*** MODELOPTs: RegDFAULT CONC ELEV URBAN SigA Data

*** MODEL SETUP OPTIONS SUMMARY ***

- -

** Model Options Selected:
* Model Uses Regulatory DEFAULT Options
* Model Is Setup For Calculation of Average CONCentration Values.
* NO GAS DEPOSITION Data Provided.
* NO PARTICLE DEPOSITION Data Provided.
* Model Uses NO DRY DEPLETION. DDPLETE = F
* Model Uses NO WET DEPLETION. WETDPLT = F
* Stack-tip Downwash.
* Model Accounts for ELEVated Terrain Effects.
* Use Calms Processing Routine.
* Use Missing Data Processing Routine.
* No Exponential Decay.
* Model Uses URBAN Dispersion Algorithm for the SBL for 3 Source(s),
for Total of 1 Urban Area(s):
Urban Population = 120749.0 ; Urban Roughness Length = 1.000 m
* Urban Roughness Length of 1.0 Meter Used.
* TEMP_Sub - Meteorological data includes TEMP substitutions
* Model Assumes No FLAGPOLE Receptor Heights.
* The User Specified a Pollutant Type of: OTHER

**Model Calculates 1 Short Term Average(s) of: 1-HR
and Calculates PERIOD Averages

**This Run Includes: 3 Source(s); 1 Source Group(s); and 2766 Receptor(s)

with: 0 POINT(s), including
0 POINTCAP(s) and 0 POINTHOR(s)
and: 0 VOLUME source(s)
and: 3 AREA type source(s)
and: 0 LINE source(s)
and: 0 RLINE/RLINEXT source(s)
and: 0 OPENPIT source(s)
and: 0 BUOYANT LINE source(s) with a total of 0 line(s)
and: 0 SWPOINT source(s)

**Model Set To Continue RUNning After the Setup Testing.

**The AERMET Input Meteorological Data Version Date: 18081

**Output Options Selected:
Model Outputs Tables of PERIOD Averages by Receptor
Model Outputs Tables of Highest Short Term Values by Receptor (RECTABLE Keyword)
Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)
Model Outputs Separate Summary File of High Ranked Values (SUMMFILE Keyword)

**NOTE: The Following Flags May Appear Following CONC Values: c for Calm Hours

```
                                                    m for Missing Hours
                                                    b for Both Calm and Missing Hours

**Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =     6.00 ;  Decay Coef. =    0.000     ;  Rot. Angle =     0.0
                 Emission Units = GRAMS/SEC                                ;  Emission Rate Unit Factor =   0.10000E+07
                 Output Units   = MICROGRAMS/M**3

**Approximate Storage Requirements of Model =      3.8 MB of RAM.

**Input Runstream File:          aermod.inp
**Output Print File:             aermod.out

**Detailed Error/Message File:   Construction.err
**File for Summary of Results:   Construction.sum
```

1.0 INTRODUCTION

This Biological Resources Technical Report evaluates existing biological resources, potential impacts, and mitigation measures for the Vista Cove Project (Project) located in the City of Vallejo, Solano County, California (Figure 1, Appendix A). An approximately 20.13-acre Study Area was evaluated that includes Assessor Parcel Numbers (APN) 079-12-100 and 079-171-170. The proposed Project involves the construction of a residential development.

1.1 Overview and Purpose

This report provides an assessment of biological resources within the Study Area and immediate vicinity. The purpose of the assessment is to develop and gather information on sensitive biological communities and special-status plant and wildlife species to support an evaluation of the Project under the California Environmental Quality Act (CEQA). This report describes the results of the site visit, which assessed the Study Area for: (1) the presence of sensitive biological communities, special-status plant species, and special-status wildlife species, and (2) the potential for the site to support special-status plant and wildlife species. The assessment includes a formal wetland delineation. Based on the results of the site assessment, potential impacts to sensitive biological communities and special-status species resulting from the Project are evaluated. If the Project has the potential to result in significant impacts to sensitive biological resources, measures to avoid, minimize, or mitigate for those significant impacts are described.

A biological resources assessment provides general information on the presence, or potential presence, of sensitive species and habitats. This assessment is based on information available at the time of the study and on-site conditions that were observed on the dates the site was visited. Conclusions are based on currently available information used in combination with the professional judgement of the biologists completing this study.

1.2 Project Description

The Study Area, located northeast of the intersection of Shady Lane and Wildflower Avenue in the City of Vallejo, CA is comprised of 20.13 acres of undeveloped land designated by the City of Vallejo for Residential land uses. The Project Area, listed as Lot 1 within the design plans, includes the northern half of the Study Area, approximately 10.40 acres. Parcel A, the southern half of the Study Area, and Parcel B, the riparian and intermittent stream within Lot 1, will not be impacted as a result of this proposed Project (Appendices A and D).

The Project Area encompasses APN 0079-171-170 and a portion of APN 0079-120-100. The western parcel, APN 0079-171-170, approximately 1 acre, is zoned Residential Low Density and has a General Plan designation as primarily single-family. The other parcel, APN 0079-120-100, is zoned Residential Medium Density and has a General Plan designation of Mix of Housing Types/Medium Density. The Project is development for a 10. 40-acre property. The Project would provide for development of 51 single-family residential homes. The proposed 51 dwelling units are comprised of two floor plans with three elevations each. For parking, 102 covered garage spaces, 102 driveway stalls, 24 on-street stalls, and 1 mailbox stall will be provided. Grading proposed by the project would disturb the entirety of the Project Area (10.40 acres). Access to the Project would be provided by one (1) full access driveway through an established residential community to the west.

1.3 Summary of Results

Sensitive vegetation communities or land cover types in the Study Area include riparian, seasonal wetland, freshwater marsh, intermittent stream, and toyon chaparral habitats. Non-sensitive land cover types in the Study Area include non-native grassland, artichoke thistle fields, poison oak scrub, and coyote brush scrub. Only one sensitive land cover type, seasonal wetland, is present within the Project Area. No special-status or rare plant species were observed during the site visits or have potential to occur within the Study Area. One special-status bird, as well as non-status birds with baseline legal protections, have potential to occur within the Study Area. Recommended avoidance, minimization, and mitigation measures are provided to ensure potential impacts to sensitive resources are less than significant.

2.0 REGULATORY BACKGROUND

The following sections explain the regulatory context of the biological assessment, including applicable laws and regulations that were applied to the field investigations and analysis of potential project impacts. Table 1 shows the correlation between these regulations and each Biological Resources question in the Environmental Checklist Form (Appendix G) of the CEQA guidelines.

2.1 Federal and State Regulatory Setting

2.1.1 Vegetation and Aquatic Communities

CEQA provides protections for particular vegetation types defined as sensitive by the California Department of Fish and Game (CDFW), and aquatic communities protected by laws and regulations administered by the U.S Army Corps of Engineers (Corps), State Water Resources Control Board (SWRCB), and Regional Water Quality Control Boards (RWQCB). The laws and regulations that provide protection for these resources are summarized below.

Sensitive Natural Communities: Sensitive natural communities include habitats that fulfill special functions or have special values. Natural communities considered sensitive are those identified in local or regional plans, policies, regulations, or by the CDFW. CDFW ranks sensitive communities as "threatened" or "very threatened" (CDFW 2022a) and keeps records of their occurrences in its California Natural Diversity Database (CNDDB; CDFW 2022b). Vegetation alliances are ranked 1 through 5 in the CNDDB based on NatureServe's (2022) methodology, with those alliances ranked globally (G) or statewide (S) as 1 through 3 considered sensitive. Impacts to sensitive natural communities identified in local or regional plans, policies, or regulations or those identified by the CDFW or U.S. Fish and Wildlife Service (USFWS) must be considered and evaluated under CEQA (CCR Title 14, Div. 6, Chap. 3, Appendix G). In addition, this general class includes oak woodlands that are protected by local ordinances under the Oak Woodlands Protection Act and Section 21083.4 of California Public Resources Code.

Waters of the United States, Including Wetlands: The Corps regulates “Waters of the United States” under Section 404 of the Clean Water Act (CWA). Waters of the United States are defined in the Code of Federal Regulations (CFR) as including the territorial seas, and waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, such as tributaries, lakes and ponds, impoundments of waters of the U.S., and wetlands that are hydrologically connected with these navigable features (33 CFR 328.3). Potential wetland areas, according to the three criteria used to delineate wetlands as defined in the *U.S. Army Corps of Engineers Wetlands Delineation Manual* (Corps Manual; Environmental Laboratory 1987), are identified by the presence of (1) hydrophytic vegetation, (2) hydric soils, and (3) wetland hydrology. Unvegetated waters including lakes, rivers, and streams may also be subject to Section 404 jurisdiction and are characterized by an ordinary high water mark (OHWM) identified based on field indicators such as the lack of vegetation, sorting of sediments, and other indicators of flowing or standing water. The placement of fill material into Waters of the United States generally requires a permit from the Corps under Section 404 of the CWA.

TABLE 1. SUMMARY OF BIOLOGICAL RESOURCES EVALUATION

CEQA ASSESSMENT CATEGORY[1] IV. -BIOLOGICAL RESOURCES	BIOLOGICAL RESOURCES CONSIDERED	RELEVANT LAWS AND REGULATIONS	RESPONSIBLE REGULATORY AGENCY	SUMMARY OF FINDINGS & REPORT SECTION[2]
Question A. Special-status species	Special-status Plants Special-status Wildlife Designated Critical Habitat	Federal Endangered Species Act California Endangered Species Act California Native Plant Protection Act Migratory Bird Treaty Act Bald and Golden Eagle Protection Act	U.S. Fish and Wildlife Service National Marine Fisheries Service California Department of Fish and Wildlife	Potentially significant impacts were identified, and mitigation measures are included that reduce those impacts to a level that is less than significant. **See Sections 5.2 and 7.1 for more information**
Question B. Sensitive natural communities & riparian habitat	Sensitive Natural Communities Streams, Lakes, & Riparian Habitat	California Fish and Game Code Oak Woodland Conservation Act Porter-Cologne Act Clean Water Act	California Department of Fish and Wildlife U.S. Army Corps of Engineers U.S. Environmental Protection Agency State Water Resources Control Board Regional Water Quality Control Board	Potentially significant impacts were identified, and mitigation measures are included that reduce those impacts to a level that is less than significant. **See Section 5.1 and 7.2 for more information**
Question C. State and federally protected wetlands	Wetlands Unvegetated surface waters	Clean Water Act Sections 404/401 Rivers and Harbors Act Section 10 Porter Cologne Act	U.S. Army Corps of Engineers U.S. Environmental Protection Agency State Water Resources Control Board Regional Water Quality Control Board	Potentially significant impacts were identified, and mitigation measures are included that reduce those impacts to a level that is less than significant. **See Section 5.1 and 7.3 for more information**

[1] CEQA Questions have been summarized here; see Section 6.0 for details.

[2] As given in this report; see Section 5.0 subheadings

Question D. Fish & wildlife corridors	Essential Fish Habitat Wildlife Corridors	California Fish and Game Code Magnuson-Stevens Fishery Conservation & Management Act	California Department of Fish and Wildlife National Marine Fisheries Service	No potentially significant impacts were identified, and no mitigation measures are required. **See Section 5.3 and 7.4 for more information**
Question E. Local policies	Protected Trees Coastal zone resources Other biological protections	Local Tree Ordinance General Plan (e.g., Stream & Wetland Setbacks) Local ordinances	Local and regional agencies California Coastal Commission San Francisco Bay Conservation and Development Commission	No potentially significant impacts were identified, and no mitigation measures are required. **See Section 7.5 for more information**
Question F. Local, state, federal conservation plans	Habitat Conservation Plans Natural Community Conservation Plans	Federal Endangered Species Act Natural Community Conservation Planning Act	U.S. Fish and Wildlife Service California Department of Fish and Wildlife	No potentially significant impacts were identified, and no mitigation measures are required. **See Section 7.6 for more information**

The Corps also regulates construction in navigable waterways of the U.S. through Section 10 of the Rivers and Harbors Act (RHA) of 1899 (33 USC 403). Section 10 of the RHA requires Corps approval and a permit for excavation or fill, or alteration or modification of the course, location, condition, or capacity of, any port, roadstead, haven, harbor, canal, lake, harbor or refuge, or enclosure within the limits of any breakwater, or of the channel of any navigable water of the United States. Section 10 requirements apply only to navigable waters themselves, and are not applicable to tributaries, adjacent wetlands, and similar aquatic features not capable of supporting interstate commerce.

Waters of the State, Including Wetlands: The term "Waters of the State" is defined by the Porter-Cologne Act as "any surface water or groundwater, including saline waters, within the boundaries of the state." The SWRCB and nine RWQCB protect waters within this broad regulatory scope through many different regulatory programs. Waters of the State in the context of a CEQA Biological Resources evaluation include wetlands and other surface waters protected by the *State Wetland Definition and Procedures for Discharges of Dredged or Fill Material to Waters of the State* (SWRCB 2019). The SWRCB and RWQCB issue permits for the discharge of fill material into surface waters through the State Water Quality Certification Program, which fulfills requirements of Section 401 of the CWA and the Porter-Cologne Water Quality Control Act. Projects that require a CWA permit are also required to obtain a Water Quality Certification. If a project does not require a federal permit but does involve discharge of dredge or fill material into surface waters of the State, the SWRCB and RWQCB may issue a permit in the form of Waste Discharge Requirements.

Sections 1600-1616 of California Fish and Game Code: Streams and lakes, as habitat for fish and wildlife species, are regulated by CDFW under Sections 1600-1616 of California Fish and Game Code (CFGC). Alterations to or work within or adjacent to streambeds or lakes generally require a 1602 Lake and Streambed Alteration Agreement. The term "stream," which includes creeks and rivers, is defined in the California Code of Regulations (CCR) as "a body of water that flows at least periodically or intermittently through a bed or channel having banks and supports fish or other aquatic life [including] watercourses having a surface or subsurface flow that supports or has supported riparian vegetation" (14 CCR 1.72). The term "stream" can include ephemeral streams, dry washes, watercourses with subsurface flows, canals, aqueducts, irrigation ditches, and other means of water conveyance if they support aquatic life, riparian vegetation, or stream-dependent terrestrial wildlife (CDFG 1994). Riparian vegetation has been defined as "vegetation which occurs in and/or adjacent to a stream and is dependent on, and occurs because of, the stream itself" (CDFG 1994). Removal of riparian vegetation also requires a Section 1602 Lake and Streambed Alteration Agreement from CDFW.

2.1.2 Special-status Species

Endangered and Threatened Plants, Fish, and Wildlife. Specific species of plants, fish, and wildlife species may be designated as threatened or endangered by the federal Endangered Species Act (ESA), or the California Endangered Species Act (CESA). Specific protections and permitting mechanisms for these species differ under each of these acts, and a species' designation under one law does not automatically provide protection under the other.

The ESA (16 USC 1531 et seq.) is implemented by the USFWS and the National Marine Fisheries Service (NMFS). The USFWS and NMFS maintain lists of endangered and threatened plant and animal species (referred to as "listed species"). "Proposed" or "candidate" species are those that are being considered for listing and are not protected until they are formally listed as threatened or endangered. Under the ESA, authorization must be obtained from the USFWS or NMFS prior to take of any listed species. "Take"

under the ESA is defined as “harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct.” Take under the ESA includes direct injury or mortality to individuals, disruptions in normal behavioral patterns resulting from factors such as noise and visual disturbance, and impacts to habitat for listed species. Actions that may result in take of an ESA-listed species may obtain a permit under ESA Section 10, or via the interagency consultation described in ESA Section 7. Federally listed plant species are only protected when take occurs on federal land.

The ESA also provides for designation of critical habitat, which are specific geographic areas containing physical or biological features “essential to the conservation of the species.” Protections afforded to designated critical habitat apply only to actions that are funded, permitted, or carried out by federal agencies. Critical habitat designations do not affect activities by private landowners if there is no other federal agency involvement.

The CESA (CFGC 2050 et seq.) prohibits the take of any plant and animal species that the CFGC determines to be an endangered or threatened species in California. CESA regulations include take protection for threatened and endangered plants on private lands, as well as extending this protection to candidate species that are proposed for listing as threatened or endangered under CESA. The definition of a "take" under CESA ("hunt, pursue, catch, capture, or kill, or attempt to hunt, pursue, catch, capture, or kill") only applies to direct impact to individuals, and does not extend to habitat impacts or harassment. CDFW may issue an Incidental Take Permit under CESA to authorize take if it is incidental to otherwise lawful activity and if specific criteria are met. Take of these species is also authorized if the geographic area is covered by a Natural Community Conservation Plan (NCCP), as long as the NCCP covers that activity.

Fully Protected Species and Designated Rare Plant Species. This category includes specific plant and wildlife species that are designated in the CFGC as protected even if not listed under CESA or ESA. Fully Protected Species includes specific lists of birds, mammals, reptiles, amphibians, and fish designated in CFGC. Fully protected species may not be taken or possessed at any time. No licenses or permits may be issued for take of fully protected species, except for necessary scientific research and conservation purposes. The definition of "take" is the same under the California Fish and Game Code and the CESA. By law, CDFW may not issue an Incidental Take Permit for Fully Protected Species. Under the California Native Plant Protection Act (CNPPA), CDFW has listed 64 “rare” or “endangered” plant species, and prevents “take”, with few exceptions, of these species. CDFW may authorize take of species protected by the CNPPA through the Incidental Take Permit process, or under a NCCP.

Special Protections for Nesting Birds and Bats. The federal Bald and Golden Eagle Protection Act provides relatively broad protections to both of North America’s eagle species (bald eagle [*Haliaeetus leucocephalus*] and golden eagle [*Aquila chrysaetos*)] that in some regards are similar to those provided by the ESA. In addition to regulations for special-status species, most native birds in the United States, including non-status species, have baseline legal protections under the Migratory Bird Treaty Act of 1918 and CFGC, i.e., sections 3503, 3503.5 and 3513. Under these laws/codes, the intentional harm or collection of adult birds as well as the intentional collection or destruction of active nests, eggs, and young is illegal. For bat species, the Western Bat Working Group (WBWG) designates conservation status for species of bats, and those with a high or medium-high priority are typically given special consideration under CEQA.

Essential Fish Habitat. The Magnuson-Stevens Fishery Conservation and Management Act provides for conservation and management of fishery resources in the U.S., administered by NMFS. This Act establishes a national program intended to prevent overfishing, rebuild overfished stocks, ensure conservation, and facilitate long-term protection through the establishment of Essential Fish Habitat

(EFH). EFH consists of aquatic areas that contain habitat essential to the long-term survival and health of fisheries, which may include the water column, certain bottom types, vegetation (e.g., eelgrass (*Zostera* spp.)), or complex structures such as oyster beds. Any federal agency that authorizes, funds, or undertakes action that may adversely affect EFH is required to consult with NMFS.

Species of Special Concern, Movement Corridors, and Other Special-status Species under CEQA. A Species of Special Concern (SSC) is a species formally designated by the CDFW which meets one or more criteria related to a Federal ESA status (if it is not listed under CESA), including extirpation from California, documented population declines, or small population size within California and risk of declines. In addition, CDFW has developed a list of special species as "a general term that refers to all of the taxa the CNDDB is interested in tracking, regardless of their legal or protection status." This list includes lists developed by other organizations, including for example, the Audubon Watch List Species, the Bureau of Land Management Sensitive Species, and USFWS Birds of Conservation Concern. Plant species on the California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants (Inventory) with California Rare Plant Ranks (Rank) of 1 and 2, as well as some with a Rank of 3, are also considered special-status plant species and must be considered under CEQA. Some Rank 3 species and all Rank 4 species are typically only afforded protection under CEQA when such species are particularly unique to the locale (e.g., range limit, low abundance/low frequency, limited habitat) or are otherwise considered locally rare. Additionally, any species listed as sensitive within local plans, policies and ordinances are likewise considered sensitive. Movement and migratory corridors for native wildlife (including aquatic corridors) as well as wildlife nursery sites are given special consideration under CEQA.

2.2 Local Plans and Policies

City of Vallejo General Plan. The City of Vallejo General Plan 2040 (City of Vallejo 2020) contains policies pertaining to the following biological resources categories:

- Wetlands, streams, riparian, and aquatic areas (Policies NBE-1.1G, 1.2D, 1.4A),
- Vegetation communities (Policy NBE 1.2D),
- Plant Species (Policies NBE-1.1E, NBE 1.2D, 1.2E), and
- Wildlife Species (Policies NBE-1.2C, NBE 1.2D, 1.2E)

City of Vallejo Tree Ordinance. The City of Vallejo municipal code (Tree Protection 16.504.07) requires a tree inventory for all trees that will be preserved on the project site prior to construction or permit submittal. For trees that are proposed for removal, "[t]he director may approve the removal of trees based on a determination that there is no feasible alternative design for developing the site and based on report and recommendation by a qualified arborist submitted by the applicant".

The municipal code requires the replacement of "Significant Trees" if they are removed. With the exception of the fire-prone species defined as: blue gum eucalyptus (*Eucalyptus globulus*), Monterey pines (*Pinus radiata*), juniper (*Cupressaceae* spp.), Tree of Heaven (*Ailanthus altissima*), black acacia (*Acacia melanoxylon*), and bamboo. Significant Trees are defined as: "any tree or stand of trees on private property having either a height of twenty-five feet measured above ground level, or a diameter of ten or more inches" (16.701.02). Significant trees shall be replaced at a ratio of at least 3:1, and with at least 15-gallon replacement trees on the project site, adjacent to the project site (subject to the owner's approval), or in the public right-of-way adjacent to the property (subject to approval from the director of public works).

3.0 ASSESSMENT METHODOLOGY

On February 28, 2022, and July 14, 2022, WRA, Inc. (WRA) biologists visited the Study Area to map vegetation, aquatic communities, unvegetated land cover types, document plant and wildlife species present, and evaluate on-site habitat for the potential to support special-status species as defined by CEQA. The site visits did not constitute protocol-level surveys for special status plants or wildlife. Prior to the site visit, WRA biologists reviewed literature resources and performed database searches to assess the potential for sensitive biological communities and special-status species, including:

- Soil Survey of Solano County, California (USDA 1969)
- Benicia 7.5-minute U.S. Geological Survey (USGS) quadrangle (USGS 2021)
- Contemporary aerial photographs (Google Earth 2024)
- Nationwide Environmental Title Research (NETR 2024)
- National Wetlands Inventory (NWI) (USFWS 2024)
- California Aquatic Resources Inventory (SFEI 2024)
- CNDDB (CDFW 2024b)
- CNPS Inventory (CNPS 2024a)
- Consortium of California Herbaria (CCH1 2024, CCH2 2024)
- USFWS List of Federal Endangered and Threatened Species (USFWS 2024)
- eBird Online Database (Cornell 2024)
- California Bird Species of Special Concern in California (Shuford and Gardali 2008)
- California Amphibian and Reptile Species of Special Concern (Thomson et al. 2016)
- A Field Guide to Western Reptiles and Amphibians (Stebbins 2003)
- A Manual of California Vegetation, Online Edition (CNPS 2024b)
- Preliminary Descriptions of the Terrestrial Natural Communities (Holland 1986)
- California Natural Community List (CDFW 2024a)
- Database searches (i.e., CNDDB, CNPS) for special-status species focused on the Cuttings Wharf, Cordelia, Fairfield South, Mare Island, Benicia, Vine Hill, Richmond, Briones Valley, and Walnut Creek USGS 7.5-minute quadrangles.

Following the remote assessment, WRA biologists conducted field assessments on February 28 and July 14, 2022 to document: (1) land cover types (e.g., terrestrial communities, aquatic resources), (2) existing conditions and to determine if such provide suitable habitat for any special-status plant or wildlife species, (3) if and what type of aquatic natural communities (e.g., wetlands) are present, and (4) if special-status species are present[3].

3.1 Vegetation Communities and Other Land Cover Types

During the site visits, WRA evaluated the species composition and area occupied by distinct vegetation communities, aquatic communities, and other land cover types. Mapping of these classifications utilized a combination of aerial imagery and ground surveys. In most instances, communities are characterized and mapped based on distinct shifts in plant assemblage (vegetation) and follow the California Natural Community List (CDFW 2024a) and A Manual of California Vegetation, Online Edition (CNPS 2024b). These

[3] Due to the timing of the assessment, it may or may not constitute protocol-level species surveys; see Section 5.2 if the site assessment would constitute a formal or protocol-level species survey.

resources cannot anticipate every component of every potential vegetation assemblage in California, and so in some cases, it is necessary to identify other appropriate vegetative classifications based on best professional judgment of WRA biologists. When undescribed variants are used, it is noted in the description. Vegetation alliances (natural communities) with a CDFW Rank of 1 through 3 (globally critically imperiled [S1/G1], imperiled [S2/G2], or vulnerable [S3/G3]) (CDFW 2024a), were evaluated as sensitive as part of this evaluation.

The site was reviewed for the presence of wetlands and other aquatic resources during a formal delineation on July 14, 2022. The delineation was conducted according to the methods described in the Corps Manual (Environmental Laboratory 1987), the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West* (Corps 2008), and *A Field Guide to the Identification of the Ordinary High Water Mark (OHWM) in the Arid West Region of the Western United States* (Lichvar and McColley 2008). Areas meeting these indicators were mapped as aquatic resources and categorized using the vegetation community classification methods described above. Aquatic communities which are mapped in the NMFS EFH Mapper (NMFS 2024) or otherwise meet criteria for designation as EFH are indicated as such in the community description below in Section 5.1. The presence of riparian habitat was evaluated based on woody plant species meeting the definition of riparian provided in *A Field Guide to Lake and Streambed Alteration Agreements, Section 1600-1607, California Fish and Game Code* (CDFG 1994) and based on best professional judgement of biologists completing the field surveys.

3.2 Special-status Species

Potential occurrence of special-status species in the Study Area was evaluated by first determining which special-status species occur in the vicinity of the Study Area through a literature and database review as described above. Presence of suitable habitat for special-status species was evaluated during the site visits based on physical and biological conditions of the site as well as the professional expertise of the investigating biologists. The potential for each special-status species to occur in the Study Area was then determined according to the following criteria:

- **No Potential.** Habitat on and adjacent to the site is clearly unsuitable for the species requirements (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime).

- **Unlikely.** Few of the habitat components meeting the species requirements are present, and/or the majority of habitat on and adjacent to the site is unsuitable or of very poor quality. The species is not likely to be found on the site.

- **Moderate Potential.** Some of the habitat components meeting the species requirements are present, and/or only some of the habitat on or adjacent to the site is unsuitable. The species has a moderate probability of being found on the site.

- **High Potential.** All of the habitat components meeting the species requirements are present and/or most of the habitat on or adjacent to the site is highly suitable. The species has a high probability of being found on the site.

- **Present.** Species is observed on the site or has been recorded (i.e., CNDDB, other reports) on the site in the recent past.

If a more thorough assessment was deemed necessary, a targeted or protocol-level assessment or survey was conducted or recommended as a future study. If a special-status species was observed during the site visits, its presence was recorded and discussed below in Section 5.2. If designated critical habitat is present for a species, the extent of critical habitat present and an evaluation of critical habitat elements is provided as part of the species discussions below in Section 5.2.

3.3 Wildlife Corridors and Native Wildlife Nursery Sites

To account for potential impacts to wildlife movement/migratory corridors, biologists reviewed maps from the California Essential Connectivity Project (CalTrans 2010), and habitat connectivity data available through the CDFW Biogeographic Information and Observation System (BIOS; CDFW and Caltrans 2024). Additionally, aerial imagery (Google Earth 2024) for the local area was referenced to assess if local core habitat areas were present within, or connected to the Study Area. This assessment was refined based on observations of on-site physical and/or biological conditions, including topographic and vegetative factors that can facilitate wildlife movement, as well as on-site and off-site barriers to connectivity.

The potential presence of native wildlife nursery sites is included in the discussion of individual wildlife species below. Examples of native wildlife nursery sites include nesting sites for native bird species (particularly colonial nesting sites), marine mammal pupping sites, and colonial roosting sites for other species, such as for monarch butterfly (*Danaus plexippus*).

4.0 ECOLOGICAL SETTING

The approximately 20.13-acre Study Area is located in the City of Vallejo, Solano County, California. The Study Area is located north of the Carquinez Strait, south of Interstate 780, west of the Benicia State Recreation Area, and east of a residential area. The Study Area includes all areas that may be affected by the proposed Project. Additional details of the local setting are below.

4.1 Soils and Topography

The topography of the Study Area contains undulating hills with flat areas, with elevations ranging from approximately 97 to 180 feet above sea level. According to the *Web Soil Survey* (USDA 2024b), the Study Area is underlain by Dibble-Los Osos clay loams, including three soil mapping units: 2 to 9 percent slopes, 9 to 30 percent slopes, and 30 to 50 percent slopes. Soils within the Study Area are shown in Appendix A – Figure 2. The parent soil series of all the Study Area's mapping units is summarized below.

Dibble-Los Osos Clay Loam: This series consists of moderately deep, well drained soils that formed in material weathered from shale, sandstone and semi consolidated densic material. The soil pH ranges from 5.6 to 7.3, resulting in neutral to acidic soils. Dibble soils are on foothills and fan remnants and have slopes of 2 to 75 percent (USDA 2024b). These soils are not considered hydric (USDA 2024a).

