Emissions	1.9	1.9	3.6	0.9
Area Source Emissions	2.6	<0.1	<0.1	<0.1
Energy Source Emissions	<0.1	0.4	<0.1	<0.1
Stationary Source Emissions	0.1	0.3	<0.1	<0.1
Total Emissions	**4.7**	**2.6**	**3.7**	**1.0**
Air District Thresholds	54.0	54.0	82.0	54.0
Exceed Threshold?	**No**	**No**	**No**	**No**
Tons Per Year				
Mobile Source Emissions	0.3	0.4	0.7	0.2
Area Source Emissions	0.5	<0.1	<0.1	<0.1
Energy Source Emissions	<0.1	0.1	<0.1	<0.1
Stationary Source Emissions	<0.1	0.1	<0.1	<0.1
Total Emissions	**0.9**	**0.5**	**0.7**	**0.1**
Air District Thresholds	10.0	10.0	15.0	10.0
Exceed Threshold?	**No**	**No**	**No**	**No**

Source: Compiled by LSA (March 2025).
Note: Some values may not add up due to rounding.
Air District = Bay Area Air District
NO_X = nitrogen oxides
PM_{10} = particulate matter less than 10 microns in size
$PM_{2.5}$ = particulate matter less than 2.5 microns in size
ROGs = reactive organic gases

The primary emissions associated with the project are regional in nature, meaning that air pollutants are rapidly dispersed on release or, in the case of vehicle emissions associated with the project, emissions are released in other areas of the Air Basin. The daily and annual emissions associated with project operational trip generation, energy, and area sources are identified in **Table 4.3.B** for ROGs, NO_X, PM_{10}, and $PM_{2.5}$.

The results shown in **Table 4.3.B** indicate the project would not exceed the significance criteria for daily or annual ROG, NO_X, PM_{10}, or $PM_{2.5}$ emissions. Therefore, operation of the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is nonattainment under applicable federal or State ambient air quality standards. Impacts would be **less than significant**. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Localized CO Impacts. Emissions and ambient concentrations of CO have decreased dramatically in the Bay Area with the introduction of the catalytic converter in 1975. No exceedances of the State or federal CO standards have been recorded at Bay Area monitoring stations since 1991. The Air District's 2022 CEQA Guidelines include recommended methodologies for quantifying concentrations of localized CO levels for proposed projects. A screening level analysis using guidance from the Air District's 2022 CEQA Guidelines was performed to determine the impacts of the project. The screening methodology provides a conservative indication of whether the implementation of a proposed project would result in significant CO emissions. According to the Air

District's 2022 CEQA Guidelines, a project would result in a less than significant impact to localized CO concentrations if the following screening criteria are met:

- The project is consistent with an applicable congestion management program established by the county congestion management agency for designated roads or highways and the regional transportation plan and local congestion management agency plans.
- Project traffic would not increase traffic volumes at affected intersections to more than 44,000 vehicles per hour (vph).
- The project would not increase traffic volumes at affected intersections to more than 24,000 vph where vertical and/or horizontal mixing is substantially limited (e.g., tunnel, parking garage, bridge underpass, natural or urban street canyon, or below-grade roadway).

Implementation of the proposed project would not conflict with the policies or programs of the Solano County Transportation Authority. As identified in Section 4.7, Transportation and Traffic, the proposed project would generate approximately 35 a.m. vehicle trips during the morning peak hour of travel and 48 p.m. vehicle trips during the evening peak hour of travel. As the project's contribution to peak-hour traffic volumes at intersections in the vicinity of the project site would be well below 44,000 vph, the proposed project would not result in localized CO concentrations that exceed State or federal standards, and project impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project expose sensitive receptors to substantial pollutant concentrations? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

Sensitive receptors are defined as residential uses, schools, daycare centers, nursing homes, and medical centers. Individuals particularly vulnerable to diesel particulate matter (DPM) are children, whose lung tissue is still developing, and the elderly, who may have serious health problems that can be aggravated by exposure to DPM. Exposure from diesel exhaust associated with construction activity contributes to both cancer and chronic non-cancer health risks.

According to the Air District, a project would result in a significant impact if it would individually expose sensitive receptors to TACs, resulting in an increased cancer risk greater than 10 in 1 million, increased non-cancer risk of greater than 1.0 on the Hazard Index (chronic or acute), or an annual average ambient $PM_{2.5}$ increase greater than 0.3 µg/m.[3]

The project site is in an urban area in proximity to existing single-family residential uses that could be exposed to diesel emissions exhaust during the construction period. Therefore, a construction HRA, which evaluates construction-period health risk to off-site receptors, was performed for construction of the proposed project. To estimate the potential cancer risk associated with construction activities from equipment exhaust (including DPM), a dispersion model was used to translate an emissions rate from the source location to a concentration at the receptor location of interest (i.e., a nearby residence and worksites). Dispersion modeling varies from a simpler, more conservative screening-level analysis to a more complex and refined detailed analysis.

For the purposes of an HRA, emissions are analyzed for acute health impacts, chronic, and carcinogenic health impacts. A multi-pathway assessment was conducted to evaluate the project's emissions during construction following the modeling techniques recommended in the California Environmental Protection Agency's (CalEPA) Office of Environmental Health Hazard Assessment (OEHHA) *Air Toxic Hot Spots Program Risk Assessment Guidelines*.[24] The analysis herein has been conducted in accordance with the Air District's requirements for HRAs.

The HRA analysis was conducted using three models: (1) CalEEMod to determine DPM emissions during project construction; (2) the USEPA AERMOD air dispersion model to determine how the TACs would move through the atmosphere; and (3) CARB's Hotspots Analysis and Reporting Program (HARP2) model to translate the pollutant concentrations from AERMOD into individual health risks at any sensitive receptor locations surrounding the project site.

The OEHHA has determined that long-term exposure to diesel exhaust particulates poses the highest cancer risk of any TAC it has evaluated. Exposure to diesel exhaust can also have immediate health effects. Diesel exhaust can irritate the eyes, nose, throat, and lungs, and it can cause coughs, headaches, lightheadedness, and nausea. In studies with human volunteers, DPM made people with allergies more susceptible to the materials to which they were allergic, such as dust and pollen. Exposure to DPM also causes inflammation in the lungs, which may aggravate chronic respiratory symptoms and increase the frequency or intensity of asthma attacks. For risk assessment procedures, the OEHHA specifies that the surrogate for whole diesel exhaust is DPM. The HRA analyses used PM_{10} emissions to represent DPM emissions, consistent with OEHHA guidance.

The conservative nature of this analysis is due primarily to the following factors:

- The CARB-adopted diesel exhaust unit risk factor (URF) of 300 in 1 million per micrograms per cubic meter ($\mu g/m^3$) is based on the upper 95th percentile of estimated risk for each of the epidemiological studies used to develop the URF. Therefore, the risk factor is representative of DPM.

- The exposure to DPM is assumed to be constant for the given period analyzed (i.e., 70 years). However, emissions from DPM are expected to substantially decrease in the future with the implementation of standard regulatory requirements and technological advancement to reduce DPM.

Table 4.3.C, below, identifies the results of the analysis. Model outputs and snapshots of the sources are provided in **Appendix B.**

[24] California Environmental Protection Agency (CalEPA) Office of Environmental Health Hazard Assessment (OEHHA). 2015. *Air Toxics Hot Spots Program Guidance Manual for Preparation of Health Risk Assessments*. March. Website: https://oehha.ca.gov/air/air-toxics-hot-spots (accessed March 2025).

Table 4.3.C: Unmitigated Inhalation Health Risks from Project Construction to Off-Site Receptors

	Carcinogenic Inhalation Health Risk in 1 Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual $PM_{2.5}$ Concentration ($\mu g/m^3$)
Residential Receptor MEI	67.99	0.059	0.000	0.29
Worker Receptor MEI	0.46	0.023	0.000	0.11
School Receptor MEI	2.90	0.028	0.000	0.14
Threshold	**10.0**	**1.0**	**1.0**	**0.30**
Exceed Threshold?	**Yes**	**No**	**No**	**No**

Source: Compiled by LSA (March 2025).
$\mu g/m^3$ = micrograms per cubic meter
MEI = maximally exposed individual
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in **Table 4.3.C**, the maximum cancer risk for the residential receptor maximally exposed individual (MEI) associated with project construction would be 67.99 in 1 million, which would exceed the Air District's cancer risk of 10 in 1 million and would result in a potentially significant impact without mitigation. The school receptor MEI and worker receptor MEI risk would be lower at 2.90 in 1 million and 0.46 in 1 million, respectively, which would also not exceed the Air District's cancer risk threshold. The chronic hazard index would be 0.059 for the residential receptor MEI, 0.028 for the school receptor MEI, and 0.023 for the worker receptor MEI, which are below the threshold of 1. In addition, the acute hazard index would be nominal (0), which would also not exceed the threshold of 1. The results of the analysis indicate that the $PM_{2.5}$ concentration would be 0.29 $\mu g/m^3$ for the residential receptor MEI, 0.14 $\mu g/m^3$ for the school receptor MEI, and 0.11 $\mu g/m^3$ for the worker receptor MEI, which also would not exceed the Air District's significance threshold of 0.3 $\mu g/m^3$. Therefore, implementation of **Project Specific Mitigation Measure AIR-1**, which would require the use of cleaner construction equipment, would be necessary to reduce substantial pollutant concentrations during project construction.

Project Specific Mitigation Measure AIR-1

Tier 4 Final Emissions Standards. During construction of the proposed project, the project contractor shall ensure all off-road, diesel-powered construction equipment of 50 horsepower or more used for the project construction meets, at a minimum, the California Air Resources Board Tier 4 Final emissions standards or the equivalent.

Table 4.3.D identifies the results of the analysis with implementation of **Project Specific Mitigation Measure AIR-1**.

Table 4.3.D: Mitigated Inhalation Health Risks from Project Construction to Off-Site Receptors

	Carcinogenic Inhalation Health Risk in 1 Million	Chronic Inhalation Hazard Index	Acute Inhalation Hazard Index	Annual PM2.5 Concentration (µg/m3)
Residential Receptor MEI	4.52	0.004	0.000	0.02
Worker Receptor MEI	0.03	0.002	0.000	0.01
School Receptor MEI	0.19	0.002	0.000	0.00
Threshold	**10.0**	**1.0**	**1.0**	**0.30**
Exceed Threshold?	**No**	**No**	**No**	**Exceed Threshold?**

Source: Compiled by LSA (March 2025).
$\mu g/m^3$ = micrograms per cubic meter
MEI = maximally exposed individual
$PM_{2.5}$ = particulate matter less than 2.5 microns in size

As shown in **Table 4.3.D**, the mitigated cancer risk at the residential receptor MEI would be 4.52 in 1 million, which would not exceed the Air District's cancer risk threshold of 10 in 1 million. Therefore, with implementation of **Project Specific Mitigation Measure AIR-1**, construction of the proposed project would not exceed Air District thresholds and would not expose nearby sensitive receptors to substantial pollutant concentrations.

Once the proposed project is constructed, it would not be a source of substantial emissions, and consequently, implementation of the proposed project would not result in new sources of TACs. Therefore, the project would not expose sensitive receptors to substantial levels of TACs, and this impact would be less than significant with mitigation. With implementation of **Project Specific Mitigation Measure AIR-1,** no new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people? ***(Less than Significant Impact, No New Impact)***

During project construction, some odors may be present due to diesel exhaust. However, these odors would be temporary and limited to the construction period. Once operational, the proposed project would not include any activities or operations that would generate objectionable odors and once operational, the project would not be a source of odors. Therefore, the proposed project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.4 BIOLOGICAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☒	☐	☐	☒
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☒	☐	☐	☒
c. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☒	☐	☐	☒
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	☐	☐	☒	☐	☒
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☒	☐	☐	☒
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	☒	☒

4.4.1 Prior Environmental Analysis

Chapter 4.3 of the General Plan EIR analyzed impacts to biological resources associated with build out of the General Plan, and determined that without the implementation of adequate identification, controls and restrictions, and requirements for compensatory mitigation, build out of the General Plan could have a substantial adverse effect on special-status species, sensitive natural communities, protected wetlands, and native resident or migratory wildlife corridors and native wildlife nursery sites. The General Plan EIR prescribed **Mitigation Measure BIO-1**, which requires a biological assessment for new development proposed on sites that are determined to have some potential to contain sensitive biological and wetland resources, CEQA environmental review, the avoidance of potential impacts on jurisdictional wetlands and other waters, the protection of the nests of raptors and other birds, and the protection of the remaining woodlands and native tree resources (including the replacement of removed trees). With implementation of **General Plan EIR Mitigation Measure BIO-1**, impacts on biological resources were considered reduced to less than

significant. Additionally, the General Plan includes the following goals, policies, and actions related to biological resources which would be applicable to the proposed project:

- **Policy NBE-1.1: Natural Resources.** Protect and enhance hillsides, waterways, wetlands, occurrences of special-status species and sensitive natural communities, and aquatic and important wildlife habitat through land use decisions that avoid and mitigate potential environmental impacts on these resources to the extent feasible.
    - **Action NBE-1.1B:** Continue to participate in the implementation of regional habitat conservation and restoration programs, including the Solano Multispecies Habitat Conservation Plan and Natural Community Conservation Plan, and wetland restoration occurring in the Napa/Sonoma Marshes.
- **Policy NBE-1.2: Sensitive Resources.** Ensure that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, and wetlands are avoided and mitigated to the greatest extent feasible as development takes place.
    - **Action NBE-1.2D:** Protect the remaining woodlands and native tree resources, and require replacement plantings where native trees must be removed.
    - **Action NBE-1.3B:** Work with landowners to facilitate assembly and retention of parcels of sufficient size to preserve valuable tidal marshes, seasonal marshes, managed wetlands and contiguous grassland areas for the protection of aquatic and wildlife habitat.
- **Policy NBE-1.6: Open Space.** Conserve and enhance natural open space areas in and adjacent to Vallejo and its waterfront.
- **Policy NBE-1.7: Green Infrastructure.** Encourage the installation of green infrastructure, including tools such as permeable pavement, rain gardens, constructed wetlands, grassy swales, rain barrels and cisterns, and green roofs, to treat stormwater, attenuate floods, increase groundwater recharge, and reduce urban heat islands.

4.4.2 Background

This section summarizes the literature review, records search, and field investigation that were completed to inform the existing conditions on the site related to biological resources and describes the existing biological resources environment of the project site and its vicinity including site soils and topography, climate, hydrology, land use, and plant and animal species and communities that have potential to occur. The analysis of potential impacts to biological resources is based on the site-specific Biological Resources Impact Analysis[25] and Arborist Report[26] completed for the proposed project by WRA. Additionally, peer reviews of the Biological Resources Technical Report[27] and

[25] WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

[26] WRA, Inc. 2023. *Sancerra Vista Cove Development Project – Arborist Tree Survey and Report*. February 22.

[27] LSA Associates, Inc. (LSA). 2025. *Third-Party Review of Biological Resources Report for the Vista Cove Project in Vallejo, California.* March 17.

Arborist Report[28] were completed by LSA to determine whether the reports comply with CEQA and conform to accepted methodologies and procedures (industry standards). Peer reviews included one round of review and the submission of findings to the City detailing areas requiring modification. All reports related to Biological Resources are included in **Appendix C** of this Initial Study.

4.4.2.1 Literature Review and Records Search

Prior to conducting the field investigation for the biological resources impact analysis, a literature review and records search were conducted to assess the potential for sensitive biological communities and special-status species to occur on or within the vicinity of the project site, including the following:

- Soil Survey of Solano County, California[29]
- Benicia 7.5-minute United States Geological Survey (USGS) quadrangle
- Contemporary aerial photographs[30]
- Nationwide Environmental Title Research
- National Wetlands Inventory (NWI)
- California Aquatic Resources Inventory
- California Natural Diversity Database (CNDDB)
- California Native Plant Society (CNPS) Inventory
- Consortium of California Herbaria
- United States Fish and Wildlife Service (USFWS) List of Federal Endangered and Threatened Species
- eBird Online Database
- California Bird Species of Special Concern in California[31]
- California Amphibian and Reptile Species of Special Concern[32]

4.4.2.2 Habitat Assessment/Field Investigation

Following the literature review for the Biological Resources Impact Analysis, WRA biologists conducted field assessments on February 28 and July 14, 2022 to document the following: (1) land cover types (e.g., terrestrial communities, aquatic resources), (2) existing conditions and to determine if suitable habitat is provided for any special-status plant or wildlife species, (3) the presence of aquatic natural communities (e.g., wetlands), and (4) if special-status species are present.

The Arborist Report was prepared based on an arborist survey performed on October 12, 2022, which was conducted by WRA's International Society of Arboriculture (ISA)-Certified Arborist and Tree Risk Assessment Qualified arborist for the purpose of documenting all trees with a diameter at breast height (DBH) greater than 6 inches within the project site outside of the riparian area. Relevant information was recorded for each surveyed tree, including: tree number, species, trunk DBH, max drip, condition rating, health rating, structure rating, health, and comments. Surveyed trees were recorded using sub-meter accuracy global positioning system (GPS) devices and trees were tagged with aluminum tree tags with a unique identifying number.

4.4.2.3 Site Soils and Topography

Undulating hills with flat areas, with elevations ranging from approximately 97 to 180 feet above sea level, characterize the project site topography. According to the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) *Web Soil Survey*, the project site is underlain by Dibble-Los Osos clay loams, including three soil mapping units: 2 to 9 percent slopes, 9 to 30 percent slopes, and 30 to 50 percent slopes. The Dibble-Los Osos Clay Loam series consists of moderately deep, well drained soils that formed in material weathered from shale, sandstone and semi consolidated densic material. The soil pH ranges from 5.6 to 7.3, resulting in neutral to acidic soils. Dibble soils are on foothills and fan remnants and have slopes of 2 to 75 percent. These soils are not considered hydric.

[34] Holland, R.F. 1986. *Preliminary descriptions of the terrestrial natural communities of California*. State of California, The Resources Agency, Department of Fish and Game, Sacramento, CA.

4.4.2.4 Climate

The average monthly maximum temperature in the area is 68.6 degrees Fahrenheit, while the average monthly minimum temperature is 49.3 degrees Fahrenheit. Predominantly, precipitation falls as rainfall between November and March with an annual average precipitation of 17.7 inches.

4.4.2.5 Hydrology

The regional watershed for the project site is San Francisco Bay (Hydrologic Unit Code [HUC] 6: 180500) between the San Pablo Bay (HUC 8:18050002) and Suisun Bay (HUC 8: 18050001) watersheds. The project site is located in the central portions of the Suisun/San Pablo Bay watersheds. Two streams are mapped on the project site according to the National Wetland Inventory (NWI). However, there are no mapped blue line streams[35] on the project site according to the Benicia 7.5 minute quadrangle.

The stream features shown in the NWI start at the edge of the residential properties to the west of the project site and run east towards the marsh located in the Benicia State Recreation Area, and eventually, the Southampton Bay within the Carquinez Strait (0.9 mile south of the project site). The northern aquatic feature is a topographical low intermittent stream[36] that appears to have started conveying water and supporting riparian vegetation after the adjacent housing development was constructed in the 1980s and the stormwater basin directed runoff to this area. The southern aquatic feature within the project site is a historical drainage that coveys water from the hillside to the adjacent marsh southeast of the project site; however, additional stormwater and other runoff is directed into this feature. Both aquatic features receive runoff from the neighboring properties via culverts. Although NWI classifies the southern feature as a stream, due to wetland vegetation growing in the channel, it was classified as a freshwater marsh, which is considered a sensitive land cover type.

4.4.2.6 Land Use

The majority of the project site is dominated by non-native annual grassland. One intermittent stream, connected to a seasonal wetland, and one linear freshwater marsh are located on the project site. The area was used for agriculture as early as 1948 and was left as open space following the construction of the neighboring community to the west of the project site, in the early 1980s.

4.4.2.7 Vegetation Communities and Other Land Cover

The project site primarily includes the following vegetation communities: riparian, toyon chaparral, coyote brush scrub, poison oak scrub, artichoke thistle field, and non-native grassland. Additionally,

35 A blue-line stream is a body of concentrated flowing water in a natural low are or natural channel on the land surface and may be any creek, stream or other flowing water feature, perennial or ephemeral, indicated on USGS quadrangle maps, with the exception of man-made watercourses.

36 A topographical low is a low-lying area on the Earth's surface, typically represented by contour lines forming concentric circles on a topographic map which indicate that the elevation decreases towards the center of the depression.

the site supports aquatic resources identified as intermittent stream, seasonal wetland, and freshwater marsh.

Toyon Chaparral. Toyon chaparral is mapped in the central/southern portion of the project site on the steep slope above and adjacent to the freshwater marsh. It is characterized by open to dense shrub canopy dominated by toyon (*Heteromeles arbutifolia*) with occasional coyote brush (*Baccharis pilularis*) and poison oak (*Toxicodendron diversilobum*). This land cover type meets the membership rules for holly leaf cherry – toyon – greenbark ceonothus chaparral (*Prunus ilicifolia –Heteromeles arbutifolia – Ceanothus spinosus* Shrubland Alliance). Interstitial areas are dominated by non-native annual grasses such as wild oat (*Avena* sp.) and purple false brome (*Brachypodium distachyon*). Occasional small coast live oak trees are present at low cover. Although the general holly leaf cherry – toyon – greenbark ceonothus chaparral Alliance is not considered sensitive by the California Department of Fish and Wildlife (CDFW), the toyon – holly leaf cherry species association within that alliance is considered sensitive.

Coyote Brush Scrub. A small patch of coyote brush scrub was mapped in the northern portion of the project site. It is an open stand of shrubs dominated by coyote brush and meets the membership rules for the coyote brush scrub (*Baccharis pilularis Shrubland Alliance*). The interstitial areas are dominated by wild oat, and no trees are present. Coyote brush scrub is not considered sensitive.

Poison Oak Scrub. Poison oak scrub was mapped near the top of the steep ridge in the southern portion of the project site. It is characterized by an open shrub canopy dominated by poison oak, with occasional toyon and coyote brush present. It meets the membership rules for the poison oak scrub (*Toxicodendron diversilobum Shrubland Alliance*). The interstitial areas are dominated by non-native herbs such as fennel (*Foeniculum vulgare*), wild oat, and purple false brome. Poison oak scrub is not considered sensitive.

Artichoke Thistle Field. The artichoke thistle field was mapped on the steep slope in the southernmost portion of the project site. The vegetation is herbaceous and dominated by artichoke thistle (*Cynara cardunculus* ssp. *flavescens*), with other non-native herbs between artichoke thistle plants, including wild oat, purple false brome, black mustard (*Brassica nigra*), Italian thistle (*Carduus pycnocephalus* ssp. *pycnocephalus*), and fennel. Trees and shrubs were typically absent. This land cover type meets the membership rules for the upland mustards or star-thistle fields (*Brassica nigra – Centaurea [solstitalis, melitensis]* Herbaceous Semi-natural Alliance). Artichoke thistle field is not considered sensitive.

Non-native Grassland. Non-native grassland is the most common land cover type within the project site, occurring on all slopes and aspects. Portions of this land cover type are periodically mowed, and in the far northern portion of the project site, a two-track dirt vehicle path is present. Vegetation is herbaceous and is typically characterized by dense wild oat (*Avena* spp.), with occasional shrubs, trees, and other herbs present at low cover. It intergrades with the coyote brush scrub, poison oak scrub, and artichoke thistle fields land cover types. This land cover type meets the member rules for the wild oats and annual brome grasslands (*Avena* spp. – *Bromus* spp. Herbaceous Semi-natural Alliance). Non-native grassland is not considered sensitive.

Intermittent Stream. Intermittent streams are linear features that exhibit indicators of an ordinary high-water mark (OHWM) and due to groundwater influence, flow for a duration longer than a precipitation event but are dry for a portion of the year. The intermittent stream within the project site is defined by a clear bed and bank and exhibits OHWM indicators such as scour and wrack. Trickles of water were observed in portions of the channel during the February 28, 2022, site visit. However, the channel was dry at the time of the July 14, 2022, site visit. The intermittent stream receives drainage from a concrete channel from the residential community upstream (to the west). It occurs on a steep slope, and the channel peters out when the topography flattens out and transitions into the seasonal wetland. The intermittent stream is considered sensitive and is potentially subject to CDFW, United States Army Corps of Engineers (USACE), and Regional Water Quality Control Board (RWQCB) jurisdiction.

Seasonal Wetland. Seasonal wetlands include areas which hold water for part of the year, typically during the rainy season (between October and March) and are dominated by hydrophytic vegetative cover. The seasonal wetland within the project site occurs in the northern portion of the project site, where the topography flattens out downslope of the intermittent stream. Surface water and saturation were observed in the seasonal wetland during the February 28, 2022, site visit. At the time of the July 14, 2022, site visit no surface water or saturation was observed. The wetland is dominated by bristlox-tongue (*Helminthotheca echioides*), harding grass (*Phalaris aquatica*), iris leaved rush (*Juncus xiphioides*), and bulrush (*Schoenoplectus americanus*). Himalayan blackberry and a small number of arroyo and red willows (*Salix lasiolepis*) occur at northern edge of the seasonal wetland. The wetland narrows substantially to an incised channel just outside of the eastern edge of the project site. The seasonal wetland is considered sensitive and is potentially subject to USACE and RWQCB jurisdiction.

Freshwater Marsh. Freshwater marshes are wetlands which hold water for long periods of time and are dominated by graminoids and other herbaceous plants. The marsh on-site is a linear wetland drainage confined by steep slopes located centrally within the project site. Inundation was observed during the February 28 and July 14, 2022, site visits, but the full duration of inundation is unknown. It is dominated by dense bulrush with occasional small patches of cattails (*Typha* sp.) and is bordered by non-native annual grassland and toyon chaparral. Surface water is shallow with a very slow flow throughout the bottom of the drainage. Although this feature receives some seasonal runoff from concrete drainage channels upslope, the primary hydrological source is a culvert that drains an unknown source and was flowing at the time of the February and July site visits. The source of this water could not be confirmed, but it does include stormwater and urban residential runoff from the residential development upslope. Freshwater marsh is considered sensitive and is potentially subject to USACE and RWQCB jurisdiction.

4.4.2.8 Tree Survey

A total of 83 trees were surveyed within the project site, of which 57 trees met the Significant Tree definition under the City's local ordinance. Four non-native tree species were identified during the survey, including: two strawberry trees (Arbutus 'Marina'), one apple tree (*Malus* sp.), three Monterey pines (*Pinus radiata*), and two cherry trees (*Prunus* sp.). Three native tree species were identified during the survey, including: one toyon (*Heteromeles arbutifolia*), 73 coast live oaks

(*Quercus agrifolia*), and one valley oak (*Quercus lobata*). The diameters of surveyed trees ranged from 6 to 43.2 inches.[37]

4.4.2.9 Special-Status Plants

Based on a review of the resource databases listed in Section 4.4.2.1, 65 special-status plant species were not observed on the project site. Special-status plant species were documented in the vicinity of the project site. The species documented in the greater vicinity have unlikely or no potential to occur on the project site for the following reasons:

- Hydrologic conditions (e.g., tidal, riverine) necessary to support the special-status plant species are not present within the project site.
- Edaphic (soil) conditions (e.g., serpentine) necessary to support the special-status plant species are not present within the project site.
- Unique pH conditions (e.g., alkaline soils) necessary to support the special-status plant species are not present within the project site.
- Associated natural communities (e.g., coastal habitats, tidal marsh, vernal pools) necessary to support the special-status plant species are not present within the project site.
- The project site is geographically isolated (e.g. below elevation) from the documented range of the special-status plant species.
- Land use history and contemporary management (e.g., nearby development and the spread of invasive species) has degraded the localized habitat necessary to support the special-status plant species.

4.4.2.10 Special-Status Wildlife

Based on a review of the resource databases listed in Section 4.4.2.1, 52 special-status wildlife species have been documented in the vicinity of the project site. Of the 52 special-status species known from the region, five species were determined to have a moderate or high potential to occur within the project site, including the following: White-tailed kite (*Elanus leucurus*), Northern harrier (*Circus hudsonius [cyaneus]*), Short-eared owl (*Asio flammeus*), Silver-haired bat (*Lasionycteris noctivagans*), and Hoary bat (*Lasiurus cinereus*). A description of the potential special-status wildlife at the project site including a description of the potential habitat within the project site is provided in **Table 4.4.A**, below. The remaining species are unlikely or have no potential to occur due to the following factors:

- The project site lacks suitable hostplants;
- The project site lacks suitable perennial aquatic habitat;

[37] WRA, Inc. 2023. *Sancerra Vista Cove Development Project – Arborist Tree Survey and Report*. February 22.

Table 4.4.A: Potential Special-Status Wildlife

Scientific Name	Common Name	Conservation Status	Potential Habitat in the Study Area
Elanus leucurus	White-tailed kite	California Department of Fish and Wildlife (CDFW) Fully Protected Species	**Present.** This species was observed foraging within the project site during the February 28, 2022, site visit. There is suitable nesting habitat in the form of large oak trees within the project site.
Circus hudsonius	Northern harrier	CDFW Species of Special Concern	**Moderate Potential**. Grasslands and scrublands within the project site may provide suitable nesting habitat for this species. This species has been observed in the local area.
Asio flammeus	Short-eared owl	CDFW Species of Special Concern	**Moderate Potential**. Grasslands and scrublands within the project site may provide suitable nesting habitat for this species. This species has been observed in the local area.
Lasionycteris noctivagans	Silver-haired bat	Western Bat Working Group – Medium Priority	**Moderate Potential**. Large oak trees within the project site provide suitable roosting habitat.
Lasiurus cinereus	Hoary bat	Western Bat Working Group – Medium Priority	**Moderate Potential**. Large oak trees within the project site provide suitable roosting habitat.

Source: *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California* (WRA 2024).

- The project site lacks suitable wetland habitat;
- The project site is outside of the currently documented or historical range of the species; or
- The project site is outside of the distribution range for known occurrences.

4.4.3 Impact Analysis

a. Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

Special-status species are defined as follows:

1. Species that are listed, formally proposed, or designated as candidates for listing as threatened or endangered under the federal Endangered Species Act or California Endangered Species Act.

2. Plant species assigned to California Rare Plant Ranks (CRPR) 1A, 1B, 2A, 2B, or 3.

3. Animal species designated as Species of Special Concern or Fully Protected Species by the California Department of Fish and Wildlife (CDFW).

4. Species that meet the definition of rare, threatened, or endangered under Section 15380 of the *State CEQA Guidelines*.

5. Species considered as a taxon of special concern by local agencies.

As discussed in Section 4.4.2.1, 65 special-status plant species have been documented in the vicinity of the project site; however, no special-status plant species were observed on site during the habitat assessments completed for the Biological Resources Report and the species documented in the greater vicinity have unlikely or no potential to occur on the project site. Therefore, the proposed project would result in no impacts to special-status plant species.

As discussed in Section 4.4.2.1, 52 special-status wildlife species have been documented in the vicinity of the project site. Of the 52 special-status species known from the region, five species were determined to have a moderate or high potential to occur within the project site, including the following: white-tailed kite (*Elanus leucurus*), northern harrier (*Circus hudsonius [cyaneus]*), short-eared owl (*Asio flammeus*), silver-haired bat (*Lasionycteris noctivagans*), and hoary bat (*Lasiurus cinereus*).

Construction activities associated with the proposed project could result in direct mortality of white-tailed kite, northern harrier, short-eared owl, and other native bird species nests, which would be considered a potentially significant impact. Impacts to active nests of this species and their eggs, chicks and young could occur during the removal of trees, vegetation, or other ground-disturbing activities. These activities could result in the direct removal or destruction of active nests, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in nest abandonment. To reduce potential impacts to white-tailed kite, northern harrier, short-eared owl, and native nesting birds to a less than significant level, **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** would be implemented, which require the completion of pre-construction bird surveys should construction activities occur during the nesting bird season.

Project Specific Mitigation Measure BIO-1a **Avoidance of Nesting Bird Season.** To avoid adverse effects to the active nests of special-status and other native bird species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur during the non-nesting season, between September 1 through January 31.

Project Specific Mitigation Measure BIO-1b **Pre-Construction Nesting Bird Surveys.** A pre-construction nest survey for white-tailed kite, northern harrier, short-eared owl, and other native bird species shall be conducted prior to initial ground disturbance, including tree removal or vegetation removal if it begins during the nesting bird season (defined as February 1 through August 31). If active nests (containing eggs, chicks or young) are discovered during these surveys, a qualified

biologist shall establish a species-specific no-work buffer around the active nest. Work may resume in the buffer after the nesting season ends, or a qualified biologist confirms the nest is inactive.

The removal of 69 trees from the northern half of the project site could result in direct mortality of silver-haired bat and hoary bat adults and maternity roosts, which would be considered a potentially significant impact. Impacts to active maternity roosts of this species and their pups could occur during the removal of trees, vegetation, or other ground-disturbing activities in proximity to roost sites. These activities could result in the direct removal or destruction of active roosts, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in roost abandonment. To reduce potential impacts to the silver-haired bat and hoary bat to a less than significant level, **Project Specific Mitigation Measures BIO-2a** and **BIO-2b** would be implemented, which require the completion of a bat roost assessment should construction activities occur during the maternity roost season.

Project Specific Mitigation Measure BIO-2a

Avoidance of Maternity Roosting Season. To avoid adverse effects to maternity roosts of special-status and other bat species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur outside the maternity roosting season, between September 1 through April 30. Large trees (diameter at breast height [DBH] > 24 inches) removed during this season (September 1–April 30) shall be cut using a two-phased system where branches and limbs are cut and left on the ground overnight prior to chipping or removal from the site.

Project Specific Mitigation Measure BIO-2b

Pre-Construction Roost Surveys. During the maternity roost season (May 1–August 31), at least 30 days prior to the removal of any large tree (DBH > 24 inches) a bat roost assessment shall be conducted by a qualified biologist to determine if potential roost habitat is present.

If no maternity roost habitat is present, trees shall be removed using a two-phased cut. Cut branches and limbs shall be left on the ground overnight prior to chipping or removal from the site.

If potential maternity roosting habitat is present, the qualified biologist shall conduct an emergence survey to determine if the roost is occupied or assume the roost is occupied and establish a no-work buffer. If an emergence survey is conducted

and does not detect bats, the tree may be removed with no further measures required to protect roosting bats. If roosting bats are detected, or the tree is assumed to be an active roost, the tree shall be given a 100-foot no work buffer and shall be avoided until after the maternity roosting season is complete. Once the maternal roosting season is complete, tree removal shall follow the two-phase approach for tree removal.

With implementation of **Project Specific Mitigation Measures BIO-1a, BIO-1b, BIO-2a, and BIO-2b**, the proposed project would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

As discussed in Section 4.4.2.7, the following sensitive natural communities characterize the project site: holly leaf cherry – toyon – greenbark ceonothus chaparral, which is located in the central/southern portion of the project site on the steep slope above and adjacent to the freshwater marsh; intermittent stream, which is located in the northern portion of the project site; seasonal wetland, which occurs in the northern portion of the project site where the topography flattens out downslope of the intermittent stream; and freshwater marsh, which is located in the central portion of the project site. The proposed project has been designed to avoid and minimize impacts to sensitive natural communities to the greatest extent feasible. The design plans account for total avoidance of the toyon chapparal land cover type, keeping the area south of the freshwater marsh as open space. Additionally, the project plans to avoid the intermittent stream, freshwater marsh, and riparian vegetation. However, the proposed project would convert 0.49 acre of the seasonal wetland into a stormwater basin on the project site. Although the stormwater basin would be vegetated and seasonally inundated, it would result in permanent loss of the seasonal wetland on the project site. This would be a potentially significant impact. To reduce potential impacts to the seasonal wetland, **Project Specific Mitigation Measure BIO-3a** would be implemented, which requires compensatory mitigation for permanent loss of the seasonal wetland.

Project Specific Mitigation Measure BIO-3a

Compensatory Mitigation for Loss of Seasonal Wetland. Compensatory mitigation for permanent loss of 0.49 acre of the seasonal wetland shall be required. Mitigation may be satisfied through purchase of mitigation bank credits from an approved mitigation bank, payment of in-lieu fees

to an approved public agency or conservation organization (e.g., local land trust), for implementation of compensatory mitigation projects, or via a permittee responsible mitigation involving creation, restoring, or enhancing analogous habitat. The ratio for acres of mitigation to acres impacted shall be 1:1.

Additionally, because of the proximity of the riparian and freshwater marsh land cover types to the construction footprint, the proposed project could result in increased sedimentation to the freshwater marsh or damage to roots of riparian trees due to soil disturbance and grading completed during construction of the proposed project. This would be a potentially significant impact. To reduce potential project specific impacts to the riparian and freshwater marsh and riparian trees to a less than significant level, **Project Specific Mitigation Measures**, **BIO-4a**, **BIO-4b**, and **BIO-4c** would be implemented during project construction which require installation of construction fencing or flagging to delineate the riparian and freshwater marsh boundaries, utilization of erosion control measures, and implementation of tree protection measures.

Project Specific Mitigation Measure BIO-4a

Construction Fencing. Prior to ground-disturbing activities, construction fencing or flagging shall be installed to delineate the riparian and freshwater marsh boundaries. The fencing will be checked regularly during construction activities to ensure that the fencing remains intact and functional, and that encroachment has not occurred into the sensitive habitat or boundary; any repairs to the fence or encroachment correction will be conducted immediately. At the end of the project all temporary flagging, fencing, or other materials would be removed from the work areas and vicinity of the channel.

Project Specific Mitigation Measure BIO-4b

Construction Best Management Practices. Erosion control measures would be utilized throughout all phases of the project where sediment runoff from construction may potentially enter nearby waters. Appropriate sediment and erosion control Best Management Practices (BMPs) (e.g., use of silt fencing and/or straw waddles around the perimeter of the construction zone) will be implemented during and following construction to minimize surface runoff originating from the project and thereby protect water quality of the freshwater marsh. Erosion control structures would be

monitored for effectiveness and would be repaired or replaced as needed.

i. Prior to construction, a Stormwater Pollution Prevention Plan (SWPPP) would be developed. The plan would include the implementation and maintenance of erosion control measures.

ii. Prior to construction, an Accidental Spill Prevention and Cleanup Plan would be prepared. This plan would include required spill control absorbent material, for use beneath stationary equipment, to be present on-site and available at all times.

iii. No fueling, cleaning, or maintenance of vehicles or equipment would take place within any areas where an accidental discharge may cause hazardous materials to enter waterways.

iv. Any equipment or vehicles used for the project would be checked and maintained daily to prevent leaks of fluids that could be deleterious to aquatic habitats.

v. All equipment would be cleaned before arriving on the site and before removal from the site to prevent spread of invasive plants.

vi. To avoid establishment of invasive, non-native plant species on or adjacent to the project area, the following measures will be implemented:

    a. Vegetation disturbances will be limited to those areas identified on construction plans and maps as slated for development or construction staging.

    b. Erosion and sediment control materials will be certified as weed-free.

vii. Staging and storage areas for equipment, materials, fuels, lubricants and solvents would be located outside of the stream channel banks and outside of nearby waters.

viii. Stationary equipment such as motors, pumps, and generators, located adjacent to aquatic features would be positioned over secondary containment sufficient to arrest a catastrophic failure.

ix. Stockpiles of excavated soil or other materials would be covered when not in active use (i.e. would not be used or moved for 72 hours). All trucks hauling soil, sand, and other loose materials would be covered.

Project Specific Mitigation Measure BIO-4c

Tree Protection Measures. In order to protect trees adjacent to the project area:

i. Trees not proposed for removal but adjacent to project activities shall have orange construction fencing installed at the dripline. This shall be known as the tree protection zone (TPZ).

ii. Work within the TPZ shall be minimized to the maximum extent feasible.

iii. If work must occur within the TPZ, the fence can be removed temporarily, the tree trunk shall be wrapped in a waddle, and the fence shall be placed back as soon as work is completed.

iv. All equipment and stockpiles must be in designated staging areas away from all TPZ.

v. All trees to be removed shall be felled away from any trees to be avoided.

vi. If trees not proposed for removal require pruning, pruning shall follow ANSI A300 standards or be performed by a certified arborist.

vii. If any roots are exposed from trees to be avoided, roots can be pruned up to the diameter of 2 inches and pruned at 90-degree angles. The roots shall be covered by a damp burlap sack or damp towel while exposed. **(LTS)**

With implementation of **Project Specific Mitigation Measures BIO-3a**, **BIO-4a**, **BIO-4b**, and **BIO-4c**, the proposed project would not have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

As discussed in Section 4.4.2.7, the project site contains the following riparian areas: intermittent stream, which is located in the northern portion of the project site; seasonal wetland, which occurs in the northern portion of the project site where the topography flattens out downslope of the intermittent stream; and freshwater marsh, which is located in the central portion of the project site. The proposed project is designed to avoid the freshwater marsh in the southern half of the project site and the intermittent stream within the project site. However, the proposed project would convert 0.49 acre of the seasonal wetland into a stormwater basin within the project site. Although the stormwater basin would be vegetated and seasonally inundated, it would result in permanent loss of the seasonal wetland within the project site. Additionally, because of the proximity of the riparian and freshwater marsh land cover types to the construction footprint, the proposed project could result in increased sedimentation to the freshwater marsh or damage to roots of riparian trees. This would be a potentially significant impact.

To reduce potential impacts to the seasonal wetland, riparian, and freshwater marsh to a less than significant level, **Project Specific Mitigation Measures BIO-3a**, **BIO-4a**, **BIO-4b**, and **BIO-4c** would be implemented, which require compensatory mitigation for permanent loss of the seasonal wetland, installation of construction fencing or flagging to delineate the riparian and freshwater marsh boundaries, utilization of erosion control measures, and implementation of tree protection measures. With implementation of **Project Specific Mitigation Measures BIO-3a**, **BIO-4a**, **BIO-4b**, and **BIO-4c** the proposed project would not have a substantial adverse effect on State or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? ***(Less Than Significant Impact, No New Impact)***

Wildlife movement includes migration (i.e., usually annual roundtrip), inter-population movement (i.e., long-term genetic flow), and small travel pathways (i.e., daily movement corridors within an animal's territory). While small travel pathways usually facilitate movement for daily home range activities such as foraging or escape from predators, they also provide connection between outlying

populations and the main corridor, permitting an increase in gene flow among populations. In the San Francisco Bay Area, landscape elements that facilitate local and/or regional wildlife movement include stream drainages, canyons, ridges, or other prominent natural or human-made landscape features.

Habitat linkages provide connections between larger habitat areas that are separated by development. Wildlife corridors are similar to linkages but provide specific opportunities for animals to disperse or migrate between areas. A corridor can be defined as a linear landscape feature of sufficient width to allow animal movement between two comparatively undisturbed habitat fragments. Adequate cover is essential for a corridor to function as a wildlife movement area. It is possible for a habitat corridor to be adequate for one species yet still inadequate for others. Wildlife corridors are features that allow for the dispersal, seasonal migration, breeding, and foraging of a variety of wildlife species. Additionally, open space can provide a buffer against both human disturbance and natural fluctuations in resources.

No native wildlife nursery sites are present within the project site, and the project site is not within a designated wildlife corridor.[38] Additionally, the project site does not function as a fisheries movement corridor as there are no streams or rivers within the project site capable of supporting fish.[39] The project site is located within a much larger tract of housing developments intersected with several highways and non-native grasslands in Solano County. The Benicia State Recreation Area is approximately 1,000 feet southeast of the project site; however, the project site does not provide connection to other tidal marsh habitats, nor does it contain such habitat. While common wildlife species presumably utilize the site to some degree for movement at a local scale, the project site itself does not provide corridor functions beyond connecting similar ruderal grassland parcels to surrounding areas. Therefore, the proposed project would not interfere with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites, and impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

Chapter 16.504.07 of the City of Vallejo Municipal Code requires a tree removal permit for impacts to existing mature trees located in non-residential zoning districts if they are over 24 inches in diameter measured six inches above natural grade. Protected trees may be removed with the permission of the City upon submittal of an arborist's report, which determines that the tree is in poor health and not likely to survive; if the trees constitute a high fire hazard or a threat to persons, structures, or property; or, if they impede public works projects. Trees to be removed must be shown on the landscaping and irrigation plan and detailed on a tree inventory chart.

38 WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

39 Ibid.

A total of 69 trees would be removed, including 47 significant trees that are protected under the City's tree protection ordinance.[40,41] In compliance with the City's Tree Protection Ordinance, the project applicant has prepared an arborist report,[42] would implement protection measures for trees to be retained, would pay required permit application fees, and would replace removed trees at a ratio of at least three new trees for every tree removed except for the fire-prone species identified in the City's Municipal Code. Trees would be replaced at a ratio of 3 new trees for every tree removed, for a total of 141 trees that would be planted.[43] The exact number of replacement trees required for mitigation of removed trees would be identified as part of the final landscape plan to be reviewed and approved by the City. Therefore, the proposed project would not conflict with the City's Tree Protection Ordinance.

Chapter 4, Nature and Built Environment, of the *Vallejo General Plan 2040* establishes goals, policies, and actions to protect natural resources within the city. Specifically, Policies NBE-1.1 and NBE-1.2 state:

> **Policy NBE-1.1.** Natural Resources. Protect and enhance hillsides, waterways, wetlands, occurrences of special-status species and sensitive natural communities, and aquatic and important wildlife habitat through land use decisions that avoid and mitigate potential environmental impacts on these resources to the extent feasible.
>
> **Policy NBE-1.2.** Sensitive Resources. Ensure that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, and wetlands are avoided and mitigated to the greatest extent feasible as development takes place.

As described above, trees on the project site could provide nesting and/or roosting habitat for protecting bird and bat species. Additionally, the proposed project would convert 0.49 acre of the seasonal wetland into a stormwater basin within the project site and construction activities could result in increased sedimentation to the freshwater marsh or damage to roots of riparian trees due to the proximity of the construction footprint to the riparian and freshwater marsh land cover types. These impacts could interfere with the local policies listed above protecting biological resources and is a potentially significant impact.

To reduce potential conflicts with local policies protecting biological resources, implementation of **Project Specific Mitigation Measures BIO-1a, BIO-1b, BIO-2a, BIO-2b, BIO-3a**, **BIO-4a**, **BIO-4b**, and **BIO-4c** would be required. These measures require the completion of pre-construction surveys should construction activities occur during the nesting bird season; the completion of a bat roost assessment should construction activities occur during the maternity roost season; compensatory mitigation for permanent loss of the seasonal wetland; installation of construction fencing or

40 WRA, Inc. 2023. *Sancerra Vista Cove Development Project – Arborist Tree Survey and Report*. February 22.
41 Vallejo, City of. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part V – Site Development Standards, Chapter 16.504 – Landscaping, Section 16.504.07 – Tree protection.*
42 WRA, Inc. 2023. *Sancerra Vista Cove Development Project – Arborist Tree Survey and Report*. February 22.
43 Ibid.

flagging to delineate the riparian and freshwater marsh boundaries; utilization of erosion control measures; and implementation of tree protection measures.

Compliance with the City's Tree Protection Ordinance and implementation of **Project Specific Mitigation Measures BIO-1a, BIO-1b, BIO-2a, BIO-2b, BIO-3a, BIO-4a, BIO-4b,** and **BIO-4c** would ensure that the proposed project would reduce all impacts on biological resources to a less than significant level and thus not conflict with any local policies or ordinances protecting biological resources, including General Plan Policies NBE-1.1 and NBE-1.2. This impact would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

f. Would the project conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? ***(No Impact, No New Impact)***

The project site is not located within the boundaries of any adopted Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other approved local, regional, or state habitat conservation plan. Although the Solano County HCP is currently in development, it does not identify individual, privately held properties such as the project site as habitat.[44] According to the Solano County HCP, the HCP is not planning to designate private properties as preserves; instead, it would focus on lands with conservation easements, existing mitigation banks, or publicly owned habitat. As such, the project would not conflict with the provisions of any adopted conservation plan. No new impacts or substantially more severe significant impacts would occur with implementation of the proposed project, compared to those analyzed in the General Plan EIR.

[44] WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

4.5 CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5?	☐	☐	☒	☐	☒
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	☐	☒	☐	☐	☒
c. Disturb any human remains, including those interred outside of formal cemeteries?	☐	☒	☐	☐	☒

4.5.1 Prior Environmental Analysis

Chapter 4.4 of the General Plan EIR analyzed impacts to cultural and paleontological resources associated with build out of the General Plan, and determined adverse changes could occur to the significance of archaeological and paleontological resources through future development due to the lack of specific implementing procedures. Therefore, the General Plan EIR prescribed **Mitigation Measures CULT-2 and CULT-3**, which details procedures in the event that archaeological or paleontological resources are encountered during future development. With implementation of **General Plan EIR Mitigation Measures CULT-2 and CULT-3**, impacts on cultural resources were considered reduced to less than significant. Additionally, the General Plan includes the following goals, policies, and actions related to cultural resources which would be applicable to the proposed project:

- **Policy NBE-1.9 Cultural Resources:** Protect and preserve archaeological, historic, and other cultural resources.
    - **Action NBE-1.9A:** Continue to require that land use activities comply with State requirements and follow best practices to ensure that cultural resources are not impacted and that appropriate agencies and technical experts are involved in the evaluation and protection of resources and sites.
    - **Action NBE-1.9B:** Maintain a dialogue with local Native American groups regarding sensitive cultural resources in Vallejo.

4.5.2 Background

The analysis of potential impacts to cultural resources is based on a site-specific cultural resources assessment prepared for the proposed project, prepared by LSA in March 2025, which is included in **Appendix D** of this Initial Study.[45] This assessment included a cultural resources records search, a

[45] LSA Associates, Inc. (LSA). 2025. *Cultural Resources Assessment, Vista Cove Development Project, Vallejo, Solano County, California.* March.

review of historic-period aerial imagery and maps, and a pedestrian archaeological survey of the project site.

An archaeological records search was conducted on September 6, 2024, at the Northwest Information Center (NWIC) at Sonoma State University. The NWIC is the official repository for cultural resources records for Solano County and maintains an extensive inventory of previously recorded archaeological sites and prior survey coverage. The records search included a one-mile radius around the project site and reviewed all available documentation of prehistoric and historic-period resources, as well as prior cultural resource surveys and excavation reports.

In February 2025, historic-period aerial photographs and topographic maps were reviewed using the Nationwide Environmental Title Research (NETR) Online database. This review provided supplemental information regarding historical land use within and surrounding the project area.

An intensive pedestrian survey of the project site was conducted on January 20, 2025, by a qualified archaeologist. The survey was performed using linear transects spaced approximately 20 to 30 meters (65.6 to 98.4 feet) apart. The entire accessible area of the project site was inspected, with particular attention given to areas containing exposed native soils, rock outcrops, and rodent disturbances. All visible ground surfaces were carefully examined for the presence of prehistoric or historic-period artifacts, features, or other cultural deposits.

4.5.2.1 Natural Setting

This section summarizes the natural setting of the project site and its vicinity, including a general description of the climate and watershed, flora and fauna, and geology.

Climate and Watershed. The project region is characterized by a coastal climate, with mild summers and winters. Rainfall averages 24 inches annually. The project area is transected by two ephemeral drainages,[46] which drain to Benicia State Park in the east, where stormwater runoff converges and is directed to the Carquinez Strait.

Flora and Fauna. At an elevation of approximately 250 feet, the proposed project is just within the Lower Sonoran Life Zone of California , which ranges from below sea level to 3,500 feet. Monterey pine, coast live oak, poison oak, and other native species were noted on the property (particularly xeric grasses, oats, barley, and brome). Extensive fauna are known locally, including many endemic species of reptiles, birds, and insects.

The coastal environment of California hosted a rich variety of abundant floral and faunal resources that fostered a particularly dense Native American occupation of this region during prehistoric times, especially the coastal corridor within a day's "commuting" distance of fresh water.

Geology. Vallejo is within the Coast Ranges geomorphic province of California. The geological setting along the Coast Ranges is notably different between the East and West sides of the San Andreas

[46] A stream that has flowing water only during or for a short duration after precipitation events in a typical year.

fault. Vallejo lies to the east of the San Andreas fault, which is characterized by Mesozoic rocks of the Franciscan Complex, the Great Valley Sequence, and the Jurassic Coast Range ophiolite.

The boundaries of the proposed project are situated within the Upper Great Valley Sequence, which dates to the Late Cretaceous. The Upper Great Valley Sequence (Ku) consists of sandstone, siltstone, shale, and minor conglomerate.

4.5.2.2 Cultural Setting

This section summarizes the cultural setting of the project site and its vicinity, including a summary of the prehistory, ethnography, and general history of the project area.

Prehistory. Chronologies of prehistoric cultural change in the Northern California area have been attempted numerous times; however, no single description is universally accepted, as the various chronologies are based primarily on material developments identified by researchers familiar with sites in a particular region and variation exists essentially due to the differences in those items found at the sites. Small differences occur over time and space, which combine to form patterns that are variously interpreted. One of the regional chronologies commonly referenced in the archaeological literature is the Lower Archaic (10,000 to 6,000 A.D.), followed by the Initial Middle Archaic (6,000 to 4,500 BP), Terminal Middle Archaic (4,500 to 2,500 BP), Upper Archaic (2,500 to 1,300 BP) and, finally, the Emergent (1,200 to 200 BP).

Ethnography. The proposed project is within the traditional cultural territory of the Patwin. Tribal territories were somewhat fluid and changed over time. Like other Native American groups in Northern California, the Patwin were semi-nomadic hunter-gatherers who subsisted on seasonably available plant and animal resources. The first written accounts of Native American groups in California were by Spanish missionaries in the late 18th century. With the Spanish intrusion came a drastic change in lifestyle for the Native Americans of California. Incorporation of the indigenous populations into the mission system involved conflict, forced labor, and relocation along with decimation by European diseases, all of which led to the disruption of native cultures and changes in subsistence and land use practices. Cattle ranches/farms were established on or near ancestral Native American villages, primarily in the major drainages conducive to horticulture and animal husbandry. Water was diverted for irrigation and stock. Within a short time, the missions controlled many ranchos where Indians lived and worked.

History. In California, the historic era is generally divided into three periods: the Spanish Period (1769–1821), the Mexican Period (1821–1848), and the American Period (1848–present). Solano County was created from part of the Sonoma territory in 1850 by the first elected Legislature of the territory of California. Solano County is therefore one of the original 27 counties in California. General Vallejo, an instrumental figure in shaping Alta California, requested that this county was named after Chief Solano, a Suisun and Patwin leader who presided over this land prior to California's statehood. Seven of the 12 townships created during Solano County's early days have incorporated into cities. These include Benicia (1850 and 1851), Vallejo (1868), Suisun City (1856), Dixon (1878), Vacaville (1892), Rio Vista (1893), and Fairfield (1903).

Vallejo. The region that became Vallejo was first mapped by Spanish colonizers in 1775. However, this area remained largely unshaped by colonial influence until 1844, when General Vallejo received this area as a part of the larger Rancho Soscol land grant. General Vallejo donated land and funds for the construction of a capital city, named Vallejo, in the newly annexed state of California in 1851. Vallejo served as a temporary capitol until Benecia was formally recognized as the capital in 1853. Mare Island became the country's first permanent U.S. Naval station on the West Coast in September 1854. Vallejo formally incorporated in 1868 and experienced booms of growth reflecting periods of U.S. Naval growth during the Spanish-American War and World War I.

4.5.3 Impact Analysis

a. Would the project cause a substantial adverse change in the significance of a historical resource pursuant to §15064.5? ***(Less Than Significant Impact, No New Impact)***

The project site is vacant and undeveloped and is covered primarily with non-native annual grassland and scattered mature trees. No buildings or structures are present within the project area in historic period aerial photos or as indicated on maps dating back to 1948.[47]

As discussed previously in Section 4.5.1, on September 6, 2024, a records search to identify previously recorded prehistoric and historic cultural resources and cultural resource surveys within one mile of the project area was conducted at the NWIC of the California Historical Resources Information System at Sonoma State University. According to the NWIC records search, no cultural resources were recorded within the project area, although eight historic age resources are documented within 0.5 mile. The nearest historic resources to the project site are within 0.25 mile of the project boundary.

Based on the background research conducted by LSA, it was determined that there are no known archaeological resources on the project site that would qualify as "historical resources" as defined under CEQA. Furthermore, as the project site is undeveloped and there are no existing structures at the project site to qualify as an "historical resource" as defined under CEQA. Therefore, the proposed project would have no impact associated with a substantial adverse change in the significance of a historical resource as defined in Section 15064.5 of the *State CEQA Guidelines.* No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

A "substantial adverse change" to a historical resource, according to PRC Section 5020.1(q), "means demolition, destruction, relocation, or alteration such that the significance of a historical resource would be impaired." According to the NWIC records search, no cultural resources were recorded

[47] LSA Associates, Inc. (LSA). 2025. *Cultural Resources Assessment, Vista Cove Development Project, Vallejo, Solano County, California.* March.

within the project area, although eight historic age resources are documented within 0.5 mile. The nearest historic resources to the project site are within 0.25 mile of the project boundary.

An archaeological pedestrian field survey of the project site was conducted on January 20, 2025. During the field survey, archaeologists did not discover any cultural resources (including prehistoric or historic archaeological sites or historic-period buildings) on the project site or within the project site boundaries. The field survey indicated that there was light disturbance in some areas of the project site, where modern refuse was noted throughout the project area; however, overall visibility was generally limited by existing vegetation cover. No cultural resources were identified. Based on these results, the Cultural Resources Assessment determined that the project site has a low potential for in situ subsurface cultural resources due to the severe slopes and adjacent developments. The project would implement standard measures to address the potential to disturb subsurface archaeological resources consistent with the General Plan EIR mitigation measures to mitigate the impact to a level of less than significant. CEQA California Code of Regulations, Title 14, Chapter 3, Sections 15064.5 [e and f] require a lead agency to establish protocols for discovery of unknown archaeological resources. As such, the proposed project shall be required to implement **Project Specific Mitigation Measure CUL-1** as a standard requirement in accordance with State law.

Project Specific Mitigation Measure CUL-1

Unknown Discovery of Archaeological Resources. Should an archaeological deposit be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology contacted to assess the situation, determine if the deposit qualifies as a historical resource, consult with agencies as appropriate, and make recommendations for the treatment of the discovery.

If the deposit is found to be significant (i.e., eligible for listing in the California Register of Historical Resources), the project applicant shall be responsible for funding and implementing appropriate mitigation measures. Mitigation measures may include recording the archaeological deposit, data recovery and analysis, and public outreach regarding the scientific and cultural importance of the discovery. Upon completion of the selected mitigations, a report documenting methods, findings, and recommendations shall be prepared by the qualified archaeologist and submitted to the City of Vallejo for review, and the final report shall be submitted to the Northwest

Information Center at Sonoma State University. Significant archaeological materials shall be submitted to an appropriate local curation facility and used for future research and public interpretive displays, as appropriate.

Project Specific Mitigation Measure CUL-1 outlines procedures if archaeological resources are discovered during construction, such as work stoppage within 25 feet of the find, and a qualified archaeologist must evaluate the discovery. If the deposit is determined to be a significant historical resource, the project applicant must implement standard measures for the treatment of archaeological resources, which may include documentation, excavation, analysis, and public outreach. A final report will be submitted to the City and archived at the NWIC with significant materials curated for future research or public display. With the implementation of **Project Specific Mitigation Measure CUL-1,** the proposed project would not result in new significant or substantially greater impacts to previously undiscovered archaeological resources, as the resources would be avoided, recovered, and evaluated, as needed.

At the completion of project construction, the proposed project would not result in further disturbance of native soils on the project site and, therefore, project operations would have no potential to impact previously undiscovered archaeological resources.

Therefore, with implementation of **Project Specific Mitigation Measure CUL-1**, construction and operation of the proposed project would not result in a new significant or substantially more severe impact on cultural resources due to a substantial adverse change in the significance of an archaeological resource as defined in Section 15064.5 of the *State CEQA Guidelines*. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

*c. Would the project disturb any humans remains, including those interred outside of formal cemeteries? **(Less than Significant with Mitigation Incorporated, No New Impact)***

No human remains are documented/known to be on the project site. Furthermore, severe slopes and adjacent developments indicate that project site retains low potential for in situ subsurface cultural resources, as documented in **Appendix D**. Therefore, the likelihood of discovering unknown human remains during construction of the proposed project is low, which is consistent with its prior analysis in the General Plan EIR. However, there is still potential for unknown human remains to be discovered during construction activities, and impacts would be potentially significant if the project does not implement standard measures required by the Health and Safety Code section 7050.5 as summarized below.

In the unlikely event that human remains are discovered during construction activities, the Construction Contractor would be required to implement **Project Specific Mitigation Measure CUL-2**, which requires compliance with the State's Health and Safety Code for the treatment of human remains.

Project Specific Mitigation Measure CUL-2

Protocol for Human Remains Discovery. If human remains are encountered, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to State Public Resources Code (PRC) Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be Native American, the County Coroner would notify the Native American Heritage Commission (NAHC), which would determine and notify a Most Likely Descendant (MLD), and the following provisions shall apply:

- The Medical Examiner shall immediately be notified, ground disturbing activities in that location shall cease within 25 feet of the discovery and the Tribe shall be allowed, pursuant to California PRC Section 5097.98(a) to inspect the site of the discovery and make determinations as to how the human remains and grave goods should be treated and disposed of with appropriate dignity.
- The Tribe shall complete its inspection and make its MLD recommendation within forty-eight (48) hours of getting access to the site. The Tribe shall have the final determination as to the disposition and treatment of human remains and grave goods. Said determination may include avoidance of the human remains, reburial on-site or reburial on tribal or other lands that will not be disturbed in the future.
- The Tribe may wish to rebury said remains and grave goods or ceremonial and cultural items on or near the site of their discovery, in an area which will not be subject to future disturbances over a prolonged period of time. Reburial of human remains shall be accomplished in compliance with California PRC Sections 5097.98(a) and (b). The term “human remains” encompasses more than human bones because the Tribe’s traditions call for the burial of associated cultural items with the deceased (funerary objects), and/or the ceremonial

burning of Native American human remains, funerary objects, grave goods, and animals. Ashes, soils, and other remnants of these burning ceremonies, as well as associated funerary objects and unassociated funerary objects buried with or found near the Native American remains are to be treated in the same manner as bones or bone fragments that remain intact.

- Unless otherwise required by law, the site of any reburial of Native American human remains shall not be disclosed and will not be governed by public disclosure requirements of the California Public Records Act (California Government Code Section 6250 et. seq). The Medical Examiner shall withhold public disclosure of information related to such reburial pursuant to the specific exemption set forth in California Government Code Section 6254(r). The Tribe will require that the location for reburial is recorded with the California Historic Resources Inventory System (CHRIS) on a form that is acceptable to the CHRIS center. The Tribe may also suggest that the landowner enter into an agreement regarding the confidentiality of site information that will run with title on the property.
- Treatment of all cultural items, including ceremonial items and archaeological items will reflect the religious beliefs, customs, and practices of the Tribe. All cultural items, including ceremonial items and archaeological items, which may be found at a project site should be turned over to the Tribe for appropriate treatment, unless otherwise ordered by a court of agency of competent jurisdiction. The project applicant should waive any and all claims to ownership of Tribal ceremonial and cultural items, including archaeological items, which may be found on a project site in favor of the Tribe. If any intermediary (e.g., an archaeological retained by the project applicant) is necessary, said entity or individual shall not possess those items for longer than is reasonably necessary, as determined solely by the Tribe.

- If additional significant sites or sites not identified as significant in the environmental review process, but later determined to be significant are located within a project impact area, such sites will be subjected to further archaeological and cultural significance evaluation by the project applicant, Solano County and the Tribe to determine if additional mitigation measures are necessary to treat sites in a culturally appropriate manner consistent with CEQA requirements for mitigation of impacts to cultural resources. If there are human remains present that have been identified as Native American, all work will cease for a period of up to 30 days in accordance with Federal Law.

Project Specific Mitigation Measure CUL-2 outlines procedures to follow if Native American human remains are discovered during project development. If remains are found, ground-disturbing activities within 25 feet of the discovery area must immediately stop, and the County Coroner, Medical Examiner, and Tribe must be notified in accordance with State law. The NAHC would identify a Most Likely Descendant (MLD), and the Tribe, through the MLD, would have 48 hours to inspect the site and determine the appropriate dignified treatment of the remains and associated items. Treatment options may include avoidance, on-site reburial, or reburial on other lands that will not be disturbed in the future. All funerary objects, ceremonial items, and related materials—such as ashes and soil from burning ceremonies—must be treated as human remains, and the Tribe retains the right to manage their handling and final disposition, including requiring confidentiality of reburial locations. Any additional significant cultural sites identified during construction will require further evaluation and mitigation in consultation with Solano County and the Tribe, and work will pause for up to 30 days if Native American remains are present, in accordance with federal law. With implementation of **Project Specific Mitigation Measure CUL-2**, potential impacts to previously undiscovered human remains would be less than significant.

At the completion of project construction, the proposed project would not result in further disturbance of native soils on the project site and, therefore, project operations would have no potential to impact previously undiscovered human remains.

Therefore, with implementation of **Project Specific Mitigation Measure CUL-2**, construction and operation of the proposed project would have a less than significant impact on undiscovered human remains. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those impacts analyzed in the General Plan EIR.

4.6 ENERGY

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during project construction or operation?	☐	☐	☒	☐	☒
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	☐	☐	☒	☐	☒

4.6.1 Prior Environmental Analysis

Chapter 4.15 of the General Plan EIR analyzed impacts related to energy associated with build out of the General Plan, and determined that either no impact or less than significant impacts would occur due to compliance with existing energy standards including the California Code of Regulations Title 24, the City's Green Building Code, CALGreen Building Code requirements, the City's Climate Action Plan and GHG reduction measures, and other applicable State and local energy efficiency measures. No mitigation measures were prescribed. There are no General Plan goals, policies, or actions related to energy which would be applicable to the proposed project.

4.6.2 Background

Electricity and gas service is provided to the project site by Pacific Gas and Electric Company (PG&E). Energy demand is typically associated with day-to-day operations and fuel consumption associated with project construction. The proposed project would result in a small increase in demand for electricity and gasoline. The discussion and analysis provided below is based on data included in the California Emissions Estimator Model version 2022.1 (CalEEMod) output, which are included in **Appendix A**.

4.6.3 Impact Analysis

a. Would the project result in a potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during project construction or operation? ***(Less than Significant Impact, No New Impact)***

Construction-Period Energy Use. The proposed project would require grading, site preparation, and building activities during construction. Construction of the proposed project would require energy for the manufacture and transport of construction materials, preparation of the site for grading activities, and construction of the proposed residential development. Petroleum fuels (e.g., diesel and gasoline) would be the primary sources of energy for these activities. In order to increase energy efficiency on the site during project construction, the idling times for construction vehicles would be restricted to 5 minutes or less and construction workers would be required to shut off idle equipment, as required by the Air District. In addition, construction activities are not anticipated to result in inefficient use of energy, as gasoline and diesel fuel would be supplied by construction contractors which would conserve the use of their supplies to minimize their costs on the project.

Energy usage on the project site during construction would be temporary in nature, and no unusual project characteristics would necessitate the use of construction equipment that would be less energy-efficient than at comparable construction sites in the region or the State. Therefore, construction energy impacts would be less than significant.**Operational Energy Use.**Operational energy usage is typically associated with natural gas use, electricity consumption, and fuel used for vehicle trips. The proposed project would also result in diesel usage associated with the standby backup generator; however, the backup generator would operate for up to 50 hours annually, primarily for testing purposes. Therefore, use of the emergency backup generator is not expected to substantially increase diesel fuel usage and is not evaluated further. Electricity and natural gas consumption were estimated for the project using default energy intensities by land use type in CalEEMod. The 2022 Title 24 Building Energy Efficiency Standards (Title 24 Standards) contain energy efficiency requirements for newly constructed buildings, additions to existing buildings, and alterations to existing buildings. The Title 24 Standards establish performance metrics in the form of an "energy budget" based on energy consumption per square foot of floor space. For this reason, Title 24 Standards include both a prescriptive option, allowing builders to comply by using methods known to be efficient, and a performance option, allowing builders complete freedom in their designs provided the building achieves the same overall efficiency as an equivalent building using the prescriptive option. Reference appendices are adopted along with the Title 24 Standards containing data and various compliance tools to help builders achieve compliance.

In addition, the proposed project would result in energy usage associated with gasoline to fuel project-related trips. Based on the CalEEMod analysis, the proposed project would result in approximately 1,897,969 vehicle miles traveled (VMT) per year.[48] The average fuel economy for light-duty vehicles (autos, pickups, vans, and sport utility vehicles [SUVs]) in the United States has steadily increased from about 14.9 miles per gallon (mpg) in 1980 to 22.8 mpg in 2022, the year for which the most recent data is available.[49] The average fuel economy for heavy-duty trucks in the United States has also steadily increased, from 5.7 mpg in 2013 to a projected 8.0 mpg in 2021.[50] Therefore, using the United States Environmental Protection Agency (EPA) fuel economy estimates for 2020, the proposed project would result in the consumption of approximately 67,760 gallons of gasoline per year and 43,235 gallons of diesel fuel per year.

Electricity and natural usage estimates associated with the proposed project are shown in **Table 4.6.A**.

[48] To be conservative, LSA utilized default vehicle miles traveled in CalEEMod, which estimates trip lengths for vehicle trips traveling between home, work, shopping, and other locations (e.g., school, park, gym, etc.).

[49] United States Department of Transportation (USDOT). 2023. "Table 4-23: Average Fuel Efficiency of U.S. Light Duty Vehicles." Website: https://www.bts.gov/content/average-fuel-efficiency-us-light-duty-vehicles (accessed March 26, 2025).

[50] California Energy Commission (CEC). 2015. Medium and Heavy-Duty Truck Prices and Fuel Economy 2013–2026. Website: efiling.energy.ca.gov/getdocument.aspx?tn=206180 (accessed March 26, 2025).

Table 4.6.A: Estimated Annual Energy Use of Proposed Project

Electricity Use (kWh/yr)	Natural Gas Use (therms/yr)	Gasoline (gal/yr)	Diesel (gal/yr)
434,811	14,839	67,760	43,235

Source: Compiled by LSA (March 2025).
gal/yr = gallons per year kWh/yr = kilowatt-hours per year therms/yr = therms per year

As shown in **Table 4.6.A**, the estimated potential increased electricity demand associated with the proposed project is 434,811 kilowatt-hours (kWh) per year. In 2022, California consumed approximately 287,826 gigawatt-hours (GWh), or 287,826,110,475 kWh.[51] Of this total, Solano County consumed 3,225 GWh, or 3,225,398,734 kWh.[52] Therefore, electricity demand associated with the proposed project would be less than 0.1 percent of Solano County's total electricity demand.

Additionally, as shown in **Table 4.6.A**, the estimated potential increase in natural gas demand associated with the proposed project is 14,839 therms per year. In 2022, California consumed approximately 11,171 million therms (11,710,641,194 therms).[53] Of this total, Solano County consumed 248 million therms (248,386,169 therms).[54] Therefore, natural gas demand associated with the proposed project would be less than 0.1 percent of Solano County's total natural gas demand.