4.2 Climate and Hydrology

The average monthly maximum temperature in the area is 68.6 degrees Fahrenheit, while the average monthly minimum temperature is 49.3 degrees Fahrenheit. Predominantly, precipitation falls as rainfall between November and March with an annual average precipitation of 17.7 inches.

The regional watershed for the Study Area is San Francisco Bay (HUC 6: 180500) between the San Pablo Bay (HUC 8:18050002) and Suisun Bay (HUC 8: 18050001) watersheds. The Study Area is located in the central portions of the Suisun/San Pablo Bay watersheds. There are two streams mapped within the Study Area in the National Wetland Inventory (NWI) (USFWS 2024). NWI is a USFWS web application displaying the extent and type of wetlands within a given area. However, there are no mapped blue line streams within the Study Area according to the Benicia 7.5 minute quadrangle (USGS 2021). The stream features, shown in the NWI start at the edge of the residential properties to the east of the Study Area and run west towards the marsh within the Benicia State Recreation Area, and eventually, the Southampton Bay within the Carquinez Strait (0.9 miles south of the Study Area). These aquatic features receive runoff from the neighboring properties via culverts. Although NWI classifies the southern feature as a stream, due to wetland vegetation growing in the channel, it was classified as a freshwater marsh (Section 5.1.2).

4.3 Land-use

The majority of the Study Area is dominated by non-native annual grassland. The Study Area contains one intermittent stream, connected to a seasonal wetland, and one linear freshwater marsh. Detailed plant community descriptions are included in Section 5.1 below, and all observed plant species are included in Appendix B. Surrounding land use includes a residential community, Interstate 780, and open space/recreation area (Google Earth 2024). The area has been used for agriculture as early as 1948, and was left as open space following the construction of the neighboring community to the east of the Study Area, in the early 1980's (NETR 2024). The natural topography of the Study Area contained one drainage. The northern aquatic feature is a topographical low, but seems to have started conveying water and

supporting riparian vegetation after the adjacent housing development was constructed in the 1980's and the stormwater basin directed runoff to this area (NETR, Google Earth 2024). The southern aquatic feature within the Study Area is a historical drainage that coveys water from the hillside to the adjacent marsh southeast of the Study Area; however, additional stormwater and other runoff is directed into this feature.

5.0 ASSESSMENT RESULTS

5.1 Vegetation Communities and Other Land Cover

WRA observed nine land cover types within the Study Area as shown on Figure 3 (Appendix A) and summarized in Table 2. The non-sensitive land cover types in the Study Area include coyote brush scrub, poison oak scrub, non-native grasslands, and artichoke thistle field. The sensitive land cover types in the Study Area include intermittent stream, seasonal wetland, freshwater marsh, riparian, and toyon chaparral.

TABLE 2. VEGETATION COMMUNITY AND LAND COVER TYPES

COMMUNITY/LAND COVERS	SENSITIVE STATUS	RARITY RANKING	ACRES WITHIN STUDY AREA
Terrestrial Community/Land Cover			
Riparian	Sensitive	S3/G3	0.91
Toyon Chaparral	Sensitive	S4/G5	1.24
Coyote Brush Scrub	Not Sensitive	S5/G5	0.43
Poison Oak Scrub	Not Sensitive	S4/G4	0.91
Artichoke Thistle Field	Not Sensitive	None	3.29
Non-native Grassland	Not Sensitive	None	12.70
Aquatic Resources			
Intermittent Stream	Sensitive	None	0.05
Seasonal Wetland	Sensitive	None	0.49
Freshwater Marsh	Sensitive	None	0.12

5.1.1 Terrestrial Land Cover

Riparian (*Platanus racemosa – Quercus agrifolia* Woodland Alliance). CDFW Rank: S3/G3. The riparian land cover type borders the intermittent stream in the northern portion of the Study Area. The vegetation is characterized by a dense tree canopy dominated by coast live oak (*Quercus agrifolia*) with occasional red willows (*Salix laevigata*) and meets the membership rules for the California sycamore – coast live oak riparian woodlands (*Platanus racemosa – Quercus agrifolia* Woodland Alliance) (CNPS 2024b). Where there are gaps in the canopy, Himalayan blackberry (*Rubus armeniacus*) is dominant and dense. The understory is generally sparse to absent and dominated by Himalayan blackberry. Herbs are typically absent. This community is considered sensitive and is potentially subject to CDFW and RWQCB jurisdiction.

PHOTO 1. RIPARIAN AREA WITHIN THE STUDY AREA

Toyon Chaparral (*Prunus ilicifolia – Heteromeles arbutifolia – Ceanothus spinosus)* Shrubland Alliance). CDFW Rank: S4/G5. Toyon chaparral was mapped in the central/southern portion of the Study Area on the steep slope above and adjacent to the freshwater marsh. It is characterized by open to dense shrub canopy dominated by toyon (*Heteromeles arbutifolia*) with occasional coyote brush (*Baccharis pilularis*) and poison oak (*Toxicodendron diversilobum*). This land cover type meets the membership rules for holly leaf cherry – toyon – greenbark ceonothus chaparral (*Prunus ilicifolia – Heteromeles arbutifolia – Ceanothus spinosus* Shrubland Alliance) (CNPS 2024b). Interstitial areas are dominated by non-native annual grasses such as wild oat (*Avena* sp.) and purple false brome (*Brachypodium distachyon*). Occasional small coast live oak trees are present at low cover. Although the general holly leaf cherry – toyon – greenbark ceonothus chaparral Alliance is not considered sensitive by the CDFW, the toyon – holly leaf cherry species association within that alliance is considered sensitive.

PHOTO 2. TOYON CHAPARRAL WITHIN THE STUDY AREA

PHOTO 3. COYOTE BRUSH SCRUB WITHIN THE STUDY AREA

Coyote Brush Scrub (*Baccharis pilularis* Shrubland Alliance). CDFW Rank: S5/G5. A small patch of coyote brush scrub was mapped in the northern portion of the Study Area. It is an open stand of shrubs dominated by coyote brush and meets the membership rules for the coyote brush scrub (*Baccharis pilularis* Shrubland Alliance) (CNPS 2024b). The interstitial areas are dominated by wild oat. Trees are absent. Coyote brush scrub is not considered sensitive.

Poison Oak Scrub (*Toxicodendron diversilobum* Shrubland Alliance). CDFW Rank: S4/G4. Poison oak scrub was mapped near the top of the steep ridge in the southern portion of the Study Area. It characterized by an open shrub canopy dominated by poison oak, with occasional toyon and coyote brush present. It meets the membership rules for the poison oak scrub (*Toxicodendron diversilobum* Shrubland Alliance) (CNPS 2024b). The interstitial areas are dominated by non-native herbs such as fennel (*Foeniculum vulgare*), wild oat, and purple false brome. Poison oak scrub is not considered sensitive.

PHOTO 4. POISON OAK SCRUB WITHIN THE STUDY AREA

Artichoke Thistle Field (*Brassica nigra – Centaurea* [*solstitialis, melitensis*] Herbaceous Semi-natural Alliance). CDFW Rank: None. The artichoke thistle field was mapped on the steep slope in the southernmost portion of the Study Area. The vegetation is herbaceous and dominated by artichoke thistle (*Cynara cardunculus* ssp. *flavescens*), with other non-native herbs between artichoke thistle plants, including wild oat, purple false brome, black mustard (*Brassica nigra*), Italian thistle (*Carduus pycnocephalus* ssp. *pycnocephalus*), and fennel. Trees and shrubs were typically absent. This land cover type meets the membership rules for the upland mustards or star-thistle fields (*Brassica nigra – Centaurea* [*solstitialis, melitensis*] Herbaceous Semi-natural Alliance) (CNPS 2024b). Artichoke thistle fields is not considered sensitive.

PHOTO 5. ARTICHOKE THISTLE FIELD WITHIN THE STUDY AREA

PHOTO 6. NON-NATIVE GRASSLAND WITHIN THE STUDY AREA

Non-native Grassland (*Avena* spp. – *Bromus* spp. Herbaceous Semi-Natural Alliance). CDFW Rank: None.

Non-native grassland is the most common land cover type within the Study Area, occurring on all slopes and aspects. Portions of this land cover type are periodically mowed, and in the far northern portion of the Study Area, a two-track dirt vehicle path is present. Vegetation is herbaceous and is typically characterized by dense wild oat (*Avena* spp.), with occasional shrubs, trees, and other herbs present at low cover. It intergrades with the coyote brush scrub, poison oak scrub, and artichoke thistle fields land cover types. This land cover type meets the member rules for the wild oats and annual brome grasslands (*Avena* spp. – *Bromus* spp. Herbaceous Semi-natural Alliance) (CNPS 2024b). Non-native grassland is not considered sensitive.

5.1.2 Aquatic Land Cover

PHOTO 7. THE INTERMITTENT STREAM WITHIN THE STUDY AREA

Intermittent Stream (No Alliance). CDFW Rank: Sensitive. Intermittent streams are linear features that exhibit indicators of an OHWM and due to groundwater influence, flow for a duration longer than a precipitation event but are dry for a portion of the year. The intermittent stream within the Study Area is defined by a clear bed and bank and exhibits OHWM indicators such as scour and wrack. Trickles of water were observed in portions of the channel during the February 28, 2022, site visit. However, the channel was dry at the time of the July 14, 2022, site visit. The stream receives drainage from a concrete channel from the residential community upstream (to the west). It occurs on a steep slope, and the channel peters out when the topography flattens out and transitions into the seasonal wetland. Intermittent stream is considered sensitive and is potentially subject to CDFW, Corps, and RWQCB jurisdiction.

PHOTO 8. THE SEASONAL WETLAND WITHIN THE STUDY AREA

Seasonal Wetland (No Alliance). CDFW Rank: Sensitive. Seasonal wetlands include areas which hold water for part of the year, typically during the rainy season (between October and March) and are dominated by hydrophytic vegetative cover. The seasonal wetland within the Study Area occurs in the northern portion of the Study Area, where the topography flattens out downslope of the intermittent stream. Surface water and saturation were observed in the seasonal wetland during the February 28, 2022, site visit. At the time of the July 14, 2022, site visit no surface water or saturation was observed. The wetland is dominated by bristly ox-tongue (*Helminthotheca echioides*), harding grass (*Phalaris aquatica*), iris leaved rush (*Juncus xiphioides*), and bulrush (*Schoenoplectus americanus*). Himalayan blackberry and a small number of arroyo and red willows (*Salix lasiolepis*) occur at northern edge of the seasonal wetland. The wetland narrows substantially to an incised channel just outside of the eastern edge of the Study Area. The seasonal wetland is considered sensitive and is potentially subject to Corps and RWQCB jurisdiction.

Freshwater Marsh (No Alliance) CDFW Rank: Sensitive. Freshwater marshes are wetlands which hold water for long periods of time and are dominated by graminoids and other herbaceous plants. The marsh on-site is a linear wetland drainage confined by steep slopes located centrally within the Study Area. Inundation was observed during the February 28 and July 14, 2022, site visits, but the full duration of inundation is unknown. It is dominated by dense bulrush with occasional small patches of cattails (*Typha* sp.) and is bordered by non-native annual grassland and toyon chaparral. Surface water is shallow with a very slow flow throughout the bottom of the drainage. Although this feature receives some seasonal runoff from concrete drainage channels upslope, the primary hydrological source is a culvert that drains an unknown source and was flowing at the time of the February and July site visits. The source of this water could not be confirmed, but it does includes stormwater and urban residential runoff from the residential development upslope. Freshwater marsh is considered sensitive and is potentially subject to Corps and RWQCB jurisdiction.

PHOTO 9. THE FRESHWATER MARSH WITHIN THE STUDY AREA

5.2 Special-status Species

5.2.1 Special-status Plants

Based upon a review of the resource databases listed in Section 3.0, 65 special-status plant species have been documented in the vicinity of the Study Area (Appendix C). None of these species have a moderate or high potential to occur in the Study Area. The species documented from the greater vicinity have unlikely or no potential to occur for one or more of the following reasons:

- Hydrologic conditions (e.g., tidal, riverine) necessary to support the special-status plant species are not present in the Study Area;
- Edaphic (soil) conditions (e.g., serpentine) necessary to support the special-status plant species are not present in the Study Area;
- Unique pH conditions (e.g., alkaline soils) necessary to support the special-status plant species are not present in the Study Area;
- Associated natural communities (e.g., coastal habitats, tidal marsh, vernal pools) necessary to support the special-status plant species are not present in the Study Area;
- The Study Area is geographically isolated (e.g. below elevation) from the documented range of the special-status plant species;
- Land use history and contemporary management (e.g., nearby development and the spread of invasive species) has degraded the localized habitat necessary to support the special-status plant species.

No special-status plant species were observed by WRA biologists during the February 28 and July 14, 2022, biological surveys. The biological surveys did not constitute protocol-level surveys for plant species. No further actions or surveys are recommended for special-status plants.

5.2.2 Special-status Wildlife

Based upon a review of the resources and databases listed in Section 3.0, 52 special-status wildlife species have been documented in the vicinity of the Study Area. Appendix C summarizes the potential for each of these species to occur in the Study Area. Of the 52 special-status species known from the region, five species were determined to have a moderate or high potential to occur within the Study Area. The remaining species are unlikely or have no potential to occur due to one or more of the following factors.

The Study Area:

- lacks suitable hostplants (e.g., California golden violet, blue elderberry, etc.);
- lacks suitable perennial aquatic habitat (e.g., rivers, streams, or ponds);
- lacks suitable wetland habitat (e.g., vernal pools and tidal marshes);
- is outside of the currently documented or historical range of the species; or
- is outside of the distribution range for known occurrences.

Observations of special-status wildlife by WRA biologists during the February 28 and July 14, 2022, biological surveys are documented in this section. The biological surveys did not constitute protocol-level surveys for wildlife. The species presented in Table 3. were determined to have a moderate or high potential to occur.

Table 3. Potential Special-status Wildlife

Scientific Name	Common Name	Conservation Status	Potential Habitat in the Study Area
Other Special-status Wildlife (CEQA, other)			
Elanus leucurus	White-tailed kite	CFP	**Present.** This species was observed foraging within the Study Area during the February 28, 2022 site visit. There is suitable nesting habitat in the form of large oak trees within the Study Area.
Circus hudsonius	Northern harrier	SSC	**Moderate Potential.** Grasslands and scrublands within the Study Area may provide suitable nesting habitat for this species. This species has been observed in the local area.
Asio flammeus	Short-eared owl	SSC	**Moderate Potential**. Grasslands and scrublands within the Study Area may provide suitable nesting habitat for this species. This species has been observed in the local area.
Lasionycteris noctivagans	Silver-haired bat	WBWG Med	**Moderate Potential.** Large oak trees within the Study Area provide suitable roosting habitat.
Lasiurus cinereus	Hoary bat	WBWG Med	**Moderate Potential.** Large oak trees within the Study Area provide suitable roosting habitat.

Special-status Wildlife Species that are Present in the Study Area

White-tailed kite (*Elanus leucurus*). CDFW Fully Protected Species. Present. White-tailed kite is resident in open to semi-open habitats throughout the lower elevations of California, including grasslands, savannahs, woodlands, agricultural areas, and wetlands. Vegetative structure and prey availability seem to be more important habitat elements than associations with specific plants or vegetative communities (Dunk 1995). Nests are constructed mostly of twigs and placed in trees, often at habitat edges. Nest trees are highly variable in size, structure, and immediate surroundings, ranging from shrubs to trees greater than 150 feet tall (Dunk 1995). This species preys upon a variety of small mammals, as well as other vertebrates and invertebrates.

The Study Area contains large oak trees suitable for nesting for this species. The Study Area also includes potential foraging habitat for white-tailed kite in the form of nonnative grasslands and scrub communities. White-tailed kites are documented to occur in the region and have been observed routinely foraging near the Benicia State Recreation Area, located east of the Study Area (CDFW 2024b, Cornell 2024). Additionally, this species was observed foraging during the February 28, 2022 site visit. Therefore, white-tailed kites have a moderate potential to nest within the Study Area.

Special-status Wildlife Species with Moderate Potential to Occur in the Study Area

Northern harrier (*Circus hudsonius [cyaneus]*). CDFW Species of Special Concern. Moderate Potential. The northern harrier occurs as a resident and winter visitor in open habitats throughout most of California, including freshwater and brackish marshes, grasslands and fields, agricultural areas, and deserts. Harriers typically nest in treeless areas within patches of dense, relatively tall, vegetation, the composition of which is highly variable; nests are placed on the ground and often located near water or within wetlands (Shuford and Gardali 2008). Harriers are birds of prey and subsist on a variety of small mammals and other vertebrates.

Large portions of the Study Area provide suitable foraging and nesting habitat for northern harriers, including areas with non-native annual grassland and scrub communities. Additionally, the Benicia State Recreation Area, less than 1,000 feet southeast of the Study Area, has a confirmed breeding occurrence in 2005 (CDFW 2024b) and several sightings documented more recently (Cornell 2024). The presence of suitable foraging and nesting habitat in and adjacent to the Study Area suggests that northern harrier has a moderate potential to nest within the Study Area.

Short-eared owl (*Asio flammeus*). CDFW Species of Special Concern. Moderate Potential. The short-eared owl occurs primarily as a winter visitor in California; regular breeding is restricted to the Great Basin, portions of the Central Valley, and scattered other lowland locations (e.g., the northern Sacramento-San Joaquin Delta (Shuford and Gardali 2008). Suitable year-round habitat for this species consists of open areas with herbaceous cover, and includes grasslands, prairies, marshes and wetlands, and some agricultural areas. Nests are placed on the ground within vegetative cover. Short-eared owl breeding varies widely in geographic extent across years and is usually closely tied to the population cycle of voles (*Microtus* spp.), their primary prey (Shuford and Gardali 2008).

There are several documented occurrences of this species in the vicinity of the Study Area within the last five years (Cornell 2024). The Study Area contains suitable nesting habitat in the form of non-native annual grasslands and scrub communities. Additionally, the Benicia State Recreation Area, less than 1,000 feet southeast of the Study Area, has a sighting in 2019 (Cornell 2024). The nearest confirmed population is at

Suisun Marsh approximately 7 miles east (Shuford and Gardali 2008; CDFW 2024b). The presence of suitable foraging and nesting habitat in and around the area suggests that short-eared owl has a moderate potential to nest within the Study Area.

Silver-haired bat (*Lasionycteris noctivagans*). WBWG Medium Priority. Moderate Potential. Silver-haired bats occur in temperate forests (coniferous, deciduous, and mixed) from southern Alaska to northeastern Mexico. Females form maternity roosts almost exclusively inside hollows or under loose bark of large trees and may switch roosts several times (WBWG 2024). Hibernation occurs in trees, rock crevices, leaf litter, in and under buildings, and in caves and mines. Foraging for insects occurs above the tree canopy. Silver-haired bats are known to migrate south in the winter, although overwintering at northern latitudes has also been documented (WBWG 2024).

The Study Area contains suitable foraging and roosting habitat for this migratory species. During the February 28, 2022 site visit, large oak trees were observed within the Study Area that could provide maternity or day-roost habitat. The presence of suitable roosting and foraging habitat in the Study Area suggests that silver-haired bats have a moderate potential to roost in the Study Area.

Hoary bat (*Lasiurus cinereus*). WBWG Medium Priority. Moderate Potential. Hoary bats are highly associated with forested habitats in the western United States, particularly in the Pacific Northwest. They are a solitary species and roost primarily in foliage of both coniferous and deciduous trees, near the ends of branches, usually at the edge of a clearing. Roosts are typically 10 to 30 feet above the ground. They have also been documented roosting in caves, beneath rock ledges, in woodpecker holes, in grey squirrel nests, under driftwood, and clinging to the side of buildings, though this behavior is not typical. Hoary bats are thought to be highly migratory; however, wintering sites and migratory routes have not been well documented. This species tolerates a wide range of temperatures and has been captured at air temperatures between 0 and 22 degrees Celsius. Hoary bats probably mate in the fall, with delayed implantation leading to birth in May through July. They usually emerge late in the evening to forage, typically from just over one hour after sunset to after midnight. This species reportedly has a strong preference for moths, but is also known to eat beetles, flies, grasshoppers, termites, dragonflies, and wasps (WBWG 2024).

The Study Area contains suitable foraging and roosting habitat for this migratory species. During the February 28, 2022, site visit, large oak trees were observed within the Study Area that could provide maternity or day-roost habitat. The presence of suitable roosting and foraging habitat in the Study Area suggests that hoary bats have a moderate potential to occur within the Study Area.

Special-Status Wildlife Species Documented Nearby but Unlikely to Occur within the Study Area

The following special-status wildlife species are unlikely to occur but are discussed here because there are documented occurrences near the Study Area or typical land cover types associated with these species present in the Study Area. However, habitat elements within the Study Area do not support these species. Discussion of additional species that were determined to have no or limited potential to occur in the Study Area is provided in Appendix C.

Pallid bat (*Antrozous pallidus*). CDFW Species of Special Concern, WBWG High Priority. Unlikely. The pallid bat is broadly distributed throughout much of western North America and typically occurs in association with open, rocky areas. Occupied habitats are highly variable and range from deserts to forests in lowland areas and include higher-elevation forests. Roosting may occur singly or in groups of up to

hundreds of individuals. Roosts must offer protection from high temperatures and are typically in rock crevices, mines, caves, or tree hollows; manmade structures are also used, including buildings (both vacant and occupied) and bridges. Pallid bats are primarily insectivorous, feeding on large prey that is usually taken on the ground but sometimes in flight (WBWG 2024).

The nearest documented occurrence of this species was approximately 13 mi north in 2007, in addition to several historic occurrences (pre-1940) south of the Study Area (CDFW 2024b). The Study Area contains suitable foraging habitat for this species. However, there is no suitable roosting habitat as this species is very sensitive to disturbance. The few large trees within the Study Area are directly adjacent (approximately 330 ft) to interstate 780 and exposed to predators, wind, and temperature fluctuations. Additionally, this species typically roosts in crevices of rocks, caves, and mines which are absent from the Study Area. This species could be found in the Study Area foraging but not roosting.

Burrowing owl (*Athene cunicularia*). CDFW Species of Special Concern; USFWS Bird of Conservation Concern. Unlikely. The burrowing owl occurs as a year-round resident and winter visitor in much of California's lowlands, inhabiting open areas with sparse or non-existent trees or shrub canopies. Typical habitat is annual or perennial grassland, although human-modified areas such as agricultural lands and airports are also used (Poulin et al. 2011). This species is dependent on burrowing mammals to provide the burrows that are characteristically used for shelter and nesting, and in northern California is typically found in close association with California ground squirrels (Otospermophilus beecheyi). Manmade substrates such as pipes or debris piles may also be occupied in place of burrows. Prey consists of insects and small vertebrates. Breeding typically takes place from March to July.

There have been numerous documented occurrences of this species within 5 miles of the Study Area during wintering and migration periods (CDFW 2024b, Cornell 2024), and two winter occurrences approximately 4 miles from the Study Area (CDFW 2024b). The Study Area contains suitable foraging habitat in the form of grasslands and shrublands and therefore may be observed foraging during winter or migration periods. During the site visit on February 28, 2022, no ground squirrel burrows were observed. Therefore, the Study Area lacks the mammal burrows necessary for nesting and refuge by this species and it is unlikely to nest withinoccupy the Study Area.

Crotch bumble bee (*Bombus crotchii*), State candidate. Unlikely. Crotch bumble bee occurs primarily in central and southern California, from coastal areas inland to the foothills (Williams et al. 2014). This species is now largely absent from the Central Valley, although it was historically common in this region (Hatfield et al. 2015). Crotch bumble bee occurs in grassland and scrub habitats and has also been documented in agricultural areas. Like other bumble bee species, Crotch bumble bee is a social species with an annual life cycle. Queens emerge from hibernation in the late winter/early spring to establish a new colony. The colony produces workers throughout the spring and summer, and reproductive (i.e. drones and queens) in the early fall. Nests are built in pre-existing cavities. They are commonly found underground, in abandoned rodent burrows, or aboveground in grass tufts, rock piles, abandoned bird nests, or tree cavities. Crotch bumble bee feeds on pollen and nectar during all life stages; preferred host species include (but are not limited to) milkweeds (Asclepias spp.), chaenactis (Chaenactis spp.), clarkias (Clarkia spp.), larkspurs (Delphinium spp.), buckwheats (Eriogonum spp.), lupines (Lupinus spp.), medicks (Medicago spp.), bladderpod (Peritoma arborea), phacelias (Phacelia spp.), poppies (Eschscholzia spp.), and sages (Salvia spp.). Queens overwinter in hibernacula; little is known about habitat requirements for hibernacula; bare ground, leaf litter and/or duff, and pre-existing cavities may provide overwintering habitat. Major threats to Crotch bumble bee include agricultural intensification and rapid urbanization (Hatfield et al. 2015). Additionally, Crotch bumble bees have a narrow climatic range compared to most

bumble bee species and may be threatened by increasing aridity and global climate change (NatureServe 2022). In general, bumble bees are threatened by a combination of factors including pesticide use, resource competition with non-native bees, and pathogen spillover from managed pollinators (Goulson 2010, Cameron et al. 2011).

The single documented occurrence of this species within 60 miles was over 13 miles away across the Carquinez Strait in 2015 (CDFW 2024b). The Study Area contains foraging and nesting habitat for this species. However, limited food resources (as nectar producing flowers) were observed within the Study Area during the February and July site visits. In addition, no ground squirrel burrows were observed and nesting habitat may be severely limited. Additionally, populations of this species have drastically contracted in recent years by 97.7 percent (CDFW 2019). The Study Area is significantly isolated and surrounded by development including large residential complexes and Interstate 780 to the north, and Carquinez Strait to the south. The nearest undeveloped lands are three miles to northeast near Lake Herman where more suitable foraging and nesting habitat occurs.

5.3 Wildlife Corridors and Native Wildlife Nursery Sites

Wildlife Corridors

No native wildlife nursery sites are present in the Study Area. Wildlife movement between suitable habitat areas can occur via open space areas lacking substantial barriers. The terms “landscape linkage” and “wildlife corridor” are often used when referring to these areas. The key to a functioning corridor or linkage is that it connects two larger habitat blocks, also referred to as core habitat areas (Beier and Loe 1992; Soulé and Terbough 1999). It is useful to think of a “landscape linkage” as being valuable in a regional planning context, a broad scale mapping of natural habitat that functions to join two larger habitat blocks. The term “wildlife corridor” is useful in the context of smaller, local area planning, where wildlife movement may be facilitated by specific local biological habitats or passages and/or may be restricted by barriers to movement. Above all, wildlife corridors must link two areas of core habitat and should not direct wildlife to developed areas or areas that are otherwise void of core habitat (Hilty et al. 2019).

The Study Area is not within a designated wildlife corridor (CalTrans 2010). The site is located within a much larger tract of housing developments intersected with several highways and nonnative grasslands in Solano County. The Benicia State Recreation Area is approximately 1,000 feet southeast of the Study Area; however, the Study Area does not provide connection to other tidal marsh habitats nor does it contain such habitat.. While common wildlife species presumably utilize the site to some degree for movement at a local scale, the Study Area itself does not provide corridor functions beyond connecting similar ruderal grassland parcels to surrounding areas.

Essential Fish Habitat

The Study Area does not function as a fisheries movement corridor. The National Oceanic and Atmospheric Administration’s (NOAA) Essential Fish Habitat geospatial dataset uses habitat modelling to identify water features with value as fishery habitat (NMFS 2024). The entirety of the Study Area is within the Chinook salmon Essential Fish Habitat. However, this database is depicting a course resolution of the entire watershed that influences this fishery. There is no stream or river within the Study Area capable of supporting the Chinook salmon fishery or its habitat in any form.

Critical Habitat

The Study Area does not contain designated critical habitat.

6.0 ANALYTICAL METHODOLOGY AND SIGNIFICANCE THRESHOLD CRITERIA

Pursuant to Appendix G, Section IV of the State CEQA Guidelines, a project would have a significant impact on biological resources if it would:

1. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service;

2. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service;

3. Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means

4. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites;

5. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance; and/or,

6. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

These thresholds were utilized in completing the analysis of potential project impacts for CEQA purposes. For the purposes of this analysis, a “substantial adverse effect” is generally interpreted to mean that a potential impact could directly or indirectly affect the resiliency or presence of a local biological community or species population. Potential impacts to natural processes that support biological communities and special-status species populations that can produce similar effects are also considered potentially significant. Impacts to individuals of a species or small areas of existing biological communities may be considered less than significant if those impacts are speculative, beneficial, de minimis, and/or would not affect the resiliency of a local population.

7.0 IMPACTS AND MITIGATION EVALUATION

Using the CEQA analysis methodology outlined in Section 6.2 above, the following section describes potential significant impacts to sensitive resources within the Project Area as well as suggested mitigation measures which are expected to reduce impacts to less than significant.

7.1 Special-status Species

This section analyzes the Project's potential impacts and mitigation for special-status species in reference to the significance threshold outlined in CEQA Appendix G, Part IV (a):

> *a) Does the project have the potential to have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?*

Potential impacts and mitigation for potentially significant impacts are discussed below.

7.1.1 Special-status Plant Species

As detailed in Section 5.2.1, above, none of the 65 special-status plant species documented within the vicinity of the Proposed Project have potential to occur within the Project Area; therefore, there is **no impact,** and no avoidance, minimization, or mitigation measures are necessary to avoid impacts to special-status plant species in the Project Area.