In addition, the proposed project would result in energy usage associated with gasoline and diesel to fuel project-related trips. As shown above in **Table 4.6.A,** vehicle trips associated with the proposed project would consume approximately 67,760 gallons of gasoline per year and 43,235 gallons of diesel fuel per year. Based on fuel consumption obtained from CARB's EMission FACtor model (EMFAC2021), approximately 173.0 million gallons of gasoline and approximately 55.1 million gallons of diesel fuel will be consumed from vehicle trips in Solano County in 2025. Therefore, gasoline and diesel fuel demand generated by vehicle trips associated with the proposed project would be a minimal fraction of gasoline and diesel fuel consumption in Solano County. Fuel consumption associated with vehicle trips generated by project operations would not be considered inefficient, wasteful, or unnecessary in comparison to other similar developments in the region.

In addition, proposed new development would be constructed using energy-efficient modern building materials and construction practices, and the proposed project also would use new modern appliances and equipment, in accordance with the Appliance Efficiency Regulations (Title 20, California Code of Regulations [CCR] Sections 1601 through 1608). The expected energy

51 California Energy Commission (CEC). 2024a. Energy Consumption Data Management Service. Electricity Consumption by County. Website: www.ecdms.energy.ca.gov/elecbycounty.aspx (accessed March 26, 2025).
52 Ibid.
53 California Energy Commission (CEC). 2024b. Energy Consumption Data Management Service. Gas Consumption by County. Website: https://ecdms.energy.ca.gov/gasbycounty.aspx (accessed March 26, 2025).
54 Ibid.

consumption during construction and operation of the proposed project would be consistent with typical usage rates for residential uses.

PG&E is the private utility that would supply the proposed project's electricity and natural gas services. In 2022, approximately 40 percent of PG&E's delivered electricity came from renewable sources, including solar, wind, geothermal, small hydroelectric, and various forms of bioenergy.[55] PG&E reached California's 2020 renewable energy goal in 2017 and is positioned to meet the State's 60 percent by 2030 renewable energy mandate set forth in Senate Bill (SB) 100. In addition, PG&E plans to continue to provide reliable service to its customers and upgrade its distribution systems as necessary to meet future demand.

Therefore, the proposed project would not result in the wasteful, inefficient, or unnecessary consumption of fuel or energy and would incorporate renewable energy or energy efficiency measures into building design, equipment use, and transportation. Construction and operation period impacts related to consumption of energy resources would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency? ***(Less Than Significant Impact, No New Impact)***

In 2002, the State Legislature passed SB 1389, which required the California Energy Commission (CEC) to develop an integrated energy plan every 2 years for electricity, natural gas, and transportation fuels for the California Energy Policy Report. The plan calls for the State to assist in the transformation of the transportation system to improve air quality, reduce congestion, and increase the efficient use of fuel supplies with the least environmental and energy costs. To further this policy, the plan identifies a number of strategies, including assistance to public agencies and fleet operators in implementing incentive programs for zero-emission vehicles and their infrastructure needs, and encouragement of urban designs that reduce VMT and accommodate pedestrian and bicycle access.

The most recently adopted CEC energy report is the *2024 Integrated Energy Policy Report Update*.[56] The *2024 Integrated Energy Policy Report Update* provides the results of the CEC's assessments of a variety of energy issues facing California. Many of these issues will require action if the State is to meet its climate, energy, air quality, and other environmental goals while maintaining energy reliability and controlling costs. The *2024 Integrated Energy Policy Report Update* covers a broad range of topics, including implementation of SB 350 (Clean Energy and Pollution Reduction Act of 2015), integrated resource planning, distributed energy resources, transportation electrification, solutions to increase resiliency in the electricity sector, energy efficiency barriers faced by disadvantaged communities, demand response, transmission and landscape-scale planning, the

[55] Pacific Gas & Electric (PG&E). 2023. *Exploring Clean Energy Solutions*. Website: https://www.pge.com/en/about/corporate-responsibility-and-sustainability/taking-responsibility/clean-energy-solutions.html (accessed March 5, 2025).

[56] California Energy Commission. 2024. *2024 Integrated Energy Policy Report Update.* Docket Number: 24-IEPR-01.

California Energy Demand Preliminary Forecast, the preliminary transportation energy demand forecast, renewable gas (in response to SB 1383), updates on Southern California electricity reliability, the natural gas outlook, and climate adaptation and resiliency.

As indicated above, energy usage on the project site during construction would be temporary in nature. In addition, energy usage associated with operation of the proposed project would be relatively small in comparison to the State's available energy sources, and energy impacts would be negligible at the regional level. Because California's energy conservation planning actions are conducted at a regional level, and because the project's total impact to regional energy supplies would be minor, the proposed project would not conflict with California's energy conservation plans as described in the CEC *2024 Integrated Energy Policy Report Update*. Therefore, the proposed project would not conflict with or obstruct a State or local plan for renewable energy or energy efficiency, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.7 GEOLOGY AND SOILS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact

4.7.1 Prior Environmental Analysis

Chapter 4.5 of the General Plan EIR analyzed the geological, seismic, and soil conditions within the city, and determined that build out of the General Plan would result in less than significant impacts related to geology and soils due to compliance with existing regulatory requirements including the California Building Code, City of Vallejo Municipal Code, and the Construction General Permit, and implementation of General Plan goals, policies, and actions. Chapter 4.4 of the General Plan EIR analyzed impacts to paleontological resources associated with build out of the General Plan, and determined adverse changes could occur to the significance of paleontological resources through future development due to the lack of specific implementing procedures. Therefore, the General Plan EIR prescribed **Mitigation Measure CULT-3**, which details procedures in the event that paleontological resources are encountered during future development. With implementation of **General Plan EIR Mitigation Measure CULT-3**, impacts on paleontological resources were considered reduced to less than significant.

Additionally, the General Plan includes the following goals, policies, and actions related to geology and soils which would be applicable to the proposed project:

- **Goal NBE-5: Hazard Protection**: Protect life and property from natural and human-made hazards.
    - **Policy NBE-5.3: Health and Safety Codes**. Enforce development regulations and building code requirements to protect residents, businesses, and employees from flooding, liquefaction, earthquakes, fires, and other hazards.
    - **Policy NBE-5.4: Project Location and Design**. Prohibit development in any area where it is determined that the potential risk from natural hazards cannot be mitigated to acceptable levels.
        - **Action NBE-5.4A**: Continue to require geotechnical studies for land use proposals to determine engineering measures that may be necessary to adequately mitigate any seismic, flooding, sea level rise, landslide, erosion, or related risk.
        - **Action NBE-5.4B**: Continue to require drainage and erosion control measures for landslide-prone or geologically hazardous hillside areas to minimize risks to downhill areas.

4.7.2 Background

Unless otherwise noted, the following analysis is based on the *Preliminary Geotechnical Exploration* prepared for the proposed project[57] and the peer review conducted as part of the environmental review process[58]. A copy of the Geotechnical Investigation and peer review are included in **Appendix E** of this Initial Study.

The project site is in a seismically active area, where earthquakes have the potential to subject the project to strong seismic ground shaking. There are no mapped faults within or adjacent to the project site, and the project site is not located within an Alquist-Priolo Zone.[59] As detailed in the *Preliminary Geotechnical Exploration* prepared for the proposed project, the soil materials encountered within the project site generally consist of clayey soil and bedrock that are not susceptible to liquefaction. As detailed in the *Preliminary Geotechnical Exploration* completed for the proposed project, the soil and bedrock at the site generally exhibit moderate to high shrink/swell potential with variations in moisture content.

57 ENGEO. 2022a. *Vallejo Properties – Vista Cove, Vallejo, California, Preliminary Geotechnical Exploration.* September 12.

58 Baseline Environmental Consulting. 2025. *Peer Review of Preliminary Geotechnical Exploration, Vista Cove Planned Development Project, Vallejo, California.* March 26.

59 California Department of Conservation, California Geologic Survey (DOC CGS). 2021. *Earthquake Zones of Required Investigation.* Website: https://maps.conservation.ca.gov/cgs/EQZApp/app/ (accessed March 5, 2025).

As detailed in the *Preliminary Geotechnical Exploration* prepared for the proposed project, geologic mapping shows a queried landslide area crossing through the site. Based on a review of published maps, interpretation of aerial photographs, and completion of subsurface exploration, six landslide areas were identified adjacent to or within the project site that have a relatively high likelihood of experiencing instability. The landslides at the site are classified as shallow soil creep/earthflows, shallow landslide deposits, and deep-seated bedrock landslides.

4.7.3 Impact Analysis

a. Would the project directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42. ***(No Impact, No New Impact)***

Fault rupture is generally expected to occur along active fault traces that have exhibited signs of recent geological movement (i.e., within the last 11,000 years). Alquist-Priolo Earthquake Fault Zones delineate areas around active faults with potential surface fault rupture hazards that would require specific geological investigations prior to approval of certain kinds of development within the delineated area. There are no mapped faults within or adjacent to the project site, and the project site is not located within an Alquist-Priolo Zone.[60] The nearest mapped fault to the project site is the Green Valley Fault, which is located approximately 5 miles northeast of the project site. Therefore, the project would not directly or indirectly cause substantial adverse effects related to fault rupture, and there would be no impact. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

ii. Strong seismic ground shaking? ***(No Impact, No New Impact)***

The project site is in a seismically active area, where earthquakes have the potential to subject the project to strong seismic ground shaking. The intensity of ground shaking would depend on the characteristics of the fault, distance from the fault, the earthquake's magnitude and duration, and site-specific geologic conditions.

The City requires projects to comply with the 2022 California Building Code (CBC) (Title 24, California Code of Regulations),[61] which provides stringent construction requirements on projects in areas of high seismic risk based on numerous interrelated factors. It is acknowledged that seismic hazards cannot be completely eliminated even with implementation of advanced building practices. However, the seismic design standards of the CBC are intended to prevent catastrophic structural

[60] California Department of Conservation, California Geologic Survey (DOC CGS). 2021. *Earthquake Zones of Required Investigation.* Website: https://maps.conservation.ca.gov/cgs/EQZApp/app/ (accessed March 5, 2025).

[61] Vallejo, City of. n.d.-c. *Vallejo, California – Municipal Code, Title 12 – Buildings and Construction, Chapter 12.48.010 – Existing Building Code Adoption.*

failure in the most severe earthquakes currently anticipated. Therefore, the proposed project would not directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving seismic ground shaking, and there would be no impact. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

iii. Seismic-related ground failure, including liquefaction? ***(No Impact, No New Impact)***

Liquefaction. Soil liquefaction is a phenomenon primarily associated with saturated soil layers located close to the ground surface. During ground shaking, these soils lose strength and acquire "mobility" sufficient to permit both horizontal and vertical movements. The significant factors on which liquefaction potential of a soil deposit depends include, among others, soil type, relative soil density, intensity of earthquake, duration of ground shaking, and depth of ground water. Soils that are most susceptible to liquefaction are clean, loose, uniformly graded, saturated, fine-grained sands that lie relatively close to the ground surface. However, loose sands that contain a significant amount of fines (i.e., silt and clay) may also liquefy. As detailed in the *Preliminary Geotechnical Exploration* prepared for the proposed project, the soil materials encountered within the project site generally consist of clayey soil and bedrock that are not susceptible to liquefaction. Therefore, the project site would not be susceptible to liquefaction, and no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

iv. Landslides? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

A landslide generally occurs on relatively steep slopes and/or on slopes underlain by weak materials. Seismically induced landslides are triggered by earthquake ground shaking. The risk of this hazard is greatest in the late winter, when groundwater levels are highest and hillside colluvium is saturated. As detailed in the *Preliminary Geotechnical Exploration* prepared for the proposed project, geologic mapping shows a queried landslide area crossing through the site. Based on a review of published maps, interpretation of aerial photographs, and completion of subsurface exploration, six landslide areas were identified adjacent to or within the project site that have a relatively high likelihood of experiencing instability. The landslides at the site are classified as shallow soil creep/earthflows, shallow landslide deposits, and deep-seated bedrock landslides. The *Preliminary Geotechnical Exploration* includes conceptual mitigation measures for each landslide area and recommends a design-level geotechnical review be completed prior to issuing the plans for construction.

Project Specific Mitigation Measure GEO-1	**Design-Level Geotechnical Review.** A licensed Geotechnical Engineer or their representative shall be retained to perform a design-level geotechnical investigation once site development plans are final. The design-level geotechnical investigation shall include further evaluation of potential geologic hazards related to landslides, stability of graded slopes, corrective grading for planned building sites, and the presence of moderate to highly expansive soil and bedrock. The design-level investigation

findings shall be used to address all the geotechnical concerns described in the Preliminary Geotechnical Exploration and to develop detailed recommendations for design and construction. The recommendations of the Preliminary Geotechnical Exploration and any recommendations included in the required design-level geotechnical investigation for the project shall be incorporated into all design and engineering plans. At the end of construction, the Geotechnical Engineer shall provide a letter regarding contractor compliance with project plans and specifications and with the recommendations of the Geotechnical Investigation and any supplemental recommendations issued during construction. The letter shall be submitted for review to the City of Vallejo Building Division and confirmed prior to issuance of a certificate of occupancy.

Implementation of **Project Specific Mitigation Measure GEO-1**, which requires the project sponsor to incorporate all of the recommendations of the Geotechnical Investigation and any recommendations included in a design-level geotechnical investigation into the project development plans, would reduce the potential impacts related to landslides to a less than significant level. This is a standard measure applicable to projects located within areas that are subject to seismic activity and related hazard areas, to ensure that the most stringent building standards are implemented. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project result in substantial soil erosion or the loss of topsoil? ***(Less Than Significant Impact, No New Impact)***

Topsoil is defined as the upper part of the soil profile that is relatively rich in humus and is technically known as the A-horizon of the soil profile.[62] Grading and earthmoving during project construction has the potential to result in erosion and loss of topsoil. Exposed soils could be entrained in stormwater runoff and transported off the project site. However, this impact would be less than significant through compliance with the regulatory requirements detailed in Section 4.10, Hydrology and Water Quality, which include the preparation of a Stormwater Pollution Prevention Plan (SWPPP). Although designed primarily to protect stormwater quality, the SWPPP would incorporate Best Management Practices (BMPs) to minimize impacts related to erosion to a less than significant level. Additional details regarding the SWPPP are provided in Section 4.10, Hydrology and Water Quality of this Initial Study. No new impacts or substantially more severe

[62] California State Mining and Geology Board. 2014. Surface Mining Reclamation Act Regulations. California Code of Regulations, Title 14, Division 2, Chapter 8, Subchapter 1.

significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

As discussed in Section 4.7.a, site soils would not be subject to liquefaction and impacts related to landslides would be reduced to a less than significant level with the implementation of **Project Specific Mitigation Measure GEO-1.**

Lateral Spreading. Lateral spreading is a form of horizontal displacement of soil toward an open channel or other "free" face, such as an excavation boundary. In a lateral spread failure, a layer of ground at the surface is carried on an underlying layer of liquefied material over a nearly flat surface toward a river channel or other bank. The lateral spreading hazard tends to mirror the liquefaction hazard for a site. Because the project site is not susceptible to liquefaction, the potential for seismically induced lateral spreading is low. Therefore, the project site would not be susceptible to lateral spreading, and no impact would occur.

Subsidence. Subsidence can result from the removal of subsurface water, resulting in either gradual depression or catastrophic collapse of the ground surface. As detailed in the *Preliminary Geotechnical Exploration* completed for the proposed project, no groundwater was encountered within the test pits, trench, and borings completed as part of the exploration. However, fluctuations in groundwater levels occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors. Therefore, dewatering may be required in isolated areas of the project site during construction. Construction-related dewatering would not be expected to result in subsidence or soil collapse as the dewatering activities would be temporary, localized, and affect only the uppermost water-bearing zone. Therefore, subsidence would not occur and there would be no impact.

Unstable Soils and Collapse. As detailed in the *Preliminary Geotechnical Exploration* completed for the proposed project, soils on site generally consist of colluvial soil overlaying mudstone bedrock interbedded with indurated sandstone, shale, siltstone, and claystone or colluvial deposits overlaying weak to very weak interbedded sandstone, siltstone, and mudstone. Colluvial deposits that include soft or compressible materials over bedrock have the potential for settlement due to building loads or engineered fill loads. To minimize settlement, the *Preliminary Geotechnical Exploration* recommends corrective grading measure including the removal of compressible materials down to a hard material/bedrock. Colluvial soil on steeper slopes is also subject to soil creep, which is the slow downslope movement of soil that occurs with the annual cycle of wetting and drying under the influence of gravity. To minimize soil creep, the *Preliminary Geotechnical Exploration* recommends benching through surficial soil during fill placement or designing drilled pier foundation systems to accommodate lateral loads from soil creep.

Due to the steep slopes at the project site, the *Preliminary Geotechnical Exploration* also includes corrective grading recommendations to ensure the stability of graded slopes, including removal of

compressible colluvium, excavation of buttress keyways, cut and cut-fill lot excavation, differential fill excavation, and construction of subsurface drainage facilities.

Implementation of **Project Specific Mitigation Measure GEO-1**, which requires the project sponsor to incorporate all of the recommendations of the Geotechnical Investigation and any recommendations included in a design-level geotechnical investigation into the project development plans, would reduce the potential impacts related to unstable soils and collapse to a less than significant level with mitigation. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

Expansive soils are characterized by the potential for shrinking and swelling as the moisture content of the soil decreases and increases, respectively. Shrink-swell potential is influenced by the amount and type of clay minerals present and can be measured by the percent change of the soil volume. As detailed in the *Preliminary Geotechnical Exploration* completed for the proposed project, the soil and bedrock at the site generally exhibit moderate to high shrink/swell potential with variations in moisture content. The *Preliminary Geotechnical Exploration* includes preliminary earthwork, foundation, and retaining wall recommendations to prevent potential impacts related to expansive soil and recommends a design-level geotechnical review be completed prior to issuing the plans for construction.

Implementation of **Project Specific Mitigation Measure GEO-1**, which requires the project sponsor to incorporate all of the recommendations of the Geotechnical Investigation and any recommendations included in a design-level geotechnical investigation into the project development plans, would reduce the potential impacts related to expansive soil to a less than significant level with mitigation. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water? ***(No Impact, No New Impact)***

Development of the proposed project would not involve the use of septic tanks or alternative wastewater disposal systems. Therefore, the proposed project would have no impact related to septic tanks or alternative wastewater disposal systems. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

f. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

There are no known paleontological resources or unique geologic features within or near the project site. However, according to a search of the University of California Museum of Paleontology (UCMP) at the University of California, Berkeley, there are 296 known localities that have produced 1,699 specimens within Solano County.[63] Therefore, the possibility of accidental discovery of paleontological resources during project construction cannot be discounted. Implementation of **Project Specific Mitigation Measure GEO-2**, described below, would reduce potential impacts to paleontological resources to a less than significant level. This is a standard accidental-discovery measure required of most construction projects that include soil excavation throughout the Bay Area and the State. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Project Specific Mitigation Measure GEO-2

Discovery of Paleontological Resources. Should paleontological resources be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified paleontologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. For purposes of this mitigation, a "qualified paleontologist" shall be an individual with the following qualifications: (1) a graduate degree in paleontology or geology and/or a person with a demonstrated publication record in peer-reviewed paleontological journals; (2) at least 2 years of professional experience related to paleontology; (3) proficiency in recognizing fossils in the field and determining their significance; (4) expertise in local geology, stratigraphy, and biostratigraphy; and (5) experience collecting vertebrate fossils in the field. If the paleontological resources are found to be significant and project activities cannot avoid them, measures shall be implemented to ensure that the project does not cause a substantial adverse change in the significance of the paleontological resource. Measures may include monitoring, recording the fossil locality, data recovery and analysis, a final report, and accessioning the fossil material and technical report to a paleontological repository. Upon completion of the assessment, a report

[63] University of California Museum of Paleontology (UCMP). *Databases.* Website: https://ucmp.berkeley.edu/collections/databases/ (accessed March 5, 2025).

documenting methods, findings, and recommendations shall be prepared and submitted to the City of Vallejo for review. If paleontological materials are recovered, this report also shall be submitted to a paleontological repository, such as the University of California Museum of Paleontology, along with significant paleontological materials. Public educational outreach may also be appropriate.

The project sponsor shall inform its contractor(s) of the sensitivity of the project site for paleontological resources and shall verify that the following directive has been included in the project grading plans:

"The subsurface of the construction site may be sensitive for fossils. If fossils are encountered during project subsurface construction, all ground-disturbing activities within 25 feet shall be redirected and a qualified paleontologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. Project personnel shall not collect or move any paleontological materials. Fossils can include plants and animals, and such trace fossil evidence of past life as tracks or plant imprints. Ancient marine sediments may contain invertebrate fossils such as snails, clam and oyster shells, sponges, and protozoa; and vertebrate fossils such as fish, whale, and sea lion bones. Contractor acknowledges and understands that excavation or removal of paleontological material is prohibited by law and constitutes a misdemeanor under California Public Resources Code, Section 5097.5."

4.8 GREENHOUSE GAS EMISSIONS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	☒	☐	☐	☐	☒
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	☒	☐	☐	☐	☒

4.8.1 Prior Environmental Analysis

Chapter 4.6 of the General Plan EIR analyzed impacts related to greenhouse gas (GHG) emissions associated with build out of the General Plan. The General Plan EIR determined that while implementation of the General Plan supports progress toward the long term-goals identified in Executive Order B-30-15 and Executive Order S-03-05, it cannot yet be demonstrated that the City will achieve GHG emissions reductions that are consistent with a 60 percent reduction below 1990 levels by the year 2040 based on existing technologies and currently adopted policies and programs. The General Plan EIR prescribed **Mitigation Measure GHG-1**, which requires the City to update its Climate Action Plan (CAP) to address the GHG reduction goals of Executive Order B-30-15 for GHG sectors that the City has direct or indirect jurisdictional control over. However, the General Plan EIR determined that even with implementation of **General Plan EIR Mitigation Measure GHG-1**, GHG impacts would be significant and unavoidable.

In addition, the General Plan EIR evaluated consistency with the California Air Resources Board (CARB) Scoping Plan, Plan Bay Area, and the Vallejo CAP. The General Plan EIR found that while the General Plan would be consistent with the regional objectives of Plan Bay Area and the City's CAP and the policies and programs in the General Plan would ensure substantial progress toward the long-term GHG reductions goals for 2050, additional State and federal measures are necessary to achieve the more aggressive targets established for 2050 in Executive Order S-03-05. Therefore, the General Plan EIR identified **Mitigation Measure GHG-2**, which requires implementation of **General Plan EIR Mitigation Measure GHG-1**. However, the General Plan EIR found that impacts would be significant and unavoidable, even with implementation of identified mitigation measures.

4.8.2 Background

GHGs are present in the atmosphere naturally, are released by natural sources, or are formed from secondary reactions taking place in the atmosphere. The gases that are widely seen as the principal contributors to human-induced global climate change are:

- Carbon dioxide (CO_2);
- Methane (CH_4);
- Nitrous oxide (N_2O);
- Hydrofluorocarbons (HFCs);

- Perfluorocarbons (PFCs); and
- Sulfur hexafluoride (SF_6).

Over the last 200 years, humans have caused substantial quantities of GHGs to be released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere and enhancing the natural greenhouse effect, believed to be causing global warming. While man-made GHGs include naturally occurring GHGs such as CO_2, methane, and N_2O, some gases, like HFCs, PFCs, and SF_6, are completely new to the atmosphere.

Certain gases, such as water vapor, are short-lived in the atmosphere. Others remain in the atmosphere for significant periods of time, contributing to climate change in the long term. Water vapor is excluded from the list of GHGs above because it is short-lived in the atmosphere and its atmospheric concentrations are largely determined by natural processes, such as oceanic evaporation.

These gases vary considerably in terms of global warming potential (GWP), a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. The GWP is based on several factors, including the relative effectiveness of a gas to absorb infrared radiation and length of time that the gas remains in the atmosphere ("atmospheric lifetime"). The GWP of each gas is measured relative to CO_2, the most abundant GHG. The definition of GWP for a particular GHG is the ratio of heat trapped by one unit mass of the GHG to the ratio of heat trapped by one unit mass of CO_2 over a specified time period. GHG emissions are typically measured in terms of pounds or tons of "CO_2 equivalents" (CO_2e).

4.8.3 Impact Analysis

a. Would the project generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment? ***(Potentially Significant Impact, No New Impact)***

This section describes the proposed project's construction- and operation-related GHG emissions and contribution to global climate change. The Air District did not address emission thresholds for construction in its CEQA Guidelines; however, the Air District encourages quantification and disclosure. The General Plan EIR included a quantitative analysis of GHG emissions associated with operational activities from build out of the General Plan. As the proposed project is consistent with the build out assumed in the General Plan EIR and the Addendum to the General Plan EIR for the 2023-2031 Housing Element Update[64] (Housing Element Addendum), the proposed project's anticipated GHG emissions associated with project operation were included in the GHG emissions analysis contained in the General Plan EIR. As such, the following section describes potential impacts associated with GHG emissions that could occur if the construction and operation of the proposed project would result in a new significant or substantially greater impact than the impacts identified in the City's General Plan EIR and Housing Element Addendum.

Construction GHG Emissions. Construction activities associated with the proposed project would produce combustion emissions from various sources. During construction, GHGs would be emitted

[64] Vallejo, City of. 2024. *Addendum to the General Plan EIR 2023-2031 Housing Element Update*. State Clearinghouse No. 2014112035. December 6.

through the operation of construction equipment and from worker and builder supply vendor vehicles, which typically use fossil-based fuels to operate. The combustion of fossil-based fuels creates GHGs such as CO_2, CH_4, and N_2O. Furthermore, CH_4 is emitted during the fueling of heavy equipment. Exhaust emissions from on-site construction activities would vary daily as construction activity levels change. GHG emissions generated during construction of the proposed project would be short term in nature, lasting only for the duration of the construction period, and would not represent a long-term source of GHG emissions.

As discussed in Section 4.3, Air Quality, construction emissions were estimated for the proposed project using CalEEMod, consistent with the Air District's recommendations. As included in the CalEEMod modeling, construction of the proposed project is anticipated to begin in June 2026 and would occur over an approximately 1-year period. It is anticipated that 58,700 cubic yards of soil would be cut, and 59,300 cubic yards would be used for fill, resulting in a total soil import of 600 cubic yards, which was included in CalEEMod. This analysis utilizes the default construction equipment list and assumes use of Tier 2 construction equipment for all phases of project construction. CalEEMod output sheets are included in **Appendix A**.

Using CalEEMod, it is estimated that the construction of the proposed project would generate approximately 306.0 metric tons (MT) CO_2e during construction of the project. Implementation of the Air District's Basic BMPs, as required by **General Plan EIR Mitigation Measure AQ-2b.1**, would reduce GHG emissions by reducing the amount of construction vehicle idling and by requiring the use of properly maintained equipment. This measure is implemented by the City and the Air District to ensure that GHG emissions would be less than significant. In addition, construction activities would be minimal and GHG emissions generated during construction of the proposed project would be short term in nature, lasting only for the duration of the construction period. The General Plan EIR did not quantify construction-related GHG emissions; however, since GHG emissions associated with construction activities would not represent a long-term source of GHG emissions and would cease once construction is completed, project construction impacts associated with GHG emissions would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Operational GHG Emissions. Long-term GHG emissions associated with the proposed project would typically be generated from mobile sources (e.g., vehicle trips), area sources (e.g., maintenance activities and landscaping), indirect emissions from sources associated with energy consumption, waste sources (land filling and waste disposal), and water sources (water supply and conveyance, treatment, and distribution). Mobile-source GHG emissions would include project-generated vehicle trips to and from the project site. Area-source emissions would be associated with activities such as landscaping and maintenance on the project site. Energy source emissions would be generated at off-site utility providers from increased electricity demand generated by the proposed project. Waste source emissions generated by the proposed project include energy generated by transporting and managing project generated waste. In addition, water source emissions associated with the proposed project are generated by water supply and conveyance, water treatment, water distribution, and wastewater treatment.

The General Plan EIR found that operational GHG emissions associated with development facilitated by the General Plan would result in 2.6 MT CO_2e per service population per year, above the plan-level efficiency target of 2.5 MT CO_2e per service population per year identified in the General Plan EIR, which was found to be a significant and unavoidable impact. As such, for the purpose of this analysis, the proposed project is compared to the GHG efficiency target of 2.5 MT CO_2e per service population.

Consistent with the General Plan EIR, GHG emissions were estimated using CalEEMod. **Table 4.8.A** shows the calculated GHG emissions for the proposed project. As discussed in Section 4.3, Air Quality, trip generation rates for the project were based on the project's trip generation estimates of approximately 481 average daily trips. In addition, the proposed project would have a standby diesel backup generator. Therefore, this analysis conservatively assumes that there would be a 500-horsepower diesel generator that would run up to 50 hours annually. Where project-specific data were not available, default assumptions (e.g., electricity usage, water usage, and solid waste generation) from CalEEMod were used to estimate project emissions. CalEEMod output sheets are included in **Appendix A**.

Table 4.8.A: Project Greenhouse Gas Emissions

Emissions Source Category	Operational Emissions (metric tons per year)			
	CO_2	CH_4	N_2O	CO_2e
Mobile	664.0	<0.1	<0.1	675.0
Area	1.5	<0.1	<0.1	1.5
Energy	119.0	<0.1	<0.1	119.6
Water	2.7	0.1	<0.1	4.6
Waste	3.1	0.3	0.0	10.8
Stationary	9.5	<0.1	<0.1	9.6
Total Operational Emissions				**811.9**
Total Annual Service Population Emissions (Metric Tons/Year/Service Population)				**5.7**

Source: Compiled by LSA (September 2025).
CH_4 = methane
CO_2 = carbon dioxide
CO_2e = carbon dioxide equivalents
N_2O = nitrous oxide

As shown in **Table 4.8.A**, the proposed project would generate approximately 811.9 metric tons of CO_2e. As discussed in Section 4.14, Population and Housing, the proposed project would result in approximately 143 residents on the project site. Therefore, the total service population (residents plus employees) would be 143 people. As such, the proposed project's GHG emissions would result in a GHG efficiency of 5.7 metric tons CO_2e per service population, which would exceed the plan-level efficiency target of 2.5 MT CO_2e per service population per year identified in the General Plan EIR. As such, similar to build out under the General Plan, the proposed project would not achieve the GHG efficiency metric for the year 2040.

The project site was identified as a housing opportunity site in the General Plan EIR. As discussed in the Project Description, the General Plan designates the project site as R-MH and R-SF. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre, and

nine dwelling units per acre in the R-SF designation; however, in single-family areas where accessory dwelling units are allowed, maximum permitted residential density is 12 dwelling units per acre. To facilitate development of the project as proposed, the project site would be rezoned as PD and would result in 51 new residential units. As such, the proposed project would introduce fewer residential uses and a lower density than previously assumed in the General Plan EIR. Therefore, while the proposed project's GHG emissions per service population are higher than the service population emissions identified in the General Plan EIR, it is assumed that the proposed project would result in fewer total project operational emissions than were previously assumed for the project site in the General Plan EIR.

Further, the Housing Element sites inventory identifies 51 dwelling units on the project site. The Housing Element Addendum did not quantify GHG emissions associated with the Housing Element Update but found that GHG emissions associated with the Housing Element would be significant and unavoidable but would not exceed the significant and unavoidable impacts evaluated in the General Plan EIR. Therefore, since the proposed project would be consistent with the uses assumed in the Housing Element Addendum, the proposed project would contribute to the significant and unavoidable impacts identified in the General Plan EIR and Housing Element Addendum. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR and Housing Element Addendum.

b. Would the project conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases? ***(Potentially Significant Impact, No New Impact)***

Applicable plans adopted for the purpose of reducing GHG emissions include the 2022 Scoping Plan, Plan Bay Area, and the City's CAP. As such, the proposed project was evaluated for consistency with those plans to demonstrate whether the proposed project would conflict with any applicable plan, policy, or regulation of an agency adopted for the purpose of reducing the GHG emissions.

Scoping Plan. The following discussion evaluates the proposed project according to the goals of the 2022 Scoping Plan, Executive Order (EO) B-30-15, Senate Bill (SB) 32, and Assembly Bill (AB) 197.

EO B-30-15 added the immediate target of reducing GHG emissions to 40 percent below 1990 levels by 2030. The CARB released a second update to the Scoping Plan, the 2017 Scoping Plan, to reflect the 2030 target set by EO B-30-15 and codified by SB 32. SB 32 affirms the importance of addressing climate change by codifying into statute the GHG emissions reductions target of at least 40 percent below 1990 levels by 2030 contained in EO B-30-15. SB 32 builds on AB 32 and keeps the State on the path toward achieving the 2050 objective of reducing emissions to 80 percent below 1990 levels. The companion bill to SB 32, AB 197 provides additional direction to the CARB related to the adoption of strategies to reduce GHG emissions. Additional direction in AB 197 intended to provide easier public access to air emissions data that are collected by the CARB was posted in December 2016.

The 2022 Scoping Plan assesses progress toward the statutory 2030 target while laying out a path to achieving carbon neutrality no later than 2045. The 2022 Scoping Plan focuses on outcomes needed to achieve carbon neutrality by assessing paths for clean technology, energy deployment, natural

and working lands, and others, and is designed to meet the State's long-term climate objectives and support a range of economic, environmental, energy security, environmental justice, and public health priorities.

The 2022 Scoping Plan focuses on building clean energy production and distribution infrastructure for a carbon-neutral future, including transitioning existing energy production and transmission infrastructure to produce zero-carbon electricity and hydrogen, and utilizing biogas resulting from wildfire management or landfill and dairy operations, among other substitutes. The 2022 Scoping Plan states that in almost all sectors, electrification will play an important role. The 2022 Scoping Plan evaluates clean energy and technology options and the transition away from fossil fuels, including adding four times the solar and wind capacity by 2045 and about 1,700 times the amount of current hydrogen supply. As discussed in the 2022 Scoping Plan, EO N-79-20 requires that all new passenger vehicles sold in California will be zero-emission by 2035, and all other fleets will have transitioned to zero-emission as fully possible by 2045, which will reduce the percentage of fossil fuel combustion vehicles.

As identified above, the 2022 Scoping Plan contains GHG reduction measures that work towards reducing GHG emissions, consistent with the targets set by EO B-30-15 and codified by SB 32 and AB 197. The measures applicable to the proposed project include energy efficiency measures, water conservation and efficiency measures, and transportation and motor vehicle measures, as qualitatively discussed below.

Energy Measures. Energy-efficient measures are intended to maximize energy efficiency building and appliance standards, pursue additional efficiency efforts including new technologies and new policy and implementation mechanisms, and pursue comparable investment in energy efficiency from all retail providers of electricity in California. In addition, these measures are designed to expand the use of green building practices to reduce the carbon footprint of California's new and existing inventory of buildings. The proposed project would comply with current California Energy Code and CALGreen standards. However, the proposed project would not be all-electric and would include natural gas. The elimination of natural gas in new development would help projects implement their "fair share" of achieving long-term 2045 carbon neutrality consistent State goals. As such, if a project does not utilize natural gas, a lead agency can conclude that it would be consistent with achieving the 2045 neutrality goal and will not have a cumulative considerable impact on climate change. Therefore, since the proposed project would include natural gas, and the proposed project would not be consistent with the applicable energy measures.

Water Conservation and Efficiency Measures. Water conservation and efficiency measures are intended to continue efficiency programs and use cleaner energy sources to move and treat water. Increasing the efficiency of water transport and reducing water use would reduce GHG emissions. As identified above, the proposed project would comply with current CALGreen Code standards, which include a variety of different measures, including reduction of wastewater and water use. In addition, the proposed project would be required to comply with the California Model Water Efficient Landscape Ordinance. Therefore, the proposed project would comply with applicable water conservation and efficiency measures.

Transportation and Motor Vehicle Measures. The goal of transportation and motor vehicle measures is to develop regional GHG emissions reduction targets for passenger vehicles. Specific regional emission targets for transportation emissions would not directly apply to the proposed project. The second phase of Pavley standards will reduce GHG emissions from new cars by 34 percent from 2016 levels by 2025, resulting in a 3 percent decrease in average vehicle emissions for all vehicles by 2020. The majority of vehicles traveling to the project site would comply with the Pavley II (LEV III) Advanced Clean Cars Program. Therefore, the proposed project would comply with applicable transportation and motor vehicle measures.

The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would not be developed and would remain as private open space. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding adjacent residential, recreational, and public and semi-public uses, as described in Section 2.1.4, Surrounding Land Uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation.

In addition, the 2022 Scoping Plan includes key project attributes that reduce operational GHG emissions in Appendix D, Local Actions,[65] of the 2022 Scoping Plan. A summary of the proposed project's consistency with the 2022 Scoping Plan's key project attributes identified in Appendix D of the 2022 Scoping Plan is shown in **Table 4.8.B.**

Plan Bay Area. As described above, Plan Bay Area 2050 is a State-mandated, integrated long-range transportation and land use plan. Plan Bay Area 2050 includes 11 goals and 35 performance targets covering four broad areas: housing, economic, transportation, and environmental. These targets enable the plan to be evaluated by its performance in areas identified as key regional concerns, including equitable access, economic vitality, and transportation system effectiveness. **Table 4.8.C** includes an evaluation of the proposed project's consistency with Plan Bay Area 2050 goals and performance targets.

[65] California Air Resources Board (CARB). 2022. *2022 Scoping Plan, Appendix D Local Actions.* November. Website: https://ww2.arb.ca.gov/sites/default/files/2022-11/2022-sp-appendix-d-local-actions.pdf (accessed February 2024).

Table 4.8.B: Project Consistency with 2022 Scoping Plan Key Project Attributes

Priority Areas	Key Project Attribute	Project Consistency
Transportation Electrification	Provides EV charging infrastructure that, at minimum, meets the most ambitious voluntary standard in the California Green Building Standards Code at the time of project approval.	***Consistent.*** The proposed project would provide electric vehicle charging capabilities that meet the requirements of the latest version of CALGreen. As such, the proposed project would be consistent with this key project attribute.
VMT Reduction	Is located on infill sites that are surrounded by existing urban uses and reuses or redevelops previously undeveloped or underutilized land that is presently served by existing utilities and essential public services (e.g., transit, streets, water, sewer).	***Consistent.*** The project site is located in an urban area in Vallejo and is generally surrounded by residential, recreational, and open space uses. In addition, the project site is presently served by existing utilities and essential public services (e.g., transit, streets, water, sewer). The proposed project would be consistent with this key project attribute.
	Does not result in the loss or conversion of natural and working lands.	***Consistent.*** The City of Vallejo General Plan 2040 designates the project site as Mix of Housing Types (R-MH) and Primarily Single Family (R-SF). The project site consists of undeveloped grassland with scattered mature trees with no existing development or improvements. The project site is classified as "Grazing Land" and "Urban and Built-Up Land" by the California Department of Conservation (DOC). The proposed project does not consist of natural or working lands; therefore, the proposed project would be consistent with this key project attribute.
	Consists of transit-supportive densities (minimum of 20 residential dwelling units per acre) or is in proximity to existing transit stops (within 0.50 mile) or satisfies more detailed and stringent criteria specified in the region's SCS.	***Consistent.*** The proposed project would result in the development of a residential subdivision on the project site. The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would remain undeveloped as private hillside area and open space. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding residential, recreational, and public and semi-public uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation, consistent with the intent of this key attribute.

Table 4.8.B: Project Consistency with 2022 Scoping Plan Key Project Attributes

Priority Areas	Key Project Attribute	Project Consistency
	Reduces parking requirements by: eliminating parking requirements or including maximum allowable parking ratios (i.e., the ratio of parking spaces to residential units or square feet); or providing residential parking supply at a ratio of less than one parking space per dwelling unit; or for multifamily residential development, requiring parking costs to be unbundled from costs to rent or own a residential unit.	***Consistent.*** The proposed project would provide 102 covered garage spaces (2 per unit), 102 driveway stalls (2 per unit), 24 on-street stalls, and 1 mailbox parking stall, for a total of 229 parking spaces. However, as discussed above, the project would support the ability of residents and visitors to use alternative modes of transportation, consistent with the intent of this key attribute.
	At least 20 percent of units included are affordable to lower-income residents.	***Not Consistent.*** The proposed project would not include affordable units.
	Results in no net loss of existing affordable units .	***Consistent.*** The proposed project would not result in a net loss of existing affordable units. The proposed project would provide 51 dwelling units to comply with the Housing Element sites inventory which identifies 51 dwelling units on the project site and the project would be consistent with this key project attribute.
Building Decarbonization	Uses all-electric appliances without any natural gas connections and does not use propane or other fossil fuels for space heating, water heating, or indoor cooking	***Not Consistent.*** The proposed project would not be all-electric.

VMT = vehicle miles traveled

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
Housing Strategies		
Protect and Preserve Affordable Housing	**H1. Further strengthen renter protections beyond state law.** Building upon recent tenant protection laws, limit annual rent increases to the rate of inflation, while exempting units less than 10 years old.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not apply to the project.
	H2. Preserve existing affordable housing. Acquire homes currently affordable to low and middle-income residents for preservation as permanently deed-restricted affordable housing.	***Not Applicable.*** The project site does not include any existing affordable housing.
Spur Housing Production for Residents of All Income Levels	**H3. Allow a greater mix of housing densities and types in Growth Geographies.** Allow a variety of housing types at a range of densities to be built in Priority Development Areas, select Transit-Rich Areas and select High-Resource Areas.	***Consistent.*** The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would remain as private open space. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding residential, recreational, and public and semi-public uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation. As such, the proposed project would not conflict with the Air District's initiatives to increase the use of alternative means of transportation, consistent with the intent of this measure.
	H4. Build adequate affordable housing to ensure homes for all. Construct enough deed-restricted affordable homes to fill the existing gap in housing for the unhoused community and to meet the needs of low-income households.	***Not Consistent.*** The proposed project would not include affordable units; however, the proposed project would help to address the California housing shortage and would increase the number of residences available to bay area residents. Through increasing housing opportunities, the proposed project would be consistent with State and regional goals to advance the availability of fair housing.

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
	H5. Integrate affordable housing into all major housing projects. Require a baseline of 10-20% of new market-rate housing developments of five units or more to be affordable to low-income households.	***Not Consistent.*** As discussed above, the proposed project would not include affordable units; however, the proposed project would help to address the California housing shortage and would increase the number of residences available to bay area residents. Through increasing housing opportunities, the proposed project would be consistent with State and regional goals to advance the availability of fair housing.
	H6. Transform aging malls and office parks into neighborhoods. Permit and promote the reuse of shopping malls and office parks with limited commercial viability as neighborhoods with housing for residents at all income levels.	***Not Applicable.*** The project site does not include an existing mall or office parks.
Create Inclusive Communities	**H7. Provide targeted mortgage, rental and small business assistance to Equity Priority Communities.** Provide assistance to low-income communities and communities of color to address the legacy of exclusion and predatory lending, while helping to grow locally owned businesses.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	H8. Accelerate reuse of public and community-owned land for mixed-income housing and essential services. Help public agencies, community land trusts and other non-profit landowners accelerate the development of mixed-income affordable housing.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
Economic Strategies		
Improve Economic Mobility	**EC1. Implement a statewide universal basic income.** Provide an average $500 per month payment to all Bay Area households to improve family stability, promote economic mobility and increase consumer spending.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	EC2. Expand job training and incubator programs. Fund assistance programs for establishing new businesses, as well as job training programs, primarily in historically disinvested communities.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	EC3. Invest in high-speed internet in underserved low-income communities. Provide direct subsidies and construct public infrastructure to ensure all communities have affordable access to high-speed internet.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
Shift the Location of Jobs	**EC4. Allow greater commercial densities in Growth Geographies.** Allow greater densities for new commercial development in select Priority Development Areas and Transit-Rich Areas to encourage more jobs to locate near public transit.	***Not Applicable.*** The proposed project would not include new commercial development; therefore, this measure would not be applicable to the project.
	EC5. Provide incentives to employers to shift jobs to housing-rich areas well served by transit. Provide subsidies to encourage employers to relocate off ices to housing-rich areas near regional rail stations.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	EC6. Retain and invest in key industrial lands. Implement local land use policies to protect key industrial lands, identified as Priority Production Areas, while funding key infrastructure improvements in these areas.	***Not Applicable.*** The proposed project would not include new industrial development; therefore, this measure would not be applicable to the project.
Transportation Strategies		
Maintain and Optimize the Existing System	**T1. Restore, operate and maintain the existing system.** Commit to operate and maintain the Bay Area's roads and transit infrastructure while reversing pandemic-related cuts to total transit service hours.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	T2. Support community-led transportation enhancements in Equity Priority Communities. Provide direct funding to historically marginalized communities for locally identified transportation needs.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	T3. Enable a seamless mobility experience. Eliminate barriers to multi-operator transit trips by streamlining fare payment and trip planning while requiring schedule coordination at timed transfer hubs.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	T4. Reform regional transit fare policy. Streamline fare payment and replace existing operator- specific discounted fare programs with an integrated fare structure across all transit operators.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	T5. Implement per-mile tolling on congested freeways with transit alternatives. Apply a per-mile charge on auto travel on select congested freeway corridors where transit alternatives exist, with discounts for carpoolers, low-income residents, and off-peak travel; and reinvest excess revenues into transit alternatives in the corridor.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	T6. Improve interchanges and address highway bottlenecks. Rebuild interchanges and widen key highway bottlenecks to achieve short- to medium-term congestion relief.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
	T7. Advance other regional programs and local priorities. Fund regional programs like motorist aid and 511 while supporting local transportation investments on arterials and local streets.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
Create Healthy and Safe Streets	**T8. Build a Complete Streets network.** Enhance streets to promote walking, biking and other micro-mobility through sidewalk improvements, car-free slow streets, and 10,000 miles of bike lanes or multi-use paths.	***Consistent.*** The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would remain undeveloped. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding residential, recreational, and public and semi-public uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation. As such, the proposed project would not conflict with the Air District's initiatives to increase the use of alternative means of transportation, consistent with the intent of this measure.
	T9. Advance regional Vision Zero policy through street design and reduced speeds. Reduce speed limits to between 20 and 35 miles per hour on local streets and 55 miles per hour on freeways, relying on design elements on local streets and automated speed enforcement on freeways.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
Build a Next-Generation Transit Network	**T10. Enhance local transit frequency, capacity and reliability.** Improve the quality and availability of local bus and light rail service, with new bus rapid transit lines, South Bay light rail extensions, and frequency increases focused in lower-income communities.	***Not Applicable.*** This strategy is not applicable as the proposed project would consist of a residential development.
	T11. Expand and modernize the regional rail network. Better connect communities while increasing frequencies by advancing the Link21 new transbay rail crossing, BART to Silicon Valley Phase 2, Valley Link, Caltrain Downtown Rail Extension and Caltrain/High-Speed Rail grade separations, among other projects.	***Not Applicable.*** This strategy is not applicable as the proposed project would consist of a residential development.

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
	T12. Build an integrated regional express lanes and express bus network. Complete the buildout of the regional express lanes network to provide uncongested freeway lanes for new and improved express bus services, carpools and toll-paying solo drivers.	***Not Applicable.*** This strategy is not applicable as the proposed project would consist of a residential development.
Environmental Strategies		
Reduce Risks From Hazards	**EN1. Adapt to sea level rise.** Protect shoreline communities affected by sea level rise, prioritizing low-cost, high-benefit solutions and providing additional support to vulnerable populations.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	EN2. Provide means-based financial support to retrofit existing residential buildings. Adopt building ordinances and incentivize retrofits to existing buildings to meet higher seismic, wildfire, water and energy standards, providing means-based subsidies to off-set associated costs.	***Not Applicable.*** This strategy is not applicable as the proposed project would not consist of a building retrofit.
	EN3. Fund energy upgrades to enable carbon neutrality in all existing commercial and public buildings. Support electrification and resilient power system upgrades in all public and commercial buildings.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
Expand Access to Parks and Open Space	**EN4. Maintain urban growth boundaries.** Using urban growth boundaries and other existing environmental protections, focus new development within the existing urban footprint or areas otherwise suitable for growth, as established by local jurisdictions.	***Consistent.*** The proposed project would develop a residential development with undeveloped open space on a project site generally surrounded by single-family residential neighborhoods.
	EN5. Protect and manage high-value conservation lands. Provide strategic matching funds to help conserve and maintain high-priority natural and agricultural lands, including but not limited to, Priority Conservation Areas and wildland-urban interface areas.	***Not Applicable.*** This is a community policy based goal; therefore, this measure would not be applicable to the project.
	EN6. Modernize and expand parks, trails and recreation facilities. Invest in quality parks, trails and open spaces that provide inclusive recreation opportunities for people of all backgrounds, abilities and ages to enjoy.	***Not Applicable.*** This strategy is not applicable as the proposed project would consist of a residential development. However, 9.74 acres of the proposed project would remain undeveloped open space. The project site would also include 3.55 acres of common area open space that would include two bioretention areas totaling 7,617 square feet, walkways, a loop walk around a flexible use turf area, and a vista overlook for residents.

Table 4.8.C: Project Consistency with Plan Bay Area 2050

Goal	Target	Project Consistency
Reduce Climate Emissions	**EN7. Expand commute trip reduction programs at major employers.** Set a sustainable commute target for major employers as part of an expanded Bay Area Commuter Benefits Program, with employers responsible for funding incentives and disincentives to shift auto commuters to any combination of telecommuting, transit, walking and/or bicycling.	***Not Applicable.*** This strategy is not applicable as the proposed project would consist of a residential development.
	EN8. Expand clean vehicle initiatives. Expand investments in clean vehicles, including more fuel-efficient vehicles and electric vehicle subsidies and chargers.	***Consistent .*** The proposed project would provide electric vehicle charging capabilities that meet the requirements of the latest version of the CALGreen. As such, the proposed project would be consistent with this measure.
	EN9. Expand transportation demand management initiatives. Expand investments in programs like vanpools, bikeshare, carshare and parking fees to discourage solo driving.	***Consistent.*** As discussed above, the proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would remain undeveloped. The residential portion of the proposed project would include 51 residential lots, open space, and related infrastructure improvements. The project site is located within walking or bicycling distance from the surrounding residential, recreational, and public and semi-public uses. Additionally, the project site is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway. The Amtrak station in Vallejo is approximately 4 miles northwest of the project site, and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is approximately 3.5 miles northwest of the project site. Therefore, the project would support the ability of residents and visitors to use alternative modes of transportation. As such, the proposed project would not conflict with the Air District's initiatives to increase the use of alternative means of transportation, consistent with the intent of this measure.

Sources: Metropolitan Transportation Commission and Association of Bay Area Governments (2021); LSA (September 2025).
CALGreen Code = California Green Building Standards Code

Vallejo Climate Action Plan. As discussed above, the City's CAP identifies emission reduction goals to reduce GHG emissions in the city by 15 percent below the 2005 emission levels by 2020, consistent with AB 32. The proposed project would not be operational until post-2020; therefore, because the City's CAP was prepared based on the 2020 GHG targets, which are now superseded by the 2030 GHG targets established in SB 32, the City's CAP would not apply for streamlining. However, the CAP sets forth goals, measures, and actions to achieve emission

reductions; therefore, a qualitative analysis of the proposed project's consistency with these goals, measures, and actions is provided. These goals include measures related to City Government Operations (CG), Community Engagement (CE), Energy (E), Renewable Energy (RE), Transportation Demand Management (TDM), Optimized Travel (OT), Water, Wastewater, and Solid Waste (W), Off-Road Equipment (OR), and Adaptation (A). The following measures are applicable to the proposed project:

- **E-2. Building Standards:** Require all new development to meet the minimum California Title 24 and California Green Building Standards Code requirements, as amended, and encourage new development to exceed the minimum requirements.

- **E-4. Cool Roofs and Pavements.** Increase tree planting and the use of cool roofs and cool pavement materials to reduce the urban heat island effect and corresponding energy consumption. Implement tree replacement policy for projects where tree removal is necessary.

- **TDM-2. Mixed-Use, Higher-Density, Transit-Oriented Development.** Promote mixed-use, higher-density development near transit nodes.

- **TDM-3. Bicycle and Pedestrian Travel.** Expand and link the network of pedestrian and bicycle paths and facilities through preparation of a Bicycle and Pedestrian Master Plan, with the goal of increasing the bicycle and pedestrian mode share 20 percent by 2035.

- **TDM-8. Jobs/Housing Balance.** Plan for an improved jobs/housing balance in order to reduce the need for long-distance travel from residences to places of work.

- **OT-1. Efficient and Alternative Fuel Vehicles.** Support the expanded use of efficient and alternative fuel vehicles.

- **OT-4. Zero Emission Vehicle Stations.** Provide electric vehicle charging stations.

- **W-2. Development Standards for Water Conservation.** Require water conservation in all new buildings and landscapes.

- **W-3. Recycling and Composting Efforts.** Support waste diversion through composting and recycling programs.

- **W-4. Development Standards for Recycling and Composting.** Require waste diversion and use of recycled materials in new development.

- **OR-2. Construction Equipment.** Reduce emissions from heavy-duty construction equipment by limiting idling and utilizing cleaner fuels, equipment, and vehicles.

The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining portion of the project site would remain undeveloped. As demonstrated in Section 4.17, Transportation, the proposed

project is not expected to result in a significant increase in the generation of vehicle trips or VMT. Additionally, the proposed project would provide electric vehicle charging capabilities that meet the requirements of the latest version of CALGreen as part of the final project designs. The proposed project would also be required to comply with the latest Title 24 standards, regarding energy conservation and green building standards, reduction of wastewater and water use, and waste reduction. In addition, the proposed project would include an 8-acre parcel that would remain private open space and the residential portion of the project site would provide 3.55 acres of common open space, consistent with the urban cooling measure of the CAP. As such, the proposed project would be consistent with applicable CAP measures. In addition, the idling times for construction vehicles would be restricted to 5 minutes or less and construction workers would be required to shut off idle equipment, as required by **General Plan EIR Mitigation Measure AQ 2b.1** as detailed in Section 4.3, Air Quality.

Conclusion. As described above, the proposed project would generally be consistent with the 2022 Scoping Plan, Plan Bay Area 2050, and the City's CAP. The proposed project would comply with the majority of regulations adopted for the purpose of reducing GHG emissions. Although the proposed project would not install fewer on-site parking spaces than required by code, the proposed project would support the ability of residents and visitors to use alternative modes of transportation. In addition, as discussed above, the elimination of natural gas in new development would help projects implement their "fair share" of achieving long-term 2045 carbon neutrality consistent with State goals. Therefore, since the proposed project would include natural gas, it would not be considered consistent with the long-term State GHG reduction goals and emission targets required in AB 32, SB 32, EO B-30-15, EO B-48-18, and AB 1279.

As discussed above, the General Plan EIR found that while the General Plan would be consistent with the regional objectives of Plan Bay Area and the City's CAP and the policies and programs in the General Plan would ensure substantial progress toward the long-term GHG reductions goals for 2050, additional State and federal measures are necessary to achieve the more aggressive targets established for 2050 in EO S-03-05. The General Plan EIR concluded that impacts would be significant and unavoidable. Therefore, similar to the findings of the General Plan EIR and Housing Element Addendum, the proposed project would conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHG emissions. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR and Housing Element Addendum. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.9 HAZARDS AND HAZARDOUS MATERIALS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	☐	☒	☐	☐	☒
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	☐	☒	☐	☐	☒
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	☐	☐	☒	☐	☒
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	☐	☐	☐	☒	☒
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	☐	☐	☐	☒	☒
f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐	☒
g. Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?	☐	☐	☒	☐	☒

4.9.1 Prior Environmental Analysis

Chapter 4.7 of the General Plan EIR analyzed impacts related to hazards and hazardous materials associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to hazards and hazardous materials due to compliance with existing regulatory requirements including, but not limited to, the Hazardous Materials Transportation Act, the Resource Conservation and Recovery Act, the California Hazardous Materials Management Act, the California Health and Safety Code, California Code of Regulations, California Division of Occupational Safety and Health (Cal/OSHA) regulations, and other regulatory programs overseen by the Regional Water Quality Control Board, Department of Toxic Substances Control, and Solano County Department of Environmental Management. No mitigation measures were prescribed. However, the General Plan includes the following goals, policies, and actions related to hazards and hazardous materials which would be applicable to the proposed project:

- **Goal NBE-5: Hazard Protection**: Protect life and property from natural and human-made hazards.

- **Policy NBE-5.3: Health and Safety Codes**. Enforce development regulations and building code requirements to protect residents, businesses, and employees from flooding, liquefaction, earthquakes, fires, and other hazards.
  - **Action NBE-5.4C**: Continue to use the development review process to ensure that development is planned and constructed to resist the encroachment of uncontrolled fire.
- **Policy NBE-5.10: Site Safety**. Ensure that affected soil, groundwater, or buildings will not have the potential to adversely affect the environment or the health and safety of site occupants.
  - **Action NBE-5.10A**: Continue to require remediation of hazardous material releases from previous land uses as part of any redevelopment activities.
  - **Action NBE-5.10B**: Continue to require environmental site assessments stipulated by State and County regulations for potential hazardous material releases from prior uses and assessments for lead and asbestos present in building materials.
- **Policy NBE-5.11: Risk Reduction**. Reduce the risk of hazardous materials accidents, spills, and vapor releases, and minimize the effects of such incidents if they occur.
- **Policy MTC-2.3: Emergency Response Routes**. Ensure adequate emergency vehicle access in all areas of Vallejo.
- **Action MTC-2.3B**: Continue to involve the Police and Fire Departments in the development review process to ensure that applicable requirements for emergency access are met.

4.9.2 Background

The following discussion is based on the findings from the *Phase I Environmental Site Assessment*[66] (Phase I ESA) prepared for the project site and the peer review of the Phase I ESA conducted as part of the environmental review process[67]. The Phase I ESA and peer review are included in **Appendix F** of this Initial Study.

The project site is vacant and undeveloped. The Phase I ESA completed for the proposed project determined that there are no recognized environmental conditions (RECs) identified in connection with the project site after completing a review of local, State, tribal, and federal environmental record sources; standard historical sources; aerial photographs; fire insurance maps; physical setting sources; a reconnaissance of the project site; and written/oral interviews with persons knowledgeable about past and current site use.

66 ENGEO. 2022b. *Vallejo Properties – Glen Cove, Vallejo, California Phase I Environmental Site Assessment*. April 26.

67 Baseline Environmental Consulting. 2025. *Peer Review of Phase I Environmental Site Assessment, Vista Cove Planned Development Project, Vallejo, California.* March 25.

4.9.3 Impact Analysis

a. Would the project create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

The proposed project involves the subdivision of the 20.13-acre site and construction of 51 residential lots, internal roadways, undeveloped land, and related infrastructure improvements. Because the proposed project is for private residential use, it would generally not involve transport, use, or disposal of significant quantities of hazardous materials. Only small quantities of chemicals would be used for routine maintenance that would not pose a significant threat to human or environmental health.

Construction of the proposed project would involve the use and transport of hazardous materials. These materials could include fuels, oils, paints, and other chemicals used during construction activities. Handling and transportation of hazardous materials could result in accidental releases or spills and associated health risks to workers, the public, and the environment. To prevent the accidental release of hazardous materials into aquatic features within the project site that drain to the Carquinez Strait, **Project Specific Mitigation Measures HAZ-1 and HAZ-2** would be required, which entail the preparation and implementation of an Emergency Response and Cleanup Plan and properly completing all construction equipment maintenance, refueling, and washing activities outside of riparian areas.

Transport and use of hazardous materials would be subject to all applicable State and federal laws, such as the Hazardous Materials Transportation Act, the Resource Conservation and Recovery Act, the California Hazardous Materials Management Act, the California Health and Safety Code, and CCR Title 8 and Title 22. Compliance with existing regulations and implementation of **Project Specific Mitigation Measures HAZ-1 and HAZ-2** would ensure that the proposed project would not create a significant hazard to the public or the environment associated with the routine transport, use, or disposal of hazardous materials by ensuring these materials are properly handled during construction of the proposed project. These are standard measures applied to construction activities within sensitive natural areas. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Project Specific Mitigation Measure HAZ-1	**Emergency Response and Cleanup Plan.** Prior to commencement of construction activities, the construction contractor shall prepare an Emergency Response and Cleanup Plan. The construction contractor shall implement the plan during construction. The plan shall detail the methods to be used to contain and clean up a spill of petroleum products or other hazardous materials in the work area.

Project Specific Mitigation Measure HAZ-2 **Construction Equipment Maintenance, Refueling, and Washing Activities.** During construction, the construction contractor shall ensure that all equipment maintenance, refueling, and storage are conducted on level ground outside the aquatic features within the project site, away from concentrated flows of stormwater and drainage courses. Drip pans or absorbent pads shall be used during equipment refueling and maintenance activities. Adequate quantities of absorbent spill cleanup material and spill kits shall be kept in the refueling and maintenance area and on fuel trucks. Spill cleanup materials shall be disposed of immediately after use.

b. Would the project create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

There are two main ways that the public and/or the environment could be affected by the release of hazardous materials from the project site into the environment: (1) exposing workers and/or the public to potentially contaminated soil and groundwater during construction and/or operation of the project; or (2) exposing workers and/or the public to hazardous building materials (e.g., lead-based paint, asbestos) during demolition of existing structures.

The proposed project would not involve the demolition of any existing structures. The project site is vacant and undeveloped. Therefore, it is unlikely that the soil and groundwater are contaminated with significant toxic or hazardous materials that would be released during construction. Additionally, the Phase I ESA completed for the proposed project determined that there are no recognized environmental conditions (RECs) identified in connection with the project site after completing a review of local, State, tribal, and federal environmental record sources; standard historical sources; aerial photographs; fire insurance maps; physical setting sources; a reconnaissance of the project site; and written/oral interviews with persons knowledgeable about past and current site use.

As described above, hazardous materials could be used at the project site during construction and operation of the proposed project. Improper use, storage, or handling could result in a release of hazardous materials into the environment, which could pose a risk to construction workers and the public. However, the project sponsor would be required to comply with existing government regulations related to the use and disposal of these materials, as detailed previously in Section 4.9.a, including Occupational Safety and Health Administration (OSHA) and California Division of Occupational Safety and Health (Cal/OSHA) regulations, CCR Title 8; the Construction General Permit (CGP); and United States Department of Transportation (DOT), Resource Conservation and Recovery Act (RCRA), and State regulations. Additionally, the proposed project would be subject to **Project Specific Mitigation Measures HAZ-1 and HAZ-2** would be required, which require the preparation

and implementation of an Emergency Response and Cleanup Plan and properly completing all construction equipment maintenance, refueling, and washing activities outside of riparian areas. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school? ***(Less than Significant Impact, No New Impact)***

The nearest school to the project site is St. Patrick-St. Vincent High School, located approximately 0.1 mile north of the project site. During operation of the proposed residential project, only small quantities of chemicals would be used for routine maintenance, which would not pose a significant threat to human or environmental health. Additionally, as noted in Sections 4.9.a and 4.9.b, the proposed project would comply with all applicable State and federal laws, such as the Hazardous Materials Transportation Act, the Resource Conservation and Recovery Act, the California Hazardous Materials Management Act, California Health and Safety Code, and CCR Title 8 and Title 22. Construction of the proposed project would not create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials or create a hazard to the public and environment through reasonably foreseeable upset and accident conditions. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment? ***(No Impact, No New Impact)***

The project site is not included on any list of hazardous materials site compiled pursuant to Government Code Section 65962.5,[68] and no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project be located within an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area? ***(No Impact, No New Impact)***

The project site is not located within 2 miles of a public airport or public use airport. The closest airports are Napa County Airport and Buchanan Field Airport, which are located approximately 9.5 miles northwest and southeast of the project site, respectively. Therefore, the proposed project would not result in a safety hazard or excessive noise for people residing or working in the area, and no impact would occur. No new impacts or substantially more severe significant impacts would

[68] California Environmental Protection Agency (CalEPA). 2024. Cortese List Data Resources. Website: https://calepa.ca.gov/sitecleanup/corteselist/ (accessed March 5, 2025).

result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

f. Would the project impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan? ***(Less Than Significant Impact, No New Impact)***

The Vallejo General Plan 2040 Nature and Built Environment chapter addresses natural and human-made hazards and dangers and offers methods to mitigate natural hazards, enhance disaster resistance, and promote public safety. The element focuses on natural disasters, including earthquake hazards (surface faulting, ground shaking, liquefaction, landslides, and tsunamis) and weather-related hazards (flooding, landslides, wildfires, drought, and climate change). The element does not identify specific evacuation routes within Vallejo.

The Solano County General Plan Public Health and Safety chapter discusses disaster preparedness, and the Solano County Office of Emergency Services (OES) is responsible for creating and maintaining the Solano County Emergency Operations Plan (EOP). The EOP establishes management organization and assigns functions and tasks consistent with California's Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS). The EOP provides for the integration and coordination of planning efforts for Solano County, and its intent is to provide direction on how to respond for an emergency form the onset through extended response, and into the recovery process. The Solano County OES also prepares and maintains the Solano County Multi-Jurisdictional Hazard Mitigation Plan (MJHMP), which identifies risks and ways to minimize damage from natural and human-made disasters. Section 7 of the MJHMP details the hazard mitigation planning elements specific to the City of Vallejo. Neither of these plans identify specific evacuation routes within the city or the county.

The proposed project would be consistent with the policies outlined in the Solano County General Plan Public Health and Safety chapter, the City of Vallejo General Plan Nature and Built Environment chapter, the Solano County EOP, and the Solano County MJHMP. The proposed project would not alter or block adjacent roadways, and implementation of the proposed project would not be expected to impair the function of nearby emergency evacuation routes. In addition, operation of the proposed project would not cause permanent alterations to vehicle circulation routes and patterns or impede public access or travel on public rights-of-way, as the proposed internal roadways would be accessible to neighborhood users and would terminate at the project site. Prior to approval of final maps and improvement plans for any development project within Vallejo, plan review and approval by the Vallejo Fire District is required. Internal roadways and ingress/egress for the project site would be required to meet State and local standards regarding turning radius, road width, and emergency vehicle access. Therefore, potential impacts to an adopted emergency response plan or emergency evacuation plan would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

g. Would the project expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires? ***(Less Than Significant Impact, No New Impact)***

According to the City of Vallejo General Plan 2040, the project site is located within a moderate- to high-risk wildfire area.[69] There are no Very High Fire Hazard Areas in or adjacent to Vallejo.

Construction of the proposed project would involve the use of some flammable materials such as gasoline, diesel fuel, hydraulic oils, paints, solvents, or other wastes. During construction, there would be increased human activity and ignition sources, including equipment that could create sparks, be a source of heat, or leak flammable materials on the project site. However, all construction equipment is required to have fire suppression equipment (such as a fire extinguisher) on board or at the work site, secondary containment would be required for fuel-powered equipment, and a spill kit would be required to be kept on site during construction for use in case of any leaks or spills of flammable materials. These existing requirements would reduce the potential exacerbation of wildfire risks related to construction activities.

Operation of the proposed project would be consistent with adjacent residential uses and the allowable zoning for the project site. The proposed project would be subject to the design standards and guidelines as outlined in the City of Vallejo Municipal Code and would undergo Development Review to ensure that proposed structures conform with all applicable regulations. The proposed project would also be subject to requirements in Section 13000 et seq. of the California Health and Safety Code, the California Building Standards Code, and the California State Fire Code, which include regulations concerning the following: building standards for fire protection; fire protection and notification systems such as extinguishers and smoke alarms; safety for firefighters and emergency responders during emergency operations; minimum standards for hazardous vegetation and fuel management, defensible space, and building construction; and minimum standards for emergency access and water supply for fire response.

Compliance with these existing regulatory requirements would ensure that the proposed project would not exacerbate wildfire risks and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.10 HYDROLOGY AND WATER QUALITY

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?	☐	☐	☒	☐	☒
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	☐	☐	☒	☐	☒
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	☐	☐	☒	☐	☒
i. Result in substantial erosion or siltation on- or off-site;	☐	☐	☒	☐	☒
ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;	☐	☐	☒	☐	☒
iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	☐	☐	☒	☐	☒
iv. Impede or redirect flood flows?	☐	☐	☐	☒	☒
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	☐	☐	☐	☒	☒
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	☐	☐	☒	☐	☒

4.10.1 Prior Environmental Analysis

Chapter 4.8 of the General Plan EIR analyzed impacts to hydrology and water quality with build out of the General Plan, and determined that build out of the General Plan would result in less than significant impacts related to hydrology and water quality due to compliance with existing regulatory requirements including the SWRCB's CGP, the MRP, City of Vallejo Municipal Code, Vallejo Sanitation and Flood Control District Code, National Flood Insurance Program standards, and California Division of Safety of Dams standards. No mitigation measures were prescribed. However, the General Plan includes the following goals, policies, and actions related to hydrology and water quality which would be applicable to the proposed project:

- **Policy NBE-1.1: Natural Resources**. Protect and enhance hillsides, waterways, wetlands, and aquatic and wildlife habitat through land use decisions that avoid and mitigation potential environmental impacts on these resources to the extent feasible.

- **Policy NBE-1.7: Green Infrastructure**. Encourage the installation of green infrastructure, including tools such as permeable pavement, rain gardens, constructed wetlands, grassy

swales, rain barrels and cisterns, and green roofs, to treat stormwater, attenuate floods, increase groundwater recharge, and reduce urban heat islands.

- **Action NBE-1.14C**: Update the Green Building Standards Code to require the use of low flow plumbing fixtures, low volume irrigation systems, and drought-tolerant plant palettes.

- **Goal NBE-5: Hazard Protection**. Protect life and property from natural and human-made hazards.
  - **Policy NBE-5.4: Project Location and Design**. Prohibit development in any area where it is determined that the potential risk from natural hazards cannot be mitigated to acceptable levels.
    - **Action NBE-5.4A**: Continue to require geotechnical studies for land use proposals to determine engineering measures that may be necessary to adequately mitigate any seismic, flooding, sea level rise, landslide, erosion, or related risk.
    - **Action NBE-5.4B**: Continue to require drainage and erosion control measures for landslide-prone or geologically hazardous hillside areas to minimize risks to downhill areas.
    - **Action NBE-5.6D**: Continue to enforce City regulations that prohibit development, grading, and land modification activities that would adversely affect the local drainage system or create unacceptable erosion impacts.
  - **Policy NBE-5.7: Design for Stormwater Control**. Encourage new development and redevelopment to minimize the area of new roofs and paving.

4.10.2 Background

Unless otherwise noted, the following analysis is based on the *Preliminary Stormwater Control Plan*[70] and the *Drainage Study*[71] prepared for the proposed project. Copies of these reports are included in **Appendix G** of this Initial Study.

4.10.2.1 Water Quality Regulations

The State Water Resources Control Board (SWRCB) and nine Regional Water Quality Control Boards (RWQCBs) regulate the quality of surface water and groundwater bodies throughout California. In the Bay Area, including the project site, the San Francisco Bay RWQCB (Water Board) is responsible for implementation of the Water Quality Control Plan (Basin Plan). The Basin Plan establishes beneficial water uses and water quality objectives for waterways and water bodies within the region. Section 303(d) of the federal Clean Water Act (CWA) requires that states identify water bodies, including bays, rivers, streams, creeks, and coastal areas, that do not meet water quality

[70] Sancerra Vista Cove, LLC. 2023. *Preliminary Stormwater Control Plan for Vista Cove.* November.
[71] DK Engineering. 2023. Op. cit.

standards and the pollutants that are causing the impairment. Total Maximum Daily Loads (TMDLs) describe the maximum amount of a pollutant that a water body can receive while still meeting established water quality standards. A TMDL establishes limits for pollutant discharges into impaired water bodies.