7.1.2 Special-status Wildlife Species

As detailed in Section 5.2.2, above, five of the 52 special-status wildlife species documented within the vicinity of the Study Area have potential to occur within the Project Area: therefore, mitigation measures are necessary to avoid impacts to special-status wildlife species in the Project Area. With implementation of MM BIO-1a, 1b, 2a, and 2b below, the Proposed Project would reduce impacts to a less-than-significant level.

White-tailed Kite, Northern harrier, Short-Eared Owl, and Nesting Bird Species

The Proposed Project has the potential to impact white-tailed kite, northern harrier, short-eared owl, and other native nesting birds. Potential impacts to these species are regulated under CEQA and Sections 3503, 3503.5, and 3513 of Fish and Game Code. Future activities within the Project Area may impact these species during their nesting season (typically between March 1 – August 31).

The following section presents recommendations to avoid, minimize, or mitigate impacts to white-tailed kite, northern harrier, and short-eared owl.

> **Potential Impact BIO-1:** The Proposed Project's housing development within the Project Area could result in direct mortality of white-tailed kite, northern harrier, short-eared owl, and other native bird species nests, which would be considered a significant impact. Impacts to active nests of this species and their eggs, chicks and young could occur during the removal of trees, vegetation, or other ground-disturbing activities. These activities could result in the direct removal or destruction of active nests, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in nest abandonment.

To reduce potential impacts to white-tailed kite, northern harrier, short-eared owl, and native nesting birds to a less-than-significant level, the following measures:

Mitigation Measure BIO-1a: To avoid adverse effects to the active nests of special-status and other native bird species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur during the non-nesting season, between September 1 through January 31.

Mitigation Measure BIO-1b: A pre-construction nest survey for white-tailed kite, northern harrier, short-eared owl, and other native bird species shall be conducted prior to initial ground disturbance, including tree removal or vegetation removal if it begins during the nesting bird season (defined as February 1 through August 31). If active nests (containing eggs, chicks or young) are discovered during these surveys, a qualified biologist shall establish a species-specific no-work buffer around the active nest. Work may resume in the buffer after the nesting season ends or a qualified biologist confirms the nest is inactive.

Implementation of these mitigation measures will reduce potential impacts to white-tailed kite, northern harrier, and short-eared owl to a level that is less than significant.

Silver-Haired Bat, Hoary Bat, and Other Roosting Bat Species

The Proposed Project has the potential to impact silver-haired bats and hoary bats, both are Western Bat Working Group (WBWG) Medium Priority species. For bat species, the WBWG designates conservation status for species of bats, and those with a high or medium-high priority are typically given special consideration under CEQA. Future activities within the Project Area including tree removal may affect these species during their maternity roosting season (typically between March 1 – August 31). No potential hibernation roosts are present within the Project or Study Area.

The following section presents recommendations to avoid, minimize, or mitigate impacts to the silver-haired bat and hoary bat.

Potential Impact BIO-2: The removal of trees within the Project Area could result in direct mortality of silver-haired bat and hoary bat adults and maternity roosts, which would be considered a significant impact. Impacts to active maternity roosts of this species and their pups could occur during the removal of trees, vegetation, or other ground-disturbing activities in proximity to roost sites. These activities could result in the direct removal or destruction of active roosts, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in roost abandonment.

To reduce potential impacts to the silver-haired bat and hoary bat to a less-than-significant level, the following measures shall be implemented:

Mitigation Measure BIO-2a: To avoid adverse effects to maternity roosts of special-status and other bat species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur outside the maternity roosting season, between September 1 through April 30. Large trees ((DBH > 24 inches) removed during this season (September 1 – April 30) shall be cut using a two-phased system where branches and limbs are cut and left on the ground overnight prior to chipping or removal from the site.

Mitigation Measure BIO-2b: During the maternity roost season (May 1 – August 31), at least 30 days prior to the removal of any large tree (DBH > 24 inches) a bat roost assessment shall be conducted by a qualified biologist to determine if potential roost habitat is present.

If no maternity roost habitat is present, trees shall be removed using a two-phased cut. Cut branches and limbs shall be left on the ground overnight prior to chipping or removal from the site.

If potential maternity roosting habitat is present, the qualified biologist shall conduct an emergence survey to determine if the roost is occupied or assume the roost is occupied and establish a no-work buffer. If an emergence survey is conducted and does not detect bats, the tree may be removed with no further measures required to protect roosting bats. If roosting bats are detected, or the tree is assumed to be an active roost, the tree shall be given a 100-foot no work buffer and shall be avoided until after the maternity roosting season is complete. Once the maternal roosting season is complete, tree removal shall follow the two-phase approach for tree removal.

Implementation of these mitigation measures will reduce potential impacts to the silver-haired bat and hoary bat to a level that is less than significant.

7.2 Sensitive Natural Communities and Land Cover Types

This section addresses the question:

b) Does the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service;

Sensitive natural communities within the Project Area include seasonal wetland.

The Proposed Project is designed to avoid and minimize impacts to sensitive natural communities. The design plans account for total avoidance of the toyon chapparal land cover type, keeping the area south of the freshwater marsh as open space. Additionally, the Project plans to avoid the intermittent stream, freshwater marsh, and riparian vegetation. However, the Proposed Project would convert the seasonal wetland into a stormwater basin within the Project Area. Although the stormwater basin would be vegetated and seasonally inundated, it is a loss of the seasonal wetland and considered a permanent impact. A Section 404 CWA permit from the Corps and Section 401 CWA certification from the RWQCB may be required for conversion of the seasonal wetland. Additionally, because of the proximity of the riparian and freshwater marsh land cover types to the construction footprint, the Vista Cove Project could result in increased sedimentation to the freshwater marsh or damage to roots of riparian trees. Potential impacts and mitigation measures to avoid impacts to these sensitive natural communities are described below.

Potential Impact BIO-3: The proposed conversion of 0.49 acre of seasonal wetland to a stormwater basin for the development will result in fill and permanent loss of the seasonal wetland within the Project Area.

Potential Impact BIO-4: Temporary impacts associated with construction activities adjacent to the riparian and freshwater marsh land cover types may result increased sedimentation into freshwater marsh, trimming of riparian vegetation, or exposure of riparian tree roots.

To reduce potential impacts to the seasonal wetland, riparian, and freshwater marsh to a less-than-significant level, the following measures shall be implemented:

Mitigation Measure BIO-3: Compensatory mitigation for permanent loss of the seasonal wetland shall be required. Mitigation may be satisfied through purchase of mitigation bank credits from an approved mitigation bank, payment of in-lieu fees to an approved public agency or conservation organization (e.g. local land trust), for implementation of compensatory mitigation projects, or via a permittee responsible mitigation involving creation, restoring, or enhancing analogous habitat. The ratio for acres of mitigation to acres impacted shall be 1:1.

Mitigation Measure BIO-4a: Prior to ground disturbing activities, construction fencing or flagging shall be installed to delineate the riparian and freshwater marsh boundaries. The fencing will be checked regularly during construction activities to ensure that the fencing remains intact and functional, and that encroachment has not occurred into the sensitive habitat or boundary; any repairs to the fence or encroachment correction will be conducted immediately. At the end of the Project all temporary flagging, fencing, or other materials would be removed from the work areas and vicinity of the channel.

Mitigation Measure BIO-4b: Erosion control measures would be utilized throughout all phases of the Project where sediment runoff from construction may potentially enter nearby waters. Appropriate sediment and erosion control BMPs (e.g., use of silt fencing and/or straw waddles around the perimeter of the construction zone) will be implemented during and following construction to minimize surface runoff originating from the Project and thereby protect water quality of the freshwater marsh. Erosion control structures would be monitored for effectiveness and would be repaired or replaced as needed.

i. Prior to construction, a Stormwater Pollution Prevention Plan (SWPPP) would be developed. The plan would include the implementation and maintenance of erosion control measures.

ii. Prior to construction, an Accidental Spill Prevention and Cleanup Plan would be prepared. This plan would include required spill control absorbent material, for use beneath stationary equipment, to be present on-site and available at all times.

iii. No fueling, cleaning, or maintenance of vehicles or equipment would take place within any areas where an accidental discharge may cause hazardous materials to enter waterways.

iv. Any equipment or vehicles used for the Project would be checked and maintained daily to prevent leaks of fluids that could be deleterious to aquatic habitats.

v. All equipment would be cleaned before arriving on the site and before removal from the site to prevent spread of invasive plants.

vi. To avoid establishment of invasive, non-native plant species on or adjacent to the Project Area, the following measures will be implemented:

1. Vegetation disturbances will be limited to those areas identified on construction plans and maps as slated for development or construction staging.
2. Erosion and sediment control materials will be certified as weed-free.

vii. Staging and storage areas for equipment, materials, fuels, lubricants and solvents, would be located outside of the stream channel banks and outside of nearby waters.

viii. Stationary equipment such as motors, pumps, and generators, located adjacent to aquatic features would be positioned over secondary containment sufficient to arrest a catastrophic failure.

ix. Stockpiles of excavated soil or other would be covered when not in active use (i.e. would not be used or moved for 72 hours). All trucks hauling soil, sand, and other loose materials would be covered.

Mitigation Measure BIO-4c: In order to protect trees adjacent to the Project Area:

i. Trees not proposed for removal but adjacent to Project activities shall have orange construction fencing installed at the dripline. This shall be known as the tree protection zone (TPZ).
ii. Work within the TPZ shall be minimized to the maximum extent feasible.
iii. If work must occur within the TPZ, the fence can be removed temporarily, the tree trunk shall be wrapped in a waddle, and the fence shall be placed back as soon as work is completed.
iv. All equipment and stockpiles must be in designated staging areas away from all TPZ.
v. All trees to be removed shall be felled away from any trees to be avoided.
vi. If trees not proposed for removal require pruning, pruning shall follow ANSI A300 standards or be performed by a certified arborist.
vii. If any roots are exposed from trees to be avoided, roots can be pruned up to the diameter of 2 inches and pruned at 90-degree angles. The roots shall be covered by a damp burlap sack or damp towel while exposed.

Implementation of these mitigation measures will reduce this potential impact to seasonal wetland, freshwater marsh, and riparian land covers to a level that is ***less than significant***.

7.3 Aquatic Resources

This section analyzes the Project's potential impacts and mitigation for wetlands and other areas presumed or determined to be within the jurisdiction of the Corps or BCDC in reference to the significance threshold outlined in CEQA Appendix G, Part IV (c):

c) Does the Project have the potential to have a substantial adverse effect on state or federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means;

The Proposed Project is designed to avoid the freshwater marsh in the southern half of the Study Area and the intermittent stream within the Project Area. Both of which are potential Waters of the U.S. and State and the intermittent stream is potentially jurisdictional under CFGC 1602. Potential temporary impacts and mitigation measures for the freshwater marsh are described above (**Potential Impact and Mitigation Measure BIO-4**). No impacts are anticipated to the intermittent stream. Approximately 0.42 acre of seasonal wetland will be permanently impacted by Project construction as a result of conversion to a stormwater basin. Potential impacts and mitigation measures are discussed above in **Potential Impact and Mitigation Measures BIO-3 and BIO-4**. No additional impacts beyond those previously described are anticipated.

The implementation of Mitigation Measure BIO-3, BIO-4a, and BIO-4b will reduce impacts to a ***less than significant*** level***.***

7.4 Wildlife Corridors

This section analyzes the Project's potential impacts and mitigation for habitat corridors and linkages in reference to the significance threshold outlined in CEQA Appendix G, Part IV (d):

d) Does the Project have the potential to interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites;

As noted in Section 5.3, no portions of the Study Area provide connectivity between areas of suitable habitat (Caltrans 2010), and the Study Area does not contain nursery sites. No impact will occur to migratory corridors for terrestrial and aquatic species.

7.5 Local Policies and Ordinances

This section analyzes the Project's potential impacts and mitigation based on conflicts with local policies and ordinances in reference to the significance threshold outlined in CEQA Appendix G, Part IV (e):

e) Does the Project have the potential to conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance;

Local plans and policies related to biological resources examined in this analysis are:

- City of Vallejo General Plan, and
- City of Vallejo Tree Ordinance

The Proposed Project is consistent with the City of Vallejo General Plan regarding protecting sensitive natural resources, when possible, and ***no conflict*** will occur related to these local policies. However, the removal of trees as a part of the Proposed Project will require compliance with the City of Vallejo Tree

Ordinance. The Proposed Project will provide an Arborist Report prior to construction and will plant replacement trees according to the City of Vallejo Tree Ordinance, therefore ***no conflict*** with the tree ordinance will occur.

Tree removal may be required for the Proposed Project, as needed for construction and access. Some of the trees removed may be classified as "significant trees" or otherwise protected by local ordinances. The City of Vallejo Tree Ordinance requires tree removal permits for any significant tree. An arborist report (WRA 2023) in compliance with the City's Tree Ordinance has been prepared and up to 47 significant trees are anticipated to be removed for the Proposed Project. The proposed Project will follow the Tree Ordinance and replanting requirements. There is no potential conflict with the local tree ordinance.

7.6 Habitat Conservation Plans

This section analyzes the Project's potential impacts and mitigation based on conflicts with any adopted local, regional, and state habitat conservation plans in reference to the significance threshold outlined in CEQA Appendix G, Part IV (f):

> *f) Does the Project have the potential to conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.*

The Project Area is not within an adopted Habitat Conservation Plan, Natural Community Conservation Plan or other approved local, regional, or state habitat conservation plan, therefore, there is ***no conflict*** with adopted conservation plans.

APPENDIX B – SPECIES OBSERVED WITHIN THE STUDY AREA

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix B-1. Plant species observed within the Study Area on February 28 and July 14, 2022

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Amsinckia intermedia	Common fiddleneck	annual herb	native	-	-	-
Amsinckia lycopsoides	Tarweed fiddleneck	annual herb	native	-	-	-
Avena barbata	Slim oat	annual, perennial grass	native	-	Moderate	-
Avena fatua	Wildoats	annual grass	native	-	Moderate	-
Baccharis pilularis	Coyote brush	shrub	native	-	-	-
Bellardia trixago	Mediterranean lineseed	annual herb	native	-	Limited	-
Bolboschoenus maritimus ssp. *paludosus*	Saltmarsh bulrush	perennial grasslike herb	native	-	-	OBL
Brassica nigra	Black mustard	annual herb	non-native (invasive)	-	Moderate	-
Briza minor	Little rattlesnake grass	annual grass	non-native (invasive)	-	-	FAC
Bromus diandrus	Ripgut brome	annual grass	non-native	-	Moderate	-
Bromus hordeaceus	Soft chess	annual grass	native	-	Limited	FACU
Calandrinia menziesii	Red maids	annual herb	native	-	-	FACU
Calendula arvensis	Field marigold	annual herb	native	-	-	-
Capsella bursa-pastoris	Shepherd's purse	annual herb	native	-	-	FACU
Cardamine cf. hirsuta	Hairy bitter cress	non-native	annual herb	-	-	FACU
Carduus pycnocephalus ssp. *pycnocephalus*	Italian thistle	annual herb	native	-	Moderate	-
Chlorogalum pomeridianum	Amole	perennial herb	native	-	-	-
Cirsium vulgare	Bullthistle	perennial herb	native	-	Moderate	FACU
Cortaderia selloana	Pampas grass	perennial grass	-	-	High	FACU
Crassula connata	Sand pygmy weed	annual herb	non-native (invasive)	-	-	FAC

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Cynara cardunculus ssp. *flavescens*	Artichoke thistle	perennial herb	non-native (invasive)	-	Moderate	-
Cyperus eragrostis	Tall cyperus	perennial grasslike herb	-	-	-	FACW
Dittrichia graveolens	Stinkwort	annual herb	native	-	Moderate	-
Elymus caput-medusae	Medusa head	annual grass	native	-	High	-
Elymus triticoides	Beardless wild rye	perennial grass	non-native (invasive)	-	-	FAC
Erigeron canadensis	Canada horseweed	native	annual herb	-	-	FACU
Erodium botrys	Big heron bill	annual herb	native	-	-	FACU
Erodium cicutarium	Red stemmed filaree	annual herb	non-native (invasive)	-	Limited	-
Erodium moschatum	Whitestem filaree	annual herb	native	-	-	-
Euphorbia peplus	Petty spurge	annual herb	non-native (invasive)	-	-	-
Festuca bromoides	Brome fescue	annual grass	non-native	-	-	FACU
Festuca myuros	Rattail sixweeks grass	annual grass	non-native (invasive)	-	Moderate	FACU
Festuca perennis	Italian rye grass	annual, perennial grass	non-native (invasive)	-	Moderate	FAC
Ficus carica	Common fig	tree	native	-	Moderate	FACU
Foeniculum vulgare	Fennel	perennial herb	non-native	-	High	-
Galium aparine	Cleavers	annual herb	non-native	-	-	FACU
Geranium dissectum	Wild geranium	annual herb	non-native (invasive)	-	Limited	-
Geranium molle	Crane's bill geranium	annual, perennial herb	native	-	-	-
Helenium puberulum	Sneezeweed	perennial herb	non-native (invasive)	-	-	FACW
Helminthotheca echioides	Bristly ox-tongue	annual, perennial herb	non-native (invasive)	-	Limited	FAC

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Hemizonia congesta ssp. *luzulifolia*	Woodrush tarweed	annual herb	native	-	-	-
Heteromeles arbutifolia	Toyon	shrub	non-native (invasive)	-	-	-
Holcus lanatus	Common velvetgrass	perennial grass	native	-	Moderate	FAC
Juncus effusus	Common bog rush	perennial grasslike herb	non-native (invasive)	-	-	FACW
Juncus mexicanus	Mexican rush	perennial grasslike herb	non-native (invasive)	-	-	FACW
Juncus xiphioides	Iris leaved rush	perennial grasslike herb	native	-	-	OBL
Ligustrum lucidum	Glossy privet	tree, shrub	native	-	Limited	-
Lupinus succulentus	Arroyo lupine	annual herb	native	-	-	-
Lysimachia arvensis	Scarlet pimpernel	annual herb	non-native (invasive)	-	-	FAC
Malva sp.	Mallow	annual herb	non-native	-	-	-
Marah fabacea	California man-root	perennial herb, vine	non-native	-	-	-
Maytenus boaria	Mayten	tree, shrub	non-native	-	Watch	-
Medicago polymorpha	Bur clover	non-native (invasive)	annual herb	-	Limited	FACU
Nasturtium officinale	Watercress	perennial herb (aquatic)	non-native	-	-	OBL
Oxalis pes-caprae	Bermuda buttercup	perennial herb	non-native (invasive)	-	Moderate	-
Phalaris aquatica	Harding grass	perennial grass	non-native (invasive)	-	Moderate	FACU
Phoradendron leucarpum	American mistletoe	shrub (parasitic)	non-native (invasive)	-	-	-
Prunus cerasifera	Cherry plum	tree	non-native (invasive)	-	Limited	-
Prunus dulcis	Almond	tree	native	-	-	-
Pseudognaphalium luteoalbum	Jersey cudweed	annual herb	non-native (invasive)	-	-	FAC

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Quercus agrifolia	Coast live oak	tree	non-native	-	-	-
Raphanus sativus	Wild radish	annual, biennial herb	native	-	Limited	-
Rubus armeniacus	Himalayan blackberry	shrub	non-native (invasive)	-	High	FAC
Rumex crispus	Curly dock	non-native (invasive)	perennial herb	-	Limited	FAC
Rumex pulcher	Fiddleleaf dock	perennial herb	native	-	-	FAC
Salix laevigata	red willow	tree, shrub	native	-	-	FACW
Salix lasiolepis	Arroyo willow	tree, shrub	native	-	-	FACW
Sanicula bipinnatifida	Purple sanicle	native	perennial herb	-	-	-
Schoenoplectus americanus	Chairmaker's bulrush	perennial grasslike herb	native	-	-	OBL
Sisyrinchium bellum	Blue eyed grass	perennial herb	native	-	-	FACW
Sonchus oleraceus	Common sow thistle	annual herb	non-native (invasive)	-	-	UPL
Stipa pulchra	Purple needle grass	perennial grass	native	-	-	-
Toxicodendron diversilobum	Poison oak	vine, shrub	non-native	-	-	FACU
Typha sp.	-	-	native	-	-	-
Vicia sativa	Spring vetch	annual herb, vine	non-native	-	-	FACU

All species identified using the *Jepson eFlora* [Jepson Flora Project (eds.) 2022]; nomenclature follows *Jepson eFlora* [Jepson Flora Project (eds.) 2022]

[1] **California Native Plant Society. 2022. Inventory of Rare and Endangered Plants (online edition, v9-01 1.5). Sacramento, California. Online at: http://rareplants.cnps.org/; most recently accessed: March 2022**

FE: Federal Endangered
FT: Federal Threatened
SE: State Endangered
ST: State Threatened
SR: State Rare
Rank 1A: Plants presumed extinct in California
Rank 1B: Plants rare, threatened, or endangered in California and elsewhere
Rank 2: Plants rare, threatened, or endangered in California, but more common elsewhere

Rank 3: Plants about which we need more information – a review list

Rank 4: Plants of limited distribution – a watch list

[2] **California Invasive Plant Council. 2022. California Invasive Plant Inventory Database. California Invasive Plant Council, Berkeley, CA. Online at: http://www.cal-ipc.org/paf/; most recently accessed: March 2022**

High: Severe ecological impacts; high rates of dispersal and establishment; most are widely distributed ecologically.

Moderate: Substantial and apparent ecological impacts; moderate-high rates of dispersal, establishment dependent on disturbance; limited-moderate distribution ecologically

Limited: Minor or not well documented ecological impacts; low-moderate rate of invasiveness; limited distribution ecologically

Assessed: Assessed by Cal-IPC and determined to not be an existing current threat

[3] **U.S. Army Corps of Engineers. 2020. National Wetland Plant List, version 3.5. Engineer Research and Development Center. Cold Regions Research and Engineering Laboratory, Hanover, NH. Online at: http://wetland-plants.usace.army.mil/; most recently accessed: March 2022**

OBL: Almost always found in wetlands

FACW: Usually found in wetlands

FAC: Equally found in wetlands and uplands

FACU: Usually not found in wetlands

UPL: Almost never found in wetlands

NL: Not listed, assumed almost never found in wetlands

NI: No information; not factored during wetland delineation

Appendix B-2. Wildlife Species Observed within the Study Area on February 28 and July 14, 2022

Scientific Name	Common Name	Conservation Status[1]
Mammals		
Canis latrans	Coyote	-
Odocoileus hemionus californicus	California mule deer	-
Sus scrofa	Feral hog	-
Thomomys bottae	Botta's pocket Gopher	-
Birds		
Aphelocoma californica	California scrub-jay	-
Buteo jamaicensis	Red-tailed hawk	-
Buteo lineatus	Red-shouldered hawk	-
Calypte anna	Anna's hummingbird	-
Cathartes aura	Turkey vulture	-
Colaptes auratus	Northern flicker	-
Corvus brachyrhynchos	American crow	-
Elanus leucurus	White-tailed kite	FP
Haemorhous mexicanus	House finch	-
Melozone crissalis	California towhee	-
Mimus polyglottos	Northern mockingbird	-
Sayornis saya	Say's phoebe	-
Setophaga coronata	Yellow-rumped warbler	-
Zenaida macroura	Mourning dove	-
Zonotrichia atricapilla	Golden-crowned sparrow	-

Scientific Name	Common Name	Conservation Status[1]
Invertebrates		
Bombus spp.	Bumblebee	-
Apis mellifera	European honeybee	-

[1]Key to Conservation Status:

FP CDFW Fully Protected Species

APPENDIX C – POTENTIAL FOR SPECIAL-STATUS SPECIES TO OCCUR IN THE STUDY AREA

THIS PAGE INTENTIONALLY LEFT BLANK

Appendix C. Potential for Special-status Species to Occur in the Study Area. Special-status plant and wildlife species table with the potential to occur within the vicinity of the Study Area (Cuttings Wharf, Cordelia, Fairfield South, Mare Island, Benicia, Vine Hill, Richmond, Briones Valley, and Walnut Creek USGS 7.5' topographic quadrangles). Results include database searches of California Native Plant Society Rare and Endangered Plant Inventory, California Natural Diversity Database, Information Planning and Conservation, as well as U.S. Fish and Wildlife Service Threatened and Endangered Species Lists.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Plants				
bent-flowered fiddleneck *Amsinckia lunaris*	Rank 1B.2	Cismontane woodland, coastal bluff scrub, valley and foothill grassland. Elevation ranges from 10 to 1640 feet (3 to 500 meters). Blooms Mar-Jun.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat, and is therefore unlikely to support this species.	No further actions are recommended for this species.
California androsace *Androsace elongata* ssp. *acuta*	Rank 4.2	Chaparral, cismontane woodland, coastal scrub, meadows and seeps, pinyon and juniper woodland, valley and foothill grassland. Elevation ranges from 490 to 4280 feet (150 to 1305 meters). Blooms Mar-Jun.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. Few native species are present, indicating that the grassland is poor quality habitat, and is therefore unlikely to support this species.	No further actions are recommended for this species.
slender silver moss *Anomobryum julaceum*	Rank 4.2	Broadleafed upland forest, lower montane coniferous forest, north coast coniferous forest. Elevation ranges from 330 to 3280 feet (100 to 1000 meters).	**Unlikely.** This species is known from mesic to perennially wet sandstone (K. Kellman, pers. com.), and such habitat is absent from the Study Area.	No further actions are recommended for this species.
pallid manzanita *Arctostaphylos pallida*	FT, SE, Rank 1B.1	Broadleafed upland forest, chaparral, cismontane woodland, closed-cone coniferous forest, coastal scrub. Elevation ranges from 605 to 1525 feet (185 to 465 meters). Blooms Dec-Mar.	**No Potential.** This species occurs on uplifted marine terraces on siliceous shale or thin chert (CDFW 2024b), and such substrate is absent from the Study Area.	No further actions are recommended for this species.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
alkali milk-vetch *Astragalus tener* var. *tener*	Rank 1B.2	Playas, valley and foothill grassland, vernal pools. Elevation ranges from 5 to 195 feet (1 to 60 meters). Blooms Mar-Jun.	**No Potential.** The Study Area does not contain vernal pools or alkaline soils necessary to support this species.	No further actions are recommended for this species.
crownscale *Atriplex coronata* var. *coronata*	Rank 4.2	Chenopod scrub, valley and foothill grassland, vernal pools. Elevation ranges from 5 to 1935 feet (1 to 590 meters). Blooms Mar-Oct.	**No Potential.** The Study Area does not contain vernal pools or alkaline soils necessary to support this species.	No further actions are recommended for this species.
vernal pool smallscale *Atriplex persistens*	Rank 1B.2	Vernal pools. Elevation ranges from 35 to 375 feet (10 to 115 meters). Blooms Jun-Oct.	**No Potential**. The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
big-scale balsamroot *Balsamorhiza macrolepis*	Rank 1B.2	Chaparral, cismontane woodland, valley and foothill grassland. Elevation ranges from 150 to 5100 feet (45 to 1555 meters). Blooms Mar-Jun.	**Unlikely.** Although the Study Area contains grassland and chaparral habitat, the site has been historically disturbed, and in some areas it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species. Based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
big tarplant *Blepharizonia plumosa*	Rank 1B.1	Valley and foothill grassland. Elevation ranges from 100 to 1655 feet (30 to 505 meters). Blooms Jul-Oct.	**No Potential.** The Study Area does not contain alkaline soils necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Mt. Diablo fairy-lantern *Calochortus pulchellus*	Rank 1B.2	Chaparral, cismontane woodland, riparian woodland, valley and foothill grassland. Elevation ranges from 100 to 2755 feet (30 to 840 meters). Blooms Apr-Jun.	**Unlikely.** Although the Study Area contains grassland and chaparral habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species. Based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
Oakland star-tulip *Calochortus umbellatus*	Rank 4.2	Broadleafed upland forest, chaparral, cismontane woodland, lower montane coniferous forest, valley and foothill grassland. Elevation ranges from 330 to 2295 feet (100 to 700 meters). Blooms Mar-May.	**Unlikely.** Although the Study Area contains grassland, forest, and chaparral habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species. Based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it. Forested areas are too shady to support this species.	No further actions are recommended for this species.
coastal bluff morning-glory *Calystegia purpurata* ssp. *saxicola*	Rank 1B.2	Coastal bluff scrub, coastal dunes, coastal scrub, north coast coniferous forest. Elevation ranges from 0 to 345 feet (0 to 105 meters). Blooms (Mar)Apr-Sep.	**No Potential.** The Study Area does not contain coastal habitats necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Lyngbye's sedge *Carex lyngbyei*	Rank 2B.2	Marshes and swamps. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms Apr-Aug.	**Unlikely.** Although the Study Area contains a marsh, this species is known from brackish habitats, which are absent from the Study Area.	No further actions are recommended for this species.
Tiburon paintbrush *Castilleja affinis* var. *neglecta*	FE, ST, Rank 1B.2	Valley and foothill grassland. Elevation ranges from 195 to 1310 feet (60 to 400 meters). Blooms Apr-Jun.	**No Potential.** The Study Area does not contain serpentine soils necessary to support this species.	No further actions are recommended for this species.
johnny-nip *Castilleja ambigua* var. *ambigua*	Rank 4.2	Coastal bluff scrub, coastal prairie, coastal scrub, marshes and swamps, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 1425 feet (0 to 435 meters). Blooms Mar-Aug.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
Congdon's tarplant *Centromadia parryi* ssp. *congdonii*	Rank 1B.1	Valley and foothill grassland. Elevation ranges from 0 to 755 feet (0 to 230 meters). Blooms May-Oct(Nov).	**Unlikely.** Although the Study Area contains grassland habitat, it does not contain alkaline soils typical of this species. The nearest modern occurrence of this species is 7 miles southeast of the Study Area. No species of *Centromadia* were observed during site visits.	No further actions are recommended for this species.
pappose tarplant *Centromadia parryi* ssp. *parryi*	Rank 1B.2	Chaparral, coastal prairie, marshes and swamps, meadows and seeps, valley and foothill grassland. Elevation ranges from 0 to 1380 feet (0 to 420 meters). Blooms May-Nov.	**Unlikely.** Although the Study Area contains marsh habitat, it is too consistently inundated to support this species. Additionally, the Study Area does not contain alkaline soils, on which this species often occurs (CDFW 2024b). The nearest occurrence of this species is approximately 6 miles northeast of the Study Area. No species of *Centromadia* were observed during site visits.	No further actions are recommended for this species.
Point Reyes salty bird's-beak *Chloropyron maritimum* ssp. *palustre*	Rank 1B.2	Marshes and swamps. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms Jun-Oct.	**No Potential.** Although the Study Area contains a marsh, it does not contain a tidal marsh, which is necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
soft salty bird's-beak *Chloropyron molle* ssp. *molle*	FE, SR, Rank 1B.2	Marshes and swamps. Elevation ranges from 0 to 10 feet (0 to 3 meters). Blooms Jun-Nov.	**No Potential.** Although the Study Area contains a marsh, it does not contain a tidal marsh, which is necessary to support this species.	No further actions are recommended for this species.
Bolander's water-hemlock *Cicuta maculata* var. *bolander*i	Rank 2B.1	Marshes and swamps. Elevation ranges from 0 to 655 feet (0 to 200 meters). Blooms Jul-Sep.	**Unlikely.** Although the Study Area contains a marsh, based on historic aerial imagery (NETR 2024), it is recently developed and appears to persist as a result of residential runoff. As such, it is low quality habitat. In addition, all occurrences in the vicinity of the Study Area occur in tidal marsh, which is absent from the Study Area.	No further actions are recommended for this species.
Franciscan thistle *Cirsium andrewsii*	Rank 1B.2	Broadleafed upland forest, coastal bluff scrub, coastal prairie, coastal scrub. Elevation ranges from 0 to 490 feet (0 to 150 meters). Blooms Mar-Jul.	**Unlikely.** Although the Study Area contains forest habitat, it is too shady to support this species.	No further actions are recommended for this species.
Suisun thistle *Cirsium hydrophilum* var. *hydrophilum*	FE, Rank 1B.1	Marshes and swamps. Elevation ranges from 0 to 5 feet (0 to 1 meters). Blooms Jun-Sep.	**No Potential.** Although the Study Area contains a marsh, it does not contain a tidal marsh, which is necessary to support this species.	No further actions are recommended for this species.
western leatherwood *Dirca occidentalis*	Rank 1B.2	Broadleafed upland forest, chaparral, cismontane woodland, closed-cone coniferous forest, north coast coniferous forest, riparian forest, riparian woodland. Elevation ranges from 80 to 1395 feet (25 to 425 meters). Blooms Jan-Mar (Apr).	**Unlikely.** Although the Study Area contains forest habitat, based on historic aerial imagery (NETR 2024), the forest is recently established. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
dwarf downingia *Downingia pusilla*	Rank 2B.2	Valley and foothill grassland, vernal pools. Elevation ranges from 5 to 1460 feet (1 to 445 meters). Blooms Mar-May.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
small spikerush *Eleocharis parvula*	Rank 4.3	Marshes and swamps. Elevation ranges from 5 to 9910 feet (1 to 3020 meters). Blooms (Apr)Jun-Aug (Sep).	**Unlikely.** Although the Study Area contains a marsh, based on historic aerial imagery (NETR 2024), it is recently developed and appears to persist as a result of residential runoff. As such, it is low quality habitat.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
streamside daisy *Erigeron biolettii*	Rank 3	Broadleafed upland forest, cismontane woodland, north coast coniferous forest. Elevation ranges from 100 to 3610 feet (30 to 1100 meters). Blooms Jun-Oct.	**Unlikely.** Although the Study Area contains forest habitat, based on historic aerial imagery (NETR 2024), the forest is recently established. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
Mt. Diablo buckwheat *Eriogonum truncatum*	Rank 1B.1	Chaparral, coastal scrub, valley and foothill grassland. Elevation ranges from 10 to 1150 feet (3 to 350 meters). Blooms Apr-Sep (Nov-Dec).	**No Potential.** This species has a restricted range to Mount Diablo, approximately 15 miles southeast of the Study Area. Additionally, the Study Area does not contain alkaline soil necessary to support this species.	No further actions are recommended for this species.
Jepson's coyote-thistle *Eryngium jepsonii*	Rank 1B.2	Valley and foothill grassland, vernal pools. Elevation ranges from 10 to 985 feet (3 to 300 meters). Blooms Apr-Aug.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
cut-leaved monkeyflower *Erythranthe laciniata*	Rank 4.3	Chaparral, lower montane coniferous forest, upper montane coniferous forest. Elevation ranges from 1610 to 8695 feet (490 to 2650 meters). Blooms Apr-Jul.	**No Potential.** The nearest recorded occurrence is a cultivated specimen from 1901 in Berkeley, California. Wild populations of this species are known from the western Sierra Nevada and adjacent foothills, far from the Study Area.	No further actions are recommended for this species.
San Joaquin spearscale *Extriplex joaquinana*	Rank 1B.2	Chenopod scrub, meadows and seeps, playas, valley and foothill grassland. Elevation ranges from 5 to 2740 feet (1 to 835 meters). Blooms Apr-Oct.	**No Potential.** The Study Area does not contain alkaline soils necessary to support this species.	No further actions are recommended for this species.
minute pocket moss *Fissidens pauperculus*	Rank 1B.2	North coast coniferous forest. Elevation ranges from 35 to 3360 feet (10 to 1024 meters).	**No Potential.** The Study Area does not contain north coast coniferous forest necessary to support this species.	No further actions are recommended for this species.
fragrant fritillary *Fritillaria liliacea*	Rank 1B.2	Cismontane woodland, coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 10 to 1345 feet (3 to 410 meters). Blooms Feb-Apr.	**Unlikely.** Although the Study Area contains grassland and marsh habitat, it is too consistently inundated to support this species.	No further actions are recommended for this species.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Diablo helianthella *Helianthella castanea*	Rank 1B.2	Broadleafed upland forest, chaparral, cismontane woodland, coastal scrub, riparian woodland, valley and foothill grassland. Elevation ranges from 195 to 4265 feet (60 to 1300 meters). Blooms Mar-Jun.	**Unlikely.** Although the Study Area contains grassland, forest, and chaparral habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species. Based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it. Forested areas are too shady to support this species.	No further actions are recommended for this species.
hogwallow starfish *Hesperevax caulescens*	Rank 4.2	Valley and foothill grassland, vernal pools. Elevation ranges from 0 to 1655 feet (0 to 505 meters). Blooms Mar-Jun.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
woolly rose-mallow *Hibiscus lasiocarpos* var. *occidentalis*	Rank 1B.2	Marshes and swamps (freshwater) Elevation ranges from 0 to 395 feet (0 to 120 meters). Blooms June-Sep.	**Unlikely.** Although the Study Area contains a marsh, based on historic aerial imagery (NETR 2024), it is recently developed and appears to persist as a result of residential runoff. As such, it is low quality habitat.	No further actions are recommended for this species.
Loma Prieta hoita *Hoita strobilina*	Rank 1B.1	Chaparral, cismontane woodland, riparian woodland. Elevation ranges from 100 to 2820 feet (30 to 860 meters). Blooms May-Jul(Aug-Oct).	**No Potential.** The Study Area does not contain serpentine soils necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Santa Cruz tarplant *Holocarpha macradenia*	FT, SE, Rank 1B.1	Coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 35 to 720 feet (10 to 220 meters). Blooms Jun-Oct.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
coast iris *Iris longipetala*	Rank 4.2	Coastal prairie, lower montane coniferous forest, meadows and seeps. Elevation ranges from 0 to 1970 feet (0 to 600 meters). Blooms Mar-May(Jun).	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
Carquinez goldenbush *Isocoma arguta*	Rank 1B.1	Valley and foothill grassland. Elevation ranges from 5 to 65 feet (1 to 20 meters). Blooms Aug-Dec.	**No Potential.** The Study Area does not contain alkaline soils necessary to support this species.	No further actions are recommended for this species.
Southern California black walnut *Juglans californica*	Rank 4.2	Chaparral, cismontane woodland, coastal scrub, riparian woodland. Elevation ranges from 165 to 2955 feet (50 to 900 meters). Blooms Mar-Aug.	**No Potential.** The Study Area is well outside of the known range of this species, which is restricted to Southern California.	No further actions are recommended for this species.
Contra Costa goldfields *Lasthenia conjugens*	FE, Rank 1B.1	Cismontane woodland, playas, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 1540 feet (0 to 470 meters). Blooms Mar-Jun.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
Ferris' goldfields *Lasthenia ferrisiae*	Rank 4.2	Vernal pools. Elevation ranges from 65 to 2295 feet (20 to 700 meters). Blooms Feb-May.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Delta tule pea *Lathyrus jepsonii* var. *jepsonii*	Rank 1B.2	Marshes and swamps. Elevation ranges from 0 to 15 feet (0 to 5 meters). Blooms May-Jul(Aug-Sep).	**No Potential.** The Study Area does not contain tidally influenced marshes necessary to support this species.	No further actions are recommended for this species.
legenere *Legenere limosa*	Rank 1B.1	Vernal pools. Elevation ranges from 5 to 2885 feet (1 to 880 meters). Blooms Apr-Jun.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
bristly leptosiphon *Leptosiphon acicularis*	Rank 4.2	Chaparral, cismontane woodland, coastal prairie, valley and foothill grassland. Elevation ranges from 180 to 4920 feet (55 to 1500 meters). Blooms Apr-Jul.	**Unlikely.** Although the Study Area contains grassland and chaparral habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species. Based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
large-flowered leptosiphon *Leptosiphon grandiflorus*	Rank 4.2	Cismontane woodland, closed-cone coniferous forest, coastal bluff scrub, coastal dunes, coastal prairie, coastal scrub, valley and foothill grassland. Elevation ranges from 15 to 4005 feet (5 to 1220 meters). Blooms Apr-Aug.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Jepson's leptosiphon *Leptosiphon jepsonii*	Rank 1B.2	Chaparral, cismontane woodland, valley and foothill grassland. Elevation ranges from 330 to 1640 feet (100 to 500 meters). Blooms Mar-May.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
woolly-headed lessingia *Lessingia hololeuca*	Rank 3	Broadleafed upland forest, coastal scrub, lower montane coniferous forest, valley and foothill grassland. Elevation ranges from 50 to 1000 feet (15 to 305 meters). Blooms Jun-Oct.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
Mason's lilaeopsis *Lilaeopsis masonii*	SR, Rank 1B.1	Marshes and swamps, riparian scrub. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms Apr-Nov.	**No Potential.** Tidal marsh is absent from the Study Area.	No further actions are recommended for this species.
Delta mudwort *Limosella australis*	Rank 2B.1	Marshes and swamps, riparian scrub. Elevation ranges from 0 to 10 feet (0 to 3 meters). Blooms May-Aug.	**No Potential.** Tidal marsh is absent from the Study Area.	No further actions are recommended for this species.
Hall's bush-mallow ***Malacothamnus hallii***	Rank 1B.2	Chaparral, coastal scrub. Elevation ranges from 35 to 2495 feet (10 to 760 meters). Blooms (Apr)May- Sep(Oct).	Unlikely. The Study Area was historically grassland, which is not suitable habitat for this species. Based on historic aerial imagery, shrub stands did not begin establishing in the Study Area until the 1980s. The nearest occurrence of this species is located approximately 15 miles southeast, across the Carquinez Strait/Suisun Bay. It is unlikely that this species could have colonized the Study Area from that distance and across the geographic and urban development barriers that are present.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Oregon meconella *Meconella oregana*	Rank 1B.1	Coastal prairie, coastal scrub. Elevation ranges from 820 to 2035 feet (250 to 620 meters). Blooms Mar-Apr.	**No Potential.** The Study Area does not contain coastal habitats necessary to support this species.	No further actions are recommended for this species.
San Antonio Hills monardella *Monardella antonina* ssp. *antonina*	Rank 3	Chaparral, cismontane woodland. Elevation ranges from 1050 to 3280 feet (320 to 1000 meters). Blooms Jun-Aug.	**Unlikely.** Although the Study Area contains chaparral habitat, based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.
Antioch Dunes evening-primrose *Oenothera deltoides* ssp. *howellii*	FE, SE, Rank 1B.1	Inland dunes. Elevation ranges from 0 to 100 feet (0 to 30 meters). Blooms Mar-Sep.	**No Potential.** The Study Area does not contain inland dunes necessary to support this species.	No further actions are recommended for this species.
Marin knotweed *Polygonum marinense*	Rank 3.1	Marshes and swamps. Elevation ranges from 0 to 35 feet (0 to 10 meters). Blooms (Apr)May-Aug(Oct).	**No Potential.** Although the Study Area contains a marsh, it is not tidal or brackish.	No further actions are recommended for this species.
California alkali grass *Puccinellia simplex*	Rank 1B.2	Chenopod scrub, meadows and seeps, valley and foothill grassland, vernal pools. Elevation ranges from 5 to 3050 feet (2 to 930 meters). Blooms Mar-May.	**No Potential.** The Study Area does not contain vernal pools necessary to support this species.	No further actions are recommended for this species.
Lobb's aquatic buttercup *Ranunculus lobbii*	Rank 4.2	Cismontane woodland, north coast coniferous forest, valley and foothill grassland, vernal pools. Elevation ranges from 50 to 1540 feet (15 to 470 meters). Blooms Feb-May.	**No Potential.** The Study Area does not contain seasonally ponded areas necessary to support this species.	No further actions are recommended for this species.
chaparral ragwort *Senecio aphanactis*	Rank 2B.2	Chaparral, cismontane woodland, coastal scrub. Elevation ranges from 50 to 2625 feet (15 to 800 meters). Blooms Jan-Apr (May).	**No Potential.** The Study Area does not contain alkaline soils necessary to support this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
long-styled sand-spurrey *Spergularia macrotheca* var. *longistyla*	Rank 1B.2	Marshes and swamps, meadows and seeps. Elevation ranges from 0 to 835 feet (0 to 255 meters). Blooms Feb-May.	**No Potential.** The Study Area does not contain alkaline soils necessary to support this species.	No further actions are recommended for this species.
northern slender pondweed *Stuckenia filiformis* ssp. *alpina*	Rank 2B.2	Marshes and swamps. Elevation ranges from 985 to 7055 feet (300 to 2150 meters). Blooms May-Jul.	**No Potential.** This species occurs in clear, shallow water (CDFW 2024b), which is absent from the Study Area.	No further actions are recommended for this species.
California seablite *Suaeda californica*	FE, Rank 1B.1	Marshes and swamps. Elevation ranges from 0 to 50 feet (0 to 15 meters). Blooms Jul-Oct.	**No Potential.** Tidal marsh is absent from the Study Area.	No further actions are recommended for this species.
Suisun Marsh aster *Symphyotrichum lentum*	Rank 1B.2	Marshes and swamps. Elevation ranges from 0 to 10 feet (0 to 3 meters). Blooms (Apr)May-Nov.	**No Potential.** Tidal marsh is absent from the Study Area.	No further actions are recommended for this species.
two-fork clover *Trifolium amoenum*	FE, Rank 1B.1	Coastal bluff scrub, valley and foothill grassland. Elevation ranges from 15 to 1360 feet (5 to 415 meters). Blooms Apr-Jun.	**Unlikely.** Although the Study Area contains grassland habitat, the site has been historically disturbed, and in some areas, it receives modern anthropogenic disturbance, including mowing, discing, and off-highway vehicle use. The grassland is dominated by a very dense cover of non-native and invasive species. Few native species are present, indicating that the grassland is poor quality habitat and is therefore unlikely to support this species.	No further actions are recommended for this species.
saline clover *Trifolium hydrophilum*	Rank 1B.2	Marshes and swamps, valley and foothill grassland, vernal pools. Elevation ranges from 0 to 985 feet (0 to 300 meters). Blooms Apr-Jun.	**No Potential.** The Study Area does not contain vernal pools or alkaline soils necessary to support this species.	No further actions are recommended for this species.
oval-leaved viburnum *Viburnum ellipticum*	Rank 2B.3	Chaparral, cismontane woodland, lower montane coniferous forest. Elevation ranges from 705 to 4595 feet (215 to 1400 meters). Blooms May-Jun.	**Unlikely.** Although the Study Area contains chaparral habitat, based on historic aerial imagery (NETR 2024), chaparral did not start establishing in the Study Area until the 1980s. As there are no occurrences of this species in the immediate vicinity, the Study Area is unlikely to have a historic seedbank containing this species and is unlikely to have been colonized by it.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Birds				
Golden eagle *Aquila chrysaetos*	FP, BGEPA	Occurs year-round in rolling foothills, mountain areas, sage-juniper flats, and deserts. Cliff-walled canyons provide nesting habitat in most parts of range; also nests in large trees, usually within otherwise open areas.	**Unlikely.** The nearest documented breeding occurrence of this species was 1.8 mi north of the Study Area in 1987 (CDFW 2024b). There are dozens of historic and recent occurrences in the vicinity of the Study Area (CDFW 2024b, Cornell 2024). There is potential foraging habitat within the Study Area in the form of nonnative annual grasslands and scrub communities, however during the site visit on February 28, 2022, no ground squirrel burrows were observed. There is no suitable nesting habitat within the Study Area. Although golden eagles may fly over the Study Area, they are unlikely to forage or nest within the Study Area.	No further actions are recommended for this species.
Bald eagle *Haliaeetus leucocephalus*	SE, FP, BGEPA	Occurs year-round in California, but primarily a winter visitor; breeding population is growing. Nests in large trees in the vicinity of larger lakes, reservoirs and rivers. Wintering habitat somewhat more variable but usually features large concentrations of waterfowl or fish.	**Unlikely.** The nearest documented breeding occurrence of this species was over 10 mi south of the Study Area in 2006 (CDFW 2024b). There are no other occurrences within 60 miles of the Study Area (CDFW 2024b). The Study Area lacks suitable foraging and nesting habitat for this species. There are no large bodies of freshwater in the Study Area.	No further actions are recommended for this species.
Northern harrier *Circus hudsonius*	SSC	Year-round resident and winter visitor. Found in open habitats including grasslands, prairies, marshes and agricultural areas. Nests on the ground in dense vegetation, typically near water or otherwise moist areas. Preys on small vertebrates.	**Moderate Potential.** The nearest documented breeding occurrence of this species was less than 1 mile southeast of the Study Area in 2004 in the Benicia State Recreation Area (CDFW 2024b). The Benicia State Recreation Area is a 200-acre tidal wetland that could act as source population to the Study Area. Additionally, the Study Area contains suitable foraging and nesting habitat for this species. There is moderate potential this species will use the Study Area for foraging and nesting.	Work windows or pre-construction surveys. See Section 7 for a discussion of mitigation measures.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Swainson's hawk *Buteo swainsoni*	ST	Summer resident in California's Central Valley and limited portions of the southern California interior. Nests in tree groves and isolated trees in riparian and agricultural areas, including near buildings. Forages in grasslands and scrub habitats as well as agricultural fields, especially alfalfa. Preys on arthropods year-round as well as smaller vertebrates during the breeding season.	**Unlikely.** The nearest documented breeding occurrence of this species was over 9 mi north of the Study Area in 2004 (CDFW 2024b). Swainson's hawk is documented to occur in the region on occasion during migration (Cornell 2024). The Study Area contains suitable foraging in the form of grasslands, but this species is not known to nest in the vicinity and may only occasionally pass through during migration.	No further actions are recommended for this species.
American peregrine falcon *Falco peregrinus anatum*	FP	Year-round resident and winter visitor. Occurs in a wide variety of habitats, though often associated with coasts, bays, marshes and other bodies of water. Nests on protected cliffs and also on man-made structures including buildings and bridges.	**Unlikely.** This species has been documented foraging within 2 miles of the Study Area (Cornell 2024). The Study Area contains foraging habitat, but no nesting habitat such as cliffs, bridges, or other tall structures. Foraging habitat within the Study Area is not primary as this species is most likely to forage in the marshland to the east and south. It is unlikely this species could be found in the Study Area other than occasional foraging.	No further actions are recommended for this species.
White-tailed kite *Elanus leucurus*	CFP	Year-round resident in coastal and valley lowlands with scattered trees and large shrubs, including grasslands, marshes and agricultural areas. Nests in trees, of which the type and setting are highly variable. Preys on small mammals and other vertebrates.	**Moderate Potential.** There have been numerous historic and recent documented occurrences of this species (Cornell 2024),and one potential nest within 2 miles of the Study Area (CDFW 2024b). The Study Area contains suitable foraging in the form of grasslands and shrublands. Additionally, there are large oak trees that are suitable nesting habitat. This species was observed foraging within the Study Area on February 28, 2022. There is a moderate potential for this species to nest within the Study Area.	Work windows or pre-construction surveys. See Section 7 for a discussion of mitigation measures.

Species	Status	Habitat	Potential to Occur	Recommendations
Short-eared owl *Asio flammeus*	SSC	Occurs year-round, but primarily as a winter visitor; breeding very restricted in most of California. Found in open, treeless areas (e.g., marshes, grasslands) with elevated sites for foraging perches and dense herbaceous vegetation for roosting and nesting. Preys mostly on small mammals, particularly voles.	**Moderate Potential.** There are several documented occurrences of this species within 5 miles of the Study Area (Cornell 2024), although no CNDDB occurrences within 5 miles (CDFW 2024b). The Study Area contains suitable nesting habitat in the form of grasslands and shrublands. The adjacent Benicia State Recreation Area provides foraging habitat for this species. The nearest confirmed population is at Suisun Marsh approximately 7 miles east of the Study Area (Shuford and Gardali 2008; CDFW 2024b).	Work windows or pre-construction surveys. See Section 7 for a discussion of mitigation measures.
Burrowing owl *Athene cunicularia*	SSC	Year-round resident and winter visitor. Occurs in open, dry grasslands and scrub habitats with low-growing vegetation, perches and abundant mammal burrows. Preys upon insects and small vertebrates. Nests and roosts in old mammal burrows, most commonly those of ground squirrels.	**Unlikely.** There have been numerous documented occurrences of this species within 5 miles of the Study Area during wintering and migration periods (Cornell 2024), and 2 wintering occurrences about 4 miles from the Study Area in CNDDB (CDFW 2024b). The Study Area contains suitable foraging habitat in the form of grasslands and shrublands and may be observed foraging during winter or migration periods. During the site visit on February 28, 2022, no ground squirrel burrows were observed. Therefore, the Study Area lacks the mammal burrows necessary for occupation or nesting by this species and it is unlikely to nest within the Study Area.	No further actions are recommended for this species.
California Ridgway's rail *Rallus obsoletus obsoletus*	FE, SE, FP	Year-round resident in tidal marshes of the San Francisco Bay estuary. Requires tidal sloughs and intertidal mud flats for foraging, and dense marsh vegetation for nesting and cover. Typical habitat features abundant growth of cordgrass and pickleweed. Feeds primarily on mollusks and crustaceans.	**No Potential.** The Study Area does not contain any tidal marshes, sloughs, or intertidal mud flats that can support foraging or nesting for this species and is greater than 700 feet from tidal marsh habitats.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
California black rail *Laterallus jamaicensis coturniculus*	ST, FP	Year-round resident in marshes (saline to freshwater) with dense vegetation within four inches of the ground. Prefers larger, undisturbed marshes that have an extensive upper zone and are close to a major water source. Extremely secretive and cryptic.	**No Potential.** The Study Area does not contain any marshes, sloughs, or intertidal mud flats that can support foraging or nesting for this species and is greater than 700 feet from marsh habitats.	No further actions are recommended for this species.
Yellow rail *Coturnicops noveboracensis*	SSC	Summer resident in eastern Sierra Nevada in Mono County, breeding in shallow freshwater marshes and wet meadows with dense vegetation. Also a rare winter visitor along the coast and other portions of the state. Extremely cryptic.	**No Potential.** The Study Area does not contain any marshes or sloughs that can support foraging or nesting for this species.	No further actions are recommended for this species.
Tricolored blackbird *Agelaius tricolor*	ST, SSC	Nearly endemic to California, where it is most numerous in the Central Valley and vicinity. Highly colonial, nesting in dense aggregations over or near freshwater in emergent growth or riparian thickets. Also uses flooded agricultural fields. Abundant insect prey near breeding areas essential.	**Unlikely.** The Study Area has 0.42 acres of seasonal wetland that will be impacted and 0.94 acres of riparian habitat that will not be impacted. The seasonal wetland lacks riparian thickets or tall, dense emergent vegetation suitable to support nesting for this species. The riparian habitat present in the Study Area is dense tree canopy and not suitable for this species.	No further actions are recommended for this species.
Yellow-headed blackbird *Xanthocephalus xanthocephalus*	SSC	Summer resident. Breeds colonially in freshwater emergent wetlands with dense vegetation and deep water, often along borders of lakes or ponds. Requires abundant large insects such as dragonflies; nesting is timed for maximum emergence of insect prey.	**No Potential.** The seasonal wetland in the Study Area lacks riparian thickets or tall, dense emergent vegetation suitable to support nesting for this species. The Study Area does not have deep water features suitable for this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
San Pablo song sparrow *Melospiza melodia samuelis*	SSC	Year-round resident of tidal marshes along the north side of San Francisco and San Pablo Bays. Typical habitat is dominated by pickleweed, with gumplant and other shrubs present in the upper zone for nesting. May forage in areas adjacent to marshes.	**No Potential.** The Study Area does not contain any tidal marshes, sloughs, or intertidal mud flats that can support nesting for this species. The nearest occurrence for this species is over 3.5 miles west of the Study Area (CDFW 2024b; Cornell 2024). The Study Area is outside the known range of this species.	No further actions are recommended for this species.
Suisun song sparrow *Melospiza melodia maxillaris*	SSC	Year-round resident of brackish-water marshes along Suisun Bay. Inhabits cattails, tules, bulrushes and other emergent vegetation, including pickleweed. Nests typically placed in shrubs.	**Unlikely.** The Study Area does not contain any tidal marshes, sloughs, or intertidal mud flats that can support nesting for this species. However, the Study Area is near tidal marsh habitat and this species could forage in the Study Area. This species has been documented in the Benicia State Recreation Area (CDFW 2024b, Cornell 2024). The Study Area is within the known range of this species, but over 700 feet from typical habitat.	No further actions are recommended for this species.
Alameda song sparrow *Melospiza melodia pusillula*	SSC	Year-round resident of salt marshes bordering the south arm of San Francisco Bay. Inhabits primarily pickleweed marshes; nests placed in marsh vegetation, typically shrubs such as gumplant.	**No Potential.** The Study Area does not contain any tidal marshes, sloughs, or intertidal mud flats that can support nesting for this species. Additionally, the Study Area is outside the current range of this species.	No further actions are recommended for this species.
Saltmarsh common yellowthroat *Geothlypis trichas sinuosa*	SSC	Resident of the San Francisco Bay region, in fresh and saltwater marshes. Requires thick, continuous cover down to water surface for foraging; tall grasses, tule patches, willows for nesting.	**Unlikely.** The Study Area does not contain any tidal marshes, sloughs, or intertidal mud flats that can support nesting for this species. However, the Study Area is near marsh habitat and this species could forage in the Study Area. This species has been documented in the Benicia State Recreation Area (CDFW 2024b, Cornell 2024).	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Bank swallow *Riparia riparia*	ST	Summer resident in riparian and other lowland habitats near rivers, lakes and the ocean in northern California. Nests colonially in excavated burrows on vertical cliffs and bank cuts (natural and manmade) with fine-textured soils. Historical nesting range in southern and central areas of California has been eliminated by habitat loss. Currently known to breed in Siskiyou, Shasta, and Lassen Cos., portions of the north coast, and along Sacramento River from Shasta Co. south to Yolo Co.	**No Potential.** There have been no documented occurrences of this species within 10 miles of the Study Area (CDFW 2024b; Cornell 2024). The Study Area does not contain suitable nesting habitat near rivers, lakes, or the ocean for this species.	No further actions are recommended for this species.
Western snowy plover *Charadrius nivosus nivosus*	FT, SSC	Federal listing applies only to the Pacific coastal population. Year-round resident and winter visitor. Occurs on sandy beaches, salt pond levees, and the shores of large alkali lakes. Nests on the ground, requiring sandy, gravelly or friable soils.	**No Potential.** The Study Area does not contain any tidal sandy beaches, salt ponds, or alkali lakes that can support foraging or nesting for this species.	No further actions are recommended for this species.
California least tern *Sterna antillarum browni*	FE, SE, FP	Summer resident along the coast from San Francisco Bay south to northern Baja California; inland breeding also very rarely occurs. Nests colonially on barren or sparsely vegetated areas with sandy or gravelly substrates near water, including beaches, islands, and gravel bars. In San Francisco Bay, has also nested on salt pond margins.	**No Potential.** The Study Area does not contain any tidal sandy or gravely beaches or salt ponds that can support foraging or nesting for this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Amphibians and Reptiles				
Foothill yellow-legged frog *Rana boylii*	SE, SSC	Found in or adjacent to rocky streams in a variety of habitats. Prefers partly-shaded, shallow streams and riffles with a rocky substrate; requires at least some cobble-sized substrate for egg-laying. Needs at least 15 weeks to attain metamorphosis. Feeds on both aquatic and terrestrial invertebrates.	**No Potential.** The Study Area does not contain any rocky streams that can support foraging, basking, or breeding for this species.	No further actions are recommended for this species.
California red-legged frog *Rana draytonii*	FT, SSC	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation. Requires 11 to 20 weeks of permanent water for larval development. Associated with quiet perennial to intermittent ponds, stream pools and wetlands. Prefers shorelines with extensive vegetation. Disperses through upland habitats after rains.	**Unlikely.** The riparian and seasonal wetland habitat within the Study Area are not historical. They were created as a result of stormwater runoff from the housing development to the west of the Study Area. Additionally, the Study Area is significantly isolated from nearby populations to the northeast by large residential developments and Interstate 780, and from populations to the south by Carquinez Strait. The nearest recent occurrence was in 2007 approximately 3.7 miles away (CDFW 2024b).	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
California tiger salamander - central California DPS *Ambystoma californiense pop. 1*	FT, ST	Restricted to grasslands and low-elevation foothill regions in California (generally under 1500 feet) where it uses seasonal aquatic habitats for breeding. The salamanders breed in natural ephemeral pools, or ponds that mimic ephemeral pools, and occupy substantial areas surrounding the breeding pool as adults. They survive hot, dry summers by living underground in burrows (e.g., ground squirrels). During wet periods, the salamanders may emerge from refugia and feed in the surrounding grasslands.	**No Potential.** The seasonal wetland habitat within the Study Area is not historical. It was created as a result of stormwater runoff from the housing development to the west of the Study Area. The Study Area has significant dispersal barriers including large residential developments and Interstate 780 to the north, and Carquinez Strait to the south. Lastly, the Study Area is over 9 miles from the nearest breeding occurrence (CDFW 2024b), much farther than the known dispersal distance of 1.3 miles.	No further actions are recommended for this species.
Alameda whipsnake *Masticophis lateralis euryxanthus*	FT, ST	Inhabits chaparral and foothill-hardwood habitats in the eastern Bay Area. Prefers south-facing slopes and ravines with rock outcroppings where shrubs form a vegetative mosaic with oak trees and grasses and small mammal burrows provide basking and refuge.	**No Potential.** The Study Area does not contain any rock outcroppings that can support foraging, basking, or breeding for this species. This species is not known to occur in Solano County.	No further actions are recommended for this species.
Giant garter snake *Thamnophis gigas*	FT, ST	Prefers freshwater marsh and low gradient streams. Has adapted to drainage canals and irrigation ditches. This is the most aquatic of the garter snakes in California.	**No Potential.** The Study Area does not contain aquatic habitats for this species, and no freshwater is present in the summer. The Study Area is outside of the known range for this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Northern California legless lizard *Anniella pulchra*	SSC	Found in loose soils or leaf litter with plant cover such as beach dune, sandy washes, stream terraces, chaparral, and pine-oak woodlands. Requires some soil moisture. Occasionally found in suburban gardens. Preys upon invertebrates.	**No Potential.** The Study Area does not contain any friable soils that can support foraging, breeding, or protection for this species. Additionally, the Study Area is outside the current range of this species.	No further actions are recommended for this species.
Western pond turtle *Emys marmorata*	FPT, SSC	A thoroughly aquatic turtle of ponds, marshes, rivers, streams and irrigation ditches with aquatic vegetation. Require basking sites such as partially submerged logs, vegetation mats, or open mud banks, and suitable upland habitat (sandy banks or grassy open fields) for egg-laying.	**Unlikely.** The Study Area does not contain aquatic habitat for this species as freshwater is only seasonal. Additionally, the seasonal wetland is not historical as it was created because of the housing development to the west of the Study Area. The Study Area has significant dispersal barriers to nearby populations 4 miles to the north including large residential developments and Interstate 780 to the north, and Carquinez Strait to the south.	No further actions are recommended for this species.
Mammals				
American badger *Taxidea taxus*	SSC	Most abundant in drier open stages of most shrub, forest, and herbaceous habitats, with friable soils. Requires friable soils and open, uncultivated ground. Preys on burrowing rodents.	**No Potential.** The Study Area is isolated from large contiguous grasslands by housing developments and Interstate 780. The nearest occurrence is almost 14 miles away both of which date back to 1911 and 1925 (CDFW 2024b). Furthermore, during the site visit on February 28, 2022, no badger burrows were found and only a couple of gopher burrows were observed indicating a limited food resource.	No further actions are recommended for this species.
Big free-tailed bat *Nyctinomops macrotis*	SSC, WBWG Med	Occurs rarely in low-lying arid areas. Requires high cliffs or rocky outcrops for roosting sites.	**No Potential.** The Study Area does not contain any cliff or rock outcrops that can support this species. The Study Area is outside the home range of this species which is known to occur in the state of Colorado (USFWS 2024b). However, vagrants have been documented in Alameda and San Diego Counties in rare cases (CDFW 2021).	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Pallid bat *Antrozous pallidus*	SSC, WBWG High	Found in a variety of habitats ranging from grasslands to mixed forests, favoring open and dry, rocky areas. Roost sites include crevices in rock outcrops and cliffs, caves, mines, and also hollow trees and various manmade structures such as bridges, barns, and buildings (including occupied buildings). Roosts must protect bats from high temperatures. Very sensitive to disturbance of roosting sites.	**Unlikely.** The nearest documented occurrence of this species was ~13 mi north in 2007, in addition to several historic occurrences (pre-1940) south of the Study Area (CDFW 2024b). The Study Area contains suitable foraging habitat for this species. However, there is no suitable roosting habitat as this species is very sensitive to disturbance. The few large trees within the Study Area are directly adjacent (~330 ft) to Interstate 780 and exposed to predators, wind, and temperature fluctuations. Additionally, this species typically roosts in crevices of rocks, caves, and mines which are absent from the Study Area. This species could be found in the Study Area foraging but not roosting.	No further actions are recommended for this species.
Townsend's big-eared bat *Corynorhinus townsendii*	SSC, WBWG High	Associated with a wide variety of habitats from deserts to higher-elevation mixed and coniferous forests. Females form maternity colonies in buildings, caves and mines, and males roost singly or in small groups. Foraging typically occurs at edge habitats near wooded areas, e.g. along streams.	**Unlikely.** The Study Area does contain suitable foraging habitat for this species. However, there is no suitable roosting habitat as this species typically roosts in caves, mines, and buildings. It is unlikely this species could be found in the Study Area other than occasional foraging.	No further actions are recommended for this species.
Silver-haired bat *Lasionycteris noctivagans*	WBWG Med	Primarily a forest dweller, feeding over streams, ponds, and open brushy areas. Summer habitats include a variety of forest and woodland types, both coastal and montane. Roosts in hollow trees, snags, buildings, rock crevices, caves, and under bark.	**Moderate Potential.** The Study Area does contain suitable foraging and roosting habitat for this migratory species. Large oak trees are present within the Study Area that could provide maternity or day-roost habitat.	Work windows or pre-construction surveys. See Section 7 for a discussion of mitigation measures.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Hoary bat *Lasiurus cinereus*	WBWG Med	Prefers open forested habitats or habitat mosaics, with access to trees for cover and open areas or habitat edges for feeding. Roosts in dense foliage of medium to large trees. Feeds primarily on moths.	**Moderate Potential.** The Study Area does contain suitable foraging and roosting habitat for this species. Large oak trees are present within the Study Area.	Work windows or pre-construction surveys. See Section 7 for a discussion of mitigation measures.
San Francisco dusky-footed woodrat *Neotoma fuscipes annectens*	SSC	Forest habitats of moderate canopy and moderate to dense understory. Also, in chaparral habitats. Constructs nests of shredded grass, leaves, and other material. May be limited by availability of nest-building materials.	**No Potential.** The Study Area is outside of this subspecies range. This subspecies does not occur north of San Pablo or Suisun Bays.	No further actions are recommended for this species.
Suisun shrew *Sorex ornatus sinuosus*	SSC	Tidal marshes of the northern shores of San Pablo and Suisun Bays. Require dense low-lying cover and driftwood and other litter above the mean hightide line for nesting and foraging.	**No Potential.** The Study Area does not contain any salt or brackish wetlands that can support this species.	No further actions are recommended for this species.
Salt-marsh wandering shrew *Sorex vagrans halicoetes*	SSC	Salt marshes of the south arm of San Francisco Bay. Medium high marsh 6 to 8 feet above sea level where abundant driftwood is scattered among Salicornia.	**No Potential.** The Study Area does not contain any salt or brackish wetlands that can support this species. The Study Area is outside the current range of this species.	No further actions are recommended for this species.
San Pablo vole ***Microtus californicus sanpabloensis***	SSC	Saltmarshes of San Pablo Creek, on the south shore of San Pablo Bay. Constructs burrow in soft soil. Feeds on grasses, sedges and herbs. Forms a network of runways leading from the burrow.	**No Potential.** The Study Area does not contain any salt or brackish wetlands that can support this species. The Study Area is outside the current range of this species.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Salt-marsh harvest mouse *Reithrodontomys raviventris*	FE, SE, FP	Endemic to emergent salt and brackish wetlands of the San Francisco Bay Estuary. Pickleweed marshes are primary habitat; also occurs in various other wetland communities with dense vegetation. Does not burrow, builds loosely organized nests. Requires higher areas for flood escape.	**No Potential.** The Study Area does not contain any salt or brackish wetlands that can support this species.	No further actions are recommended for this species.
Fish				
Sacramento splittail *Pogonichthys macrolepidotus*	SSC	Formerly endemic to the lakes and rivers of the Central Valley, but now confined to the Sacramento Delta, Suisun Bay and associated marshes. Occurs in slow-moving river sections and dead-end sloughs. Requires flooded vegetation for spawning and foraging for young. A freshwater species, but tolerant of moderate salinity (10-18 parts per thousand).	**No Potential.** The Study Area does not contain any stream or rivers. Only one intermittent stream and ephemeral drainage is present.	No further actions are recommended for this species.
Delta smelt *Hypomesus transpacificus*	FT, SE	Lives in the Sacramento-San Joaquin estuary in areas where salt and freshwater systems meet. Occurs seasonally in Suisun Bay, Carquinez Strait and San Pablo Bay. Seldom found at salinities > 10 ppt; most often at salinities < 2 ppt.	**No Potential.** The Study Area does not contain any estuarine habitat.	No further actions are recommended for this species.

SPECIES	STATUS	HABITAT	POTENTIAL TO OCCUR	RECOMMENDATIONS
Sacramento perch *Archoplites interruptus*	SSC	(Only within native range) Historically found in the sloughs, slow-moving rivers, and lakes of the Central Valley. Prefer warm water. Aquatic vegetation is essential for young. Tolerate wide range of physio-chemical water conditions.	**No Potential.** The Study Area does not contain any stream or rivers. Only one intermittent stream and ephemeral drainage is present.	No further actions are recommended for this species.
Longfin smelt *Spirinchus thaleichthys*	FPE, ST	Euryhaline, nektonic and anadromous. Found in open waters of estuaries, mostly in middle or bottom of water column. Prefer salinities of 15 to 30 ppt but can be found in completely freshwater to almost pure seawater.	**No Potential.** The Study Area does not contain any estuarine habitat	No further actions are recommended for this species.
Green sturgeon – Southern DPS *Acipenser medirostris pop. 1*	FT	Spawn in the Sacramento River and the Feather River. Spawn at temperatures between 8-14 degrees C. Preferred spawning substrate is large cobble, but can range from clean sand to bedrock.	**No Potential.** The Study Area does not contain any stream or rivers. Only one intermittent stream and ephemeral drainage is present.	No further actions are recommended for this species.
Steelhead - central California coast DPS *Oncorhynchus mykiss irideus pop. 8*	FT	They are born in freshwater streams, where they spend their first 1-3 years of life. They then emigrate to the ocean where most of their growth occurs. After spending between one to four growing seasons in the ocean, steelhead return to their native freshwater stream to spawn.	**No Potential.** The Study Area does not contain any stream or rivers. Only one intermittent stream and ephemeral drainage is present.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Invertebrates				
Callippe silverspot butterfly *Speyeria callippe callippe*	FE	Two populations in San Bruno Mountain and the Cordelia Hills are recognized. Hostplant is Viola pedunculata, which is found on serpentine soils. Most adults found on east-facing slopes; males congregate on hilltops in search of females.	**Unlikely.** The nearest population is in Cordelia Hills approximately 3 miles north (CDFW 2024b). The hostplant for this species (*Viola pedunculata*) was not observed within the Study Area during the February and July site visits. The majority of the Study Area is dominated by non-native grassland, artichoke thistle, and ruderal weeds (fennel, mustards) limiting the potential of the hostplant occurring within the site. Additionally, minimal nectar producing flowering plants occur within the Study Area as a food source.	No further actions are recommended for this species.
Monarch - California overwintering population *Danaus plexippus pop. 1*	FC	Roosts are located in wind-protected tree groves, with nectar and water sources nearby, and are often on south, southwest, or west facing slopes which may provide more favorable temperature regimes and wind protection.	**Unlikely.** There are no tree groves suitable for supporting monarch winter roosting in the Study Area. Minimal nectar producing flowering plants occur within the Study Area as a food source. This species may forage for nectar or migrate through the Study Area.	No further actions are recommended for this species.
Valley elderberry longhorn beetle *Desmocerus californicus dimorphus*	FT	Occurs only in the central valley of California, in association with blue elderberry (Sambucus spp.). Prefers to lay eggs in elderberry 2 to 8 inches in diameter; some preference shown for ""stressed"" elderberry.	**No Potential.** There are no documented occurrences of this species within 9 miles (CDFW 2024b). Additionally, no elderberry shrubs were observed within the Study Area during the February 28, 2022 site visit.	No further actions are recommended for this species.
Crotch bumble bee *Bombus crotchii*	SC	Range largely restricted to California, favoring grassland and scrub habitats. Typical of bumble bees, nests are usually constructed underground.	**Unlikely.** The single documented occurrence of this species within 60 miles was over 13 miles away across the Carquinez Strait in 2015 (CDFW 2024b). The Study Area contains foraging and nesting habitat for this species. However, limited food resources (nectar producing flowers) and no ground squirrel burrows were observed within the Study Area during the February and July site visits.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
Western bumble bee *Bombus occidentalis*	SC	Formerly common throughout much of western North America; populations from southern British Columbia to central California have nearly disappeared (Xerces 2015). Occurs in a wide variety of habitat types. Nests are constructed annually in pre-existing cavities, usually on the ground (e.g., mammal burrows). Many plant species are visited and pollinated.	**No Potential.** All documented occurrences of this species within 60 miles have been historic with the most recent being in the 1950s (CDFW 2024b), and the Study Area is outside of the current known range (CDFW 2023).	No further actions are recommended for this species.
Vernal pool fairy shrimp *Branchinecta lynchi*	FT	Endemic to the grasslands of the Central Valley, central coast mountains, and south coast mountains, in astatic rain-filled pools. Inhabit small, clear-water sandstone-depression pools and grassed swale, earth slump, or basalt-flow depression pools.	**No Potential.** There are no vernal pool or vernal swale habitat is present within the Study Area.	No further actions are recommended for this species.
Conservancy fairy shrimp *Branchinecta conservatio*	FE	Endemic to the grasslands of the northern two-thirds of the Central Valley; found in large, turbid pools. Inhabit astatic pools located in swales formed by old, braided alluvium; filled by winter/spring rains, last until June.	**No Potential.** There is no vernal pool or vernal swale habitat present within the Study Area.	No further actions are recommended for this species.

Species	Status	Habitat	Potential to Occur	Recommendations
California freshwater shrimp *Syncaris pacifica*	FE, SE	Endemic to Marin, Napa, and Sonoma counties. Found in low elevation, low gradient streams where riparian cover is moderate to heavy. Shallow pools away from mainstream flow. Winter: undercut banks with exposed roots. Summer: leafy branches touching water.	**No Potential.** The Study Area does not contain any stream or rivers that are capable of supporting this species and is out of the known range of this species. Only one intermittent and one ephemeral drainage are present.	No further actions are recommended for this species.

*** Key to status codes:**

BGEPA	Bald and Golden Eagle Protection Act
CFP	California Department of Fish and Wildlife (CDFW) Fully Protected Species
FC	Federal Candidate
FE	Federal Endangered
FPE	Federal Proposed Endangered
FPT	Federal Proposed Threatened
FT	Federal Threatened
SE	State Endangered
SC	State Candidate
SSC	California Department of Fish and Wildlife (CDFW) Species of Special Concern
ST	State Threatened
WBWG High	Western Bat Working Group – High Priority
WBWG Med	Western Bat Working Group – Medium Priority

<u>California Rare Plant Rank (CRPR)</u>

Rank 1A	CRPR 1A: Plants presumed extinct in California
Rank 1B	CRPR 1B: Plants rare, threatened or endangered in California and elsewhere
Rank 2A	CRPR 2A: Plants presumed extirpated in California, but more common elsewhere
Rank 2B	CRPR 2B: Plants rare, threatened, or endangered in California, but more common elsewhere
Rank 3	CRPR 3: Plants about which CNPS needs more information (a review list)
Rank 4	CRPR 4: Plants of limited distribution (a watch list)

<u>Threat Ranks</u>

0.1	Seriously threatened in California
0.2	Moderately threatened in California
0.3	Not very threatened in California

****Potential species occurrence definitions:**

Present. Species was observed on the site during site visits or has been recorded (i.e. CNDDB, other reports) on the site recently.

High Potential. All of the habitat components meeting the species requirements are present and/or most of the habitat on or adjacent to the site is highly suitable. The species has a high probability of being found on the site.

Moderate Potential. Some of the habitat components meeting the species requirements are present, and/or only some of the habitat on or adjacent to the site is unsuitable. The species has a moderate probability of being found on the site.

Unlikely. Few of the habitat components meeting the species requirements are present, and/or the majority of habitat on and adjacent to the site is unsuitable or of very poor quality. The species has a low probability of being found on the site.

No Potential. Habitat on and adjacent to the site is clearly unsuitable for the species requirements (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime).

Appendix B-1. Plant species observed within the Study Area on February 28 and July 14, 2022

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Amsinckia intermedia	Common fiddleneck	annual herb	native	-	-	-
Amsinckia lycopsoides	Tarweed fiddleneck	annual herb	native	-	-	-
Avena barbata	Slim oat	annual, perennial grass	native	-	Moderate	-
Avena fatua	Wildoats	annual grass	native	-	Moderate	-
Baccharis pilularis	Coyote brush	shrub	native	-	-	-
Bellardia trixago	Mediterranean lineseed	annual herb	native	-	Limited	-
Bolboschoenus maritimus ssp. *paludosus*	Saltmarsh bulrush	perennial grasslike herb	native	-	-	OBL
Brassica nigra	Black mustard	annual herb	non-native (invasive)	-	Moderate	-
Briza minor	Little rattlesnake grass	annual grass	non-native (invasive)	-	-	FAC
Bromus diandrus	Ripgut brome	annual grass	non-native	-	Moderate	-
Bromus hordeaceus	Soft chess	annual grass	native	-	Limited	FACU
Calandrinia menziesii	Red maids	annual herb	native	-	-	FACU
Calendula arvensis	Field marigold	annual herb	native	-	-	-
Capsella bursa-pastoris	Shepherd's purse	annual herb	native	-	-	FACU
Cardamine cf. hirsuta	Hairy bitter cress	non-native	annual herb	-	-	FACU
Carduus pycnocephalus ssp. *pycnocephalus*	Italian thistle	annual herb	native	-	Moderate	-
Chlorogalum pomeridianum	Amole	perennial herb	native	-	-	-
Cirsium vulgare	Bullthistle	perennial herb	native	-	Moderate	FACU
Cortaderia selloana	Pampas grass	perennial grass	-	-	High	FACU
Crassula connata	Sand pygmy weed	annual herb	non-native (invasive)	-	-	FAC

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Cynara cardunculus ssp. *flavescens*	Artichoke thistle	perennial herb	non-native (invasive)	-	Moderate	-
Cyperus eragrostis	Tall cyperus	perennial grasslike herb	-	-	-	FACW
Dittrichia graveolens	Stinkwort	annual herb	native	-	Moderate	-
Elymus caput-medusae	Medusa head	annual grass	native	-	High	-
Elymus triticoides	Beardless wild rye	perennial grass	non-native (invasive)	-	-	FAC
Erigeron canadensis	Canada horseweed	native	annual herb	-	-	FACU
Erodium botrys	Big heron bill	annual herb	native	-	-	FACU
Erodium cicutarium	Red stemmed filaree	annual herb	non-native (invasive)	-	Limited	-
Erodium moschatum	Whitestem filaree	annual herb	native	-	-	-
Euphorbia peplus	Petty spurge	annual herb	non-native (invasive)	-	-	-
Festuca bromoides	Brome fescue	annual grass	non-native	-	-	FACU
Festuca myuros	Rattail sixweeks grass	annual grass	non-native (invasive)	-	Moderate	FACU
Festuca perennis	Italian rye grass	annual, perennial grass	non-native (invasive)	-	Moderate	FAC
Ficus carica	Common fig	tree	native	-	Moderate	FACU
Foeniculum vulgare	Fennel	perennial herb	non-native	-	High	-
Galium aparine	Cleavers	annual herb	non-native	-	-	FACU
Geranium dissectum	Wild geranium	annual herb	non-native (invasive)	-	Limited	-
Geranium molle	Crane's bill geranium	annual, perennial herb	native	-	-	-
Helenium puberulum	Sneezeweed	perennial herb	non-native (invasive)	-	-	FACW
Helminthotheca echioides	Bristly ox-tongue	annual, perennial herb	non-native (invasive)	-	Limited	FAC

Scientific name	Common name	Life form	Origin	Rare Status[1]	Invasive Status[2]	Wetland indicator (AW 2020)[3]
Hemizonia congesta ssp. *luzulifolia*	Woodrush tarweed	annual herb	native	-	-	-
Heteromeles arbutifolia	Toyon	shrub	non-native (invasive)	-	-	-
Holcus lanatus	Common velvetgrass	perennial grass	native	-	Moderate	FAC
Juncus effusus	Common bog rush	perennial grasslike herb	non-native (invasive)	-	-	FACW
Juncus mexicanus	Mexican rush	perennial grasslike herb	non-native (invasive)	-	-	FACW
Juncus xiphioides	Iris leaved rush	perennial grasslike herb	native	-	-	OBL
Ligustrum lucidum	Glossy privet	tree, shrub	native	-	Limited	-
Lupinus succulentus	Arroyo lupine	annual herb	native	-	-	-
Lysimachia arvensis	Scarlet pimpernel	annual herb	non-native (invasive)	-	-	FAC
Malva sp.	Mallow	annual herb	non-native	-	-	-
Marah fabacea	California man-root	perennial herb, vine	non-native	-	-	-
Maytenus boaria	Mayten	tree, shrub	non-native	-	Watch	-
Medicago polymorpha	Bur clover	non-native (invasive)	annual herb	-	Limited	FACU
Nasturtium officinale	Watercress	perennial herb (aquatic)	non-native	-	-	OBL
Oxalis pes-caprae	Bermuda buttercup	perennial herb	non-native (invasive)	-	Moderate	-
Phalaris aquatica	Harding grass	perennial grass	non-native (invasive)	-	Moderate	FACU
Phoradendron leucarpum	American mistletoe	shrub (parasitic)	non-native (invasive)	-	-	-
Prunus cerasifera	Cherry plum	tree	non-native (invasive)	-	Limited	-
Prunus dulcis	Almond	tree	native	-	-	-

Re: Sancerra Vista Cove Development Project – Arborist Tree Survey and Report

Dear Scott Covington:

The purpose of this letter is to inform you of the results of an arborist survey performed on October 12, 2022, near the east end of Shady Lane in the City of Vallejo, Solano County, California, including Assessor Parcel Numbers (APN) 007-912-010, 007-917-117, and 007-917-118 (Study Area, see Figure 1 in the attachments). The survey was conducted by WRA's ISA-Certified Arborist (#WE-9541A) and Tree Risk Assessment Qualified (TRAQ) arborist Kevin Schwartz (Arborist) for the purpose of documenting all trees with a diameter at breast height (DBH) greater than 6 inches within the Study Area and outside of the riparian area (see Figure 2 in the attachments). The tree inventory and arborist report are provided as part of the planning process for the Vista Cove Development Project (Project) consistent with the City of Vallejo's Zoning Code Chapters 16.504.07 and 16.701.02 of Title 16. The proposed Project will require tree protection, removal, and replacement. Anticipated tree impacts presented in this report may be subject to change with further design development.

Regulatory Background

Title 16 of the City of Vallejo Zoning Code (Zoning Code) details protections, restrictions, permits, and violations surrounding the removal or disturbance of Significant Trees from any parcel of property in the City. Details of the Zoning Code can be found below:

16.701.02 LAND USE TERMS AND DEFINITIONS

Significant Tree. Any tree or stand of trees on private property having either a height of twenty-five feet measured above ground level, or a diameter of ten or more inches.

16.504.07 TREE PROTECTION

A. Preserving Trees During Construction. The following measures are required to protect trees during construction in addition to any that may be recommended by an arborist hired by the applicant and imposed as a condition of approval:

1. Tree Inventory. Identify trees to be preserved on a tree inventory plan with type of tree and condition prior to construction, or permit submittal or as part of entitlements, whichever is first.

2. Existing Trees. Existing mature trees shall be preserved in non-residential zoning districts if they are over 24 inches in diameter measured 4 feet 6 inches above natural grade. However, trees meeting the above criteria may be removed on a limited basis with the permission of the Director upon submittal of an Arborist's report which determines that the tree is in poor health and not likely to survive; if the trees constitute a high fire hazard or a threat to persons, structures, or property; or, if they impede public works projects. Trees to be removed shall be shown on the Landscaping and Irrigation Plan and detailed on a tree inventory chart. The Arborist's Report shall provide guidance on the following requirements:

a. Construct fencing around the drip line of each tree or group of trees to be retained;
b. No fill, grading, or construction shall be permitted within the drip line of any tree (or within 6 feet of the trunk, whichever is greater) designated for preservation except as may be recommended by an arborist or forester.
c. Trenching shall be prohibited within the tree drip line, and any required utility line within the tree drip line shall be installed by boring or drilling through the soil. Where necessary for access in the vicinity of trees designated for preservation, paving within the drip line shall use porous materials such as gravel, loose boulders, cobbles, wood chips, or bark mulch.
d. As an option, establish an incentive program in the construction contract to encourage workers, particularly bulldozer drivers, to maximize caution when working near trees (such as a fine for each damaged tree or subtract the fine from a bonus to be divided among all construction workers at the end of the project).
e. Alternate methods to the standards above that are recommended by the Arborist may be implemented.

B. Removal of Trees. The Director may approve the removal of trees based on a determination that there is no feasible alternative design for developing the site and based on report and recommendation by a qualified arborist submitted by the applicant including information as to whether:

1. The tree is in poor health and cannot be saved;
2. The tree is a public nuisance, causing damage to public utilities or streets and sidewalks that cannot be mitigated by some other means (such as root barriers etc.);
3. The tree is in danger of falling and cannot be saved by some other means (such as pruning);
4. The tree is damaging existing private improvements on the lot (e.g., building foundation, wall, patio, deck, roof, retaining wall, etc.);
5. The tree species has been identified as fire prone including Blue gum eucalyptus (*Eucalyptus globulus*), Monterey pines (*Pinus radiata*), Juniper (Cupressaceous) Tree of

Heaven (*Ailanthus altissima*), Black acacia (*Acacia melanoxylon*), and bamboo and is located within 100 feet of structures; or

6. The tree species is known to develop weaknesses that affect its health or the safety of people and property (e.g., short-lived, weak-wooded and subject to limb breakage, shallow-rooted and subject to toppling).

C. Replacement of Significant Trees Required. Trees shall be replaced at a ratio of at least 3 new trees for every tree removed except for the fire-prone species identified above. The minimum size of a replacement tree shall be 15 gallons. Exception to this requirement may be approved by the Director when site conditions warrant. Replacement trees shall be planted in the following order of priority:

1. On the Study Area;
2. On any adjacent property subject to approval of the owner; or
3. In the public right-of-way adjacent to the property subject to approval of the Director of Public Works.

Methods

On October 12, 2022, the Study Area was traversed on foot by the Arborist to inventory all trees with a DBH of 6 inches or greater within the Study Area, not including the riparian protection zone (Figure 2). Relevant information was recorded for each surveyed tree, including:

- Tree Number – corresponds to a round aluminum tag affixed to each protected tree.
- Species – common and scientific name of the tree.
- Trunk DBH – was calculated for surveyed trees by measuring the trunk diameter at 4.5 feet (54 inches) above the ground on the high side of the trunk. For multi-trunk trees, DBH was calculated by measuring each individual trunk and calculating the sum of trunk diameters.
- Max Drip –Dripline radii were recorded to the nearest foot measuring from the center of the trunk to the edge of dripline mapped, approximating the maximum distance in feet from the trunk to the edge of the branches.
- Condition Rating – rated poor, fair, or good considering both the health and structure of the tree. A rating of fair-good or good indicates no significant condition concerns.
- Health Rating – rated poor, fair, or good considering the overall health of the tree. A rating of fair-good or good indicates no significant health concerns.
- Structure Rating – rated poor, fair, or good considering the structure of the tree. A rating of fair-good or good indicates no significant structure concerns.
- Health – specific comments contributing to the condition, health, and structure ratings were noted (e.g. major decay/dieback, dead, multiple dead trunks, poor growth form, lean, unknown abiotic disorder, lean, cankers).
- Comments – comments regarding the tree assessment, access, and whether the tree should be removed or not.