Runoff water quality is regulated by the National Pollutant Discharge Elimination System (NPDES) Program (established through the federal CWA). The NPDES program objective is to control and reduce pollutant discharges to surface water bodies. Compliance with NPDES permits is mandated by State and federal statutes and regulations. Locally, the NPDES Program is administered by Water Board. Construction activities are subject to the SWRCB NPDES General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities, Order No. 2022-0057-DWQ, NPDES No. CAS000002 (CGP). Any construction activity, including grading, that would result in the disturbance of 1 acre or more would require compliance with SWRCB's CGP, which requires preparation of a SWPPP and implementation of Construction BMPs during construction activities. Construction BMPs would include, but not be limited to, Erosion Control and Sediment Control BMPs designed to minimize erosion and retain sediment on site, as well as Good Housekeeping BMPs to prevent spills, leaks, and discharge of construction debris and waste into receiving waters.

The proposed project would be subject to the California Regional Water Quality Control Board San Francisco Bay Region's Municipal Regional Stormwater NPDES Permit (MRP), which went into effect on July 1, 2022, by Order R2-2022-0018, NPDES Permit No. CAS612008. The MRP covers stormwater discharges from municipalities and local agencies in Alameda, Contra Costa, San Mateo, and Santa Clara counties; the cities of Fairfield, Suisun City, and Vallejo; and the VFWD, which have joined to form the Solano Stormwater Alliance (Solano Permittees). Provision C.3 of the MRP requires new development and redevelopment projects that would replace more than 5,000 square feet of existing impervious surfaces to include post-construction stormwater control in project designs. Under the Provision C.3 requirements, the preparation and submittal of a Stormwater Control Plan (SCP) would be required. The purpose of an SCP is to detail the design elements and implementation measures necessary to meet the post-construction stormwater control requirements of the MRP. In particular, SCPs must include Low Impact Development (LID) design measures, which reduce water quality impacts by preserving and recreating natural landscape features, minimizing imperviousness, and using stormwater as a resource rather than a waste product. Additionally, the preparation of a Stormwater Facility Operation and Maintenance Plan is required to ensure that stormwater control measures are inspected, maintained, and funded for the life of the project.

4.10.2.2 Project Site Hydrology

Under existing conditions, the project site consists entirely of pervious surface consisting primarily of grassland. There is no existing stormwater infrastructure on the project site, and the project site drains from west to east to Benicia State Park, where stormwater runoff converges and is directed to the Carquinez Strait.[72] The Carquinez Strait drains to the San Pablo Bay, which drains to the San

[72] DK Engineering. 2023. Op. cit.

Francisco Bay, which drains to the Pacific Ocean. The receiving waters for stormwater runoff from the project site are listed as impaired on the 303(d) list for several constituents.[73]

4.10.2.3 Water Quality

The Carquinez Strait is listed as an impaired water body for the following pollutants: chlordane, dichlorodiphenyltrichloroethane (DDT), dieldrin, dioxin compounds (including 2,3,7,8-TCDD), furan compounds, invasive species, mercury, polychlorinated biphenyls (PCBs), PCBs (dioxin-like), and selenium. The San Pablo Bay is listed as an impaired water body for the following pollutants: chlordane, DDT, dieldrin, dioxin compounds (including 2,3,7,8-TCDD), furan compounds, invasive species, mercury, PCBs, PCBs (dioxin like), and selenium. The San Francisco Bay, Central is listed as an impaired water body for the following pollutants: chlordane, DDT, dieldrin, dioxin compounds (including 2,3,7,8-TCDD), furan compounds, invasive species, mercury, PCBs, PCBs (dioxin like), selenium, and trash.

4.10.2.4 Groundwater

The project site is not located within a mapped Division of Water Rights groundwater basin boundary.[74]

4.10.2.5 Floodplains

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06095C0629G, the project site is located in Zone X, which is identified as an area of minimal flood hazard.[75]

4.10.3 Impact Analysis

a. Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality? ***(Less Than Significant Impact, No New Impact)***

Construction. The proposed project involves the subdivision of the 20.13-acre site and construction of 51 residential lots, internal roadways, undeveloped land and related infrastructure improvements. Construction activities would result in the disturbance of 10.3 acres of soil. Pollutants of concern during construction include sediments, trash, petroleum products, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. During construction activities, excavated soil would be exposed, and there would be an increased potential for soil erosion and sedimentation compared to existing conditions. In addition, chemicals, liquid products, petroleum products

[73] State Water Resources Control Board (SWRCB). 2024. *2024 California Integrated Report*. Website: https://www.waterboards.ca.gov/water_issues/programs/water_quality_assessment/2024-integrated-report.html (accessed March 5, 2025).

[74] State of California Department of Water Resources (DWR). DWR Mapping Tool. Website: https://sgma.water.ca.gov/webgis/index.jsp?appid=gasmaster&rz=true (accessed September 19, 2024).

[75] Federal Emergency Management Agency (FEMA). 2016. Flood Insurance Rate Map No. 06095C0629G. Map Revised August 3, 2016. Website: https://msc.fema.gov/portal/search (accessed July 5, 2024).

(e.g., paints, solvents, and fuels), and concrete-related waste may be spilled or leaked, and they have the potential to be transported via stormwater runoff into receiving waters.

Because construction of the proposed project would disturb greater than 1 acre of soil, the project is subject to the requirements of the CGP, which requires preparation of a SWPPP and implementation of construction BMPs during construction activities as detailed above**.** Construction BMPs would include, but not be limited to, Erosion Control and Sediment Control BMPs designed to minimize erosion and retain sediment on site, as well as Good Housekeeping BMPs to prevent spills, leaks, and discharge of construction debris and waste into receiving waters.

As detailed in the *Preliminary Geotechnical Exploration*[76] completed for the proposed project, no groundwater was encountered within the test pits, trench, and borings completed as part of the exploration. However, fluctuations in groundwater levels occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors. Construction of the proposed project would require excavation to a depth of up to 24 feet below the ground surface to accommodate foundations and utility infrastructure. Therefore, dewatering and shoring of groundwater may be required during construction activities involving excavation. Release of dewatered groundwater to surface waters can introduce total dissolved solids and other constituents to surface waters and could cause degradation of the receiving water quality. In the event that groundwater is encountered during construction and groundwater dewatering is necessary, any groundwater dewatering during excavation would be conducted in accordance with the requirements of the CGP. The CGP allows the discharge of dewatering effluent if the source of the water is uncontaminated groundwater and is properly filtered or treated using appropriate technology. The discharge of dewatering effluent is authorized under the CGP if the following conditions are met:

- The discharge does not cause or contribute to a violation of any water quality standard;
- The discharge does not violate any other provision of the CGP;
- The discharge is not prohibited by the applicable Basin Plan;
- The discharger has included and implemented specific BMPs required by the CGP to prevent or reduce the contact of the nonstormwater discharge with construction materials or equipment;
- The discharge does not contain toxic constituents in toxic amounts or (other) significant quantities of pollutants;
- The discharge is monitored and meets the applicable numeric action levels; and
- The discharger reports the sampling information in the annual report.

[76] ENGEO. 2022a. *Vallejo Properties – Vista Cove, Vallejo, California, Preliminary Geotechnical Exploration.* September 12.

If any of the above conditions are not satisfied, the discharge of dewatering effluent is not authorized by the CGP and the discharger must notify the local Regional Water Quality Control Board to determine whether a separate NPDES permit is necessary.

Adherence with the CGP, including implementation of the required SWPPP, Construction BMPs, and dewatering requirements, would ensure construction impacts related to surface water quality standards, waste discharge requirements, and surface water quality would be less than significant.

Operation. Pollutants of concern from long-term operations include pathogens (bacteria/viruses), nutrients, pesticides/herbicides, sediments/total suspended solids, trash and debris, and oil and grease. The City of Vallejo is under the purview of the MRP. Therefore, the proposed project would be subject to the requirements of Provision C.3 of the MRP because the project would result in new development consisting of more than 5,000 square feet of impervious surfaces. As such, the preparation and implementation of an SCP, including a Stormwater Facility Operation and Maintenance Plan, would be required. As discussed in Chapter 2.0, Project Description, the proposed project would include two detention basins and approximately 7,617 square feet of bioretention space that would be used for stormwater control and treatment to reduce pollutants of concern in stormwater prior to release into the marshland area adjacent to Benicia State Park. Therefore, compliance with the requirements of the MRP would ensure that operational impacts to water quality would be less than significant.

Overall, because the proposed project would be required to comply with existing regulations, including the CGP and the MRP, the proposed project would not violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin? ***(Less than Significant Impact, No New Impact)***

The project site is not located within a mapped Division of Water Rights groundwater basin boundary.[77] Impacts related to groundwater recharge are discussed below.

Construction. As detailed in the *Preliminary Geotechnical Exploration* completed for the proposed project, no groundwater was encountered within the test pits, trench, and borings completed as part of the exploration. However, fluctuations in groundwater levels occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors. Construction of the proposed project would require excavation to a depth of up to 24 feet below the ground surface to accommodate foundations and utility infrastructure. Therefore, dewatering and shoring of groundwater may be required during construction activities involving excavation. Such dewatering

[77] State of California Department of Water Resources (DWR). DWR Mapping Tool. Website: https://sgma.water.ca.gov/webgis/index.jsp?appid=gasmaster&rz=true (accessed September 19, 2024).

would be localized and temporary and would not result in the lowering of surrounding groundwater levels and would have to comply with the CGP, as detailed above.

Operation. The City of Vallejo provides water to the project site. The City's potable water supply is derived from various surface sources, including the Sacramento River watershed; the Solano Project from Putah Creek watershed, including Lake Berryessa; the Wild Horse Creek watershed; and the Upper Suisun Creek watershed (future water source).[78] Because the City does not use groundwater for municipal water supply, water use during operation of the proposed project would not affect groundwater supplies.

Development of the proposed project would result in an increase in impervious surfaces on the project site from 0 acres to approximately 3.95 acres, which could decrease on-site infiltration. However, in compliance with MRP, the proposed project would include two detention basins and approximately 7,617 square feet of bioretention space that would be used for stormwater control and treatment. Due to the incorporation of bioretention space and the implementation of LID techniques as required by the MRP, the proposed project would not result in a significant decrease in groundwater recharge that would result in a net deficit in aquifer volume or a lowering of the local groundwater table level. Therefore, the proposed project would not interfere with groundwater recharge.

For the reasons listed above, impacts related to the decrease of groundwater supplies or interference with groundwater recharge would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:

i. Result in substantial erosion or siltation on- or off-site; ***(Less than Significant Impact, No New Impact)***

During construction activities, more than 1 acre of soil would be disturbed. Soil would be exposed, and drainage patterns would be temporarily altered during grading and other construction activities, and there would be an increased potential for soil erosion and siltation compared to existing conditions. Additionally, during a storm event, soil erosion and siltation could occur at an accelerated rate. As required by the CGP a SWPPP would be prepared to identify construction BMPs to be implemented as part of the proposed project to reduce impacts on water quality during construction, including those impacts associated with soil erosion and siltation. With compliance with the requirements in the CGP and implementation of construction BMPs, construction impacts related to on- or off-site erosion or siltation would be less than significant.

After the completion of project construction, operation of the proposed project would result in an increase in impervious surfaces on the project site from 0 acres to approximately 3.95 acres, which

[78] Vallejo, City of. 2021. *City of Vallejo 2020 Urban Water Management Plan.* October 12.

would result in a net increase in stormwater runoff that could lead to downstream erosion in receiving waters. However, as discussed above, two detention basins and approximately 7,617 square feet of bioretention space included in the project's design in compliance with the MRP would be used for stormwater control and treatment. Due to the incorporation of bioretention space and implementation of LID techniques as required by the MRP, operational impacts related to on- or off-site erosion or siltation would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite; ***(Less than Significant Impact, No New Impact)***

Development of the proposed project would result in an increase in impervious surfaces on the project site from 0 acres to approximately 3.95 acres, which could have the potential to increase the volume and rate of stormwater runoff discharged from the project site. However, as previously discussed, the two detention basins and approximately 7,617 square feet of bioretention space included in the project's design in compliance with the MRP would be used for stormwater control and treatment. The proposed drainage facilities and BMPs needed to accommodate stormwater runoff would be appropriately sized so that on-site flooding would not occur. Therefore, due to the implementation of LID techniques as required by the MRP, the proposed project would not substantially increase the rate or amount of surface runoff in a manner that would result in flooding on or off site. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or ***(Less than Significant Impact No, New Impact)***

Stormwater Drainage System Capacity. Under existing conditions, the project site consists entirely of pervious surface consisting primarily of grassland. There is no existing stormwater infrastructure on the project site, and the project site drains from west to east to Benicia State Park, where stormwater runoff converges and is directed to the Carquinez Strait.[79]

The proposed project would include two detention basins and approximately 7,617 square feet of bioretention space, made up of two bioretention facilities located at the northwest corner of the site and the middle east border of the site that would collect drainage from the proposed on-site stormwater infrastructure and be used for stormwater control and treatment before discharging to an 18-inch storm drain pipe that outfalls to the existing marshland area adjacent to Benicia State Park. The storm drain system would be designed and installed to VFWD standards.

As detailed above, the proposed project would be required to comply with the MRP and would include the incorporation of LID design features, including bioretention areas that would be used for stormwater control and treatment. The proposed drainage facilities and BMPs needed to

[79] DK Engineering. 2023. Op. cit.

accommodate stormwater runoff would be appropriately sized such that drainage facility capacity would not be exceeded during a design storm. Therefore, the proposed project would not result in an exceedance of planned or existing stormwater drainage systems and impacts would be less than significant.

Polluted Runoff. As discussed in Section 4.10.a, pollutants of concern during construction include sediments, trash, petroleum products, concrete waste (dry and wet), sanitary waste, and chemicals. Each of these pollutants on its own or in combination with other pollutants can have a detrimental effect on water quality. Drainage patterns would be temporarily altered during grading and other construction activities, and construction-related pollutants could be spilled, leaked, or transported via storm runoff into adjacent drainages and downstream receiving waters. However, as previously discussed, the proposed project would be required to comply with the requirements set forth by the CGP and SWPPP, which would specify BMPs to be implemented to control the discharge of pollutants in stormwater runoff as a result of construction activities. Therefore, construction-related impacts would be less than significant.

Expected pollutants of concern from long-term operations include pathogens (bacteria/viruses), nutrients, pesticides/herbicides, sediments/total suspended solids, trash and debris, and oil and grease. As previously discussed, compliance with the MRP and the implementation of LID techniques would ensure that the proposed project would not exceed the capacity of existing or planned stormwater drainage systems or discharge substantial sources of polluted runoff from the project site. Operation-related impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

*iv. Impede or redirect flood flows? **(No Impact, No New Impact)***

According to Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06095C0629G, the project site is located in Zone X, which is identified as an area of minimal flood hazard.[80] Additionally, the proposed project would not substantially alter drainage patterns. Because the proposed project would not place improvements and structures directly within a 100-year floodplain, the proposed project would not impede or redirect flood flows, and there would be no impact. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

*d. In flood hazard, tsunami, or seiche zones, would the project risk release of pollutants due to project inundation? **(No Impact, No New Impact)***

Flooding. According to FEMA FIRM No. 06095C0629G, the project site is located in Zone X, which is identified as an area of minimal flood hazard.[81] Therefore, the proposed project would not risk release of pollutants due to project inundation by flood hazard.

---

80 Federal Emergency Management Agency (FEMA). 2016. Flood Insurance Rate Map No. 06095C0629G. Map Revised August 3, 2016. Website: https://msc.fema.gov/portal/search (accessed July 5, 2024).

81 Ibid.

Tsunami. The project site is not within a mapped tsunami hazard area.[82] Furthermore, the risk of flooding due to a tsunami event is considered to be low for Vallejo.[83] No impact would occur.

Seiches. Seiches are waves created in an enclosed body of water (e.g., a bay, lake, or harbor) that go up and down or oscillate and do not progress forward like standard ocean waves. Limited isolated damage to adjacent and downslope structures has been observed from seiches occurring in swimming pools and in small shallow lakes and ponds. There are no sizeable, enclosed bodies of water in the vicinity of the project site. The project site is approximately 1 mile from the Carquinez Strait; however, no seiches have ever been recorded in the Bay Area[84] and the project site is at a higher elevation and would not be inundated in the event of a seiche. No impact would occur.

Dam Inundation. The project site is not within a mapped dam failure inundation area.[85] Therefore, the project site is not at risk of inundation due to dam failure. No impact would occur.

Overall, the proposed project would not risk release of pollutants due to project inundation by flooding, tsunami, seiches, or dam inundation. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan? ***(Less Than Significant Impact, No New Impact)***

In the Bay Area, including the project site, the Water Board is responsible for implementation of the Basin Plan, which establishes beneficial water uses for waterways and water bodies within the region. As previously discussed, the proposed project would comply with existing NPDES permit requirements, including the CGP and MRP, and would implement construction and operational BMPs to reduce pollutants of concern in stormwater runoff as detailed above. Compliance with these regulatory requirements would ensure that the proposed project would not degrade or alter water quality, causing the receiving waters to exceed the water quality objectives, or impair the beneficial use of receiving waters. As such, the proposed project would not result in water quality impacts that would conflict with the Basin Plan. Construction and operational impacts related to a conflict with the Basin Plan would be less than significant.

The Sustainable Groundwater Management Act (SGMA), which was enacted in September 2014, requires governments and water agencies of high- and medium-priority basins to halt overdraft of groundwater basins. The SGMA requires the formation of local Groundwater Sustainability Agencies (GSAs), which are required to adopt Groundwater Sustainability Plans to manage the sustainability of the groundwater basins. The project site is not located within a mapped Division of Water Rights groundwater basin boundary and is not subject to a sustainable groundwater management plan.

83 Vallejo, City of. 2016. *Propel Vallejo General Plan Update and Sonoma Boulevard Specific Plan EIR for the City of Vallejo.* July.

84 Ibid.

85 Ibid.

Nevertheless, as detailed in Section 4.10.b, the proposed project would not interfere with groundwater recharge in the vicinity of the project site. For these reasons, the proposed project would not conflict with or obstruct the implementation of a sustainable groundwater management plan, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.11 LAND USE AND PLANNING

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Physically divide an established community?	☐	☐	☐	☒	☒
b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?	☐	☐	☒	☐	☒

4.11.1 Prior Environmental Analysis

Chapter 4.9 of the General Plan EIR analyzed impacts related to land use and planning associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to land use and planning and would not divide an established community or conflict with established plans, policies, and regulations. No mitigation measures were prescribed. The General Plan does not include any goals, policies, or actions related to land use which would be applicable to the proposed project.

4.11.2 Background

The project site is located in an urban area in Vallejo and is generally surrounded by residential, recreational, and open space uses. The City of Vallejo General Plan 2040 designates the project site as Mix of Housing Types (R-MH) and Primarily Single Family (R-SF). The project site is currently zoned Residential Medium Density (RMD) and Residential Low Density (RLD) on the City's Zoning Map and would be rezoned a Planned Development (PD) Zoning District.

4.11.3 Impact Analysis

a. Would the project physically divide an established community? ***(No Impact, No New Impact)***

The physical division of an established community typically refers to the construction of a physical feature (such as an interstate highway or railroad tracks) or removal of a means of access (such as a local road or bridge) that would impair mobility within an existing community or between a community and outlying area. For instance, the construction of an interstate highway through an existing community may constrain travel from one side of the community to another; similarly, such construction may also impair travel to areas outside the community.

The project site is located in an urban area in Vallejo and is generally surrounded by residential, recreational, and open space uses. The project site is bordered to the north by I-780 and vacant land that is zoned for Public and Semi-Public uses. Farther north is a variety of Public and Semi-Public uses, including a California Highway Patrol office, St. Patrick-St. Vincent High School, and single- and multifamily residential uses. The project site is bordered immediately to the east by vacant, undeveloped land zoned for resource conservation and the Benicia State Recreation Area. Farther east are commercial uses and single- and multifamily residential uses. The project site is bordered

immediately to the south by vacant undeveloped land owned by the City and zoned for parks, recreation and open space, and resource conservation. Farther south are single-family residential uses and Glen Cove Elementary School. The project site is bordered immediately to the west by a 141-unit single-family residential subdivision. Farther west are commercial uses and single-family residential uses. The proposed project would include the development of the project site with residential uses, consistent with the adjacent residential communities in the surrounding area west of the project site. The proposed project would not require the construction of any new infrastructure that would divide an established community and would not remove any means of access. Therefore, the proposed project would not result in the physical division of an established community or adversely affect the continuity of land uses in the vicinity and there would be no impact. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect? ***(Less Than Significant Impact, No New Impact)***

The City of Vallejo General Plan 2040 designates the project site as Mix of Housing Types (R-MH) and Primarily Single Family (R-SF). Permitted land uses within the R-MH and R-SF designations are similar and include single-family homes. In addition, the land use designations allow for duplexes, triplexes fourplexes, smaller scale apartment buildings, and small commercial spaces; and public facilities such as schools, religious institutions, parks, and other community facilities appropriate within a residential neighborhood. The maximum permitted residential density in the R-MH designation is 25 dwelling units per acre, while in the R-SF designation it is 9 dwelling units per acre; however, in single-family areas where accessory dwelling units are allowed, the maximum permitted residential density is 12 dwelling units per acre. The proposed project would develop approximately 10 acres of the project site with 51 residential units, resulting in an overall density of 4.9 dwelling units per acre, which meets the residential density standard for both the R-MH and R-SF designations.

As previously stated, the project site is currently zoned Residential Medium Density (RMD) and Residential Low Density (RLD) on the City's Zoning Map and would be rezoned a Planned Development (PD) Zoning District. RLD allows for primary single-family and RMD allows for a mix of housing types/medium density. The PD District is established to encourage the arrangement of a compatible variety of uses on suitable lands in such a manner that the resulting development will be in accord with the policies of the City's Municipal Code, Section 16.209, to provide flexibility by allowing diversification in regulations such as building relationships, setbacks, height limitations, lot sizes, types of structures, parking, and the amount and location of open space[86]

The PD District requires development to conform to existing land use designations, and the minimum area of a PD Zoning District shall be 4 contiguous acres. The project site is 20.13 acres and, as discussed above, the proposed development would be consistent with the existing General Plan land use designations and would not exceed the allowable densities associated with the R-MH and

[86] Vallejo, City of. n.d.-e. *Vallejo, California – Municipal Code, Title 16 – Zoning, Part II – Districts and Development Types, Chapter 16.209 – Planned Development District.*

R-SF designations. Therefore, the proposed project would be consistent with the development regulations of the PD Zoning District.

Additionally, the proposed project would be required to undergo Site Development Review and Design Review consistent with Sections 16.604 and 16.605 of the Vallejo Municipal Code, which would provide for the review of the physical improvements to the project site, to ensure compatibility and compliance with City requirements. Additionally, the proposed project would also require building permits, a use permit, Landscape Review, and Tentative Map Approval. The proposed project would not conflict with an adopted land use plan, policy, or regulations. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to land use impacts analyzed in the General Plan EIR.

4.12 MINERAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	☐	☐	☐	☒	☒
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	☐	☐	☐	☒	☒

4.12.1 Prior Environmental Analysis

The topic of mineral resources was discussed in Chapter 6.0 of the General Plan EIR, which determined that no impact to mineral resources with build out of the General Plan would occur as there are no formal mineral resource deposits located within the city limits. No mitigation measures were prescribed. There are no General Plan goals, policies, or actions related to mineral resources which would be applicable to the proposed project.

4.12.2 Background

Minerals are any naturally occurring chemical element or compound, or groups of elements and compounds, formed from inorganic processes and organic substances, including, but not limited to, coal, peat, and oil-bearing rock, but excluding geothermal resources, natural gas, and petroleum. Rock, sand, gravel, and earth are also considered minerals by the DOC when extracted by surface mining operations.

The project site is within an urbanized area in Vallejo, and there are no known mineral resources within the vicinity of the project site that would be of value to the region or to the State.

4.12.3 Impact Analysis

a. Would the project result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state? ***(No Impact, No New Impact)***

The project site is within an urbanized area in Vallejo, and there are no known mineral resources within the vicinity of the project site that would be of value to the region or to the State. Additionally, according to the Propel Vallejo General Plan Update and Sonoma Boulevard Specific Plan Draft EIR,[87] no formal mineral resource deposits are located within the city limits. Therefore, development of the proposed project would not result in the loss of available mineral resources and no impact related to mineral resources would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

[87] Vallejo, City of. 2016. Op. cit.

b. Would the project result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan? ***(No Impact, No New Impact)***

Please refer to Section 4.12.a. The proposed project would not result in the loss of availability of any known locally important mineral resource recovery site. Therefore, no impact related to the availability of a locally important mineral resources recovery site would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.13 NOISE

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project result in:					
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	☐	☐	☒	☐	☒
b. Generation of excessive groundborne vibration or groundborne noise levels?	☐	☐	☒	☐	☒
c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	☐	☐	☐	☒	☒

4.13.1 Prior Environmental Analysis

Chapter 4.10 of the General Plan EIR analyzed noise impacts associated with build out of the general Plan and determined that development under the General Plan would cause a substantial permanent increase in ambient transportation-related noise levels in the city during construction and operation. Therefore, the General Plan prescribed **Mitigation Measure NOI-3**, which details technological advances for noise generating vehicles and machinery and universal use of noise attenuating features, and **General Plan EIR Mitigation Measure NOI-4**, which provides specific construction noise measures to be included as conditions of approval for development projects. However, the requirements in **General Plan EIR Mitigation Measure NOI-3** were determined to be infeasible, and this impact and the cumulative noise impact was determined to be significant and unavoidable.

Additionally, the General Plan includes the following goals, policies, and actions related to noise which would be applicable to the proposed project:

- **Policy NBE-5.13: Noise Control.** Ensure that noise does not affect quality of life in the community.
  - **Action NBE-5.13A:** Continue to require that new noise-producing uses are located sufficiently far away from noise-sensitive receptors and/or include adequate noise mitigation, such as screening, barriers, sound enclosures, noise insulation, and/or restrictions on hours of operation.
  - **Action NBE-5.13C:** Update City regulations to restrict the allowable hours to between 7 a.m. and 7 p.m. on weekdays for construction, demolition, maintenance, and loading/unloading activities that may impact noise-sensitive land use.

- **Policy NBE-5.14: Vibration Control.** Ensure that vibration does not affect quality of life in the community.
  - **Action NBE-5.14A:** Update City regulations to establish quantified vibration level limits similar to commonly used guidelines found in the Federal Transit Administration document "Transit Noise and Vibration Impact Assessment."
- **Policy NBE-5.15: Noise Compatibility Standards.** Apply the General Plan noise and land use compatibility standards to all new residential, commercial, and mixed-use development and redevelopment.
  - **Action NBE-5.15A:** For new single-family residential projects, use a standard of 60 L_{dn} for exterior noise in private use areas, and require appropriate impact mitigation.
  - **Action NBE-5.15D:** Require maximum interior noise levels at 45 L_{dn} in all new residential units and require appropriate impact mitigation.
  - **Action NBE-5.15E:** When approving new development, limit project-related noise increases to the following for permanent stationary and transportation-related noise sources:
    - no more than 10 dB in non-residential areas;
    - no more than 5 dB in residential areas where the with-project noise level is less than the maximum "normally acceptable" level in the Noise and Land Use Compatibility figure; and
    - no more than 3 dB where the with-project noise level exceeds the "normally acceptable" level in Noise and Land Use Compatibility figure.
  - **Action NBE-5.15F:** Require acoustical studies with appropriate mitigation measures for projects that are likely to be exposed to noise levels that exceed the 'normally acceptable' standard and for any other projects that are likely to generate noise in excess of these standards.

4.13.2 Background

The following discussion is based on the findings from the *Noise Impact Analysis*[88] prepared for the proposed project, which is included in **Appendix H** of this Initial Study.

4.13.2.1 Existing Noise Levels

To assess the existing noise level environment, noise levels are referenced from the Propel Vallejo General Plan 2040 and Sonoma Boulevard Specific Plan Draft EIR.[89] The proposed project lies within

[88] Urban Crossroads. 2025. *Vista Cove Noise Impact Analysis, City of Vallejo.* April.
[89] City of Vallejo. 2016. *Propel Vallejo General Plan 2040 and Sonoma Boulevard Specific Plan Draft EIR.* July.

the 70 A-weighted decibel (dBA) Community Noise Equivalent Level[90] (CNEL) traffic noise contour of Interstate 780 (I-780) and the freeway segment from Columbus Parkway to Glen Cove Parkway exposes adjacent land uses to 77.7 dBA CNEL at 100 feet from the centerline. The background ambient noise levels in the vicinity of the project site is considered to be dominated by the transportation-related noise associated with I-780.

4.13.2.2 Noise Monitoring Locations

To assess the potential for long-term operational and short-term construction noise impacts and short-term vibration impacts, six sensitive receiver locations were identified as representative locations for analysis as further detailed below (refer to **Figure 4.13-1**). The selection of receiver locations is based on Federal Highway Administration (FHWA) guidelines and is consistent with additional guidance provided by the California Department of Transportation (Caltrans) and the Federal Transit Administration (FTA). Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land.

Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, and recreation areas. Sensitive receivers near the project site include single-family residences, the closest of which is approximately 30 feet south of the project site, and Saint Patrick Saint Vincent Catholic High School. Other sensitive land uses in the project vicinity that are located at greater distances than those identified in **Figure 4.13-1,** will experience lower noise levels than those identified in this analysis due to the additional attenuation from distance and the shielding of intervening structures.[91] The six identified sensitive receivers are as follows:

- **R1:** Location R1 represents existing noise sensitive single-family residence at 190 Buckeye Lane, approximately 90 feet southwest of the project site. Receiver R1 is placed near the private outdoor living area (backyard) facing the project site.

- **R2:** Location R2 represents the existing noise sensitive single-family residence at 180 Ironwood Lane, approximately 80 feet south of the project site. Receiver R2 is placed near the private outdoor living area (backyard) facing the project site.

- **R3:** Location R3 represents the existing noise sensitive single-family residence at 196 Shady Lane, approximately 30 feet south of the project site. Receiver R3 is placed near the private outdoor living area (backyard) facing the project site.

- **R4:** Location R4 represents the existing noise sensitive single-family residence at 156 Wildflower Avenue, approximately 114 feet west of the project site. Receiver R4 is placed near the private outdoor living area (backyard) facing the project site.

[90] Community Noise Equivalent Level (CNEL) is a 24-hour average noise metric that accounts for the increased sensitivity to noise during the evening and nighttime hours.

4.13.2.3 City of Vallejo Significance Criteria Summary

Table 4.13.A shows the significance criteria summary matrix. Noise and vibration impacts shall be considered significant if the project causes any of the following to occur:

Table 4.13.A: Significance Criteria Summary

Analysis	Receiving Land Use	Condition(s)	Significance Criteria	
			Daytime[1]	Nighttime[2]
Off-Site Noise	Noise- Sensitive	Residential areas where with project is less than maximum "normally acceptable" level of 60 CNEL (dBA)	≥ 5 dBA CNEL Project increase[3]	
		Project exceeds "normally acceptable" level of 60 CNEL (dBA)	≥ 3 dBA CNEL Project increase[3]	
	Non-Noise Sensitive	Ambient	≥ 10 dBA CNEL Project increase[3]	
On-Site Noise	Noise- Sensitive	Exterior Noise Level Standard	60 dBA L_{dn}	
		Interior Noise Level Standard	45 dBA L_{dn}	
Operational Noise	Noise- Sensitive	Residential areas where with project is less than maximum "normally acceptable" level of 60 CNEL (dBA)	≥ 5 dBA CNEL Project increase[3]	
		Project exceeds "normally acceptable" level of 60 CNEL (dBA)	≥ 3 dBA CNEL Project increase[3]	
		Residential	60 dBA L_{eq}[4]	
Construction Noise & Vibration		Noise Level Threshold	80 dBA L_{eq}[5]	N/A
		Vibration Level Threshold	0.30 PPV (in/sec)[6]

4.13.3 Impact Analysis

a. Would the project result in generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies? ***(Less Than Significant Impact, No New Impact)***

Construction Noise Impacts. This section summarizes the potential increase in impacts resulting from the short-term construction activities associated with the development of the proposed project compared to the prior General Plan EIR noise impact analysis. Noise generated by the construction equipment associated with the proposed project would include a combination of trucks, power tools, concrete mixers, and portable generators that when combined can reach high levels. Construction activities are expected to occur in the following stages: site preparation, grading, building construction, paving, and architectural coating. Based on the construction noise levels detailed in the Noise Impact Analysis,[92] the highest anticipated noise levels during construction, occurring when the loudest equipment operates closest to the nearest sensitive receptor, would average approximately 65 dBA equivalent continuous sound level (L_{eq}). This is below the City of Vallejo's daytime construction noise threshold of 80 dBA L_{eq} at all sensitive receptor locations. In addition, the project would be required to comply with noise-related provisions of the City of Vallejo Municipal Code, Chapters 12.40 and 16.502, which establish allowable hours of construction activity and prohibit construction noise that exceeds established performance standards. According to the City of Vallejo Municipal Code, Chapters 12.40 and 16.502. During construction, construction activities shall be limited to the hours of 7:00 a.m. to 6:00 p.m., Monday through Friday, and 9:00 a.m. to 6:00 p.m. on Saturdays. Construction is prohibited on Sundays and City-observed holidays, unless a special permit is issued by the City. Compliance with these existing regulatory requirements would ensure that construction activities occur only during permitted hours and would not generate excessive noise levels. Therefore, the proposed project would not result in new significant construction-related noise impacts. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Off-Site Transportation Noise Impacts. As detailed in the Noise Impact Analysis,[93] the location with the greatest chance of an off-site transportation noise impact is at the residence near the entrance to the project site and at Shady Lane and Wildflower Avenue. Assuming a typical speed of 25 miles per hour (mph), a predominantly automobile traffic mix, and no barriers, the proposed project is predicted to generate a noise level of 50.2 dBA CNEL at the nearest building façade of 196 Wildflower Avenue. Therefore, transportation associated with the proposed project would not expose existing noise-sensitive receivers to excessive noise levels, and the off-site traffic noise level impacts due to the proposed project are considered less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR. **Off-Site Operational Noise Impacts.** Adjacent off-site land uses would potentially be exposed to stationary-source noise impacts from the proposed ground mounted air conditioning units. These units are anticipated to

92 Urban Crossroads. 2025. *Vista Cove Noise Impact Analysis, City of Vallejo.* April.

93 Ibid.

operate intermittently throughout the day and night. The analysis considered worst-case conditions, assuming 24-hour operation, seven days per week. Based on the reference noise levels detailed in the Noise Impact Analysis,[94] the highest operational noise level would average 33.3 dBA L_{eq} at the sensitive receiver locations, which would not exceed the daytime or nighttime noise level thresholds of 60 dBA L_{eq} or 50 dBA L_{eq}, respectively, at any receiver location. As such, the air conditioning units, which represent the primary source of operational noise, would not exceed the City's established thresholds for residential areas. Therefore, the operational noise generated by the proposed project would not result in a substantial permanent increase in ambient noise levels in excess of local standards as the project noise impacts were within the noise impacts evaluated in the General Plan EIR. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR. *b. Would the project result in generation of excessive groundborne vibration or groundborne noise levels?* ***(Less Than Significant Impact, No New Impact)***

Construction. Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that ground-borne vibration from project construction activities would cause only intermittent localized effects. The proposed project's construction activities most likely to cause vibration impacts are:**Heavy Construction Equipment:** Although all heavy mobile construction equipment has the potential to cause at least some perceptible vibration while operating close to buildings, the vibration is usually short-term and is not of sufficient magnitude to cause building damage.**Trucks:** Trucks hauling building materials to construction sites can be sources of vibration intrusion if the haul routes pass through residential neighborhoods on streets with bumps or potholes. Repairing the bumps and potholes generally eliminates the problem.Based on the reference construction vibration levels detailed in the Noise Impact Analysis[95] and the construction vibration assessment methodology published by the FTA, construction vibration velocity levels associated with the proposed project are estimated to range from less than 0.02 to 0.07 inches per second (in/sec) peak particle velocity (PPV) at the nearest adjacent off-site structure. Based on the maximum acceptable continuous vibration threshold of 0.10 in/sec PPV, the typical project construction vibration levels would not exceed the vibration thresholds at any local receiver. Additionally, since the vibration levels would be well below 0.30 in/sec PPV, there would be no structural vibration impacts. Therefore, the project-related vibration impacts associated with construction activities are considered less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Operation. The proposed project would not result in vibration impacts related to on-site stationary source operations because the proposed stationary equipment, ground-mounted air conditioning units, would not generate perceptible vibration levels. These units are typical residential heating, ventilation, and air conditioning (HVAC) systems designed for continuous, low-vibration operation and would be installed on vibration-isolating pads in accordance with standard construction practices.In addition, the proposed project would not result in vibration impacts from project-related traffic on site or on adjacent roadways. Project-related vehicle trips would consist of

94 Urban Crossroads. 2025. *Vista Cove Noise Impact Analysis, City of Vallejo.* April.

95 Ibid.

standard passenger vehicles traveling on paved local roads. The rubber tires and suspension systems of these vehicles effectively dampen vibration, and such activity is not typically associated with perceptible or damaging levels of groundborne vibration. Based on a reference vibration level, structures located more than 20 feet from the roadways used by project-related traffic would experience vibration levels well below the commonly used threshold for structural damage. Therefore, vibration levels generated from stationary equipment and project-related traffic would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within 2 miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels? ***(No Impact, No New Impact)***

Aircraft flyovers may be audible on the project site due to aircraft activity in the vicinity. The nearest airports to the project site are Buchanan Airfield, located approximately 10 miles to the southeast, and Napa County Airport, located approximately 10 miles to the north of the project site. Because the project site is not within the vicinity of a private airstrip or an airport land use plan or within 2 miles of a public airport or public use airport, the proposed project would not expose people residing or working in the project area to excessive noise levels. There would be no impacts. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.14 POPULATION AND HOUSING

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	☐	☐	☒	☐	☒
b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	☐	☐	☒	☐	☒

4.14.1 Prior Environmental Analysis

Chapter 4.12 of the General Plan EIR analyzed impacts related to population and housing associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to population and housing. No mitigation measures were prescribed. There are no General Plan goals, policies, or actions related to population and housing which would be applicable to the proposed project.