Surveyed tree locations within the Study Area were recorded using sub-meter accuracy GPS. Trees were tagged with aluminum tree tags with a unique identifying number. Two trees (#560 and

#563) were inaccessible to tag because the shrubs or Himalayan blackberry (*Rubus armeniacus*) were too dense to access the trunk. Anticipated tree impacts were determined based on a limit of work provided by DK Engineering on December 14, 2022. Final tree impacts may differ from the anticipated impacts presented in this report with further project design development.

This Arborist Tree Survey and Report includes the following figures and table as attachments:

- Figure 1, entitled "Study Area Regional Location Map" shows the project location.
- Figure 2, entitled "Tree Survey Study Area" contains the locations of the trees on an aerial image of the Study Area.
- Table A, entitled "Tree Evaluation", summarizes the results of the tree evaluation for all surveyed trees.

Additional summary tables are provided in the following sections.

Summary of Tree Evaluation

Location, Species Makeup, Number of Trees, and Age:

The Study Area is located south of Interstate 780 off Shady Lane and Wildflower Avenue in the City of Vallejo, Solano County, California. The subject trees found were native and horticultural species. The horticultural species had been planted as part of the landscaping along Shady Lane and a few scattered fruit trees were found in the southern part of the Study Area. The native species were found scattered around the property.

A total of 83 trees were surveyed within the Study Area, of which 57 trees meet the Significant Tree definition under the local ordinance. Four non-native tree species were identified during the survey, including: two strawberry trees (*Arbutus* 'Marina'), one apple tree (*Malus* sp.), three Monterey pines (*Pinus radiata*), and two cherry trees (*Prunus* sp.). Three native tree species were identified during the survey, including: one toyon (*Heteromeles arbutifolia*), 73 coast live oaks (*Quercus agrifolia*), and one valley oak (*Quercus lobata*). The diameters of surveyed trees ranged from 6 to 43.2 inches.

All tree numbers and their associated attributes are recorded in the Tree Evaluation Table (Table A in the attachments). The surveyed trees varied in age from young to mature.

Tree Condition, Health, and Structure:

The health of the trees was rated from poor to good. Most of the trees were in good condition, good health, and had good structure. Only one apple tree was in poor health having major decay and dieback. This apple tree was a small tree outside of the development footprint and poses no risk.

Root Protection Zones and Potential Impacts:

Using the max drip line, the Arborist estimated the area of root protection zone (RPZ) that would be impacted by the Project for each tree.

Of the 83 trees surveyed, a total of 69 trees are anticipated to require removal (0.76 acre of RPZ would be impacted for these 69 trees), three trees would not be removed but would have RPZ impacts (0.01 acre), and 11 trees would be entirely avoided (Table 1, below). The three trees with only RPZ impacts would have 24% to 38% of the RPZ impacted. Impacts to these three trees could be avoided with appropriate tree protection measures.

Of the 69 trees that are anticipated to require removal, 47 of these trees (≥10" DBH) meet the Significant Tree definition (0.60 acre of RPZ would be impacted for these 47 Significant Trees). Of the three trees that would not be removed but would have RPZ impacts, two meet the Significant Tree definition (<0.01 acre of RPZ).

Table 1. Tree Survey Summary

Description	Number of trees	RPZ Impact Area (Acre)
All Surveyed Trees (≥ 6" DBH)		
All Trees Surveyed	83	N/A
Trees Requiring Removal	69	0.76 acre
Trees Avoided but with RPZ Impacts	3	0.01 acre
Surveyed Trees Avoided	11	N/A
Significant Trees (≥10" DBH)		
Significant Trees Surveyed	57	N/A
Anticipated Significant Trees Requiring Removal	47	0.60 acre
Significant Trees Avoided but with RPZ Impacts	2	<0.01 acre
Significant Trees Avoided	8	N/A

Replacement Tree Requirements

According to Title 16.504.07 of the Zoning Code of the City of Vallejo, replacement of Significant Trees shall be required at a ratio of at least three new trees for every tree removed. While Monterey pine is a fire-prone species it is more than 100 feet from buildings and, thus, may still require mitigation in the form of tree replacement. The minimum size of a replacement tree shall be 15 gallons. Exception to this requirement may be approved by the Director when site conditions warrant. Replacement trees shall be planted in the following order of priority:

1. On the Study Area;
2. On any adjacent property subject to approval of the owner; or

3. In the public right-of-way adjacent to the property subject to approval of the Director of Public Works.

Table 3, below, shows the number of replacement trees that may be required to compensate for the anticipated removal of 47 Significant Trees protected under the local ordinance. A total of 141 replacement trees may be required. Selection of replacement trees should be done with approval of the City of Vallejo Public Works Director and in accordance with Chapter 16.504.09 Water-Efficient Landscape Requirements, Section G. Specific Requirements for Landscape Documentation Package, 3. Landscape Design Plan a. Plant material:

> a. **Plant material.** Any plant not within a "required landscaped area," may be selected for the landscape, providing the estimated total water use in the landscape area does not exceed the maximum applied water allowance. Plants to be located within a required landscaped area must be of a drought tolerant variety. Methods to achieve water efficiency shall include one or more of the following:
>
> i. Protection and preservation of native species and natural vegetation;
> ii. Selection of water-conserving plant, tree and turf species, especially local native plants;
> iii. Selection of plants based on local climate suitability, disease and pest resistance;
> iv. Selection of street trees based on city of Vallejo approved street tree list and size at maturity as appropriate for the planting area;
> v. Selection of plants from local and regional landscape program plant lists.
> vi. Selection of plants from local Modification Plan Guidelines.

Table 3. Summary of Anticipated Replacement Plantings Required for Significant Tree Removal

Species	Number of Significant Trees Requiring Mitigation	Number of Replacement Trees Anticipated[2]	Minimum Plant Size
strawberry tree	1	3	15 gallon pot
Monterey pine[1]	2	6	
plum or cherry	2	6	
coast live oak	42	126	
Total	47	141	

[1]Monterey pine trees are a fire prone species that may not require replacement planting.
[2]Replacement tree species can be different from the tree species proposed for removal.

Limitations

- This assessment is based upon conditions observed during the date of the site visit. Tree conditions change over time and, as they change, this report may need to be revised.

- The result of the evaluations for trees for which more detailed examination and/or testing and risk assessment is recommended (including aerial inspection, decay mapping and/or root examination) is provisional, pending the outcome of these studies.
- Tree condition assessments were based on visual observations from the ground level.
- The Arborist did not conduct any root excavation, coring, or aerial inspection to assess above ground conditions. Arborists cannot detect every condition that could possibly contribute to the structural failure or decline in the health of a tree and therefore affect the appraised value.
- There is no warranty or guarantee, expressed or implied, that problems or deficiencies in surveyed trees may not arise in the future.
- This report does not include a tree protection plan describing construction-related tree avoidance and protection measures for trees selected for preservation.

Arborist Disclosure Statement

The following statement pertains to The Arborist work and this report:

- Arborists are tree specialists who use their education, knowledge, training and experience to examine trees, recommend measures to enhance the beauty and health of trees, and attempt to reduce the risk of living near trees. Clients may choose to accept or disregard the recommendations of the Arborist, or to seek additional advice.
- Arborists cannot detect every condition that could possibly lead to the structural failure of a tree. Trees are living organisms that fail in ways we do not fully understand. Conditions are often hidden within trees and below ground. Arborists cannot guarantee that a tree will be healthy or safe under all circumstances, or for a specified period of time. Likewise, remedial treatments, like any medicine, cannot be guaranteed.
- Treatment, pruning and removal of trees may involve considerations beyond the scope of the Arborist's services such as property boundaries, property ownership, site lines, disputes between neighbors, and other issues. Arborists cannot take such considerations into account unless complete and accurate information is disclosed to the Arborist. An Arborist should then be expected to reasonably rely upon the completeness and accuracy of the information provided.
- Trees can be managed, but they cannot be controlled. To live near trees is to accept some degree of risk.

Certification of Performance

WRA, Inc. certifies:

- That we have personally inspected the tree(s) and/or the property referred to in this report and have stated our findings accurately. The extent of the evaluation is stated in this report;

- That we have no current or prospective interest in the vegetation, or the property, that is the subject of this report, and we have no personal interest or bias with respect to the parties involved;
- That the analysis, opinions and conclusions stated herein are our own, and are based on current scientific procedures and facts;
- That our compensation is not contingent upon the reporting of a predetermined conclusion that favors the cause of the client or any other party, nor upon the results of the assessment, the attainment of stipulated results, or the occurrence of any subsequent events;
- That our analysis, opinions, and conclusions were developed, and this report has been prepared according to commonly accepted Arboricultural practices;
- That no one provided significant professional assistance to the consultant, except as indicated within the report.

Please feel free to contact me, or Patricia Valcarcel, Principal for the WRA Project, if you have any questions or concerns. We are available to provide additional arborist services such as tree preservation recommendations, monitoring, or other services as requested.

Sincerely yours,

Kevin Schwartz, Ph.D.
ISA Certified Arborist #9541A
ISA Qualified Tree Risk Assessor
Kevin.Schwartz@wra-ca.com

FROM: John Kunna, Associate/Senior Biologist
Florentina Craciun, AICP Associate/Environmental Planner

SUBJECT: Third-Party Review of Biological Resources Report for the Vista Cove Project in Vallejo, California

INTRODUCTION

LSA Associates, Inc. (LSA) completed a peer review of the *Biological Resources Technical Report* (BRTR) prepared for the Vista Cove Project (project) by WRA Environmental Consultants (WRA) in February 2024 to determine whether the report complies with the California Environmental Quality Act (CEQA) and conforms to accepted methodologies and procedures (industry standards).

LSA relied on the information presented in the BRTR and did not collect additional data or conduct additional site surveys. Therefore, LSA cannot include an opinion evaluating to what extent the presented information is representative of the current project site conditions.

LSA peer reviewed the BRTR with respect to the following parameters:

- Adequate description of the proposed project and project site to analyze potential impacts to biological resources
- Adequate description of the existing setting, including the location of known on-site resources and features, resources, and features in the project vicinity, and applicable federal, State, regional, and local regulations
- Appropriate assumptions if and where project- and site-specific information is unavailable
- Appropriate analytical methodology, assumptions, and significance thresholds for analyzing project impacts in conformance with CEQA and current professional standards
- Results, determinations of significance, and adequacy of any proposed mitigation measures

METHODS

LSA reviewed the BRTR[1] as well as the December 2024 California Department of Fish and Wildlife (CDFW) Special Animals List[2] for updated legal/protection status of wildlife species. LSA also conducted an updated search of the California Department of Fish and Wildlife California Natural Diversity Database (CNDDB).[3]

RESULTS/PEER REVIEW

The following presents LSA's peer review of the BRTR in the order each section appears in the BRTR.

Section 1.0: Introduction

- **Overview and Purpose:** This section adequately describes the purpose and limitations of the BRTR. The project location is described adequately in text and on figures.

- **Project Description:** This section defines the 20.13-acre study area as well as the 10.4-acre project area. The proposed project description text is brief, but it is adequate for the purpose of analyzing impacts to biological resources. This section does contain one sentence that is partially redundant and unclear: "The Project is development for a 10. 40-acre property."

- **Summary of Results:** This section adequately summarizes the results and conclusion. It includes the statement that one special-status bird species has the potential to occur within the study area. However, later in the document, Section 5.0 and Table 3 list five special-status wildlife species that have a moderate or high potential to occur within the study area. LSA recommends this omission is clarified.

Section 2.0: Regulatory Background

This section adequately summarizes relevant laws and regulations and explains them in the context of the biological assessment.

Section 3.0: Assessment Methodology

- **Literature Review and Database Searches:** WRA reviewed all the relevant literature necessary to characterize the nature and extent of biological resources in the study area.

- **Site Visits:** The surveys, as described, conform to industry standards and are sufficient.

- **Vegetation Communities and Other Land Cover Types:** This section provides a thorough description of the methods used to map and classify vegetation communities and other land cover types on the site. The methodology is appropriate.

---

1 WRA Environmental Consultants. 2024. *Vista Cove Biological Resources Technical Report.* February.

2 California Department of Fish and Wildlife (CDFW). 2024. California Natural Diversity Database (CNDDB) Special Animals List. December. Sacramento, CA.

3 CDFW. 2024. CNDDB – Commercial version dated December 1, 2024.

- **Special-Status Species:** This sections provides an adequate description of the methods used to determine each special-status species' potential to occur on the site. This section would benefit from a clarification that for special-status bird species, the potential to *occur* is actually the potential to *nest* within the study area.

- **Wildlife Corridors and Native Wildlife Nursery Sites:** The methodology used to assess wildlife corridors and nursery sites was appropriate.

Section 4.0: Ecological Setting

- **Soils and Topography:** This section describes the soils mapped in the study area in sufficient detail.

- **Climate and Hydrology:** This section provides sufficient background on the climate at the site. The discussion of the National Wetland Inventory (NWI) and how it was ground-truthed is adequate.

- **Land Use:** This section describes the existing conditions in sufficient detail and accurately references the figures for a visual representation.

Section 5.0: Assessment Results

- **Vegetation Communities and Other Land Cover:** Table 2 provides a summary of the vegetation communities and land cover. The more detailed text and photographs in this section for each landcover type are accurate and adequate.

- **Special-Status Species:**

    - ***Plants:*** This section provides adequate justification for the conclusion that no special-status plant species are likely to occur in the study area and that further surveys are not warranted.

    - ***Wildlife:*** This section provides justification for the conclusion that five special-status wildlife species have potential to occur in the study area. It also provides more detail on three special-status wildlife species (pallid bat, burrowing owl, and Crotch bumble bee) that were determined to be unlikely to occur in the study area.

      According to Appendix C, several other wildlife species were also determined to be unlikely to occur in the study area but are not discussed in further detail in this section.

      Since the time of the writing of the BRTR, the California Fish and Game Commission voted to protect the western burrowing owl (*Athene cunicularia hypugaeae*) as a "candidate" species under the California Endangered Species Act (CESA).

- **Wildlife Corridors and Native Wildlife Nursery Sites:** This section adequately explains why the study area does not contain a wildlife corridor, essential fish habitat, native wildlife nursery sites, or designated critical habitat.

Section 6.0: Analytical Methodology and Significance Threshold Criteria

This section outlines the six biological resource categories covered by Appendix G, Section IV, of the *State CEQA Guidelines.* It adequately defines significant impact and substantial adverse effect.

Section 7.0: Impacts and Mitigation Evaluation

- **Special-Status Species:** This section provides reasonable and prudent measures to reduce impacts to a less than significant level for the five special-status wildlife species that have a moderate or higher potential to occur in the study area

- **Sensitive Natural Communities and Critical Habitat:** This section provides reasonable and prudent measures to reduce impacts to the seasonal wetland, freshwater marsh, and riparian area to a less than significant level.

- **Aquatic Resources:** This section describes how impacts to the freshwater marsh and intermittent stream will be avoided. It states that the previously described Mitigation Measures BIO-3, BIO-4a, and BIO-4b will reduce impacts to a less than significant level**.** LSA agrees with these conclusions.

  This section also refers to the wetlands or other areas that may be in the jurisdiction of "BCDC." The acronym is not defined, but presumably refers to the Bay Conservation and Development Commission. The BCDC is not mentioned elsewhere in the text, and the site is not within BCDC jurisdiction, so it is assumed this is a typographical error and refers to the CDFW, not the BCDC.

- **Wildlife Corridors:** LSA agrees with the conclusion that the project is not likely to interfere substantially with the movement of wildlife species or impact nursery sites and, therefore, mitigation measures are not required.

- **Local Policies and Ordinances:** This section references measures related to the planting of replacement trees. LSA agrees if these measures are implemented, there will be no conflict with local policies and ordinances.

- **Habitat Conservation Plans:** LSA agrees that the study area is not in an adopted Habitat Conservation Plan, Natural Communities Conservation Plan, or other approved local, regional, or State habitat conservation plan and that, therefore, there would be no conflict or impact.

Section 8.0: References

All references in this section appear to have been cited accurately.

Appendix A: Figures

The figures adequately depict the study area in sufficient detail.

Appendix B: Species Observed Within the Study Area

Appendix B-1. Plant Species Observed

The number of plant species detected indicates that the biologists thoroughly inventoried the study area during the site visits.

However, the table has several errors. For five species (*Cardamine cf. hirsuta, Erigeron canadensis, Medicago polymorpha, Rumex crispus*, and *Sanicula bipinnatifida*), the Life Form and Origin columns were transposed.

Ten native plant species (Crassula connata, Galium aparine, Helenium puberulum, *Heteromeles arbutifolia*, *Juncus effusus*, *Juncus mexicanus*, *Marah fabacea*, *Nasturtium officinale*, *Phoradendron leucarpum*, and *Quercus agrifolia*) were incorrectly identified as nonnative.

Conversely, 19 nonnative species (*Avena barbata*, *Avena fatua*, *Bellardia trixago*, *Bromus hordeaceus*, *Calendula arvensis*, *Capsella bursa-pastoris*, *Carduus pycnocephalus* ssp. *pycnocephalus*, *Cirsium vulgare*, *Dittrichia graveolens*, *Elymus caput-medusae*, *Elymus triticoides*, Erodium botrys, *Erodium moschatum*, *Ficus carica*, *Geranium molle*, *Holcus lanatus*, *Ligustrum lucidum*, *Raphanus sativus*, and *Rumex pulcher*) were misidentified as native.

For two species (*Cortaderia selloana* and *Cyperus eragrostis*), the Origin column was blank.

For one species (*Typha* sp.), the Common Name and Life Form columns were blank.

Appendix B-2. Wildlife Species Observed

This table notes that bumble bees were observed. Presumably, these could not be identified to species. Several species of bumble bee in California have a protected conservation status, but the conservation status column was left blank where it should have been marked as unknown.

The table also notes that Botta's pocket gopher was observed in the study area. The absence of ground squirrel burrows was one of the justifications for the Crotch bumble bee's occurrence to be considered unlikely. However, gophers also create burrows that could be used by bumble bees.

Appendix C: Potential For Special-Status Species to Occur in the Study Area

This table provides an adequate analysis of the potential for special-status wildlife species to occur in the study area as well as recommendations for further actions.

The table states that the most recent occurrences for western bumble bee within 60 miles are from the 1950s, but a review of the CNDDB indicates that within 5 miles of the study area, Occurrence #179 is based on a collection made in 1962, and Occurrence #181 is based on a collection made in 1964.

Appendix D: Project Plans

The project plans are sufficiently detailed to provide a basis for determining potential impacts to protected biological resources.

CONCLUSION AND RECOMMENDATIONS

Generally, the efforts of the study are thorough and adequate and conform to industry standards. The errors in the BRTR are unlikely to significantly change the conclusions regarding potential impacts or the proposed mitigation measures.

Please contact me at (510) 462-1326 or via email at john.kunna@lsa.net if you have any questions regarding this document.

SUBJECT: Third-Party Review of Arborist Report for the Vista Cove Project in Vallejo, California.

INTRODUCTION

LSA completed a peer review of the *Sancerra Vista Cove Development Project – Arborist Tree Survey and Report* (ATSR) prepared by WRA dated February 22, 2023, to determine whether the report conforms to accepted methodologies and procedures (industry standards).

LSA relied on the information presented in the reviewed ATSR and did not collect additional data or survey the site. Therefore, LSA cannot include an opinion evaluating to what extent the presented information appears to be representative of the current project site conditions.

LSA peer reviewed the ATSR with respect to the following parameters:

- Adequate analysis of potential impacts to trees
- Adequate description of the applicable regulations
- Appropriate methodology, assumptions, and limitations

METHODS

LSA reviewed the ATSR.[1] LSA also reviewed the City of Vallejo's Zoning Code Chapters 16.504.07 (tree protection) and 16.701.02 (Land use terms and definitions) of Title 16. LSA used the International Society of Arboriculture (ISA) website[2] to verify the credentials of the arborist.

1 WRA, Inc. 2023. Sancerra Vista Cove Development Project – Arborist Tree Survey and Report. February 22.
2 International Society of Arboriculture (ISA). n.d. Verify an ISA Credential. Website: https://www.treesaregood.org/findanarborist/verify

RESULTS/PEER REVIEW

The following presents LSA's peer review of the ATSR in the order each section appears.

Introduction

The first paragraph adequately describes the location of the site. The paragraph also provides the arborist's certifications and the purpose of the report.

Regulatory Background

This section accurately describes the relevant municipal codes.

Methods

This section describes the methods used in sufficient detail. The methods, as described, are appropriate and conform to industry standards.

Summary of Tree Evaluation

The text adequately describes the results of the survey, and a summary is provided in Table 1. No table 2 is presented or references, but Table 3 provides a suitable summary of anticipated number of trees that may be required to be planted as mitigation for tree removal. LSA suspects the omission of a Table 2 is a simple typographical error.

Limitations

This section adequately describes the limitations of the report.

Arborist Disclosure Statement

This statement is sufficient and conforms to industry standards.

Certification of Performance

This statement is sufficient and conforms to industry standards.

Attachments

Figure 1. Study Area Regional Location Map

This map adequately shows the location of the Study Area in the regional context.

Figure 2. Tree Survey Study Area

This map adequately shows al of the surveyed trees and classifies them according to size and whether they may be impacted. LSA found the use of the "RPZ" abbreviation for Root Protection Zone to be possibly confused with the Riparian Protection Zone, particularly for tree #521, which is on the limits of grading of the Riparian Protection Zone. Cross-referencing with the tree table eliminated the confusion.

Table A. Tree Evaluation

This table is generally sufficient. It contains one unidentified abbreviation ("RUAR"), but this does not affect the conclusions of the report.

CONCLUSION AND RECOMMENDATIONS

Generally, the efforts of the study appear to be thorough and adequate and conform to industry standards.

It may help to clarify that *Prunus* sp. refers to an escaped or hybridized tree cultivar that may commonly be called either plum or cherry. On page 4, two "cherry" trees are mentioned in the text, on page 6 two "plum or cherry" trees are included in Table 3, and Table A provides the details for two "plum cherry" trees. The trees are all accurately identified as non-native, so inconsistent use of common names is not a major issue.

LSA recommends that the City of Vallejo accept the ATSR.

Please contact me at (510) 462-1326 or via email at john.kunna@lsa.net if you have any questions regarding this document.

March 2025

MANAGEMENT SUMMARY

LSA conducted a cultural resources assessment for the Vista Cove Development Project (project) in Vallejo, Solano County, California. The assessment included a record search, archival research, field surveys, and this report. The subject property is approximately 20 acres. As the Lead Agency for the project, the City of Vallejo (City) required this study as part of the environmental review process to comply with the California Environmental Quality Act (CEQA).

The purpose of the study is to provide the City with the necessary information and analysis to determine, as mandated by CEQA, whether the proposed project would cause substantial adverse changes to any historical/archaeological resources that may exist in or around the project area. To identify and evaluate such resources, LSA conducted a historical/archaeological resource records search, conducted historical background research, and carried out pedestrian field surveys.

No cultural resources within or adjacent to the project area were identified. Although eight historic resources were documented less than 0.5 miles away, the severe slopes and adjacent developments indicate that project parcel retains low potential for in situ subsurface cultural resources. Based on the site sensitivity LSA recommends that the following measures be implemented: (1) Workers Environmental Awareness Program; (2) Unknown Discovery of Archaeological Resources; and (3) Protocol for Human Remains Discovery.

INTRODUCTION

At the request of the City of Vallejo (City), LSA performed a cultural resources study on approximately 20 acres of land in Vallejo, Solano County, California (see Figure 1). The subject property of the study, Assessor's Parcel Numbers 0079-171-170, 0079-220-070, and a portion of 0079-120-100, is at the northeast corner of Shady Lane and Wildflower Street in Township 3 North, Range 3 West, Section 28, Mt. Diablo Baseline and Meridian, as depicted on the United States Geological Survey *Benicia, California* 7.5-minute topographic quadrangle map. The study is part of the environmental review process for residential development. The City, as Lead Agency for the project, required the study in compliance with the California Environmental Quality Act (CEQA) (Public Resources Code [PRC] § 21000, et seq.).

LSA performed this study to provide the City with the necessary information and analysis to determine, as mandated by CEQA, whether the proposed project would cause substantial adverse changes to any historical/archaeological resources that may exist in or around the project area. To identify and evaluate such resources, LSA conducted a historical/archaeological resources record search, pursued a historical background research, and carried out pedestrian field surveys. This report is a complete account of the methods, results, and final conclusion of the study.

Vista Cove Planned Development Project

Project Location

SOURCE: *Benicia CA*, 7.5' Quad (USGS 1980)

I:\2024\20241845\GIS\Pro\Vista Cove Planned Development Project\Vista Cove Planned Development Project.aprx (1/29/2025)

SETTING

CURRENT NATURAL SETTING

Climate and Watershed

The project region is characterized by the coastal climate, with mild summers and winters. Rainfall averages 24 inches annually. The project area is transected by two ephemeral drainages, which drain to Benicia State Park in the east, where stormwater runoff converges and is directed to the Carquinez Strait (DK Engineering 2023).

Flora and Fauna

At an elevation of approximately 250 feet, the project is just within the Lower Sonoran Life Zone of California (Schoenherr 1992), which ranges from below sea level to 3,500 feet. Monterey pine, coast live oak, poison oak, and other native species were noted on the property (particularly xeric grasses, oats, barley, and brome). Extensive fauna are known locally, including many endemic species of reptiles, birds, and insects.

The coastal environment of California hosted a rich variety of abundant floral and faunal resources that fostered a particularly dense Native American occupation of this region during prehistoric times, especially the coastal corridor within a day's "commuting" distance of fresh water.

Geology

Vallejo is within the Coast Ranges geomorphic province of California. The geological setting along the Coast Ranges is notably different between the East and West sides of the San Andreas fault. Vallejo lies to the east of the San Andreas fault, which is characterized by Mesozoic rocks of the Franciscan Complex, the Great Valley Sequence, and the Jurassic Coast Range ophiolite.

According to maps by Wagner and Gutierrez (2010), the boundaries of this project are situated within the Upper Great Valley Sequence, which dates to the Late Cretaceous. The Upper Great Valley Sequence (Ku) consists of sandstone, siltstone, shale, and minor conglomerate.

CULTURAL SETTING

Prehistory

Chronologies of prehistoric cultural change in Northern California area have been attempted numerous times, and several are reviewed in Moratto (2004). No single description is universally accepted, as the various chronologies are based primarily on material developments identified by researchers familiar with sites in a particular region and variation exists essentially due to the differences in those items found at the sites. Small differences occur over time and space, which combine to form patterns that are variously interpreted.

One of the regional chronologies commonly referenced in the archaeological literature is Meyer and Rosenthal, White, and Sutton (2007) modified from Fredrickson (1974). The earliest period is the Lower Archaic (10,000 to 6,000 A.D.), followed by the Initial Middle Archaic (6,000 to 4,500 BP),

Terminal Middle Archaic (4,500 to 2,500 BP), Upper Archaic (2,500 to 1,300 BP) and, finally, the Emergent (1,200 to 200 BP).

Ethnography

The project is within the traditional cultural territory of the Patwin (Johnson, 1978; Kroeber, 1925). Tribal territories were somewhat fluid and changed over time. Like other Native American groups in Northern California, they were semi-nomadic hunter-gatherers who subsisted by exploitation of seasonably available plant and animal resources. The first written accounts of Native American groups in California were by Spanish missionaries in the late 18th century. Later documentation of the Patwin was by Powers (1877), Barrett (1908), Merriam (1929), and many others.

With the Spanish intrusion came a drastic change in lifestyle for the Native Americans of California. Incorporation of the indigenous populations into the mission system involved conflict, forced labor, and relocation along with decimation by European diseases, all of which led to the disruption of native cultures and changes in subsistence and land use practices. Cattle ranches/farms were established on or near ancestral Native American villages, primarily in the major drainages conducive to horticulture and animal husbandry. Water was diverted for irrigation and stock. Within a short time, the missions controlled many ranchos where Indians lived and worked.

History

In California, the historic era is generally divided into three periods: the Spanish Period (1769–1821), the Mexican Period (1821–1848), and the American Period (1848–present). As there were no resources within the project site the historic context focuses on the County and local community during the American Period.

Solano County was created from part of the Sonoma territory in 1850 by the first elected Legislature of the territory of California. Solano County is therefore one of the original 27 counties in California. General Vallejo, an instrumental figure in shaping Alta California, requested that this county was named after Chief Solano, a Suisun and Patwin leader who presided over this land prior to California's statehood. Seven of the 12 townships created during Solano County's early days have incorporated into cities. These include Benicia (1850 and 1851), Vallejo (1868), Suisun City (1856), Dixon (1878), Vacaville (1892), Rio Vista (1893), and Fairfield (1903) (Solano County website, February 2025).

Vallejo

The region that became Vallejo was first mapped by Spanish colonizers in 1775. However, this area remained largely unshaped by colonial influence until 1844, when General Vallejo received this area as a part of the larger Rancho Soscol land grant. General Vallejo donated land and funds for the construction of a capital city, named Vallejo, in the newly annexed state of California in 1851. Vallejo served as a temporary capitol until Benecia was formally recognized as the capital in 1853. Mare Island became the country's first permanent naval station on the West Coast in September 1854. Vallejo formally incorporated in 1868 and experienced booms of growth reflecting periods of naval growth during the Spanish-American War and World War I (Vallejo Naval and Historical Museum website, February 2025).

METHODS

Record Search

On September 6, 2024, a cultural resources record search was conducted for the current project area at the Northwest Information Center (NWIC) at Sonoma State University. The NWIC houses the pertinent archaeological site and survey information necessary to determine whether cultural resources are recorded within the study area boundaries and which specific areas have been previously surveyed in Solano County. The research included a review of all recorded historic and prehistoric archaeological sites within one mile of the project, as well as a review of known cultural resource survey and excavation reports.

Additional Research

In February 2025, Cassidy Sharp reviewed online historic period aerial photographs and maps (NETR Online 2025).

Archaeological Field Survey

On January 20, 2025, LSA Archaeologist Kendra Kolar surveyed the project area for any cultural residues (prehistoric or historic artifacts, deposits, or features). Linear transects at 20- to30-meter- (65.6- to 98.4-foot) intervals were used to systematically examine the surface. Particular attention was given to all areas of potentially native (undisturbed) soils, exposed rocks, and rodent aprons.

RESULTS

RECORD SEARCH

Data from the NWIC indicate there have been nine previous cultural resources studies conducted within the 0.5-mile study radius, three of which included portions of the project area (see Appendix A). Although no cultural resources were recorded within the project area, eight are documented within 0.5 mile. All eight of these are from historic age resources, including four buildings (Bordoni Ranch, built post-1868, as 48-000717, a 1910 residence at 1569 Columbus Parkway as 48-001030, an adjacent 1910 residential and storage building at 1545 Columbus Parkway as 48-001031, and a 1925 bungalow at 1241 Lewis Avenue as 48-001033) and five sites (48-000716 is pre-1867 township boundary marking field stones, 48-000717 is Bordoni Ranch, built post-1868, St. Vincent's Cemetery, which dates to the 19th century, is 48-001040, and 48-002056 and 48-002057 are the same historic refuse dump). Bordoni Ranch (48-000717) is listed as both a historic site and as a historic building. Bordoni Ranch (48-000717) and the historic refuse dump (48-002056) are the nearest historic resources to the project site, within 0.25 mile of the project boundary.

Additional Research

No buildings or structures are present within the project area in historic period aerial photos or indicated on maps dating back to 1948. According to these aerials, the nearby housing development completed construction sometime between 1982 and 1987 (NETR Online 2025).

ARCHAEOLOGICAL FIELD SURVEY

The field survey revealed that there was light disturbance in some areas of the project site, as modern refuse was found in various locations. Overall visibility varied in the accessed portions of the project area, but was generally limited by the vegetation cover, ranging overall from fair to non-existent. No cultural resources were identified.

Areas of visible soil were found in the previous year's plowed firebreak lines and in the dirt access road entering the north end of the project area from the adjacent development. Visibility in the southern end of the project area was very limited by grass, thistle, and fennel, with the only visible soil in rodent burrow aprons. Access was inhibited by dense vegetation at the bottom of both drainages the very steep and densely vegetated slope on the south side of the southern drainage. Observed soil was consistently reddish-brown to brown with little to no gravel. No bedrock outcrops were observed in surveyed areas. Modern refuse was noted throughout the project area.

RECOMMENDATIONS

Through the various avenues of research, this study did not identify cultural resources within or adjacent to the project. Although eight historic resources were documented less than 0.5 mile away, the severe slopes and adjacent developments indicate that project parcel retains low potential for in situ subsurface cultural resources. Therefore, no further investigation or monitoring are recommended and Standard Conditions (CEQA California Code of Regulations, Title 14, Chapter 3, Section 15064.5 [e and f] as outlined below apply.

Standard Condition -1 **Unknown Discovery of Archeological Resources**

Should an archaeological deposit be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology contacted to assess the situation, determine if the deposit qualifies as a historical resource, consult with agencies as appropriate, and make recommendations for the treatment of the discovery.

If the deposit is found to be significant (i.e., eligible for listing in the California Register of Historical Resources), the project applicant shall be responsible for funding and implementing appropriate mitigation measures. Mitigation measures may include recording the archaeological deposit, data recovery and analysis, and public outreach regarding the scientific and cultural importance of the discovery. Upon completion of the selected mitigations, a report documenting methods, findings, and recommendations shall be prepared by the qualified archaeologist and submitted to the City of Vallejo for review, and the final report shall be submitted to the Northwest Information Center at Sonoma State University. Significant archaeological materials shall be submitted to an appropriate local curation facility and used for future research and public interpretive displays, as appropriate.

Standard Condition -2 **Protocol for Human Remains Discovery**

In the event that Native American human remains are found during development of the proposed project and the Confederated Villages of Lisjan Nation (Tribe) or a member of the Tribe is determined to be the Most Likely Descendent (MLD), the following provisions shall apply:

- The Medical Examiner shall immediately be notified, ground disturbing activities in that location shall cease within 25

feet of the discovery and the Tribe shall be allowed, pursuant to California Public Resources Code (PRC) Section 5097.98(a) to inspect the site of the discovery and make determinations as to how the human remains and grave goods should be treated and disposed of with appropriate dignity.

- The Tribe shall complete its inspection and make its MLD recommendation within forty-eight (48) hours of getting access to the site. The Tribe shall have the final determination as to the disposition and treatment of human remains and grave goods. Said determination may include avoidance of the human remains, reburial on-site or reburial on tribal or other lands that will not be disturbed in the future.

- The Tribe may wish to rebury said remains and grave goods or ceremonial and cultural items on or near the site of their discovery, in an area which will not be subject to future disturbances over a prolonged period of time. Reburial of human remains shall be accomplished in compliance with California PRC Sections 5097.98(a) and (b). The term "human remains" encompasses more than human bones because the Tribe's traditions call for the burial of associated cultural items with the deceased (funerary objects), and/or the ceremonial burning of Native American human remains, funerary objects, grave goods, and animals. Ashes, soils, and other remnants of these burning ceremonies, as well as associated funerary objects and unassociated funerary objects buried with or found near the Native American remains are to be treated in the same manner as bones or bone fragments that remain intact.

- Unless otherwise required by law, the site of any reburial of Native American human remains shall not be disclosed and will not be governed by public disclosure requirements of the California Public Records Act (California Government Code Section 6250 et. seq). The Medical Examiner shall withhold public disclosure of information related to such reburial pursuant to the specific exemption set forth in California Government Code Section 6254(r). The Tribe will require that the location for reburial is recorded with the California Historic Resources Inventory System (CHRIS) on a form that is acceptable to the CHRIS center. The Tribe may also suggest that the landowner enter into an agreement

regarding the confidentiality of site information that will run with title on the property.

- Treatment of all cultural items, including ceremonial items and archaeological items will reflect the religious beliefs, customs, and practices of the Tribe. All cultural items, including ceremonial items and archaeological items, which may be found at a Project site should be turned over to the Tribe for appropriate treatment, unless otherwise ordered by a court of agency of competent jurisdiction. The project applicant should waive any and all claims to ownership of Tribal ceremonial and cultural items, including archaeological items, which may be found on a project site in favor of the Tribe. If any intermediary (e.g., an archaeological retained by the project applicant) is necessary, said entity or individual shall not possess those items for longer than is reasonably necessary, as determined solely by the Tribe.

- If additional significant sites or sites not identified as significant in the environmental review process, but later determined to be significant are located within a project impact area, such sites will be subjected to further archaeological and cultural significance evaluation by the project applicant, Solano County and the Tribe to determine if additional mitigation measures are necessary to treat sites in a culturally appropriate manner consistent with CEQA requirements for mitigation of impacts to cultural resources. If there are human remains present that have been identified as Native American, all work will cease for a period of up to 30 days in accordance with Federal Law.

Subject: Vallejo Properties – Vista Cove
Wildflower Avenue
Vallejo, California

PRELIMINARY GEOTECHNICAL EXPLORATION

Dear Mr. Smith:

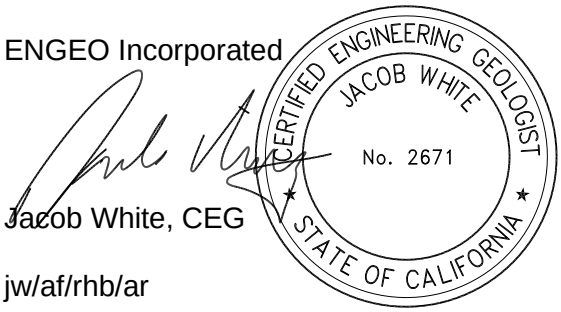
With your authorization, we have completed this preliminary geotechnical exploration for the proposed development of the Vallejo Properties – Vista Cove development located in Vallejo, California. The accompanying report presents the results of our site exploration and preliminary geotechnical conclusions and recommendations for the project.

Based on our initial assessment, the proposed residential development is feasible from a geotechnical standpoint. The main geotechnical and geologic concerns for the proposed development includes stability of graded slopes, corrective grading for planned building sites, and the presence of moderate to highly expansive soil and bedrock. A design-level exploration should be conducted prior to site development once final land plans have been prepared.

We are pleased to have been of service on this project and are prepared to consult further with you and your design team as the project progresses. If you have any questions regarding the contents of this report, please do not hesitate to contact us.

Sincerely,

ENGEO Incorporated



Jacob White, CEG

1.0 INTRODUCTION

1.1 PURPOSE AND SCOPE

We prepared this preliminary geotechnical exploration report for the proposed Vista Cove development in Vallejo, California. Based on the findings of our feasibility study dated April 29, 2022, we provided the following scope of services.

- Reviewed the findings in our previous feasibility study for the site.
- Performed subsurface exploration, including two dry-cored borings, 13 exploratory test pits, and one exploratory trench to identify the possible presence of landslide deposits crossing the development site and characterize the general site geology.
- Provided our preliminary conclusions and recommendations for site grading, foundation design, retaining walls, and preliminary pavement recommendations for the proposed development.

We prepared this report exclusively for you and your design team consultants. ENGEO should review any changes made in the character, design, or layout of the development to modify the conclusions and recommendations contained in this report, as necessary. This document may not be reproduced in whole or in part by any means whatsoever, nor may it be quoted or excerpted without the express written consent of ENGEO.

1.2 PROJECT LOCATION

The site is located just east of Wildflower Avenue and Shady Lane, as shown in the Vicinity Map, Figure 1. The Property is approximately 30 acres in area and is identified by Assessor's Parcel Numbers (APNs) 0079-171-170, 0079-120-100, and a portion of 0079-220-070. The Property is currently undeveloped, open space located on the hillside of a residential development in the Glen Cove area of Vallejo. Development plans indicate that approximately 18 acres are planned for residential development, 9 acres are to be dedicated to the City by the developer as open space, and 3 acres are to be dedicated to the developer by the City. The southern portion of the site is generally lower in elevation and increases in elevation towards the west. Elevations range from approximately Elevation 70 feet above mean sea level (msl) in low-lying areas (eastern portion of the site) up to approximately Elevation 290 feet msl (southwestern boundary of the site). Vegetation on most of the site generally consists of weeds and grasses, with trees and wetland vegetation lining the two drainages that cross the site.

The upslope development (Glen Cove Hills) was constructed in the early 1980s, with significant cuts and fills to achieve the current site grades. A fill slope approximately 50 feet high and 2:1 (horizontal: vertical) was observed along the southwestern portion of the property. There are two storm drain outlets from Glen Cove Hills that were actively flowing during our site visit, Water is collected and conveyed within the two drainages that bisect the site west to east.

1.3 PROPOSED DEVELOPMENT

Based on the conceptual plan received via email on August 4, 2022, from dk Engineering, the project will include cuts and fills of up to 24 feet with graded slope configurations as steep as 2:1 (horizontal: vertical) and up to 46 feet tall. Retaining walls (up to 12 ½ feet in height) are shown in several areas at the top of fill slopes and the base of planned cut slopes. The current development plan depicts 52 single-family units, as shown in the Site Plan, Figure 2. Access to the project is depicted off Shady Lane and Wildflower Avenue. Development is anticipated to include roadway construction, underground utilities, and stormwater detention basins associated with the project.

2.0 REGIONAL GEOLOGY AND SEISMICITY

2.1 REGIONAL GELOGIC SETTING

The project site is situated regionally within the Coast Ranges Province. The Coast Ranges Province has a complex geological history. The Coast Ranges are characterized by complex folding and faulting that has resulted in a series of northwest-trending mountain ranges and intervening valleys. Active faulting found in the Coast Ranges has developed in response to the relative motion along the transform boundary between the North American and Pacific Tectonic Plates which, in total, is considered to be approximately 5 cm per year (Argus and Gordon, 1991). Strain associated with the relative motion of the two plates is distributed across a broad area from the San Gregorio fault offshore to just east of the Sierra Nevada. The San Andreas fault accommodates a significant portion of the relative plate motion with a geologic slip rate of approximately 2.5 to 3 cm per year. The remaining relative plate motion is partitioned along a series of faults within the broad zone of deformation with the highest slip rates occurring on faults adjacent to the San Andreas fault. In the San Francisco Bay Area, these faults include the Hayward, Rogers Creek, Calaveras, Concord, Green Valley, and Greenville faults, as well as other shorter fault segments.

More specifically, the site is located in the hills approximately 1 mile north of Southhampton Bay and Dillon Point on the north side of the Carquinez Strait. Based on geologic mapping by Dibblee (2005), the site is underlain by upper Cretaceous Panoche formation (Figure 3). We also reviewed regional geologic mapping by Crane (1988) and Graymer (1999). Dibblee maps the Southampton fault approximately 500 feet east of the site boundary. This same fault is mapped by Crane as a west-dipping thrust fault, and shown as concealed below Bay Mud deposits by Graymer. The Southampton fault is depicted on the USGS Quaternary Fault and Fold Database (Bryant, 2017) consistent with Dibblee, about 500 feet east of the site, and is described as an undifferentiated Quaternary aged reverse right-lateral fault. Crane also maps the axis of a north-trending syncline through Southampton Bay east of the site. Based on interpretations by Crane, this syncline may represent the northward continuation of the Martinez syncline. Bedding at the site is mapped with a northwest strike and dipping from 35 to 45 degrees to the west.

Regional landslide mapping by Nilsen (1975) and Bortugno (1987) was reviewed as part of our study. Landslide mapping by Bortugno is depicted in Figure 5. Bortugno maps the landslides flanking the north dipping slope, just south of the proposed development area, and a larger landslide (queried) crossing through the center of the development area. Nilsen (1975) maps a landslide upslope of Silktree Lane and the existing Glen Cove Development and does not depict any landslides crossing the development area. The California Geological Survey (CGS) provides an online “Landslide Inventory” GIS database. Consistent with the queried landslide mapped by Bortugno (Figure 2), the CGS identifies the area with a “**?**” meaning the landslide deposit is uncertain or questionable.

2.2 FAULTING AND SEISMICITY

The site is not located within a State of California Earthquake Fault Hazard Zone for active faults and no signs of recent faulting were observed during our site reconnaissance mapping. The San Andreas fault represents an active plate boundary that is expected to produce the maximum probable earthquake for the region. Other active faults of coastal California are lesser-order features of the same stress-strain system. The Greenville and Concord/Green Valley faults are mapped approximately 3.5 miles east of the site, the West Napa fault is located about 6 miles to the northwest, the Hayward-Rodgers Creek fault is mapped approximately 11 miles southwest from the site, and the San Andreas fault is mapped approximately 29 miles from the site.

Numerous small earthquakes occur every year in the nearby San Francisco Bay Region, and larger earthquakes have been recorded and can be expected to occur in the future. Figure 4 shows the approximate locations of these faults and significant historic earthquakes recorded within the region.

Historically, strong earthquakes (>M7) have occurred in the nearby Bay Area with many low-magnitude earthquakes recorded every year. It should therefore be expected that the site will be subjected to moderate to severe ground shaking at some point during the project design lifetime.

The 2014 Working Group on California Earthquake Probabilities evaluated the regional seismicity of the Bay Area and published their results as The Uniform California Earthquake Rupture Forecast, Version 3 (UCERF3). The Working Group periodically attempts to summarize seismic risk in California with time-dependent earthquake rupture forecasts, in which the probabilities of future events are conditioned upon the dates of previous earthquakes. According to UCERF3, there is an aggregated 72 percent probability of 6.7 M_W or greater earthquake on an active Bay Area fault over the next 30 years.

3.0 FIELD EXPLORATION AND GEOLOGIC MAPPING

3.1 EXPLORATION AND SUBSURFACE CONDITIONS

Our supplemental exploration included drilling two continuous “dry-core” borings within a queried landslide area to confirm the presence or absence of landsliding. The borings were drilled on August 4 and 5, 2022, utilizing a track-mounted CME-55 drill rig to a maximum depth of up to 50 feet below ground surface (bgs). Additionally, 13 test pits and one trench were excavated within the proposed development and adjacent hillslopes utilizing a tracked excavator (Figure 2). The test pits and trench were excavated on July 13 and 14, 2022, to a maximum depth of approximately 11 feet bgs.

In Boring 1-B1, colluvial soil was encountered to a depth of 3 feet bgs. Extremely weak to weak mudstone bedrock (Kp) interbedded with strong indurated sandstone and shale was encountered from 3 feet to the bottom of the boring. The bedrock was closely fractured to crushed in zones, partially due to the method of drilling. Very hard drilling was encountered at 17½ feet to 25 feet bgs. No features indicative of landsliding were observed in the recovered core samples.

In Boring 1-B2, colluvial soil consisting of very stiff fat clay was encountered to a depth of 6 feet bgs. Extremely weak to weak mudstone bedrock (Kp) interbedded with strong to very indurated sandstone and siltstone was encountered from 6 feet to the bottom of the boring. The bedrock was closely fractured to crushed in zones, partially due to the method of drilling. Very hard drilling (interpreted as very strong sandstone interbeds) was encountered at 10 feet to 13 feet, 15½ to 22½ feet, and 40 to 45 feet bgs. No features indicative of landsliding were observed in the recovered core samples.

Test Pits 1-TP1 through 1-TP9 were excavated in the previously mapped queried landslide area crossing the site. Stiff to very stiff colluvial deposits consisting of lean to fat clay were encountered to a depth of up to 9 feet. Underlying the colluvial deposits (gradational contact), weak to very weak interbedded sandstone, siltstone, and mudstone were encountered to the depth of excavation. No features indicative of landsliding were observed within the test pit excavations.

Test Pits 1-TP10 through 1-TP13 were excavated in planned development areas to characterize bedrock structure and thickness of colluvial deposits. Stiff to very stiff colluvial deposits consisting of lean to fat clay were encountered to a depth of up to 7 feet. Underlying the colluvial deposits (gradational contact), weak to very weak interbedded sandstone, siltstone, and mudstone were encountered to the depth of excavation.

Trench 1-T1 was excavated in the upslope portion of the previously mapped queried landslide area crossing the site. The trench extended approximately 110 feet and up to 10 feet deep. Colluvial deposits up to approximately 9 feet thick were observed in gradational contact with the underlying bedrock. The colluvium consisted of lean to fat stiff clay. The underlying bedrock consisted of weak interbedded sandstone and claystone with bedding ranging from north 8 east to north 33 east and dipping 32 to 45 degrees west. No features indicative of landsliding were observed during exploration, such as graben fills, fracture fills, dilated bedrock, prominent shearing, or gouge.

An ENGEO Geologist logged the borings, test pits, and trench in the field. The exploration logs are included in Appendix A of this report. The trench log is included in Figure 9. The logs depict subsurface conditions encountered at the time of our exploration; however, subsurface conditions will vary with time.

3.2 HISTORIC AERIAL PHOTOGRAPH REVIEW

We reviewed stereo-paired aerial photographs as part of our study to observe the presence of geomorphic features indicative of landsliding at the site. We reviewed the photographs for features such as linear discontinuities in the rock or soil, offset drainages, linear scarps, topographic lows, and/or vegetation patterns or breaks in slope. Features indicative of landsliding were observed in several photographs spanning years from 1937 to 1989 for Landslides 1 through 6.

3.3 SITE RECONNAISSANCE AND GEOLOGIC MAPPING

Surface geologic mapping, based on photo review and site reconnaissance, was performed as part of this study, as depicted in Figure 2 and interpreted on cross sections in Figure 6. Mapping was supplemented by subsurface findings, as described in subsequent sections of the report. Site mapping focused on bedrock exposures, existing fills, landsliding, and geomorphological features to provide a preliminary surface geologic map. Below are descriptions of the geologic units observed during mapping at the site, as shown in Figure 2.

3.3.1 Existing Fill (Qaf)

Existing fills (Qaf) are mapped along the west side of the site and are associated with mass grading for the Glen Cove development (Figure 2). The existing fills observed during our site reconnaissance and in 1981 aerial photographs appear to generally be derived from local bedrock cuts typical of the area.

3.3.2 Colluvial Deposits (Qc)

Colluvium (Qc) generally overlies the low-lying portions of the site, specifically the two drainages that cross the site and a small swale along the north side of the site. Colluvium is material that erodes from ridgelines and slopes, is transported predominantly by sheet wash, and accumulates in the adjacent swales. Colluvial deposits are typically compressible and weak, and based on our experience in the area, have the potential to be expansive. Colluvium was encountered across the site during our exploration and up to 10 feet thick as observed in 1-TP3.

3.3.3 Landslide Deposits (Qls)

As previously discussed, published geologic mapping by Bortugno (1987) shows a queried landslide area crossing through the site, Figure 5. Based on our field exploration, no features indicative of landsliding were observed in the borings, test pits, or trench. Topographic lows in this area are likely related to differential weathering and bedrock structure and are generally consistent in bedding observed in the excavations. Based on a review of the published maps, interpretation of aerial photographs, and our subsurface exploration, we identified six landslide areas adjacent to or within the property, included in Figure 2. The landslides at the site are classified as shallow soil creep/earthflows, shallow landslide deposits, and deep-seated bedrock landslides. Soil creep earthflows are generally slow-moving shallow landslides that typically mobilize during significant rainfall events and usually include the overlying surface soil. Shallow landslides at the site are characterized by rotational failures predominantly including surficial and colluvial soil, and may affect some portion of upper weathered bedrock units and likely up to 20 feet deep. Deep-seated bedrock landslides involve primarily rock, but may also include some surficial soil material, and are likely 30 to 50 feet deep. No landslide deposits were encountered in excavations or borings during our exploration.

It is our opinion that the identified landslide areas have a relatively high likelihood of experiencing instability. Conceptual mitigation measures are provided below for identified landslide areas that have been designated Landslide Areas 1 through 6 in Figure 2 for discussion purposes. The relationship of each landslide area to the planned development and conceptual mitigation measures for each landslide area is summarized in Table 3.3.3-1.

TABLE 3.3.3-1: Preliminary Landslide Classification

LANDSLIDE DESIGNATION	LANDSLIDE CLASSIFICATION	DEVELOPMENT IMPACTS	MITIGATION MEASURES
1	Deep-Seated Bedrock; Wedge Failure	Upper portion of slide crossing proposed open space area.	Outside of development area, no mitigation required.
2	Deep-Seated Bedrock	Off site within Benicia State Rec Area and not affecting current site development.	Outside of development area, no mitigation required.
3	Shallow; Rotational	Off site and not affecting current site development.	Outside of development area, no mitigation required.
4	Shallow; Rotational	Predominantly within open space parcel with portion on the east crossing into planned balance area.	Remove landslide deposits from portion within development area.
5	Shallow; Rotational	Outside of proposed development area and project boundary.	Outside of development area and project boundary, no mitigation required.
6	Soil Creep/ Earthflow	Predominantly within open space parcel with portion on the east crossing into planned balance area.	Remove landslide material from portion within development area.

3.3.4 Panoche Formation (Kp)

Bedrock at the site consists of interbedded sandstone, siltstone, claystone, shale, and mudstone of the Cretaceous Great Valley Sequence Panoche Formation (Kp). Based on our experience with similar projects in the area, bedrock exposures along Shady Lane, and our subsurface

exploration, the bedrock is generally well cemented, extremely weak to strong, and beds of more well indurated sandstones are common. Regional bedding is depicted striking northwest and dipping 35 to 45 degrees west. We collected measured bedding orientations on bedrock exposures adjacent to Shady Lane, and within test pit excavations, observed bedding striking from north 3 degrees west to north 65 east and dipping 32 to 60 degrees to the west.

3.4 LABORATORY TESTING

We performed percent passing #200 sieve (ASTM D1140), Atterberg limits (ASTM D4318), and hydrometer (ASTM D422) testing. Individual test results are also included in Appendix B.

3.5 GROUNDWATER CONDITIONS

No groundwater was encountered within the test pits, trench, and borings. The two drainages crossing the site were observed to have consistent water flow from two storm drain outlet locations associated with the existing Glen Cove Hills development. Additionally, two seepage areas were observed during our site reconnaissance, as depicted in Figure 2. The seeps were identified by saturated ground surfaces and dense vegetation. Fluctuations in groundwater levels occur seasonally and over a period of years because of variations in precipitation, temperature, irrigation, and other factors. Future irrigation may cause an overall rise in groundwater levels.

4.0 PRELIMINARY CONCLUSIONS

It is our opinion from a geotechnical and geologic viewpoint that the proposed development is feasible provided the preliminary conclusions and recommendations contained in this report are incorporated into future planning for the development. The main geotechnical and geologic concerns for the proposed development include (1) stability of graded slopes, (2) corrective grading for planned building sites, and (3) presence of moderate to highly expansive soil and bedrock.

Supplemental design-level geotechnical exploration should be performed to provide site-specific recommendations for site preparation, remedial and design grading, foundation design, site improvements, and drainage. The supplemental exploration should further characterize subsurface conditions to determine mitigation measures to address geotechnical and geologic hazards.

4.1 SLOPE STABILITY

Proposed graded slopes at the site (Figure 2) are depicted as 2:1 (horizontal: vertical) and up to 46 feet tall with intermittent benches. Based on our experience and geologic conditions at the site, proposed cut slopes will require reconstruction as drained, engineered fill slopes. In general, 2:1 cut and fill slopes will require keyway buttresses and geogrid reinforcement for construction. Slope stability analysis should be performed during design-level geotechnical study and once final development plans are available to determine corrective grading configurations.

4.2 EXPANSIVE SOIL AND BEDROCK MATERIALS

The soil and bedrock at the site generally exhibit moderate to high shrink/swell potential with variations in moisture content. The results of Atterberg Limits determination show plasticity indices (PIs) ranging from 18 to 40, which is considered moderate to highly expansive when subject to changes in moisture content. Expansive soil and bedrock materials left unmitigated may shrink

and/or swell adversely impacting site improvements, such as slabs-on-grade, pavements, and structures on shallow foundations. Our recommendations to mitigate adverse effects of expansive soil and bedrock are discussed in subsequent portions of this report.

4.3 COMPRESSIBLE SOIL AND SOFT COLLUVIAL DEPOSITS

The colluvial deposits encountered during our exploration included soft or compressible materials over bedrock. To minimize settlement of the softer colluvium due to building loads or engineered fill loads, corrective grading measures should include the removal of compressible materials down to a hard material/bedrock. We anticipate colluvium removals of up to approximately 10 feet to achieve this recommendation. Figures 2 and 6 show the general locations of the colluvium. The anticipated depth of removal of soft and compressible soil should be determined during design-level studies.

4.4 SOIL CREEP

Colluvial soil on steeper slopes is subject to soil creep. Soil creep is the slow downslope movement of soil that occurs with the annual cycle of wetting and drying under the influence of gravity. The potential for adverse impacts from soil creep can be minimized by benching through surficial soil during fill placement, as recommended in this report, or by design of drilled pier foundation systems to accommodate lateral loads from soil creep.

4.5 BEDROCK RIPPABILITY

Based on field observations during excavation of test pits, trench, borings, and experience on projects in the immediate vicinity, we opine that in general bedrock units at this site should be considered rippable with conventional heavy construction equipment (such as a D-8 Bulldozer). Localized well-cemented beds and occasional well-cemented concretions may be encountered that will require more ripping effort. Trenching for utilities should be possible with conventional equipment. As noted above, localized well-cemented beds may be encountered that may necessitate use of heavy equipment such as track-mounted excavators.

In general, all soil and bedrock materials observed on the site appear suitable for use as engineered fill, if properly processed. If rocks greater than 6 inches in diameter are encountered during grading, these should be placed in accordance with recommendations provided in Section 5.3 – Selection of Materials.

4.6 SEISMIC HAZARDS

Potential seismic hazards resulting from a nearby moderate to major earthquake can generally be classified as primary and secondary. The primary effect is ground rupture, also called surface faulting. The common secondary seismic hazards include ground shaking, ground lurching, soil liquefaction, and lateral spreading. These hazards are discussed in the following sections. Based on topographic and lithologic data, the risk from regional subsidence or uplift, tsunamis, or seiches is considered low at the site.

4.6.1 Ground Rupture

Since there are no known active faults crossing the site and the property is not within a State of California Earthquake Fault Hazard Zone, the likelihood of primary fault ground rupture is considered remote.