4.14.2 Background

The proposed project would include the construction of 51 single-family residential units and associated improvements, including new private internal roadways and alleys, fencing, landscaping, and common open space areas on vacant, undeveloped land. No residential units currently exist at the project site. Based on the City of Vallejo's average household size (2019–2023) of 2.79 persons per household,[96] the proposed project would increase the local population by approximately 143 persons.

4.14.3 Impact Analysis

a. Would the project induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)? ***(Less Than Significant Impact, No New Impact)***

The proposed project would include the construction of 51 single-family residential units and associated improvements, including new private internal roadways and alleys, fencing, landscaping, and common open space areas on vacant, undeveloped land. Based on the City of Vallejo's average household size (2019–2023) of 2.79 persons per household,[97] the proposed project would increase the local population by approximately 143 persons. The population of the City was estimated to be

96 United States Census Bureau. *QuickFacts, Vallejo city, California; United States.*2024. Website: https://www.census.gov/quickfacts/fact/table/vallejocitycalifornia,US/PST045224 (accessed February 28, 2025).

97 Ibid.

approximately 122,807 persons as of July 1, 2023.[98] The anticipated population growth associated with the proposed project represents less than a 1 percent increase in the city's current population. The City's population is projected to grow by 24,826 persons to a total of 142,744 persons by 2040.[99] The proposed project represents approximately 0.6 percent of the population growth anticipated through 2040.

Because the project would create new housing, project implementation would increase the population in the area. This population growth, however, would not be considered substantial or unplanned because the proposed project is consistent with the City's General Plan land use and zoning designations for the site and would thus be consistent with the growth assumed for build out of the General Plan. Therefore, the proposed project would not result in substantial unplanned population growth in the area, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere? ***(Less Than Significant Impact, No New Impact)***

The project site is currently vacant, undeveloped land consisting of undulating hills and flat areas covered primarily with non-native annual grassland and scattered mature trees. No residential uses currently exist within the project site. Because the proposed project includes the construction of 51 single-family residential units, the proposed project would contribute to the City's housing supply. Therefore, the proposed project would not result in the displacement of people or housing and would not require the construction of replacement housing elsewhere, and impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

98 United States Census Bureau. *QuickFacts, Vallejo city, California; United States.*2024. Website: https://www.census.gov/quickfacts/fact/table/vallejocitycalifornia,US/PST045224 (accessed February 28, 2025).

4.15 PUBLIC SERVICES

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:					
i. Fire protection?	☐	☐	☒	☐	☒
ii. Police protection?	☐	☐	☒	☐	☒
iii. Schools?	☐	☐	☒	☐	☒
iv. Parks?	☐	☐	☒	☐	☒
v. Other public facilities?	☐	☐	☒	☐	☒

4.15.1 Prior Environmental Analysis

Chapter 4.13 of the General Plan EIR analyzed impacts on public services associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to public services due to compliance with existing regulatory requirements including the California Building Code, California Fire Code, the City of Vallejo Municipal Code, and the payment of Public Facilities Impact Mitigation Fees. No mitigation measures were prescribed. However, the General Plan includes the following policies and actions related to public services which would be applicable to the proposed project:

- **Policy CP-2.3: Fire Prevention and Response Services**. Ensure the provision of fire prevention and emergency response services that minimize fire risks and protect life and property.
  - **Action CP-2.3E**: Work with property owners and public agencies to ensure that plant growth is managed to minimize fire danger.
- **Policy NBE-5.3: Health and Safety Codes**. Enforce development regulations and building code requirements to protect residents, businesses, and employees from flooding, liquefaction, earthquakes, fires, and other hazards.
  - **Action NBE-5.3B**: Continue to require development to comply with building and safety codes and continue to route plans and drawings to all relevant City departments for review.
- **Policy MTC-2.3: Emergency Response Routes**. Ensure adequate emergency vehicle access in all areas of Vallejo.

- **Action MTC-2.3B**: Continue to involve the Police and Fire Departments in the development review process to ensure that applicable requirements for emergency access are met.

4.15.2 Background

The project site is located within the City of Vallejo and is served by the following existing public services.

4.15.2.1 Fire Protection

Fire suppression, emergency medical and rescue services, and other life safety services are provided to the project area and the site by the Vallejo Fire Department (VFD). The closest active fire station to the project site is Vallejo Fire Station 24 at 1005 Oakwood Avenue, approximately 1.7 miles northwest of the project site. Fire Station 24 houses an engine company of three firefighters on each shift.[100]

4.15.2.2 Police Protection

The Vallejo Police Department (VPD) provides law enforcement services to the City of Vallejo. VPD has one station within the city limits, located at 111 Amador Street approximately 2.5 miles northwest of the project site.[101]

4.15.2.3 Schools

The project site is within the boundaries of the Vallejo City Unified School District (VCUSD). The VCUSD operates 20 schools, including 10 elementary schools serving kindergarten through 5th grade; 5 schools serving kindergarten through 8th grade; one middle school serving grades 6 through 8, two high schools serving grades 9 through 12; one adult school, and one alternative school.

4.15.2.4 Parks

The Greater Vallejo Recreation District (GVRD) currently operates 33 parks with various amenities throughout the city, including: 20 neighborhood parks, 10 community parks, 6 special-purpose parks, and 4 community centers. It also manages over 1,000 acres of public land within Vallejo and some surrounding areas.[102] The closest parks to the project site are Benicia State Recreation Area (located approximately 0.3 mile southeast of the project site), Glen Cove School Park (located approximately 0.5 mile southwest of the project site), and Glen Cove Waterfront Park (located approximately 0.9 mile southwest of the project site). Benicia State Recreation Area includes trails, picnic areas, and campsites. Glen Cove School Park includes a children's play area, tennis and pickleball courts, picnic tables, and a sports field. Glen Cove Waterfront Park includes trails that connect to the San Francisco Bay Trail.

100 Vallejo, City of. 2016. Op. cit.
101 Ibid.
102 Greater Vallejo Recreation District (GVRD). 2025. About the District. Website: https://www.gvrd.org/about-the-district (accessed March 4, 2025).

4.15.3 Impact Analysis

a. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

i. Fire protection? ***(Less Than Significant Impact, No New Impact)***

Fire suppression, emergency medical and rescue services, and other life safety services are provided to the project area and the site by the Vallejo Fire Department (VFD). The VFD also provides a range of non-emergency services, including public education, fire prevention programs, and permit inspection services. The VFD also participates in countywide and Statewide mutual-aid programs with fire agencies in Solano County, Napa County, and Contra Costa County. There are six fire stations within Vallejo. The closest fire station to the project site is Vallejo Fire Station 26 at 1335 Fulton Avenue, approximately 0.6 mile west of the project site. However, Fire Station 26 is currently closed due to budget cuts. The closest active fire station to the project site is Vallejo Fire Station 24 at 1005 Oakwood Avenue, approximately 1.7 miles northwest of the project site. Fire Station 24 houses an engine company of three firefighters on each shift. Current VFD staffing and equipment levels allow for simultaneous dispatch of up to three engines, one truck, one paramedic unit, and the Battalion Chief.[103]

The VFD currently meets its response time goals in much of the city, where incidents are generally clustered in proximity to higher-call-volume fire stations. In outlying areas of the city, steep terrain and a winding street network make maintaining response time goals more challenging. Mutual-aid agreements with neighboring jurisdictions help ensure adequate response times in the outlying areas. Currently, VFD can dispatch firefighters to areas farthest from any station within 12 minutes of call receipt, which is generally adequate to stop serious fires from spreading to adjoining buildings and to provide medical treatment for noncritical patients.[104]

Planned growth under the General Plan would increase calls for fire protection services in Vallejo. The proposed project is consistent with the site's General Plan designations and does not represent unplanned growth given that the project site would be developed consistent with applicable land use and zoning designations. As noted in Section 4.14, Population and Housing, the proposed project would result in an incremental increase in the population of the city and therefore incrementally increase the demand for emergency fire services and emergency medical services. However, the proposed project would be required to comply with all applicable codes for fire safety and emergency access.

VFD would review the site plans, fire truck access, and site fire flow design for the proposed project to ensure that adequate emergency access is provided prior to issuance of a building permit. Project design features incorporated into the structural design and layout of the residential units would keep

103 Vallejo, City of. 2016. Op. cit.
104 Ibid.

service demand increases to a minimum. For example, the project would be constructed in accordance with the current CBC, which requires all on-site structures to incorporate construction techniques and materials such as roofs, eaves, exterior walls, vents, appendages, windows, and doors that are resistant to and/or perform at high levels against ignition during exposure to fires. Vehicular access to the project site would be provided by one full-access residential street through an established community to the west of the intersection of Shady Lane and Wildflower Avenue, and the proposed project would include new internal residential streets. The proposed roadways would be developed to City and Fire Code standards to allow emergency vehicles ease of access and maneuverability.

Furthermore, the project sponsor would be required to pay public facilities impact mitigation fees[105] used to fund capital costs associated with constructing new public facilities and purchasing equipment for new public facilities. These fees are one-time charges applied to new development and are imposed to raise revenue for the construction or expansion of capital facilities located outside of project boundaries of a new development that benefit the area. Public facilities impact mitigation fees enable the City to collect fair-share fees from new development projects to fund new infrastructure and services. These fees are collected for specific infrastructure needs and are deposited into different accounts representing these requirements. Payment of public facilities impact mitigation fees commensurate with the increased demand for services in Vallejo would offset any increase in demand for fire protection services.

Development of the proposed project would not cause fire staffing, facilities, or equipment to operate at a deficient level of service. The VFD would continue providing services to the project site and would not require additional firefighters to serve the proposed project. The construction of a new or expanded fire station would also not be required. The potential increase in demand for service is not expected to adversely affect existing response times to the site or within Vallejo.

Therefore, the proposed project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts in order to maintain acceptable service ratios, response times, or other performance objectives for fire protection, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

ii. Police protection? ***(Less Than Significant Impact, No New Impact)***

The Vallejo Police Department (VPD) provides law enforcement services to the City of Vallejo. Property crimes, including burglary, larceny, and robbery, account for most of the crime in Vallejo, and at times exceed the Bay Area and California averages.[106] The project site is located adjacent to an established residential area of the city, which is already served by the VPD. VPD has one station

[105] Vallejo, City of. *Vallejo, California Municipal Code, Title 3 – Revenue and Finance, Chapter 3.06 – Public Facilities Impact Mitigation Fee.* Website: https://library.municode.com/ca/vallejo/codes/municipal_code?nodeId=TIT3REFI_CH3.06PUFAIMMIFE (accessed March 4, 2025).

[106] Vallejo, City of. 2016. Op. cit.

within the city limits, located at 111 Amador Street approximately 2.5 miles northwest of the project site. VPD is organized into eight units providing field operations and support services. The Communications and Dispatch Unit provides public safety communications for police and fire, answering 9-1-1 calls and dispatching police, fire, and medical responses in the greater Vallejo area. The Community Services Unit, established at the end of 2013, addresses quality-of-life crimes in the city and provides assistance and support to Neighborhood Watch groups as well as public education and outreach services in the community.[107]

Planned growth under the General Plan would increase calls for police protection service in the city. The proposed project could result in an incremental increase in the demand for police protection services; however, the proposed project is consistent with the site's General Plan designation and does not represent unplanned growth. As previously discussed, development of the proposed project would increase the population on the project site and incrementally increase demand for emergency police services. However, the VPD would continue to provide service to the project site and would likely not require additional officers to serve the proposed project, considering the negligible increase in population that would result from the proposed project (less than 1 percent of the City's current population). Furthermore, the project sponsor would be required to pay public facilities impact mitigation fees[108] used to fund capital costs associated with constructing new public facilities and purchasing equipment for new public facilities. Payment of public facilities impact mitigation fees commensurate with the increased demand for services in the city would offset any increase in demand for police protection services.

The construction of new or expanded police facilities would not be required to serve the proposed project. Therefore, the proposed project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts in order to maintain acceptable service ratios, response times, or other performance objectives for police protection. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

iii. Schools? ***(Less Than Significant Impact, No New Impact)***

The project site is within the boundaries of the Vallejo City Unified School District (VCUSD). The VCUSD operates 20 schools, including 10 elementary schools serving kindergarten through 5th grade; 5 schools serving kindergarten through 8th grade; one middle school serving grades 6 through 8, two high schools serving grades 9 through 12; one adult school, and one alternative school. According to the VCUSD locator map, students generated by the site's population increase are anticipated to attend the following schools: Glen Cove Elementary School, Hogan Middle School, and Jesse Bethel High School. **Table 4.15.A** shows the current and past enrollment for VCUSD, Glen Cove Elementary

[107] Vallejo, City of. 2016. Op. cit.

[108] Vallejo, City of. n.d.-a. *Vallejo, California Municipal Code, Title 3 – Revenue and Finance, Chapter 3.06 – Public Facilities Impact Mitigation Fee.* Website: https://library.municode.com/ca/vallejo/codes/municipal_code?nodeId=TIT3REFI_CH3.06PUFAIMMIFE (accessed March 4, 2025).

Table 4.15.A: Vallejo City Unified School District Enrollment Data

District/School	2021–2022 Enrollment	2022–2023 Enrollment	2023–2024 Enrollment
Vallejo City Unified School District	12,717	12,215	11,799
Glen Cove Elementary School	463	447	430
Hogan Middle School	930	867	849
Vallejo High School	1,448	1,335	1,193

Source: Enrollment data obtained from the California Department of Education, Data Quest Website: Enrollment by Grade – Vallejo City Unified (California Department of Education 2025) (accessed March 4, 2025).

School, Hogan Middle School, and Jesse Bethel High School. As shown in **Table 4.15.A**, enrollment in the VCUSD, Glen Cove Elementary School, Hogan Middle School, and Vallejo High School has decreased in the last 3 school years.

The estimated number of students the proposed project would generate is derived by multiplying the number of students per dwelling unit (the student yield factor) by the number of dwelling units in the proposed project (51 new units). The California State Allocation Board Office of Public School Construction reports that the Statewide student yield factor of 0.7 student per dwelling unit is applicable for unified school districts.[109] Applying the Statewide average student yield factor, the proposed project would generate 36 students. The proposed project is consistent with the site's General Plan designations and does not represent unplanned growth given that the project site would be developed consistent with applicable land use and zoning designations. The EIR prepared for the General Plan determined that on a district-wide level the projected growth under implementation of the General Plan would not exceed school capacity.[110] In addition, under State law, the project sponsor would be required to pay school impact fees per SB 50, prior to the issuance of a building permit, to mitigate for impacts to school facilities. Therefore, the project would not require the construction of new or physically altered educational facilities, the construction of which could result in an environmental impact. Impacts associated with the need to expand educational services and facilities in order to maintain acceptable levels of service would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

iv. Parks? ***(Less Than Significant Impact, No New Impact)***

The Greater Vallejo Recreation District (GVRD) currently operates 33 parks with various amenities throughout the city, including: 20 neighborhood parks, 10 community parks, 6 special-purpose parks, and 4 community centers. It also manages over 1,000 acres of public land within Vallejo and some surrounding areas.[111] The City has established a parkland standard of 4.25 acres per 1,000 people.

[109] California Office of Public School Construction. 2019. *School Facility Program Handbook*. January.
[110] Vallejo, City of. 2016. Op. cit.
[111] Greater Vallejo Recreation District (GVRD). 2025. About the District. Website: https://www.gvrd.org/about-the-district (accessed March 4, 2025).

Vallejo currently has 7.90 acres of parkland per 1,000 residents. Therefore, the City is currently exceeding its adopted parkland service standard.[112]

The proposed project involves the construction of 51 single-family residences and would induce minor population growth in the area. The increase in residents within the area may result in an incremental increase in demand for and use of local parks and recreation areas. However, this increase in use is not expected to adversely affect the physical conditions of local and regional open space areas or recreational facilities or require the provision of new parks or facilities because the proposed project is anticipated to increase the city's population by less than 1 percent. The closest parks to the project site are Benicia State Recreation Area (located approximately 0.3 mile southeast of the project site), Glen Cove School Park (located approximately 0.5 mile southwest of the project site), and Glen Cove Waterfront Park (located approximately 0.9 mile southwest of the project site). Benicia State Recreation Area includes trails, picnic areas, and campsites. Glen Cove School Park includes a children's play area, tennis and pickleball courts, picnic tables, and a sports field. Glen Cove Waterfront Park includes trails that connect to the San Francisco Bay Trail.

The proposed project would include 9.74 acres of undisturbed open space and 3.55 acres of common open space, including two bioretention areas, walkways, a loop walk around a flexible-use turf area, and a vista overlook for residents. The proposed single-family residences would also include private front and rear yards. However, the project does not include any outdoor areas intended for public use. The construction of these private facilities is expected to reduce the strain of use on existing neighborhood parks and recreational facilities.

Because the population increase due to the proposed project is not substantial enough to cause a strain on parks and facilities, the proposed project would not result in a substantial increase in demand for park or recreation services in the vicinity such that new facilities would be required to serve the project. Furthermore, new residential development is required to pay park impact fees, as required by Chapter 3.18 of the City's Municipal Code, to generate revenue to be used for the acquisition of land for parks, recreational facilities, or open space; for improvement thereto; or for reasonable consultation fees, feasibility studies, environmental review, and professional services performed in connection with acquisition or improvement of parks, recreational facilities, or open space.[113] Therefore, the proposed project would not result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts in order to maintain acceptable service ratios, response times, or other performance objectives for recreation, and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

[112] Vallejo, City of. 2016. Op. cit.

[113] Vallejo, City of. n.d.-b. *Vallejo, California Municipal Code, Title 3 – Revenue and Finance, Chapter 3.18 Land Dedication and Fees for Park and Recreational Purposes.* Website: https://library.municode.com/ca/vallejo/codes/municipal_code?nodeId=TIT3REFI_CH3.18LADEFEPAREPU (accessed March 4, 2025).

v. Other public facilities? ***(Less Than Significant Impact, No New Impact)***

Development of the proposed project could also increase demand for other public services, including libraries, community centers, and public healthcare facilities. However, due to the minimal increase in population, the proposed project would not substantially increase the use of these facilities such that new facilities would be needed to maintain service standards, as these facilities are not currently overused and have the capacity to serve new demand. Therefore, impacts to other public facilities would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.16 RECREATION

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	☐	☐	☒	☐	☒
b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	☐	☐	☐	☒	☒

4.16.1 Prior Environmental Analysis

Chapter 4.11 of the General Plan EIR analyzed impacts on parks and recreation associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to parks and recreation because the City exceeds its current parkland standard and existing State and local regulations would serve to ensure that future development would not result in significant impacts related to parks and recreation. No mitigation measures were prescribed. However, the General Plan includes the following policies and actions related to recreation which would be applicable to the proposed project:

- **Policy CP-3.4 Parks**. Plan for and provide parkland and facilities to support Vallejo's recreational needs.
  - **Action CP-3.4A**: Maintain a standard of 4.25 acres of parkland per thousand residents and continue to require that new residential development make a fair share contribution to future parks development.

4.16.2 Background

The Greater Vallejo Recreation District (GVRD) currently operates 33 parks with various amenities throughout the city, including: 20 neighborhood parks, 10 community parks, 6 special-purpose parks, and 4 community centers. It also manages over 1,000 acres of public land within Vallejo and some surrounding areas.[114] The closest parks to the project site are Benicia State Recreation Area (located approximately 0.3 mile southeast of the project site), Glen Cove School Park (located approximately 0.5 mile southwest of the project site), and Glen Cove Waterfront Park (located approximately 0.9 mile southwest of the project site). Benicia State Recreation Area includes trails, picnic areas, and campsites. Glen Cove School Park includes a children's play area, tennis and pickleball courts, picnic tables, and a sports field. Glen Cove Waterfront Park includes trails that connect to the San Francisco Bay Trail.

[114] Greater Vallejo Recreation District (GVRD). 2025. About the District. Website: https://www.gvrd.org/about-the-district (accessed March 4, 2025).

4.16.3 Impact Analysis

a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? ***(Less Than Significant Impact, No New Impact)***

As discussed in Section 4.15, Public Services, residents of the proposed project would be expected to use local parks and community facilities within Vallejo and the surrounding neighborhoods, as well as regional recreational facilities. Although the proposed project would incrementally increase use of these facilities, this minor increase in use is not expected to result in substantial physical deterioration of local parks, trails, and community centers. As discussed in Section 4.14, Population and Housing, the anticipated population growth associated with the proposed project represents less than a 1 percent increase in the city's current population. Based on the estimated population increase, these facilities are anticipated to have the capacity to serve this increase in demand.

The project also includes the construction and development of various outdoor amenities within the project site, including 9.74 acres of undisturbed open space and 3.55 acres of common open space, including two bioretention areas, walkways, a loop walk around a flexible-use turf area, and a vista overlook for residents. The proposed single-family residences would also include private front and rear yards. The construction of these private facilities is expected to reduce the strain of use on existing neighborhood parks and recreational facilities. Furthermore, new residential development is required to pay park impact fees, as required by Chapter 3.18 of the City's Municipal Code, to generate revenue to be used for the acquisition of land for parks, recreational facilities, or open space; for improvement thereto; or for reasonable consultation fees, feasibility studies, environmental review, and professional services performed in connection with acquisition or improvement of parks, recreational facilities, or open space. [115] Therefore, the proposed project would have a less than significant impact on existing parks or other recreational facilities. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment? ***(No Impact, No New Impact)***

As previously discussed, the proposed project would include the construction and development of various outdoor amenities within the project site, including 9.74 acres of undisturbed open space and 3.55 acres of common open space, including two bioretention areas, walkways, a loop walk around a flexible-use turf area, and a vista overlook for residents. These private amenities would be for use by residents of the development and not for public recreational use. The proposed project does not include or require the construction or expansion of existing public recreational facilities, which might have an adverse physical effect on the environment, and no impact would occur. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

[115] Vallejo, City of. n.d.-b. Op. cit.

4.17 TRANSPORTATION

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	☐	☐	☒	☐	☒
b. Conflict or be inconsistent with CEQA Guidelines §15064.3, subdivision (b)?	☐	☐	☒	☐	☒
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	☐	☐	☒	☐	☒
d. Result in inadequate emergency access?	☐	☐	☒	☐	☒

4.17.1 Prior Environmental Analysis

Chapter 4.14 of the General Plan EIR analyzed impacts to transportation and traffic associated with build out of the proposed project and determined that development would conflict with an applicable plan, ordinance, or policy establishing measures of effectiveness for the performance of the circulation system and freeway and highway facility impacts would be significant. The General Plan EIR prescribed **Mitigation Measure TRANS-1a.1**, requiring the City work to minimize congestion in the two-lane road portion of Sonoma Boulevard; **General Plan EIR Mitigation Measure TRANS-1a.2**, requiring the City make roadway improvements to Railroad Avenue; and **General Plan EIR Mitigation Measure TRANS-1b**, requiring the City work with the Solano Transportation Authority and Caltrans to study, identify, program, and build capacity improvements on SR-37 between I-80 and west of the Mare Island interchange. None of these mitigation measures would be applicable to the proposed project as the project site is not located in the vicinity of any of the proposed transportation improvements. Even with implementation of these mitigation measures, the impacts were determined to be significant and unavoidable.

Additionally, the General Plan includes the following policies and actions related to transportation and traffic which would be applicable to the proposed project:

- **Goal MTC-2: Mobile Community**: Enhance local transportation options and maintain a safe, convenient, and sustainable local transportation system.
    - **Policy MTC-2.1: Safety First**: Prioritize pedestrian, bicycle, and automobile safety over traffic flow.
    - **Policy MTC-2.3: Emergency Response Routes**: Ensure adequate emergency vehicle access in all areas of Vallejo.
        - **Action MTC-2.5B:** Set vehicle Level of Service of E or better as an advisory standard to be considered along with, but not to override, metrics for pedestrian, bicycle, transit,

and emergency access performance, with the prioritization of metrics to be determined by the street type and context.

- **Action MTC-2.5E**: Continue to collect both City and Regional transportation impact fees so that development makes fair share contribution to improvements needed to maintain established standards for all modes of transportation, including for traffic flow, roadway safety, and pavement condition.

- **Policy MTC-2.7**: **Complete Streets**: Increase accessibility for and use of streets by pedestrians, bicyclists, and transit riders.

  - **Action MTC-2.8C**: As part of the site plan approval process, require development to provide services from a menu of transportation demand management (TDM) strategies that will reduce VMT.

- **Policy MTC-2.11**: **Sustainable Transportation**: Ensure that circulation improvements can be operated and maintained within existing and future resource limitations.

- **Goal MTC-3**: **Interconnected Community**: Improve connections within and between Vallejo's neighborhoods for all travel modes.

  - **Policy MTC-3.1**: **Coordinated Transportation Planning**: Ensure that improvements to the transportation network support a land use pattern that connects the community and facilities travel among Vallejo's neighborhoods.

4.17.2 Background

The following discussion is based on the findings from the *Transportation Analysis*[116] prepared for the proposed project, which is included in **Appendix I** of this Initial Study.

4.17.2.1 Existing Circulation System

The 20.13-acre project site is located at the northeast corner of Shady Lane and Wildflower Avenue (Assessor's Parcel Numbers [APNs] 0079-171-170 and 0079-120-100) in southeastern Vallejo, west of the eastern boundary with the city of Benicia, in an area consisting primarily of residential, recreational, and public and semi-public uses. Regional vehicular access to the project site is provided by Interstate 780 (I-780), located immediately north of the project site. I-780 is an east-west route between Vallejo and Benicia, connecting Interstate 80 (I-80) to Interstate 680 (I-680) in Benicia. I-780 is a four-lane divided facility (two lanes in each direction), with a speed limit of 65 mph.[117] The route serves an annual average daily traffic (AADT) volume of 55,000 vehicles through

[116] LSA Associates, Inc. 2025. *Transportation Analysis for the Vista Cove Project (LSA Project No. 20241845)*. January 9.

[117] City of Vallejo. 2016. *Propel Vallejo General Plan Update and Sonoma Boulevard Specific Plan EIR for the City of Vallejo.* July.

Vallejo at Columbus Parkway.[118] The closest on- and off-ramps to the project site are located along Glen Cove Road, approximately 0.45 mile west of the project site.

Direct local access to the project site is via Shady Lane and Wildflower Avenue that border the site immediately to the southwest. Shady Lane and Wildflower Avenue and other roadways in the nearby vicinity of the project site are classified as local streets, which are defined as providing direct access to property, and typically have higher intersection spacing and lower speeds than the other roadway classes.[119] Glen Cove Parkway, which is located approximately 0.5 mile west of the project site, is the nearest classified collector street. Collector streets provide connectivity within the city, linking local roads to arterials. Collectors, along with local streets, provide the highest level of access from private property driveways. Collectors typically have lower speeds than arterials, and more closely spaced intersections than arterials.[120]

4.17.2.2 Existing Transit System

Solano County Transit (Soltrans) provides local bus, regional express bus, and Americans with Disabilities Act (ADA) paratransit bus services in Vallejo. Local bus service is supplemented by limited-service routes for school days and regional express bus service connecting to the Contra Costa communities of El Cerrito, Pleasant Hill, and Walnut Creek and the Fairfield Transportation Center in Fairfield. Express bus services also provide connections to San Francisco Bay Area Rapid Transit (BART), AC Transit, County Connection, Fairfield and Suisun Transit, Golden Gate Transit, San Francisco Bay Ferry, Vine Transit, and WestCAT. The project area is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway, which are accessible to and from the project site via sidewalks along nearby local streets. The Amtrak station in Vallejo is located approximately 4 miles northwest of the project site and the Vallejo Ferry Terminal, which offers ferry service between Vallejo and San Francisco, is located approximately 3.5 miles northwest of the project site.

4.17.2.3 Existing Bicycle and Pedestrian System

Pedestrian facilities include sidewalks, pedestrian signal phases, curb ramps, curb extension, and various streetscape amenities such as lighting and benches. In general, a network of sidewalks, crosswalks, pedestrian signals, and curb ramps provide access for pedestrians in the vicinity of the proposed project site.

Bikeways in the city are classified into the following categories:

- Class I – off-street bike paths
- Class II – on-street bike lanes marked by pavement striping and signage
- Class III – on-street designated bike routes that share the road with motorized vehicles

[118] City of Vallejo. 2016. *Propel Vallejo General Plan Update and Sonoma Boulevard Specific Plan EIR for the City of Vallejo.* July.
[119] Ibid.
[120] Ibid.

The nearest designated bikeway to the project area consists of a Class II Bikeway along Glen Cove Parkway, approximately 0.5 mile west of the project site.[121]

4.17.3 Impact Analysis

a. Would the project conflict with a program plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities? ***(Less Than Significant Impact, No New Impact)***

The proposed project would include the construction of 51 single-family residential dwelling units and undeveloped open space on 10 acres within a 20.13-acre project site at the northeast corner of Shady Lane and Wildflower Avenue. The proposed project would be accessed via one full access residential street off the intersection of Shady Lane and Wildflower Avenue. The proposed project would include new internal residential streets with parking on one side and an attached sidewalk. The project would also include private alleys which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting onto them. The remainder of the project site would remain undeveloped.

Roadway Analysis. The *City of Vallejo Traffic Impact Analysis/Study Guidelines*[122] were adopted to identify the traffic impacts to traffic operation and safety and to provide the standard requirements for the preparation of a traffic study. These guidelines state that projects likely to add 500 or more daily two-way trips or 100 or more peak period two-way trips would require a traffic analysis. The trip generation for the proposed project was developed using rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (2021)[123] for Land Use Code 210 (Single-Family Detached Housing), as shown in **Table 4.17.A**, below.

Table 4.17.A: Trip Generation

Land Use (ITE Land Use Code)	Size	Unit	ADT	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
Trip Rates									
Single-Family Detached Housing (210)[1]		DU	9.43	0.18	0.52	0.70	0.59	0.35	0.94
Proposed Project Trip Generation									
Vista Cove Planned Development	51	DU	481	9	26	35	30	18	48
Net Trip Generation			**481**	**9**	**26**	**35**	**30**	**18**	**48**

[1] Trip rates based on the ITE *Trip Generation* Manual, 11th Edition (2021).
ADT = average daily traffic
ITE = Institute of Transportation Engineers
DU = dwelling unit

As **Table 4.17.A** indicates, the proposed project is anticipated to generate 481 daily trips of which 35 would occur in the AM peak hour and 48 would occur in the PM peak hour. As such, the project's trip generation is below the thresholds established by the City's guidelines and the preparation of a traffic analysis is not required for the proposed project. The project traffic is included within the

121 City of Vallejo. 2016. Op. cit.
122 City of Vallejo Public Works Department. *Traffic Impact Analysis/Study Guidelines*.
123 Institute of Transportation Engineers (ITE). 2021. *Trip Generation Manual,* 11th Edition.

traffic generated by the General Plan build out, and the project would not result in a new significant impact or in a substantial increase in the severity of the transportation impacts identified in the General Plan EIR.

Similarly, the 2023 Solano County Congestion Management Program (CMP)[124] states that projects are reviewed if they will cause a net increase of 100 or more PM peak-hour vehicle trips. The proposed project traffic is below this threshold for review.

Action MTC 2.5-B of the City's General Plan sets a level of service (LOS) standard of E or better to be considered along with, but not to override, metrics for pedestrian, bicycle, transit, and emergency access performance. As such, an analysis was prepared to identify the project's potential to affect the operation of the intersection of Glen Cove Parkway/Robles Way. The signalized intersection of Glen Cove Parkway/Robles Way is one of the access points for the existing neighborhood adjacent to the proposed project and an intersection that traffic for most of the Glen Cove community passes through. It is anticipated that all vehicles for the proposed project will use the intersection of Glen Cove Parkway/Robles Way. LSA contracted with an independent data collection company to collect traffic volume data during the morning and afternoon peak commute periods at this intersection on Thursday, August 22, 2024. All project trips were distributed to/from the north and were added to the existing traffic volume data for the project scenario. **Table 4.17.B** summarizes the results of the LOS analysis. LOS worksheets are provided in **Appendix I**. As **Table 4.17.B** shows, the intersection operates at satisfactory LOS B in existing conditions and traffic from the proposed project would not change the delay at this intersection such that the LOS of the intersection would be reduced or degraded below LOS E, consistent with General Plan Policy MTC-2.5.

Table 4.17.B: Vehicle Level of Service Summary

Intersection	No Project				With Project				Change With Project	
	AM Peak Hour		PM Peak Hour		AM Peak Hour		PM Peak Hour			
	Delay (sec)	LOS	Delay (sec)	LOS	Delay (sec)	LOS	Delay (sec)	LOS	AM	PM
Glen Cove Parkway/Robles Way	11.3	B	12.7	B	12.5	B	14.0	B	1.2	1.3

Source: Compiled by LSA (2024) using Synchro 11 modeling software.
LOS = level of service
sec = seconds

Because the project would generate fewer trips than the threshold for review established by the City and in the CMP, and because project traffic was not found to degrade the operation of the intersection of Glen Cove Parkway/Robles Way to below LOS E, it is determined that the project does not have the potential to significantly affect roadway operations, and the project would not conflict with General Plan policies regarding LOS. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

[124] Solano Transportation Authority. 2023. *2023 Solano County Congestion Management Program*.

Transit, Pedestrian, and Bicycle Facilities. The potential impacts of the project on pedestrian, bicycle and transit are described below.***Pedestrian Facilities.*** According to the United States Census Bureau,[125] pedestrian trips comprise approximately 1.6 percent of the total commute mode share in the City of Vallejo. The proposed project also would generate pedestrian trips to/from transit stops, recreation areas, and employment centers. The volume of pedestrian trips generated by the project would not exceed the carrying capacity of the sidewalks and crosswalks nearby.In the immediate project vicinity, there are sidewalks along Wildflower Avenue and Shady Lane up to the intersection with Robles Way and along Robles Way. There are marked crosswalks, pedestrian push buttons, and pedestrian signals provided at the signalized intersection of Robles Way with Glen Cove Parkway. Although very few pedestrian trips are anticipated to and from the site, the City's General Plan policies encourage non-motorized travel, including walking, bicycling, and transit.

Consistent with existing City policies, the proposed project would provide minimum 4.5-foot-wide pedestrian pathways to connect the single-family homes to the common open space areas within the developed portion of the proposed project and adjacent neighborhood. The proposed project would not disrupt existing pedestrian facilities and would not interfere with planned pedestrian facilities. Therefore, the proposed project would have a less than significant impact on pedestrian facilities. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Bicycle Facilities. United States Census Bureau data indicate that bicycle trips comprise approximately 1.7 percent of the total commute mode share in the City of Vallejo.[126] The low volume of bicycle trips generated by the project would not exceed the bicycle-carrying capacity of streets surrounding the site, and the increase in bicycle trips would not by itself require new off-site bicycle facilities. The nearest designated bikeway to the project area consists of a Class II Bikeway along Glen Cove Parkway, approximately 0.5 mile west of the project site. The proposed project, by itself, would not require additional bicycle service to the area. The proposed project would not preclude, modify, or otherwise affect existing or proposed bicycle projects or policies identified in the General Plan Transportation Element. Therefore, the proposed project would have a less than significant impact on bicycle facilities. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Transit Service. The project area is served by SolTrans Routes 3 and 8, with the transit stops located approximately 0.5 mile to the west along Glen Cove Parkway, which are accessible to and from the project site via sidewalks along nearby local streets. According to the United States Census Bureau, transit trips comprise approximately 5 percent of the total commute mode share in the City of Vallejo.[127] In addition to commute trips, there would be additional transit trips to

[125] United States Census Bureau. 2021 Census. *5-year ACS Data Table B08134: Means of Transportation to Work by Travel Time to Work.* Website: https://data.census.gov/table?q=B08134:+MEANS+OF++TRANSPORTATION+TO+WORK+BY+TRAVEL+TIME+TO+WORK&g=160000+0US0681554_1600000US0681666&tid=ACSDT5Y2021.B08134 (accessed February 9, 2023).

[126] Ibid.

[127] United States Census Bureau. 2021. Op. cit.

nearby schools, parks, and shopping areas. The low volume of transit trips generated by the project would not exceed the carrying capacity of the existing transit service to the site and the proposed project would not interfere with existing transit facilities or preclude the construction of any planned transit facilities or otherwise affect existing or proposed transit projects or policies identified in the City of Vallejo General Plan. Therefore, the proposed project would have a less than significant impact on transit service. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.*b. Would the project conflict or be inconsistent with CEQA Guidelines §15064.3, subdivision (b)?* ***(Less Than Significant Impact, No New Impact)***

The State revised its *State CEQA Guidelines* in January 2019. Among those revisions, the evaluation of transportation impacts on a project's effect on vehicle miles traveled (VMT) replaced consideration of vehicle delay and level of service (LOS). In July 2020, the City adopted the City of Vallejo CEQA Transportation Impact Analysis Guidelines, which were revised in October 2020.[128]

The City's guidelines include project type screening for projects presumed to have a less than significant impact. Projects generating fewer than 110 daily vehicle trips are included as projects screened from preparing additional VMT analysis. A footnote is provided with this value that indicates the threshold ties directly to the 2018 OPR Technical Advisory. The footnote further explains that the OPR Technical Advisory notes that CEQA provides a categorical exemption for existing structures up to 10,000 square feet and that general office buildings generate or attract an additional 110-124 trips per 10,000 square feet.

However, in Cleveland National Forest Foundation v. County of San Diego (2025) 110 Cal.App.5th 948 [331 Cal.Rptr.3d 264] the Fourth Appellate District of the State of California found that reliance on the OPR Technical Advisory suggestion without evidentiary support is not valid. Indeed, in the first paragraph of the introduction to the OPR Technical Advisory it states that the document does not alter lead agency discretion and that the document should not be construed as legal advice. It should further be noted that the OPR Technical Advisory explanation for the small project threshold suggestion is related to commercial and not residential development.

As part of the transportation analysis a memorandum was prepared establishing evidentiary support for a small project threshold for residential development within the Bay Area Air District (Air District).[129] That memorandum is provided in **Appendix I**. The evidence examined showed that the Air District has determined that development of fewer than 421 dwelling units would have a less than significant impact on regional GHG emissions. Furthermore, the project's 481 daily trips identified in **Table 4.17.A** would produce GHG emissions at a level below the threshold of significance, and the project would not cause an increase in emissions that would result in a new significant impact or a substantially greater impact when compared to the City's prior CEQA analysis for the General Plan.

The proposed project extends existing residential development and would have a less than significant impact on GHG emissions because it is a small project, and as such would not conflict or

[128] City of Vallejo. 2020. *City of Vallejo CEQA Transportation Impact Analysis Guidelines*. October.
[129] Bay Area Air District. 2022. *California Environmental Quality Act Air Quality Guidelines.*

be inconsistent with *State CEQA Guidelines* Section 15064.3, subdivision (b). The project would therefore have a less than significant impact on the VMT. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)? ***(Less Than Significant Impact, No New Impact)***

The design of the proposed project does not include any geometric design features or incompatible uses that could substantially increase circulation/traffic hazards. The proposed project would include the construction of 51 single-family residential dwelling units, undeveloped open space, and related infrastructure improvements. Vehicular access to the project site would be provided by one full access residential street through an established community to the west off the intersection of Shady Lane and Wildflower Avenue. The proposed project would include new internal residential streets that would be 28 feet wide curb-to-curb with parking on one side and a 4.5-foot attached sidewalk. The project would also include private alleys which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting onto them. Private alleys would include a 33-foot public utility easement/planting easement, and a 10-foot travel way in each direction with no parking allowed. The design, construction, and maintenance of project access locations and on-site roads would be required to comply with the City's Municipal Code and relevant City standards. As shown previously in **Figure 2-2** in Chapter 2.0, Project Description, the project site is generally surrounded by residential, recreational, and public and semi-public uses. Therefore, the proposed project would not substantially increase hazards due to a geometric design feature or incompatible uses. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project result in inadequate emergency access? ***(Less Than Significant Impact, No New Impact)***

Vehicular access to the project site would be provided by one full access residential street through an established community to the west off the intersection of Shady Lane and Wildflower Avenue. The proposed project would include new private internal residential streets that would be 28 feet wide curb-to-curb with parking on one side and a 4.5-foot attached sidewalk. The project would also include private alleys which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting onto them. Private alleys would include a 33-foot public utility easement/planting easement, and a 10-foot travel way in each direction with no parking allowed. In accordance with the California Fire Code, the project applicant is required to design, construct, and maintain structures, roadways, and facilities to maintain appropriate emergency/evacuation access to and from the project site. The design, construction, and maintenance of project access locations and on-site roads would be in compliance with the City's Municipal Code and would meet all emergency access standards. The Vallejo Fire Department would also review the proposed site plan and Fire Access Plan and would provide input on final design in relation to emergency access prior to issuance of a building permit. Site design and compliance with standard and emergency Vallejo Fire Department and City requirements, such as

the size and location of fire access routes and fire truck turning radii, would allow for proper site evacuation, if necessary, during project operations. The proposed project would not alter or block adjacent roadways and implementation of the proposed project would not be expected to impair the function of nearby emergency evacuation routes. Therefore, the proposed project would not result in inadequate emergency access. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.18 TRIBAL CULTURAL RESOURCES

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or	☐	☒	☐	☐	☒
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.	☐	☒	☐	☐	☒

4.18.1 Prior Environmental Analysis

The topic of potential impacts to tribal cultural resources with build out of the General Plan was not specifically analyzed in the General Plan EIR. Since certification of the General Plan EIR, the topic of Tribal Cultural Resources has been added as a new category to be analyzed per the CEQA Guidelines. In addition, public agencies that prepare an EIR must comply with Assembly Bill (AB) 52, which requires public agencies to consult with any California Native American tribe that requests consultation and is traditionally and culturally affiliated with the geographic area of a proposed project. However, the General Plan EIR analyzed prehistoric and historic resources and human remains and included mitigation measures related to these resources as detailed in Section 4.5.2. Additionally, the General Plan includes the following goals, policies, and actions related to cultural resources which would be applicable to the proposed project:

- **Policy NBE-1.9 Cultural Resources:** Protect and preserve archaeological, historic, and other cultural resources.
  - **Action NBE-1.9B:** Maintain a dialogue with local Native American groups regarding sensitive cultural resources in Vallejo.

4.18.2 Background

The analysis of potential impacts to tribal cultural resources is based on a site-specific cultural resources assessment prepared for the proposed project, prepared by LSA in March 2025, which is included in **Appendix D** of this Initial Study.[130] This assessment included a cultural resources records search, a review of historic-period aerial imagery and maps, and a pedestrian archaeological survey of the project site.

An archaeological records search was conducted on September 6, 2024, at the Northwest Information Center (NWIC) at Sonoma State University. The NWIC is the official repository for cultural resources records for Solano County and maintains an extensive inventory of previously recorded archaeological sites and prior survey coverage. The records search included a one-mile radius around the project site and reviewed all available documentation of prehistoric and historic-period resources, as well as prior cultural resource surveys and excavation reports.

In February 2025, historic-period aerial photographs and topographic maps were reviewed using the Nationwide Environmental Title Research (NETR) Online database. This review provided supplemental information regarding historical land use within and surrounding the project area.

An intensive pedestrian survey of the project site was conducted on January 20, 2025, by a qualified archaeologist. The survey was performed using linear transects spaced approximately 20 to 30 meters (65.6 to 98.4 feet) apart. The entire accessible area of the project site was inspected, with particular attention given to areas containing exposed native soils, rock outcrops, and rodent disturbances. All visible ground surfaces were carefully examined for the presence of prehistoric or historic-period artifacts, features, or other cultural deposits.

4.18.2.1 Existing Environmental Setting

The project site is vacant and undeveloped and is covered primarily with non-native annual grassland and scattered mature trees. No buildings or structures are present within the project area in historic period aerial photos or as indicated on maps dating back to 1948.

The proposed project is within the traditional cultural territory of the Patwin. Tribal territories were somewhat fluid and changed over time. Like other Native American groups in Northern California, the Patwin were semi-nomadic hunter-gatherers who subsisted by exploitation of seasonably available plant and animal resources. The first written accounts of Native American groups in California were by Spanish missionaries in the late 18th century. With the Spanish intrusion came a drastic change in lifestyle for the Native Americans of California. Incorporation of the indigenous populations into the mission system involved conflict, forced labor, and relocation along with decimation by European diseases, all of which led to the disruption of native cultures and changes in subsistence and land use practices. Cattle ranches/farms were established on or near ancestral Native American villages, primarily in the major drainages conducive to horticulture and animal

[130] LSA Associates, Inc. (LSA). 2025. *Cultural Resources Assessment, Vista Cove Development Project, Vallejo, Solano County, California.* March.

husbandry. Water was diverted for irrigation and stock. Within a short time, the missions controlled many ranchos where Indians lived and worked.[131]

4.18.2.2 Sacred Lands File Search

LSA requested a Sacred Lands File (SLF) Search and Native American Contact List from the California Native American Heritage Commission (NAHC) on August 8, 2024. In its response on August 28, 2024, the NAHC indicated that the record search results were negative. However, because the absence of specific site information in the SLF does not indicate the absence of cultural resources in the project area, NAHC identified methodologies and contacts for conducting required AB 52 tribal consultation for information regarding cultural resources that could be affected by the proposed project.

4.18.2.3 Native American Consultation

In August 2024, the City provided notice of the proposed project to the Native American contacts provided by the NAHC and the tribes that had previously requested notification, pursuant to AB 52 provisions.

On October 10, 2024, the Confederated Villages of Lisjan Nation responded to the City's notice and requested a copy of the final California Historic Resources Inventory System (CHRIS) records search, EIR, the SLF search results from the NAHC, and a copy of any additional archaeological reports. The City provided a response on February 10, 2025, providing the Confederated Villages of Lisjan Nation with the database searches and available information. No further responses were received.

The Yocha Dehe Wintun Nation reached out to request consultation on the proposed project on October 24, 2024. The City responded on November 18, 2024 and a meeting took place on December 9, 2024. As part of the consultation process, the City provided the Yocha Dehe Wintun Nation with draft Tribal Monitoring Mitigations on January 17, 2025. The City resent this information on February 13, 2025, and March 17, 2025, and no additional responses were received.

No further requests for consultation were received.

[131] LSA Associates, Inc (LSA). 2025. *Cultural Resources Assessment, Vista Cove Development Project, Vallejo, Solano County, California.* March.

4.18.3 Impact Analysis

a. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:

i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section 5020.1(k)? Or

ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe. ***(Less Than Significant Impact with Mitigation Incorporated, No New Impact)***

As discussed above under Section 4.18.1, Native American consultation was conducted by the City in compliance with AB 52. As part of the consultation process, a review of the SLF by the NAHC indicated that the results of the file search were negative. However, because the absence of specific site information in the SLF does not indicate the absence of cultural resources in the project area, NAHC identified methodologies and contacts for conducting the required AB 52 tribal consultation. The City provided notice of the proposed project via certified mail to Native American tribal contacts provided by the NAHC as well as local Native American tribal representatives that previously requested to be notified of future projects proposed by the City in compliance with AB 52. The Confederated Villages of Lisjan Nation and the Yocha Dehe Winton Nation responded to the City's notice and consultation with the Yocha Dehe Winton Nation occurred in January 2025.

No information regarding specific known tribal cultural resources on the project site was provided to the City. Furthermore, no human remains are known to be on the project site or are anticipated to be discovered during project construction. An archaeological pedestrian field survey of the project site was conducted on January 20, 2025, as part of the Cultural Resources Assessment completed for the proposed project. No cultural resources, including tribal cultural resources, were discovered within the project site during the field survey. The field survey indicated that there was light disturbance in some areas of the project site, where modern refuse was noted throughout the project area; however, overall visibility was generally limited by existing vegetation cover. No cultural resources were identified. Based on these results, the Cultural Resources Assessment determined that the project site has a low potential for in situ subsurface cultural resources due to the severe slopes and adjacent developments. Therefore, encountering unknown buried cultural resources, including tribal cultural resources, during project construction is unlikely.

Impacts related to accidental discovery of cultural resources or human remains are addressed in Section 4.5, Cultural Resources, and impacts were determined to be less than significant with implementation of **Project Specific Mitigation Measures CUL-1 and CUL-2**, which require adherence to proper procedure for the treatment of unanticipated tribal cultural resources if discovered during construction and require compliance with PRC 5097 and the State's Health and Safety Code Section 7050.5 for the treatment of human remains or funerary/ceremonial objects.

Project ground disturbing activities would include excavation and grading requiring ground disturbance to a depth of up to 24 feet below the ground surface to accommodate foundations and utility infrastructure. Although no known tribal cultural resources are present at the site, the possibility for accidental discovery of such resources cannot be discounted. In the event that cultural items or human remains determined to be of Native American origin are encountered during project ground disturbing activities, **Project Specific Mitigation Measure TCR-1** shall be implemented.

Project Specific Mitigation Measure TCR-1

Protocol for Discovery of Native American Cultural Items. The preferred protocol upon the discovery of Native American human remains is to secure the area, stop work within 25 feet of the find, cover any exposed human remains or other cultural items and avoid further disturbances in the area. All parties are advised to treat the remains with appropriate dignity, as provided in Public Resources Code (PRC) Section 5097.98. All parties shall treat tribal representatives and the event itself with appropriate respect.

If, after the Confederated Villages of Lisjan Nation Tribal representative has been granted access to the site and it is determined that avoidance is not feasible, an examination of the human remains will be conducted to confirm they are human and to determine the position, posture, and orientation of the remains. The following procedures shall be followed:

- All excavation in the vicinity of the human remains shall be conducted using fine hand tools and fine brushes to sweep loose dirt free from the exposure.
- In order to determine the nature and extent of the grade and its contents, controlled excavation should extend to a full buffer zone around the perimeter of the remains.
- To initiate the exposure, a perimeter balk (especially, a shallow trench) should be excavated, representing a reasonable buffer a minimum of 10 centimeters around the maximum extent of the known skeletal remains, with attention to counterintuitive discoveries or unanticipated finds relating to this or other

remains. The dirt from the perimeter balk should be bucketed, distinctly labeled, and screened for cultural materials.

- Excavation should then proceed inward from the walls of the balk as well as downward from the surface of the exposure. Loose dirt should be scooped out and brushed off into a dustpan or other collective device. Considerable care should be given to ensure that human remains are not further impacted by the process of excavation.

- Buckets, collection bags, notes, and tags should be fully labeled per provenience, and a distinction should be made between samples collected from: (1) Perimeter Balk (described above), (2) Exposure (dirt removed in exposing the exterior/burial plan and associations, and (3) Matrix (dirt from the interstices between bones or associations). Thus, each burial may have three bags, "Burial 1 Perimeter Balk," "Burial 1 Exposure Balk," "Burial 1 Matrix."

- The following records should be compiled in the field: (1) a detailed scale drawing of the burial, including the provenience of and full for all human remains, associated artifacts, and the configuration of all associated phenomena such as burial pits, evidence for pre-interment grave pit burning, soil variability, and intrusive disturbance, (2) complete a formal burial record using the consultants proprietary form or other standard form providing information on site #, unit or other proveniences, level depth, depth and location of the burial from a fixed datum, workers, date(s), artifact list, skeletal inventory, and other pertinent observations, (3) crew chief and worker field notes that may supplement or supersede information contained in the burial recording form, and (4) photographs, including either standard photography or high-quality (400-500 DPI or 10 MP recommended) digital imaging.

- Photographs and images may be used only for showing location or configuration of questionable formation or for the position of the skeleton. They are not to be duplicated for publication unless a written release is obtained from the Tribe.

- Association between the remains and other cultural materials should be determined in the field in consultation with an authorized Tribal representative and may be amended per laboratory findings. Records of provenience and sample labels should be adequate to determine association or degree of likelihood of association of human remains and other cultural materials.

- For each burial, all Perimeter Balk soil is to be 1/8”-screened. All Exposure soil is to be 1/8”-screened, and a minimum of one 5-gallon bucket of excavated but unscreened Exposure soil is to be collected, placed in a plastic garbage bag in the bucket. All Matrix soil is to be carefully excavated, screened as appropriate, and then collected in plastic bags placed in 5-gallon buckets.

- Human remains are not to be cleaned in the field.

- Prior to any physical action related to human remains, a designated tribal representative will conduct prayers and blessings over the remains. The archaeological consultant will be responsible for insuring that individuals and tools involved in the action are available for traditional blessings and prayers, as necessary.

- No laboratory studies are permitted without consultation with the tribe. Lab methods are determined on a project-specific basis in consultation with Confederated Villages of Lisjan Nation representatives. The following procedures shall be implemented:

- The primary archaeological consultant shall be responsible for insuring that all lab procedures follow stipulations made by the Tribe.

- Prior to any laboratory activities related to the remains, a designated tribal representative will conduct prayers and blessings over the remains. The archaeological consultant shall be responsible for ensuring that individuals and tools involved in the action are available for traditional blessings and prayers, as necessary.

- To the extent possible, all remains, associations, samples, and original records are to be kept together throughout the laboratory process. In particular, Matrix dirt is to be kept in buckets and shall accompany the remains to the lab. The primary archaeological consultant shall be responsible for copying all field records and images and ensuring that the original notes and records accompany the remains throughout the process.

- Laboratory study should be done making every effort to identify unanticipated finds or materials missed in the field, such as objects encased in dirt or human remains misidentified as faunal remains in the field. In the event of discovery of additional remains, materials, and other associations the tribal representatives are to be contacted immediately.

- No laboratory studies are permitted on human remains and funerary objects. The preferred treatment preference for exhumed Native American human remains is reburial in an area not subject to further disturbance. Any objects associated with remains will be reinterred with the remains. Laboratory study should be done making every effort to identify unanticipated finds or materials missed in the field, such as objects encased in dirt or human remains misidentified as faunal remains in the field. In the event of discovery of additional remains, materials, and other associations the tribal

representatives are to be contacted immediately.

- Should all, or a sample, of any archaeological materials collected during the data recovery activities – with the exception of human remains – need to be curated, an inventory and location information of the curation facility shall be given to the Tribe for their records.

At the completion of project construction, the proposed project would not result in further disturbance of native soils on the project site and, therefore, project operations would have no potential to impact previously undiscovered tribal cultural resources or human remains.

Based on the findings of the Cultural Resources Assessment and AB 52 consultation, no known tribal cultural resources listed or eligible for listing in the California Register of Historical Resources (California Register) or in a local register exist within the project site, and there are no known tribal cultural resources on the project site. Therefore, the proposed project would not cause a substantial adverse change in the significance of a tribal cultural resource defined as a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is listed or eligible for listing in the California Register or in a local register of historical resources as defined in PRC Section 5020.1(k) or that is determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. Nevertheless, implementation of **Project Specific Mitigation Measures CUL-1, CUL-2,** and **Project Specific Mitigation Measure TCR-1**, are required to address the potential impacts to unanticipated tribal cultural resources, human remains, and associated funerary or ceremonial objects, the implementation of which would reduce impacts to less than significant with mitigation. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.19 UTILITIES AND SERVICE SYSTEMS

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
Would the project:					
a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	☐	☐	☒	☐	☒
b. Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?	☐	☐	☒	☐	☒
c. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	☐	☐	☒	☐	☒
d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	☐	☐	☒	☐	☒
e. Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	☐	☐	☒	☐	☒

4.19.1 Prior Environmental Analysis

Chapter 4.15 of the General Plan EIR analyzed impacts to utilities and service systems associated with build out of the General Plan, and determined that either no impact or less than significant impacts would occur due to compliance with the Water Conservation Act, the California Plumbing Code, the City of Vallejo UWMP, San Francisco Regional Water Quality Control Board regulations, State Water Resources Control Board regulations, VFWD standards, the Integrated Waste Management Act, the CalGreen Building Code, and the City of Vallejo Municipal Code. No mitigation measures were prescribed. However, the General Plan includes the following policies and actions related to utilities and service systems which would be applicable to the proposed project:

- **Policy NBE-1.7: Green Infrastructure**. Encourage the installation of green infrastructure, including tools such as permeable pavement, rain gardens, constructed wetlands, grassy swales, rain barrels and cisterns, and green roofs, to treat stormwater, attenuate floods, increase groundwater recharge, and reduce urban heat islands.
  - **Action NBE-5.6D**: Continue to enforce City regulations that prohibit development, grading, and land modification activities that would adversely affect the local drainage system or create unacceptable erosion impacts.

- **Policy NBE-5.7: Design for Stormwater Control**. Encourage new development and redevelopment to minimize the area of new roofs and paving.
  - **Action NBE-5.7B**: Continue to manage and maintain City-owned storm drainage infrastructure to avoid flooding and reduce the negative effects of stormwater runoff.

4.19.2 Background

The project site is located within an urbanized area with surrounding land uses supported by existing utility infrastructure.

4.19.2.1 Water Supply

Water service in Vallejo is provided by the City of Vallejo Water Department. The City of Vallejo updated its Urban Water Management Plan (UWMP) in 2020, and it was adopted in 2021. The City has numerous water supply sources that provide significant annual volumes of water, including: the Sacramento River watershed; the Solano Project from Putah Creek watershed, which includes Lake Berryessa; the Wild Horse Creek watershed through Lake Madigan, Lake Frey, and the Green Valley Diversion; and the Upper Suisun Creek watershed through Lake Curry. According to the UWMP, the average water use for the City's service area is projected to be 28,111 AFY in 2025, 30,331 AFY in 2035, and 31,892 AFY in 2045. For the purposes of adequate projections, the 2020 UWMP assumed a 0.07 percent growth rate, the growth rate necessary to achieve the City's project 2040 growth rate. The UWMP indicates the City has sufficient water supplies to meet water demands through 2045, including during multiple dry years.[132]

4.19.2.2 Wastewater

The VFWD provides wastewater collection and treatment services for Vallejo. VFWD owns and operates a collection system and secondary wastewater treatment facility located at 450 Ryder Street, Vallejo (Ryder WWTP). The Ryder WWTP has a treatment capacity of 15.5 million gallons per day (mgd)[133] and treats an average of 10 mgd of wastewater.[134]

4.19.2.3 Stormwater

Under existing conditions, the project site consists entirely of pervious surface consisting primarily of grassland. There is no existing stormwater infrastructure on the project site; however, under existing conditions, the project site drains from west to east to Benicia State Park, where stormwater runoff converges and is directed to the Carquinez Strait.[135]

4.19.2.4 Dry Utilities

Electricity and gas service is provided to the project site by Pacific Gas & Electric (PG&E).

135 DK Engineering. 2023. Op. cit.

4.19.2.5 Solid Waste

Solid waste, recycling, and yard waste collection services in Vallejo, including the project site, are provided by Recology Vallejo. Solid waste from Vallejo was disposed at 18 different landfills in 2014; however, nearly 99 percent of Vallejo's solid waste in 2014 went to the Potrero Hills Landfill or the Recology Hay Landfill.[136] The Potrero Hills Landfill is located at 3675 Potrero Hills Lane in Suisun City and has a maximum permitted capacity of 83,100,000 cubic yards and a remaining capacity of 13,872,000 cubic yards as of January 2006. The landfill accepts a maximum of 4,330 tons per day and has an expected closure date of 2048.[137] The Recology Hay Landfill is located at 6426 Hay Road in Vacaville and has a maximum capacity of 37,000,000 cubic yards and a remaining capacity of 30,433,000 cubic yards as of July 2010. The landfill accepts a maximum of 2,400 tons per day and has an expected closure date of 2077.[138]

4.19.3 Impact Analysis

a. Would the project require or result in the relocation or construction of new or expanded water, wastewater treatment or stormwater drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects? ***(Less Than Significant Impact, No New Impact)***

The project site is located within an urbanized area with surrounding land uses supported by existing utility infrastructure. Implementation of the proposed project would require the connection to existing infrastructure, which would involve ground-disturbing activities and the use of heavy machinery, among other construction activities.

Water. Water service in Vallejo is provided by the City of Vallejo Water Department. The proposed project would include the installation of a new 8-inch water main line that would connect to an existing 8-inch water main in Shady Lane at two locations for a looped system. The proposed project would connect directly to existing mains and the new water lines would be constructed in conformance with City standards. Utility installation would occur within the project footprint and there would be no impacts unique to infrastructure installation that would result in significant effects beyond those evaluated in the Initial Study.

The City of Vallejo updated its Urban Water Management Plan (UWMP) in 2020, and it was adopted in 2021. According to the UWMP, the average water use for the City's service area is projected to be 30,331 acre-feet per year (AFY) in 2035 and 31,892 AFY in 2045.[139] As discussed in Section 4.19.b, the proposed project would not substantially increase demand for water and would therefore not exceed the capacity of existing water treatment facilities. The proposed project would not require

136 Vallejo, City of. 2016. Op. cit.

137 California Department of Resources Recycling and Recovery (CalRecycle). 2024a. *Solid Waste Information System (SWIS), Potrero Hills Landfill (048-AA-0075).* Website: https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/1194?siteID=3591 (accessed October 31, 2024).

138 California Department of Resources Recycling and Recovery (CalRecycle). 2024b. *Solid Waste Information System (SWIS), Recology Hay Road (48-AA-0025).* Website: https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/1184?siteID=3582 (accessed October 31, 2024).

139 Vallejo, City of. 2021. *2020 Urban Water Management Plan*. October 12.

any new infrastructure aside from the project-specific tie-ins and water pipelines to serve the proposed project, and all proposed water infrastructure would be limited to the project site. Therefore, the impact of the proposed project on water infrastructure would be less than significant.

Wastewater. The VFWD provides wastewater collection and treatment services for Vallejo. A new 8-inch sewer lateral would connect to the existing 8-inch public sanitary sewer main line located in Shady Lane at the northwestern corner of the project site. The project would also include the replacement of the existing sewer lift station that currently serves the 141 single-family-home development to the west of the proposed project site with an upgraded system to serve both communities. The lift station would be owned and maintained by the City of Vallejo and the sanitary sewer and lift station would be designed and installed to VFWD standards. Utility installation would occur within the project footprint and there would be no impacts unique to infrastructure installation that would result in significant effects beyond those evaluated in the Initial Study.

Stormwater. Under existing conditions, the project site consists entirely of pervious surface consisting primarily of grassland. There is no existing stormwater infrastructure on the project site; however, under existing conditions, the project site drains from west to east to Benicia State Park, where stormwater runoff converges and is directed to the Carquinez Strait.[140]

Upon construction of the proposed project, approximately 3.95 acres (19.6 percent) of the project site would be covered by impervious surfaces and approximately 16.18 acres (80.4 percent) would be covered by pervious surfaces, consisting of landscaped areas, undeveloped open space, and bioretention areas. The proposed project would include two detention basins and approximately 7,617 square feet of bioretention space, made up of two bioretention facilities located at the northwest corner of the site and the middle east border of the site that would collect drainage from the proposed on-site stormwater infrastructure and be used for stormwater control and treatment before discharging to an 18-inch storm drain pipe that outfalls to the existing marshland area adjacent to Benicia State Park. The storm drain system would be designed and installed to VFWD standards and in compliance with the MRP. Utility installation would occur within the project footprint and there would be no impacts unique to infrastructure installation that would result in significant effects beyond those evaluated in the Initial Study.

Electricity and Natural Gas. Electricity and gas service is provided to the project site by Pacific Gas & Electric (PG&E). The proposed project would include connections to the existing gas and electric lines that run adjacent to the project site along Shady Lane and Wildflower Avenue. The proposed project would not require any new infrastructure, aside from project-specific tie-ins and lines to serve the proposed project.

Because the proposed project would connect to existing utility services adjacent to the project site and there is sufficient excess capacity within those systems to accommodate project demands, the relocation or reconstruction of new or expanded water, wastewater treatment, or stormwater drainage, electric power, or telecommunications facilities would not be required. No modifications to utility infrastructure would be necessary outside of the immediate project site footprint. As such,

[140] DK Engineering. 2023. Op. cit.

impacts associated with the construction or expansion of utility line facilities would be less than significant and no mitigation is required. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years? ***(Less Than Significant Impact, No New Impact)***

As previously discussed, water service in Vallejo is provided by the City of Vallejo Water Department. The City of Vallejo updated its UWMP in 2020, and it was adopted in 2021. The City has numerous water supply sources that provide significant annual volumes of water, including: the Sacramento River watershed; the Solano Project from Putah Creek watershed, which includes Lake Berryessa; the Wild Horse Creek watershed through Lake Madigan, Lake Frey, and the Green Valley Diversion; and the Upper Suisun Creek watershed through Lake Curry. According to the UWMP, the average water use for the City's service area is projected to be 28,111 AFY in 2025, 30,331 AFY in 2035, and 31,892 AFY in 2045.[141] For the purposes of adequate projections the 2020 UWMP assumed a 0.07 percent growth rate, the growth rate necessary to achieve the City's project 2040 growth rate.[142]

The proposed project is within the City's planned growth, as the project site would be developed consistent with its land use designations and would represent approximately 0.6 percent of the population growth anticipated through 2040, which is inconsistent with the projected growth in the UWMP. Therefore, the proposed project would be consistent with the City's growth projections anticipated in local and regional planning documents, including the UWMP. The UWMP indicates the City has sufficient water supplies to meet water demands through 2045, including during multiple dry years. Therefore, the proposed project would have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry, and multiple dry years. Impacts would be less than significant, and no mitigation is required. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments? ***(Less Than Significant Impact, No New Impact)***

As previously discussed, the project site is within the sewer service area of VFWD. VFWD owns and operates a collection system and secondary wastewater treatment facility located at 450 Ryder Street, Vallejo (Ryder WWTP). The Ryder WWTP has a treatment capacity of 15.5 million gallons per

141 Vallejo, City of. 2021. Op. cit.
142 Vallejo, City of. 2021. Op. cit.

day (mgd)[143] and treats an average of 10 mgd of wastewater.[144] The Propel Vallejo General Plan Update EIR assumes a wastewater generation rate of 100 gallons per day (gpd) per resident. As detailed in Section 4.14, Population and Housing, the proposed project would generate 143 new residents. Therefore, the proposed project would generate approximately 14,300 gallons of wastewater per day[145] or 5,219,500 gallons of wastewater per year. The project's estimated wastewater treatment demand represents 0.26 percent of the Ryder WWTP's current daily surplus capacity,[146] and sufficient surplus wastewater treatment capacity is available to serve the project. Therefore, wastewater generated from the proposed project would not cause the WWTP to violate any wastewater treatment requirements and this impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals? ***(Less Than Significant Impact, No New Impact)***

Solid waste, recycling, and yard waste collection services in Vallejo, including the project site, are provided by Recology Vallejo. Solid waste from Vallejo was disposed at 18 different landfills in 2014; however, nearly 99 percent of Vallejo's solid waste in 2014 went to the Potrero Hills Landfill or the Recology Hay Landfill.[147] The Potrero Hills Landfill is located at 3675 Potrero Hills Lane in Suisun City and has a maximum permitted capacity of 83,100,000 cubic yards and a remaining capacity of 13,872,000 cubic yards as of January 2006. The landfill accepts a maximum of 4,330 tons per day and has an expected closure date of 2048.[148] The Recology Hay Landfill is located at 6426 Hay Road in Vacaville and has a maximum capacity of 37,000,000 cubic yards and a remaining capacity of 30,433,000 cubic yards as of July 2010. The landfill accepts a maximum of 2,400 tons per day and has an expected closure date of 2077. [149]

As detailed in Section 4.14, Population and Housing, the proposed project would generate 143 new residents. In 2018, the average disposal rate in California was 6.4 pounds of solid waste per resident

143 Vallejo, City of. 2016. Op. cit.
144 Vallejo Flood and Wastewater District (VFWD). *Treatment.* Website: https://www.vallejowastewater.org/193/Treatment (accessed October 31, 2024).
145 100 gallons/person/day x 143 persons = 14,300 gallons per day.
146 14,300 gallons per day project demand ÷ 5,500,000 gallons per day Ryder WWTP surplus = 0.26 percent.
147 Vallejo, City of. 2016. Op. cit.
148 California Department of Resources Recycling and Recovery (CalRecycle). 2024a. *Solid Waste Information System (SWIS), Potrero Hills Landfill (048-AA-0075).* Website: https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/1194?siteID=3591 (accessed October 31, 2024).
149 California Department of Resources Recycling and Recovery (CalRecycle). 2024b. *Solid Waste Information System (SWIS), Recology Hay Road (48-AA-0025).* Website: https://www2.calrecycle.ca.gov/SolidWaste/SiteActivity/Details/1184?siteID=3582 (accessed October 31, 2024).

per day.[150] Based on these rates, the proposed project would generate approximately 915.2 pounds of solid waste per day, or 0.46 tons per day.

This increase in solid waste would account for 0.01 percent of the Potrero Hills Landfill's maximum allowable capacity per day and 0.02 percent of the Recology Hay Road Landfill's allowable capacity per day. With this minimal increase in solid waste disposal demand, the Potrero Hills and Recology Hay Road landfills have adequate capacity to serve the proposed project. As such, the project would be served by a landfill with sufficient capacity to accommodate the project's waste disposal needs, and impacts associated with the disposition of solid waste would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

e. Would the project comply with federal, state, and local management and reduction statutes and regulations related to solid waste? ***(Less Than Significant Impact, No New Impact)***

The proposed project would be required to comply with all federal, State, and local solid waste statutes and/or regulations related to solid waste, and as noted above, the Potrero Hills and Recology Hay Road landfills have adequate capacity to serve the proposed project. Therefore, the proposed project would result in a less than significant impact related to solid waste regulations. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

4.20 WILDFIRE

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:					
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	☐	☐	☒	☐	☒
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	☐	☐	☒	☐	☒
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	☐	☐	☒	☐	☒
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	☐	☒	☐	☐	☒

4.20.1 Prior Environmental Analysis

Chapter 4.7 of the General Plan EIR analyzed impacts related to wildfire hazards associated with build out of the General Plan and determined that build out of the General Plan would result in less than significant impacts related to wildfire due to compliance with existing regulations including the California Fire Code, California Building Code, CCR, Department of Forestry and Fire Protection regulations, and the City of Vallejo Municipal Code. No mitigation measures were prescribed. However, the General Plan includes the following policies and actions related to wildfire which would be applicable to the proposed project:

- **Policy CP-2.3: Fire Prevention and Response Services**. Ensure the provision of fire prevention and emergency response services that minimize fire risks and protect life and property.
  - **Action CP-2.3E**: Work with property owners and public agencies to ensure that plant growth is managed to minimize fire danger.
- **Policy NBE-5.3: Health and Safety Codes**. Enforce development regulations and building code requirements to protect residents, businesses, and employees from flooding, liquefaction, earthquakes, fires, and other hazards.
  - **Action NBE-5.3B**: Continue to require development to comply with building and safety codes and continue to route plans and drawings to all relevant City departments for review.

- **Action NBE-5.4C**: Continue to use the development review process to ensure that development is planned and constructed to resist the encroachment of uncontrolled fire.

- **Policy MTC-2.3: Emergency Response Routes**. Ensure adequate emergency vehicle access in all areas of Vallejo.

  - **Action MTC-2.3B**: Continue to involve the Police and Fire Departments in the development review process to ensure that applicable requirements for emergency access are met.

4.20.2 Background

The project site is within a local responsibility area (LRA), meaning the local government (the City of Vallejo) is financially responsible for wildland fire protection. However, the project site is not considered to be within a Very High Fire Hazard Severity Zone (VHFHSZ). According to the City of Vallejo General Plan 2040, the project site is within a moderate- to high-risk wildfire area.[151] There are no Very High Fire Hazard Areas in or adjacent to Vallejo.

4.20.3 Impact Analysis

a. Would the project substantially impair an adopted emergency response plan or emergency evacuation plan? ***(Less Than Significant Impact, No New Impact)***

The City of Vallejo participates in a coordinated regional emergency management framework under the Solano County Emergency Operations Plan (EOP), which was most recently updated in May 2024.[152] The EOP outlines emergency response procedures and assigns responsibilities consistent with California's Standardized Emergency Management System (SEMS) and the National Incident Management System (NIMS). As part of the Solano County Operational Area, Vallejo's emergency response and recovery efforts are integrated into countywide protocols that guide preparedness, initial response, extended response, and recovery activities. In addition, the Solano County Multi-Jurisdictional Hazard Mitigation Plan (2022) and the Community Wildfire Protection Plan (2023) identify local and regional risks and outline hazard mitigation and wildfire safety strategies, including those applicable to Vallejo.[153, 154]

At the local level, the Vallejo Fire Department leads public safety and emergency preparedness efforts, offering resources such as wildfire prevention brochures and defensible space guidance to residents. The City also participates in the Alert Solano emergency notification system, which provides timely information to residents during critical incidents such as natural disasters,

152 Solano County Office of Emergency Services. 2024. *Solano County Emergency Operations Plan (EOP)*. May. Website: https://www.solanocounty.com/depts/oes/emergency_plans.asp.

153 Solano County Office of Emergency Services. 2022. *Solano County Multi-Jurisdictional Hazard Mitigation Plan (MJHMP)*. March 2022. Website: https://www.solanocounty.com/depts/oes/emergency_plans.asp.

154 Solano County Office of Emergency Services. 2023. *Community Wildfire Protection Plan (CWPP)*. November. https://www.solanocounty.com/depts/oes/emergency_plans.asp.

evacuations, and public safety threats. These coordinated planning efforts ensure that the City is prepared to manage and mitigate emergency situations in accordance with adopted regional and local plans.[155]

As previously discussed in Section 4.9, Hazards and Hazardous Materials, the proposed project would be consistent with the policies outlined in the Solano County General Plan Public Health and Safety chapter, the City of Vallejo General Plan Nature and Built Environment chapter, the Solano County EOP, and the Solano County MJHMP. The proposed project would not alter or block adjacent roadways, and implementation of the proposed project would not be expected to impair the function of nearby emergency evacuation routes. In addition, operation of the proposed project would not cause permanent alterations to vehicle circulation routes and patterns or impede public access or travel upon public rights-of-way. Prior to approval of final maps and improvement plans for any development project within Vallejo, plan review and approval by the VFD is required. Internal roadways and ingress/egress for each site would be required to meet State and local standards regarding turning radius, road width, and emergency vehicle access.

Given that the site is located within an urbanized area and not in a designated Very High Fire Hazard Severity Zone, the proposed development would not increase wildfire risks beyond what is contemplated in the plans. Moreover, compliance with local building codes, defensible space requirements, and the City's fire prevention programs would ensure alignment with the goals of these hazard mitigation frameworks. Therefore, potential impacts to an adopted emergency response plan or emergency evacuation plan would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

b. Would the project, due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire? ***(Less Than Significant Impact, No New Impact)***

Construction of the proposed project would involve the use of some flammable materials, such as gasoline, diesel fuel, hydraulic oils, paints, and solvents. During construction, there would be increased human activity and ignition sources, including equipment that could create sparks, be a source of heat, or leak flammable materials on the project site. However, all construction equipment is required to have fire suppression equipment (such as a fire extinguisher) on board or at the work site, secondary containment would be required for fuel-powered equipment, and a spill kit would be required to be kept on site during construction for use in case of any leaks or spills of flammable materials. These existing requirements would reduce the potential exacerbation of wildfire risks related to construction activities.

Operation of the proposed project would be consistent with surrounding residential uses and the allowable zoning and General Plan land use designations for the project site. The proposed project would be subject to the design standards and guidelines outlined in the City of Vallejo Municipal

[155] Solano County Office of Emergency Services. "Alert Solano Emergency Notification System." Accessed May 10, 2025. Website: https://www.solanocounty.com/depts/oes/alertsolano/emergency.asp.

Code and would be subject to Development Review and Design Review to ensure the proposed structures conform with all the applicable regulations.

The proposed project would also be subject to requirements in Section 13000 et seq. of the California Health and Safety Code, California Building Standards Code, and California State Fire Code, which include regulations concerning the following: building standards for fire protection; fire protection and notification systems such as extinguishers and smoke alarms; safety for firefighters and emergency responders during emergency operations; minimum standards for hazardous vegetation and fuel management, defensible space, and building construction; and minimum standards for emergency access and water supply for fire response.

Compliance with these existing regulatory requirements would ensure that the proposed project would not exacerbate wildfire risks and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire. Impacts would be less than significant, and no mitigation is required. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

c. Would the project require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment? ***(Less Than Significant Impact, No New Impact)***

The proposed project involves the construction of 51 single-family residential units. Associated improvements include utility connections to existing utility facilities, including water, sanitary sewer, storm drainage, electricity, gas, and telecommunication infrastructure. Utility connections/lines would be constructed in conformance with City standards as detailed in Section 4.19, Utilities and Service Systems. In addition, all residences would include automatic fire sprinkler systems installed in accordance with the adopted building codes. The project does not propose the installation or maintenance of any other associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines, or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment, and impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

d. Would the project expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes? ***(Less Than Significant with Mitigation Incorporated, No New Impact)***

Construction of the proposed project would be required to obtain coverage under the NPDES General Construction stormwater permit. As discussed in Section 4.10, Hydrology and Water Quality, the proposed project would implement a SWPPP that specifies BMPs and erosion control measures to be used during construction to manage runoff flows. Additionally, the proposed project would be required to implement LID techniques as required by the MRP, and as detailed in Section 4.10, would not significantly alter drainage patterns compared to existing conditions. Implementation of **Project Specific Mitigation Measure GEO-1,** which requires the project sponsor

to incorporate all of the recommendations of the Geotechnical Investigation and any recommendations included in a design-level geotechnical investigation into the project development plans, would reduce the potential impacts related to landslides to a less than significant level with mitigation. Furthermore, the project site is not located within a flood zone.[156] Therefore, the proposed project would not have the potential to expose people or structures to downslope or downstream flooding or landslides. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

[156] Federal Emergency Management Agency (FEMA). 2016. Flood Insurance Rate Map No. 06095C0629G. Map Revised August 3, 2016. Website: https://msc.fema.gov/portal/search (accessed July 5, 2024).

4.21 MANDATORY FINDINGS OF SIGNIFICANCE

	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact	No New Impact
a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	☐	☒	☐	☐	☒
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	☐	☒	☐	☐	☒
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	☐	☒	☐	☐	☒

4.21.1 Impact Analysis

a. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

As discussed and analyzed in this document, construction and operation of the proposed project would not substantially degrade the quality of the environment; reduce the habitat, population, or range of a plant or animal species; or eliminate important examples of California history or prehistory. The proposed project has been designed to minimize impacts to both biological and cultural resources, and implementation of project specific mitigation measures recommended in this Initial Study would ensure that impacts to biological and cultural resources are reduced to a less than significant level. Section 4.4, Biological Resources, includes mitigation measures to minimize impacts to nesting birds, roosting bats, sensitive natural communities, and wetlands. Additionally, Section 4.5, Cultural Resources, includes mitigation measures to minimize impacts to unknown cultural resources within the project site. With implementation of these mitigation measures, the proposed project would result in less than significant impacts to the quality of the environment.

b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)? ***(Less Than Significant with Mitigation Incorporated, No New Impact)***

Section 15065(a)(3) of the *State CEQA Guidelines* states that a project's cumulative impacts are the possible environmental effects that may be cumulatively considerable when considered with other reasonably foreseeable projects. Cumulatively considerable impacts occur when the incremental effects of a particular project or program are significant when viewed in connection with the effects of other past, current, or reasonably foreseeable future projects. Section 15355 of the *State CEQA Guidelines* defines a cumulative impact as an impact that is created as a result of the combination of the project evaluated in the CEQA document together with other projects causing related impacts. The proposed project is located in an undeveloped area, adjacent to existing residential uses. At this time, no other reasonably foreseeable projects have been identified within the immediate surroundings. While various projects within Vallejo have the potential to be under construction concurrent with the proposed project, concurrent projects within the city would be subject to regulations similar to those outlined in this document and would incorporate mitigation measures, as necessary, that would reduce impacts of the project. As shown in the discussion above, environmental impacts associated with the proposed project can be reduced to less than significant levels with the implementation of existing regulations and/or project-specific mitigation measures, with the exception of greenhouse gas emission operational impacts that would remain significant and unavoidable. All project-related impacts are localized and confined to the immediate project area. Given that the potential project-related impacts, with mitigation, would not result in any new cumulative impacts or increase the severity of a previously identified significant cumulative impact as previously analyzed, and no other CEQA standards for supplemental review are met, no new impact would occur.

c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly? ***(Less Than Significant with Mitigation Incorporated, No New Impact)***

Based on the analysis provided throughout this Initial Study, with incorporation of mitigation measures and regulatory compliance measures, the project would not result in any environmental effects that would cause substantial adverse effects on human beings, either directly or indirectly. Potential impacts on human beings would be less than significant with mitigation incorporated. Therefore, implementation of the proposed project would not result in any new impacts or increase the severity of a previously identified significant impact as previously analyzed, and no other CEQA standards for supplemental review are met. No new impact would occur.

5.0 UPDATED MITIGATION MONITORING AND REPORTING PROGRAM

This Updated Mitigation Monitoring and Reporting Program (MMRP), shown below in **Table 5.A**, has been prepared for use in implementing mitigation measures for the Vista Cove Planned Development Project (project)

As the Lead Agency, the City of Vallejo is responsible for ensuring full compliance with all mitigation measures adopted for the proposed project. The City will monitor and report on all mitigation activities. Mitigation measures will be implemented at different stages of development throughout the project area. In this regard, the responsibilities for implementation have been assigned to the Applicant, Contractor, or a combination thereof. If during the course of project implementation, any of the mitigation measures identified herein cannot be successfully implemented, the City shall be immediately informed, and the City will then inform any affected responsible agencies. The City, in conjunction with any affected responsible agencies, will then determine if modification to the project is required and/or whether alternative mitigation is appropriate.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Aesthetics						
No Mitigation Measures required.						
Agriculture and Forestry Resources						
No Mitigation Measures required.						
Air Quality						
General Plan EIR Mitigation Measure AQ 2b.1	As part of the City's development approval process, the City shall require applicants for future development projects to comply with the current Bay Area Air Quality Management District's basic control measures for reducing construction emissions of PM_{10} (Table 8-1, Basic construction Mitigation Measures Recommended for All Proposed Projects, of the BAAQMD CEQA Guidelines).	During development approval process	Construction Contractor/City	City/BAAQMD	During development approval process	Implementation of BAAQMD basic control measures for reducing construction emissions of PM_{10}.
Project Specific Mitigation Measure AIR-1	**Tier 4 Final Emissions Standards.** During construction of the proposed project, the project contractor shall ensure all off-road, diesel-powered construction equipment of 50 horsepower or more used for the project construction meets, at a minimum, the California Air Resources Board Tier 4 Final emissions standards or the equivalent.	During Construction	Project Contractor	Project Contractor	Daily monitoring during all construction activities using diesel-powered equipment	Implementation of the California Air Resources Board Tier 4 Final emissions standards or the equivalent during construction activities.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Biological Resources						
Project Specific Mitigation Measure BIO-1a	**Avoidance of Nesting Bird Season**. To avoid adverse effects to the active nests of special-status and other native bird species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur during the non-nesting season, between September 1 through January 31.	During the non-nesting season, between September 1 through January 31	Qualified Biologist	Qualified Biologist	During the non-nesting season, between September 1 through January 31	Implementation of the avoidance measures during the non-nesting season, between September 1 through January 31.
Project Specific Mitigation Measure BIO-1b	**Pre-Construction Nesting Bird Surveys.** A pre-construction nest survey for white-tailed kite, northern harrier, short-eared owl, and other native bird species shall be conducted prior to initial ground disturbance, including tree removal or vegetation removal if it begins during the nesting bird season (defined as February 1 through August 31). If (containing eggs, chicks or young) are discovered during these surveys, a qualified biologist shall establish a species-specific no-work buffer around the active nest. Work may resume in the buffer after the nesting season ends, or a qualified biologist confirms the nest is inactive.	During the nesting bird season (defined as February 1 through August 31)	Qualified Biologist	Qualified Biologist	One-time pre-construction nest survey during the nesting bird season (defined as February 1 through August 31). Continued monitoring if active nests are found.	Implementation of pre-construction nest survey for white-tailed kite, northern harrier, short-eared owl, and other native bird species during the nesting bird season (defined as February 1 through August 31). If active nests are found the Qualified Biologist.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Project Specific Mitigation Measure BIO-2a	**Avoidance of Maternity Roosting Season.** To avoid adverse effects to maternity roosts of special-status and other bat species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur outside the maternity roosting season, between September 1 through April 30. Large trees (diameter at breast height [DBH] > 24 inches) removed during this season (September 1–April 30) shall be cut using a two-phased system where branches and limbs are cut and left on the ground overnight prior to chipping or removal from the site.	Outside the maternity roosting season, between September 1 through April 30	Qualified Biologist	Qualified Biologist	One time pre construction verification plus monitoring during removal if it occurs near the end of season.	Implementation of the seasonal avoidance ensures no disturbance occurs to active bat maternity roosts.
Project Specific Mitigation Measure BIO-2b	**Pre-Construction Roost Surveys.** During the maternity roost season (May 1–August 31), at least 30 days prior to the removal of any large tree (DBH > 24 inches) a bat roost assessment shall be conducted by a qualified biologist to determine if potential roost habitat is present. If no maternity roost habitat is present, trees shall be removed using a two-phased cut. Cut branches and limbs shall be left on	During the maternity roost season (May 1–August 31), at least 30 days prior to the removal of any large tree	Qualified Biologist	Project Contractor/ Qualified Biologist	One time pre-construction survey per tree prior to removal; if maternity roost habitat is present, continued monitoring during emergence surveys until trees can be removed safely.	Implementation of pre-construction roost surveys to ensure that potential and active maternity roosts are identified and protected throughout the entire maternity season, with no tree removal occurring in active roosts until the season is complete.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	the ground overnight prior to chipping or removal from the site. If potential maternity roosting habitat is present, the qualified biologist shall conduct an emergence survey to determine if the roost is occupied or assume the roost is occupied and establish a no-work buffer. If an emergence survey is conducted and does not detect bats, the tree may be removed with no further measures required to protect roosting bats. If roosting bats are detected, or the tree is assumed to be an active roost, the tree shall be given a 100-foot no work buffer and shall be avoided until after the maternity roosting season is complete. Once the maternal roosting season is complete, tree removal shall follow the two-phase approach for tree removal.					
Project Specific Mitigation Measure BIO-3a	**Compensatory Mitigation for Loss of Seasonal Wetland.** Compensatory mitigation for permanent loss of 0.49 acre of the seasonal wetland shall be required. Mitigation may be satisfied through purchase of mitigation bank credits from an approved mitigation bank,	Prior to or concurrent with construction	Qualified Biologist / Project Applicant	Project Applicant	Prior to or concurrent with construction	Implementation of compensatory mitigation to ensure permanent wetland loss is offset and the mitigation ratio of 1:1 is achieved, with restored or preserved habitat

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	payment of in-lieu fees to an approved public agency or conservation organization (e.g., local land trust), for implementation of compensatory mitigation projects, or via a permittee responsible mitigation involving creation, restoring, or enhancing analogous habitat. The ratio for acres of mitigation to acres impacted shall be 1:1.					maintained per agency-approved requirements.
Project Specific Mitigation Measure BIO-4a	**Construction Fencing.** Prior to ground-disturbing activities, construction fencing or flagging shall be installed to delineate the riparian and freshwater marsh boundaries. The fencing will be checked regularly during construction activities to ensure that the fencing remains intact and functional, and that encroachment has not occurred into the sensitive habitat or boundary; any repairs to the fence or encroachment correction will be conducted immediately. At the end of the project all temporary flagging, fencing, or other materials would be removed from the work areas and vicinity of the channel.	Prior to ground disturbance	Qualified Biologist	Qualified Biologist/ Project Contractor	Regular checks during construction; repairs as needed.	Implementation of construction fencing to delineate sensitive habitats and prevent encroachment throughout construction.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Project Specific Mitigation Measure BIO-4b	**Construction Best Management Practices.** Erosion control measures would be utilized throughout all phases of the Project where sediment runoff from construction may potentially enter nearby waters. Appropriate sediment and erosion control BMPs (e.g., use of silt fencing and/or straw waddles around the perimeter of the construction zone) will be implemented during and following construction to minimize surface runoff originating from the Project and thereby protect water quality of the freshwater marsh. Erosion control structures would be monitored for effectiveness and would be repaired or replaced as needed. i. Prior to construction, a Stormwater Pollution Prevention Plan (SWPPP) would be developed. The plan would include the implementation and maintenance of erosion control measures. ii. Prior to construction, an Accidental Spill Prevention and Cleanup Plan would be	Throughout all phases of construction	Qualified Biologist	Qualified Biologist/ Project Contractor	Daily/ongoing monitoring for erosion, spills, and equipment maintenance.	Implementation of BMPs, including erosion and sediment control, spill prevention, and invasive species avoidance, to protect water quality during construction.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	prepared. This plan would include required spill control absorbent material, for use beneath stationary equipment, to be present on-site and available at all times. iii. No fueling, cleaning, or maintenance of vehicles or equipment would take place within any areas where an accidental discharge may cause hazardous materials to enter waterways. iv. Any equipment or vehicles used for the Project would be checked and maintained daily to prevent leaks of fluids that could be deleterious to aquatic habitats. v. All equipment would be cleaned before arriving on the site and before removal from the site to prevent spread of invasive plants. vi. To avoid establishment of invasive, non-native plant species on or adjacent to the Project Area, the following measures will be implemented: a. Vegetation disturbances will be limited to those					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	areas identified on construction plans and maps as slated for development or construction staging. b. Erosion and sediment control materials will be certified as weed-free. vii. Staging and storage areas for equipment, materials, fuels, lubricants and solvents, would be located outside of the stream channel banks and outside of nearby waters. viii. Stationary equipment such as motors, pumps, and generators, located adjacent to aquatic features would be positioned over secondary containment sufficient to arrest a catastrophic failure. **ix.** Stockpiles of excavated soil or other materials would be covered when not in active use (i.e., would not be used or moved for 72 hours). All trucks hauling soil, sand, and other loose materials would be covered.					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Project Specific Mitigation Measure BIO-4c	**Tree Protection Measures.** In order to protect trees adjacent to the project area: In order to protect trees adjacent to the Project Area: i. Trees not proposed for removal but adjacent to Project activities shall have orange construction fencing installed at the dripline. This shall be known as the tree protection zone (TPZ). ii. Work within the TPZ shall be minimized to the maximum extent feasible. iii. If work must occur within the TPZ, the fence can be removed temporarily, the tree trunk shall be wrapped in a waddle, and the fence shall be placed back as soon as work is completed. iv. All equipment and stockpiles must be in designated staging areas away from all TPZ. v. All trees to be removed shall be felled away from any trees to be avoided. vi. If trees not proposed for removal require pruning, pruning shall follow ANSI A300 standards or be	During construction	Qualified Biologist	Qualified Biologist/ Project Contractor	Continuous monitoring for work within tree protection zones (TPZs)	Implementation of tree protection measures, including fencing, pruning standards, and TPZ management, to protect trees adjacent to the project area.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	performed by a certified arborist. **vii.** If any roots are exposed from trees to be avoided, roots can be pruned up to the diameter of 2 inches and pruned at 90-degree angles. The roots shall be covered by a damp burlap sack or damp towel while exposed.					
	Cultural Resources					
Project Specific Mitigation Measure CUL-1	**Unknown Discovery of Archaeological Resources**. Should an archaeological deposit be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology contacted to assess the situation, determine if the deposit qualifies as a historical resource, consult with agencies as appropriate, and make recommendations for the treatment of the discovery.	During Ground Disturbance	Construction Contractor/Qualified Archaeologist	Construction Contractor / Qualified Archaeologist	Monitoring would occur continuously during all ground-disturbing activities within 25 feet of any discovered archaeological resources.	Implementation of discovery protocol and assessment of archaeological finds, with work halted within 25 feet until evaluation is complete.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	If the deposit is found to be significant (i.e., eligible for listing in the California Register of Historical Resources), the project applicant shall be responsible for funding and implementing appropriate mitigation measures. Mitigation measures may include recording the archaeological deposit, data recovery and analysis, and public outreach regarding the scientific and cultural importance of the discovery. Upon completion of the selected mitigations, a report documenting methods, findings, and recommendations shall be prepared by the qualified archaeologist and submitted to the City of Vallejo for review, and the final report shall be submitted to the Northwest Information Center at Sonoma State University. Significant archaeological materials shall be submitted to an appropriate local curation facility and used for future research and public interpretive displays, as appropriate.					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Project Specific Mitigation Measure CUL-2	**Protocol for Human Remains Discovery.** If human remains are encountered, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to State PRC Section 5097.98. The County Coroner must be notified of the find immediately. If the remains are determined to be Native American, the County Coroner would notify the Native American Heritage Commission (NAHC), which would determine and notify a Most Likely Descendant (MLD) and the following provisions shall apply: • The Medical Examiner shall immediately be notified, ground disturbing activities in that location shall cease within 25 feet of the discovery and the Tribe shall be allowed, pursuant to California Public Resources Code (PRC) Section 5097.98(a) to inspect the site of the discovery and make determinations as to how the human remains and grave goods should be treated	During ground disturbance	Construction Contractor/Qualified Archaeologist	City / County Coroner/Tribe	If remains are discovered monitoring would occur during ground disturbing activities.	Implementation of human remains discovery procedures per State law and tribal consultation, including site protection and culturally appropriate treatment.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	and disposed of with appropriate dignity. • The Tribe shall complete its inspection and make its MLD recommendation within forty-eight (48) hours of getting access to the site. The Tribe shall have the final determination as to the disposition and treatment of human remains and grave goods. Said determination may include avoidance of the human remains, reburial on-site or reburial on tribal or other lands that will not be disturbed in the future. • The Tribe may wish to rebury said remains and grave goods or ceremonial and cultural items on or near the site of their discovery, in an area which will not be subject to future disturbances over a prolonged period of time. Reburial of human remains shall be accomplished in compliance with California PRC Sections 5097.98(a) and (b). The term "human remains" encompasses more than human bones because the Tribe's traditions					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	call for the burial of associated cultural items with the deceased (funerary objects), and/or the ceremonial burning of Native American human remains, funerary objects, grave goods, and animals. Ashes, soils, and other remnants of these burning ceremonies, as well as associated funerary objects and unassociated funerary objects buried with or found near the Native American remains are to be treated in the same manner as bones or bone fragments that remain intact. • Unless otherwise required by law, the site of any reburial of Native American human remains shall not be disclosed and will not be governed by public disclosure requirements of the California Public Records Act (California Government Code Section 6250 et. seq). The Medical Examiner shall withhold public disclosure of information related to such reburial pursuant to the specific exemption set forth in California Government Code Section 6254(r). The Tribe					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	will require that the location for reburial is recorded with the California Historic Resources Inventory System (CHRIS) on a form that is acceptable to the CHRIS center. The Tribe may also suggest that the landowner enter into an agreement regarding the confidentiality of site information that will run with title on the property. • Treatment of all cultural items, including ceremonial items and archaeological items will reflect the religious beliefs, customs, and practices of the Tribe. All cultural items, including ceremonial items and archaeological items, which may be found at a Project site should be turned over to the Tribe for appropriate treatment, unless otherwise ordered by a court of agency of competent jurisdiction. The project applicant should waive any and all claims to ownership of Tribal ceremonial and cultural items, including archaeological items, which may be found on a project site in favor of the Tribe. If any

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	intermediary (e.g., an archaeological retained by the project applicant) is necessary, said entity or individual shall not possess those items for longer than is reasonably necessary, as determined solely by the Tribe. • If additional significant sites or sites not identified as significant in the environmental review process, but later determined to be significant are located within a project impact area, such sites will be subjected to further archaeological and cultural significance evaluation by the project applicant, Solano County and the Tribe to determine if additional mitigation measures are necessary to treat sites in a culturally appropriate manner consistent with CEQA requirements for mitigation of impacts to cultural resources. If there are human remains present that have been identified as Native American, all work will cease for a period of up to 30 days in accordance with Federal Law.					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	Energy					
	No Mitigation Measures required.					
	Geology and Soils					
Project Specific Mitigation Measure GEO-1	**Design-Level Geotechnical Review.** A licensed Geotechnical Engineer or their representative shall be retained to perform a design-level geotechnical investigation once site development plans are final. The design-level geotechnical investigation shall include further evaluation of potential geologic hazards related to landslides, stability of graded slopes, corrective grading for planned building sites, and the presence of moderate to highly expansive soil and bedrock. The design-level investigation findings shall be used to address all the geotechnical concerns described in the Preliminary Geotechnical Exploration and to develop detailed recommendations for design and construction. The recommendations of the Preliminary Geotechnical Exploration and any recommendations included in the required design-level geotechnical investigation for the project shall be	Pre-Construction/ During Construction/ Post-Construction	Applicant / Geotechnical Engineer	**City**	One investigation before design; oversight during grading; certification at completion.	Implementation of all geotechnical recommendations in design and construction, verified by letter of compliance upon project completion.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	incorporated into all design and engineering plans. At the end of construction, the Geotechnical Engineer shall provide a letter regarding contractor compliance with project plans and specifications and with the recommendations of the Geotechnical Investigation and any supplemental recommendations issued during construction. The letter shall be submitted for review to the City of Vallejo Building Division and confirmed prior to issuance of a certificate of occupancy.					
Project Specific Mitigation Measure GEO-2	**Discovery of Paleontological Resources.** Should paleontological resources be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified paleontologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. For purposes of this mitigation, a "qualified paleontologist" shall be an individual with the following	During project subsurface construction activities	Qualified Paleontologist	Project Contractor /Qualified Paleontologist	Continuous monitoring during all ground-disturbing construction activities within 25 feet of any discovered paleontological resources.	Implementation of discovery protocol; if fossils are encountered, work within 25 feet is redirected and a qualified paleontologist assesses the find, with mitigation measures applied as necessary to ensure protection and documentation of paleontological resources.

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	qualifications: (1) a graduate degree in paleontology or geology and/or a person with a demonstrated publication record in peer-reviewed paleontological journals; (2) at least 2 years of professional experience related to paleontology; (3) proficiency in recognizing fossils in the field and determining their significance; (4) expertise in local geology, stratigraphy, and biostratigraphy; and (5) experience collecting vertebrate fossils in the field. If the paleontological resources are found to be significant and project activities cannot avoid them, measures shall be implemented to ensure that the project does not cause a substantial adverse change in the significance of the paleontological resource. Measures may include monitoring, recording the fossil locality, data recovery and analysis, a final report, and accessioning the fossil material and technical report to a paleontological repository. Upon completion of the assessment, a report documenting methods, findings, and recommendations					

Table 5.A: Updated Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	shall be prepared and submitted to the City of Vallejo for review. If paleontological materials are recovered, this report also shall be submitted to a paleontological repository, such as the University of California Museum of Paleontology, along with significant paleontological materials. Public educational outreach may also be appropriate. The project sponsor shall inform its contractor(s) of the sensitivity of the project site for paleontological resources and shall verify that the following directive has been included in the project grading plans: *"The subsurface of the construction site may be sensitive for fossils. If fossils are encountered during project subsurface construction, all ground-disturbing activities within 25 feet shall be redirected and a qualified paleontologist contacted to assess the situation, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. Project personnel shall not collect or move any*

	paleontological materials. Fossils can include plants and animals, and such trace fossil evidence of past life as tracks or plant imprints. Ancient marine sediments may contain invertebrate fossils such as snails, clam and oyster shells, sponges, and protozoa; and vertebrate fossils such as fish, whale, and sea lion bones. Contractor acknowledges and understands that excavation or removal of paleontological material is prohibited by law and constitutes a misdemeanor under California Public Resources Code, Section 5097.5."

2.1. Construction Emissions Compared Against Thresholds

2.2. Construction Emissions by Year, Unmitigated

2.3. Construction Emissions by Year, Mitigated

2.4. Operations Emissions Compared Against Thresholds

2.5. Operations Emissions by Sector, Unmitigated

2.6. Operations Emissions by Sector, Mitigated

3. Construction Emissions Details

3.1. Site Preparation (2026) - Unmitigated

3.2. Site Preparation (2026) - Mitigated

3.3. Grading (2026) - Unmitigated

3.4. Grading (2026) - Mitigated

3.5. Building Construction (2026) - Unmitigated

3.6. Building Construction (2026) - Mitigated

3.7. Building Construction (2027) - Unmitigated

3.8. Building Construction (2027) - Mitigated

3.9. Paving (2027) - Unmitigated

3.10. Paving (2027) - Mitigated

3.11. Architectural Coating (2027) - Unmitigated

3.12. Architectural Coating (2027) - Mitigated

4. Operations Emissions Details

4.1. Mobile Emissions by Land Use

4.1.1. Unmitigated

4.1.2. Mitigated

4.2. Energy

4.2.1. Electricity Emissions By Land Use - Unmitigated

4.2.2. Electricity Emissions By Land Use - Mitigated

4.2.3. Natural Gas Emissions By Land Use - Unmitigated

4.2.4. Natural Gas Emissions By Land Use - Mitigated

4.3. Area Emissions by Source

4.3.1. Unmitigated

4.3.2. Mitigated

4.4. Water Emissions by Land Use

4.4.1. Unmitigated

4.4.2. Mitigated

4.5. Waste Emissions by Land Use

4.5.1. Unmitigated

4.5.2. Mitigated

4.6. Refrigerant Emissions by Land Use

4.6.1. Unmitigated

4.6.2. Mitigated

4.7. Offroad Emissions By Equipment Type

4.7.1. Unmitigated

4.7.2. Mitigated

4.8. Stationary Emissions By Equipment Type

4.8.1. Unmitigated

4.8.2. Mitigated

4.9. User Defined Emissions By Equipment Type

4.9.1. Unmitigated

4.9.2. Mitigated

4.10. Soil Carbon Accumulation By Vegetation Type

4.10.1. Soil Carbon Accumulation By Vegetation Type - Unmitigated

4.10.2. Above and Belowground Carbon Accumulation by Land Use Type - Unmitigated

4.10.3. Avoided and Sequestered Emissions by Species - Unmitigated

4.10.4. Soil Carbon Accumulation By Vegetation Type - Mitigated

4.10.5. Above and Belowground Carbon Accumulation by Land Use Type - Mitigated

4.10.6. Avoided and Sequestered Emissions by Species - Mitigated

5.18.2. Sequestration

5.18.2.1. Unmitigated

5.18.2.2. Mitigated

8. User Changes to Default Data

1. Basic Project Information

1.1. Basic Project Information

Data Field	Value
Project Name	Vista Cove Planned Development Project
Construction Start Date	6/1/2026
Operational Year	2027
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	3.60
Precipitation (days)	34.8
Location	38.08284299702481, -122.20120688622941
County	Solano-San Francisco
City	Vallejo
Air District	Bay Area AQMD
Air Basin	San Francisco Bay Area
TAZ	822
EDFZ	4
Electric Utility	Pacific Gas & Electric Company
Gas Utility	Pacific Gas & Electric
App Version	2022.1.1.29

1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
Single Family Housing	51.0	Dwelling Unit	10.0	99,450	154,638	—	144	—

1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Construction	C-5	Use Advanced Engine Tiers

2. Emissions Summary

2.1. Construction Emissions Compared Against Thresholds

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

5.18.2.2. Mitigated

Tree Type	Number	Electricity Saved (kWh/year)	Natural Gas Saved (btu/year)

8. User Changes to Default Data

Screen	Justification

Land Use	The proposed project would result in the subdivision of the 20.13-acre site, of which approximately 10 acres would be developed, while the remaining acreage would be retained as open space. The residential portion of the proposed project would include 51 residential lots, passive park use, and related infrastructure improvements. The proposed project would also include 3.55 acres of common open space.
Construction: Construction Phases	Construction of the proposed project is anticipated to begin in June 2026 and would occur over an approximately 1-year period.
Construction: Off-Road Equipment	Assuming the use of Tier 2 construction equipment.
Construction: Trips and VMT	It is anticipated that 58,700 cubic yards of soil would be cut and 59,300 cubic yards would be used for fill, resulting in a total soil import of 600 cubic yards.
Operations: Vehicle Data	The proposed project would generate approximately 481 average daily trips.