4.6.2 Ground Shaking

An earthquake of moderate to high magnitude generated within the San Francisco Bay Region could cause considerable ground shaking at the site, similar to that which has occurred in the past. To mitigate the shaking effects, all structures should be designed using sound engineering judgment and the current California Building Code (CBC) requirements, as a minimum.

4.6.3 Liquefaction/Clay Soil Softening

Soil liquefaction is a phenomenon under which saturated, cohesionless, loose soil experience a temporary loss of shear strength when subjected to the cyclic shear stresses caused by earthquake ground shaking. The soil materials encountered within the site generally consist of clayey soil and bedrock that are not susceptible to liquefaction.

4.6.4 Seismically Induced Landsliding

Seismically induced landslides are triggered by earthquake ground shaking. The risk of this hazard is greatest in the late winter when groundwater levels are highest and hillside colluvium is saturated. As with all slopes in the region, this risk is also present at the site to varying degrees depending on the slope conditions and time of year. The hazard of seismically induced landslides to the proposed structures can be best mitigated by properly engineered stabilization of planned slopes, as recommended in this report.

4.7 CBC SEISMIC DESIGN PARAMETERS

Based on the subsurface conditions observed during exploration, we preliminarily characterized the site as Site Class C. We provide the 2019 CBC seismic design parameters in the table below, which include design spectral response acceleration parameters based on the mapped Risk-Targeted Maximum Considered Earthquake (MCE_R) spectral response acceleration parameters. Future design-level studies should include evaluation of the shear-wave velocity of the subsurface to confirm site class.

TABLE 4.7-1: 2019 CBC Seismic Design Parameters (Latitude: 38.082173, Longitude: -122.200268)

PARAMETER	VALUE
Site Class	C
Mapped MCE_R Spectral Response Acceleration at Short Periods, S_S (g)	1.5
Mapped MCE_R Spectral Response Acceleration at 1-second Period, S_1 (g)	0.6
Site Coefficient, F_a	1.2
Site Coefficient, F_v	1.4
MCE_R Spectral Response Acceleration at Short Periods, S_{MS} (g)	1.8
MCE_R Spectral Response Acceleration at 1-second Period, S_{M1} (g)	0.84
Design Spectral Response Acceleration at Short Periods, S_{DS} (g)	1.2
Design Spectral Response Acceleration at 1-second Period, S_{D1} (g)	0.56
Mapped MCE Geometric Mean (MCE_G) Peak Ground Acceleration, PGA (g)	0.5
Site Coefficient, F_{PGA}	1.2
MCE_G Peak Ground Acceleration adjusted for Site Class effects, PGA_M (g)	0.6

4.8 SOIL CORROSION POTENTIAL

We collected two samples during our exploration and transported them to CERCO Analytical and tested for concentrations of water-soluble sulfate and chloride (Cl) in accordance with ASTM D4327. The sample locations are specified in the attached analytical results, Appendix C.

The soluble sulfate concentrations were 92 ppm (0.03% by weight) and “none detected”. The 2019 California Building Code references the 2014 American Concrete Institute Manual, (ACI 318-14) Chapter 19, Sections 19.3 for concrete requirements based on sulfate exposure. In accordance with ACI criteria, the soil is classified as Exposure Class S0. Cement type and water-cement ratio are not specified for this range.

The results for chloride concentration in the samples were 92 and 110 ppm. For concrete in direct contact with soil containing concentrations of chloride ions in excess of 500 ppm, the Post-Tensioning Institute (PTI) recommends additional protection from corrosion for the tendons and reinforcing. The results show levels of chloride that do not exceed 500 ppm. Therefore, preliminarily, no additional measures are specified beyond the standard measures specified by ACI 318-14 and 423.7.

A full evaluation of possible corrosion impacts to site improvements has not been conducted on site soil because of the volume of cut and fill that will be necessary to bring the site to design grades. Once design grades are achieved, supplemental testing can be performed and a corrosion specialist can be retained.

5.0 PRELIMINARY EARTHWORK RECOMMENDATIONS

5.1 GRADING, DEMOLITION, AND STRIPPING

The following preliminary recommendations are for initial land planning and preliminary estimating purposes. Final recommendations regarding site grading and foundation construction will be provided after design-level exploration has been undertaken. Grading should begin with the removal of existing structures, if any, including their foundations. Underground structures, such as buried pipes, septic tanks, and leach fields, if any, which will be abandoned or are expected to deteriorate, should be removed from the project site entirely.

All existing artificial fill, vegetation, and soft or compressible soil should be removed, as necessary, for project requirements. The depth of removal of these materials should be determined by the geotechnical engineer’s qualified representative in the field at the time of grading. Evaluation of unsuitable deposits should be performed during grading by sampling and laboratory analyses.

Areas to receive fill or structures and those areas that serve as borrow for fill should be stripped of existing vegetation. Topsoil is estimated to be from 3 to 6 inches in thickness depending on location. Tree roots should be removed to a depth of at least 3 feet below finished grade in cut areas and 3 feet below original grade in fill areas. Subject to approval by the landscape architect, strippings and organically contaminated soil that are not suitable for use as engineered fill may be used in landscape areas. Any topsoil that will be retained for future use in landscape areas should be stockpiled in areas where it will not interfere with the mass grading.

Within the development areas, excavations resulting from demolition and stripping which extend below final grades should be cleaned to firm undisturbed soil, as determined by the geotechnical engineer's representative. Following clearing and grubbing, all depressions in areas to be filled should be scarified, moisture conditioned, and backfilled with compacted engineered fill. The requirements for backfill materials and placement procedures are the same as those for engineered fill, as described in Section 5.5 – Placement of Fill.

5.2 CORRECTIVE GRADING

Based on the proposed site grading and slopes, corrective grading, including removal of compressible colluvium, excavation of buttress keyways, cut and cut-fill lot excavation, differential fill excavation, and construction of subsurface drainage facilities, is anticipated. Keyway and subdrain configurations should be provided during design-level studies and based on final development plans, including corrective grading plans and cross sections. Typical keyway and subdrain details are included in Figures 7 and 8.

5.3 SELECTION OF MATERIALS

With the exception of the organically contaminated near-surface material, the site soil and rocks containing less than 3 percent organics are suitable for use as engineered fill. Imported fill material should meet the above requirements and have a plasticity index (PI) similar to on-site soil material.

Placement of oversized rock in the fill should be done according to the following specifications.

- During grading, rock fragments up to 6 inches in maximum size should be placed in the deeper fill areas. No rock fragments larger than 6 inches in diameter shall be placed in the upper 10 feet of finished grade.
- If oversized rock fragments are encountered, these should not exceed 18 inches in any dimension if placed at selective landscape areas. Larger rock sizes should be broken mechanically, either by the heavy bulldozers rolling on them or by a pneumatic hammer mounted on a backhoe. The rock should be spread and mixed with fines and should not be allowed to nest. Engineered fill consisting of rock fragments only is not allowed. The rock should be mixed with fines at a ratio of 1 to 10, or one load of rock fragments to 10 loads of fines, as approved by ENGEO during grading.

5.4 GRADED SLOPES AND SLOPE STABILIZATION

The following preliminary guidelines may be used when considering slope gradients, heights, and retaining walls:

- In general, graded 2:1 (horizontal: vertical) slopes may be constructed up to 10 feet in vertical height. If higher vertical 2:1 slopes are planned, 2:1 slopes up to a maximum vertical height of 30 feet high may be constructed using geogrid reinforcement. Slopes exceeding 30 feet in height should include benches and/or concrete ditches, as designed by the civil engineer.
- Graded 2½:1 slopes (unreinforced with geogrid) may be constructed up to 15 feet in vertical height. If higher vertical slopes are planned, 2½:1 slopes up to a maximum vertical height of 30 feet high may be constructed using geogrid reinforcement. Slopes exceeding 30 feet in height should include benches and/or concrete ditches, as designed by the civil engineer.

- Graded 3:1 slopes, or flatter, may exceed 30 feet and do not require benches and/or concrete ditches. Major slopes exceeding 50 feet in vertical height should include a minimum 20-foot-wide debris bench along the base of slope.
- Graded cut and fill slopes exceeding 30 feet in height should include benches and/or concrete ditches, as designed by civil engineer.

The above guidelines may be considered in combination with vertical retaining wall systems, such as MSE retaining walls; however, such walls upon shallow foundations with downslope conditions will require greater embedment than walls with level foreground at slope bottoms. As an alternative to the slope gradient recommendations described above, if steeper slope gradients exceeding the above-noted maximum vertical heights are desired, such slopes could be specially designed using appropriate geogrid reinforcement. Geogrid reinforced slopes should be designed and may include primary and secondary geogrid reinforcement layers. As a general design consideration for geogrid reinforced slopes, if selected the primary horizontal reinforcement would extend on the order of 1.5 times the total vertical height of the slope, comprising the outer geogrid reinforced buttress zone of the slope; the typical vertical spacing of geogrid layers would be anticipated ranging from 1½- to 2½-foot spacing, depending on the total vertical slope height. Specific slope recommendations should be provided during design level studies and once final plans are available.

All major cut slopes should be reviewed by an ENGEO Certified Engineering Geologist for slope conditions that might be detrimental to slope stability. If areas of instability are identified during grading, such as adverse bedrock orientation or structure or groundwater seepage conditions, these cut slopes may require overexcavation and reconstruction; if necessary supplemental recommendations to mitigate cut slopes would be provided during construction.

5.5 PLACEMENT OF FILL

After removal of soft soil and loose fill, the exposed non-yielding surface of all areas to receive minor fills, secondary slabs-on-grade, or pavements should be scarified to a depth of 12 inches, moisture conditioned, and recompacted to provide adequate bonding with the initial lift of fill. All fill should be placed in thin lifts. The lift thickness should not exceed 8 inches or the depth of penetration of the compaction equipment used, whichever is less. Test procedures should be determined in accordance with ASTM D1557. Additional samples will be collected during site grading and transported to our laboratory for compaction curve testing.

TABLE 5.5-1: Fill Placement Specifications

LOCATION	MINIMUM RELATIVE COMPACTION	MINIMUM MOISTURE CONTENT (percent above optimum)
General Fill (< 50 feet deep)	90	3
General Fill (≥ 50 feet deep)	95	2
Keyway	95	2

6.0 PRELIMINARY FOUNDATION RECOMMENDATIONS

The following preliminary foundation recommendations are provided for planning purposes and should be evaluated once the final foundation layouts are provided.

It is our opinion that the proposed residential structures can be supported on structural mat foundations (such as post-tensioned mat foundations) provided that the structures are located on level ground and at least 10 feet from the top of slopes. A minimum mat thickness of 10 inches should be considered; however, the actual thickness and perimeter embedment recommendations should be determined by the structural engineer based on structural calculations.

7.0 PRELIMINARY RETAINING WALL RECOMMENDATIONS

Unrestrained walls constructed on level foreground should be designed for active lateral fluid pressure considering drained conditions, using the parameters below.

TABLE 7.0-1: Retaining Wall Design Parameters

BACKFILL SLOPE CONDITION	ACTIVE PRESSURE (pcf)
Level	50
3:1	60
2:1	70

Passive pressures acting on shallow foundations and keyways may be assumed as 250 pounds per cubic foot (pcf) provided that the area in front of the retaining wall is level for a distance of at least 10 feet or three times the depth of foundation and keyway, whichever is greater. The upper 1 foot of soil should be excluded from passive pressure computations unless it is confined by pavement or a concrete slab. The friction factor for sliding resistance may be assumed as 0.35. It is recommended that retaining wall footings be designed using an allowable bearing pressure of 2,500 pounds per square foot (psf) in engineered fill. The footings should be at least 24 inches below lowest adjacent grades. Walls adjacent to sloping terrain should be supported on deep foundations, such as drilled piers.

Based on review of the conceptual site plan, mechanically stabilized earth (MSE) retaining walls may be feasible for many of the site retaining walls. MSE walls function as gravity structures relying on self-weight of segmental blocks at the wall face and reinforced soil mass behind the segmental blocks to resist the destabilizing forces of the retained soil. The soil reinforcement consists of geogrid reinforcement.

The following preliminary soil criteria should be incorporated into the MSE wall design.

TABLE 7.0-2: MSE Wall Design Soil Material Parameters

CONDITION	COHESION (c') (pcf)	FRICTION ANGLE (∅') (degrees)	UNIT WEIGHT (γ) (pcf)
Reinforced Fill	0	28	120
Retained Soil	0	28	120
Foundation Fill	0	28	120

The geotechnical engineer should be consulted on seismic design recommendations for walls that are taller than 6 feet in retained height, tiered retaining wall configurations, or where surcharge loading is present.

All retaining walls should be provided with drainage facilities to prevent the build-up of hydrostatic pressures behind the walls. Wall drainage may be provided using a 4-inch-diameter perforated pipe embedded in Class 2 permeable material, or free-draining gravel surrounded by synthetic filter fabric. The width of the drain blanket should be at least 12 inches. The drain blanket should extend to about 1 foot below the finished grades. As an alternative, prefabricated wall drain panels can be used. The upper 1 foot of wall backfill should consist of on-site clayey soil. Collector perforated pipes should be directed to an outlet approved by the civil engineer.

All backfill should be placed in accordance with the recommendations provided above for engineered fill. Light equipment should be used during backfill compaction to reduce possible overstressing of the walls.

8.0 STORMWATER INFILTRATION AND BIORETENTION AREAS

Due to the density of the site soil and fines content, the near-surface site soil is expected to have a low to moderate permeability value for stormwater infiltration in grassy swales or permeable pavers, unless subdrains are installed. Therefore, best management practices should assume that limited stormwater infiltration will occur at the site.

If bioretention areas are implemented, we recommend that, when practical, they be planned a minimum of 10 feet away from structural site improvements, such as buildings, streets, retaining walls, and sidewalks/driveways. When this is not practical, bioretention areas located closer to structural site improvements can either:

1. Be constructed with structural side walls capable of withstanding the loads from the adjacent improvements, or
2. Incorporate filter material compacted to between 85 and 90 percent relative compaction (ASTM D1557, latest edition) and a waterproofing system designed to reduce the potential for moisture transmission into the subgrade soil beneath the adjacent improvement.

In addition, one of the following options should be followed.

1. We recommend that bioretention design incorporate a waterproofing system lining the bioswale excavation and a subdrain, or other storm drain system, to collect and convey water to an approved outlet. The waterproofing system should cover the bioretention area excavation in such a manner as to reduce the potential for moisture transmission beneath the adjacent improvements.
2. Alternatively, and with some risk of movement of adjacent improvements, if infiltration is desired, we recommend the perimeter of the bioretention areas be lined with an HDPE tree root barrier that extends at least 1 foot below the bottom of the bioretention areas/infiltration trenches.

Site improvements located adjacent to bioretention areas that are underlain by base rock, sand, or other imported granular materials, should be designed with a deepened edge that extends to the bottom of the imported material underlying the improvement. Given the nature of bioretention systems and possible proximity to improvements, we recommend ENGEO be retained to review design plans.

9.0 PRELIMINARY PAVEMENT DESIGN

The following preliminary pavement section has been determined for an assumed R-value of 5, and in accordance to the design methods contained in Chapter 630 of Caltrans Highway Design Manual.

TABLE 9.0-1: Preliminary Pavement Section

TRAFFIC INDEX	AC (inches)	AB (inches)
5.0	3.0	10.0
6.0	3.5	13.0
7.0	4.0	16.0

Notes: AC – Asphalt Concrete
AB – Caltrans Class 2 aggregate base (R-value of 78 or greater)

The above preliminary pavement sections are provided for estimating only. We recommend the actual subgrade material be tested for R-value and the traffic index, and minimum pavement section(s) should be confirmed by the civil engineer and the City of Vallejo.

10.0 FUTURE STUDIES

As previously discussed, a site-specific design-level geotechnical exploration should be performed as part of the design process. The exploration would include additional borings and laboratory soil testing to provide data for preparation of specific recommendations regarding grading, foundation design, and drainage for the proposed development. The exploration will also allow for more detailed evaluations of the geotechnical concerns discussed in this report and afford the opportunity to provide recommendations regarding techniques and procedures to be implemented during construction to mitigate potential geotechnical/geological hazards. Slope stability analyses should be performed during design-level geotechnical study and once final development plans are available to determine corrective grading configurations.

11.0 LIMITATIONS AND UNIFORMITY OF CONDITIONS

This report presents geotechnical recommendations for design of the improvements discussed in Section 1.3 for the proposed development. If changes occur in the nature or design of the project, we should be allowed to review this report and provide additional recommendations, if any. It is the responsibility of the owner to transmit the information and recommendations of this report to the appropriate organizations or people involved in design of the project, including but not limited to developers, owners, buyers, architects, engineers, and designers. The conclusions and recommendations contained in this report are solely professional opinions and are valid for a period of no more than 2 years from the date of report issuance.

We strived to perform our professional services in accordance with generally accepted principles and practices currently employed in the area; there is no warranty, express or implied. There are risks of earth movement and property damages inherent in building on or with earth materials. We are unable to eliminate all risks; therefore, we are unable to guarantee or warrant the results of our services.

This report is based upon field and other conditions discovered at the time of report preparation. We developed this report with limited subsurface exploration data. We assumed that our subsurface exploration data is representative of the actual subsurface conditions across the site. Considering possible underground variability of soil, rock, stockpiled material, and groundwater, additional costs may be required to complete the project. We recommend that the owner establish a contingency fund to cover such costs. If unexpected conditions are encountered, notify us immediately to review these conditions and provide additional and/or modified recommendations, as necessary.

Our services did not include excavation sloping or shoring, soil volume change factors, flood potential, or a geohazard exploration. In addition, our geotechnical exploration did not include work to determine the existence of possible hazardous materials. If any hazardous materials are encountered during construction, then notify the proper regulatory officials immediately.

This document must not be subject to unauthorized reuse, that is, reusing without our written authorization. Such authorization is essential because it requires us to evaluate the document's applicability given new circumstances, not the least of which is passage of time.

Actual field or other conditions will necessitate clarifications, adjustments, modifications, or other changes to our documents. Therefore, we must be engaged to prepare the necessary clarifications, adjustments, modifications, or other changes before construction activities commence or further activity proceeds. If our scope of services does not include on-site construction observation, or if other persons or entities are retained to provide such services, we cannot be held responsible for any or all claims arising from or resulting from the performance of such services by other persons or entities, and from any or all claims arising from or resulting from clarifications, adjustments, modifications, discrepancies, or other changes necessary to reflect changed field or other conditions.

BASELINE ENVIRONMENTAL CONSULTING

MEMORANDUM

Date: March 26, 2025 **Job No.:** 24217-00

To: Florentina Craciun, LSA

From: Cem Atabek, Baseline Environmental Consulting

Subject: **Peer Review of Preliminary Geotechnical Exploration, Vista Cove Planned Development Project, Vallejo, California**

Baseline Environmental Consulting (Baseline) has performed a peer review of the Preliminary Geotechnical Exploration prepared by ENGEO and dated September 12, 2022, for the Vista Cove Planned Development Project (project) located on the property identified by Assessor's Parcel Numbers (APNs) 0079-171-170 and 0079-120-100 (project site). Baseline's peer review was performed to evaluate whether the Preliminary Geotechnical Exploration provides the necessary information to perform CEQA review for the project.

The Preliminary Geotechnical Exploration indicates that the main geotechnical and geologic concerns for the project include: 1) stability of graded slopes, 2) corrective grading for planned building sites, and 3) presence of moderate to highly expansive soil and bedrock. The Preliminary Geotechnical Exploration provides preliminary recommendations to address geotechnical and geologic concerns identified at the project site and indicates that a supplemental design-level geotechnical exploration should be performed to provide site-specific recommendations for site preparation, remedial and design grading, foundation design, site improvements, and drainage. In Baseline's opinion, the Preliminary Geotechnical Exploration provides the information necessary to perform CEQA review for the project.

The Preliminary Geotechnical Exploration indicates that corrective grading is anticipated to include construction of subsurface drainage facilities in engineered slopes, and all retaining walls should include subsurface drainage facilities to prevent the build-up of hydrostatic pressures behind the walls. The Preliminary Geotechnical Exploration also recommends that bioretention areas include a waterproof liner due to expansive soil conditions, or that alternatively if infiltration is desired, which would result in some risk of movement of adjacent improvements, the perimeter of the bioretention areas be lined with a tree root barrier that extends at least 1 foot below the bottom of the bioretention areas/infiltration trenches. Baseline recommends that the discharge of water from subsurface drainage features and the lining of bioretention areas be accounted for in the CEQA review of hydrology and water quality related impacts of the project.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Smith:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Property), located in Vallejo, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Property.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 and the American Society for Testing and Materials (ASTM) Practice E1527-13. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-13.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

EXECUTIVE SUMMARY

ENGEO conducted a phase I environmental site assessment for the property located at Wildflower Avenue in Vallejo, California (Property). The Property is approximately 29 acres in area and is identified by Assessor's Parcel Numbers (APNs) 0079-171-170, 0079-120-100, and a portion of 0079-220-070.

The Property is presently vegetated open space. Review of historical records indicates that the Property has remained undeveloped land since at least 1937 (the first year of aerial photographic coverage). The eastern portion of the Property was historically used for dry farming (hay cultivation).

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps, and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs), no historical RECs, and no controlled RECs were identified for the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gaps were identified during this assessment.

- We did not receive a response to our file review request from Solano County Environmental Health prior to the publication of this report.

- We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

These data gaps do not affect the conclusions as to the presence or lack of presence of RECs at the Property.

This assessment has revealed no evidence of RECs in connection with the Property, and the property is suitable for residential development. ENGEO recommends no further environmental studies at this time.

DRAFT

1.0 INTRODUCTION

1.1 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

This assessment was performed at the request of Sancerra for the purpose of environmental due diligence during property acquisition. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Property. As defined in the ASTM Standard Practice E1527-13, an REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

1.2 DETAILED SCOPE OF SERVICES

The scope of services performed included the following.

- A review of publicly available and practicably reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practicably reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of the Property to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Interviews with owners/occupants and public sector officials.
- Preparation of this report with our findings, opinions, and conclusions.

DRAFT

1.3 SITE LOCATION AND DESCRIPTION

The Property is located at Wildflower Avenue in Vallejo, California (Figures 1 and 2). The approximately 29-acre Property is identified as APNs 0079-171-170, 0079-120-100, and a portion of 0079-220-070 (Figure 3) and is currently vacant, vegetated open space.

1.4 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES

The Property is vacant, but the vegetation has been plowed to create several dirt paths through the Property. The Property is bordered by the Benicia State Recreation Area to the east, Interstate 780 to the north, and the Glen Cove neighborhood homes to the west and south.

1.5 SITE AND VICINITY CHARACTERISTICS

The Property consists of a northern and southern hill separated by a creek, which both slope downhill toward the east. According to published topographic maps, the elevation of the northern area of the Property ranges from approximately 160 feet above mean sea level (msl) in the west to 100 feet in the east. The elevation of the southern area ranges from approximately 290 feet in the west to approximately 90 feet above msl to the east. Review of the Geologic Map and Map Database of Northeastern San Francisco Bay Region, California – Most of Solano County and

Parts of Napa, Main, Contra Costa, San Joaquin, Sacramento, Yolo, and Sonoma Counties (Graymer et al., 2002) found that the Property is underlain by the Great Valley Complex, consisting of sandstone and shale from the Late Cretaceous period.

Geocheck – Physical Setting Source Summary of the Environmental Data Resources, Inc. (EDR) report (Appendix A) indicated no Federal United States Geological Survey (USGS) and three State wells are located approximately ½ mile west-northwest of the Property. No groundwater level measurements are reported for these wells. We also reviewed the Department of Water Resources On-line Water Data Library for depth to water in the vicinity of the Property. However, the website did not identify any wells within 1 mile of the Property.

We reviewed EnviroStor, a website maintained by the State of California Department of Toxic Substances Control (DTSC), and GeoTracker, a website maintained by the State of California Water Resources Control Board, for nearby facilities with records that include depth-to-groundwater measurements. The following information was obtained regarding local groundwater conditions. The case closure summary report for the Big 4 Rents facility, located approximately 750 feet east-northeast of the Property, indicates that groundwater may be found at a depth of 15 to 25 feet below the ground surface (bgs) with a flow direction toward the southwest, toward the marshland in Benicia State Recreation Area. Based on the local topographic gradient, we expect an easterly groundwater flow direction at the Property, similarly directed toward the marshland.

The site-specific depth to groundwater and direction of groundwater flow was not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors.

We reviewed the Department of Conservation, Geologic Energy Management (CalGEM), formerly the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), website and map database to determine if any historic oil and/or gas wells were located within the Property. No wells were mapped within 1 mile of the Property.

DRAFT

2.0 RECORDS REVIEW

2.1 PROPERTY RECORDS

2.1.1 Title Report/Ownership

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources.

A Preliminary Title Report for the Property, prepared by First American Title Company and dated February 4, 2022, was provided for our review. The Property title is vested in The Timothy F. Wei Trust; The Terrence F. Wei Trust; The Tammy F. Dong Trust; The Tina T. Dong Trust; The Litton L. Chen Trust; The Tiffany L. Chen Trust; The Thomas L. Chen Trust; The Tyler C. Chuang Trust; and The Troy Chuang Trust. No references to environmental liens, deed restrictions, or other potential environmental issues were noted. This report is included in Appendix B.

2.2 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to develop a history of the previous uses or occupancies of the Property and surrounding area in order to identify those uses or occupancies that are likely to have led to RECs on the Property.

2.2.1 Historical Topographic Maps/Aerial Photographs/Sanborn Maps

Historical USGS topographic maps and aerial photographs were reviewed to determine if discernible changes pertaining to the Property had been recorded. EDR provided the following maps and photographs, presented in Appendices C and D. No Sanborn Fire Insurance Maps were identified for the Property; a copy of the Sanborn Map search report is presented in Appendix E.

TABLE 2.2.1-1: Historical Review Summary

HISTORIC MAP/PHOTOGRAPH	YEARS
Topographic Maps	1896, 1898, 1901, 1902, 1940, 1942, 1947, 1950, 1952, 1959, 1968, 1973, 1980, 2012, 2015, 2018
Aerial Photographs	1937, 1939, 1947, 1952, 1958, 1968, 1974, 1982, 1987, 1993, 2006, 2009, 2012, 2016
Sanborn Maps	N/A

In the 1896 topographic map, the Property is vacant, undeveloped land. Benicia Road is depicted north of the Property. Southampton Bay and Glen Cove are depicted south of the Property, and marshes and a creek extending into Southampton Bay are depicted just east of the Property. In the 1937 and 1939 aerial photographs, the southeastern portion of the Property appears to be used for dry farming (hay cultivation). In the 1940 topographic map, two creeks are depicted traveling eastward through the center of the Property. By 1950, only one creek was depicted. Between 1959 and 1968, the alignment of Benicia Road was adjusted and Interstate 680 (now Interstate 780) was constructed just north of the Property. The adjacent Glen Cove neighborhood development was constructed between about 1974 and 1993. No significant changes have appeared at the Property throughout its history.

DRAFT

2.2.2 City Directory

City Directories, published since the 18th century for major towns and cities, list the name of the resident or business associated with each address. A city directory search conducted by EDR is located in Appendix F. The Property is unlisted. Nearby listings show a variety of residential homes and commercial businesses along Benicia Road. No listings were identified which could be expected to pose an environmental concern to the Property.

2.3 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the Property and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

2.3.1 Environmental Records

2.3.1.1 Subject Property

The Property is not listed on Environmental Record source databases.

2.3.1.2 Other Properties

The following databases include facilities listed within the appropriate ASTM search distances of the Property on Environmental Records sources.

TABLE 2.3.1.2-1: Environmental Database Listings for Nearby Properties

DRAFT

Shady Lane Sanitary Pump Station – 198 Wildflower Avenue

The Shady Lane Pump Station is located at the corner of Shady Lane and Wildflower Avenue, next to the northwestern area of the Property. The station is operated by Vallejo Sanitation & Flood Control District and overseen by Solano County Environmental Health, and stores chemicals. This station is not expected to pose an environmental concern to the Property.

California Highway Patrol Golden Gate Division – 1551 Benicia Road

California Highway Patrol Golden Gate Division, located approximately 200 feet north of the Property, is listed in the CERS, CERS HAZ WASTE, CERS TANKS, RCRA NONGEN / NLR, and UST databases. The facility has received numerous violations from Solano County Environmental

Health pertaining to hazardous waste storage and UST operation. However, these violations are not indicative of large-scale releases of hazardous chemicals to the environment.

Big 4 Rents, Inc./ Crusader Fence Company, Inc. – 1600 Benicia Road

Big 4 Rents is listed in the CA FID UST, CERS, CORTESE, ECHO, FINDS, HAZNET, HIST CORTESE, HIST UST, HWTS, LUST, RCRA-SQG, and SWEEPS UST databases. This facility is listed as a closed cleanup case under GeoTracker case listing T0609500271, as of November 1995. According to the case closure summary, a 4,000-gallon gasoline UST, 2,000-gallon diesel UST, and 1,000-gallon diesel UST were removed from the site in May 1995 following spills. Reportedly, 468 cubic yards of impacted soil were removed and off-hauled for landfill disposal, and groundwater was not impacted. Residual concentrations of total petroleum hydrocarbons in soil ranged from non-detect to 1 part per million (ppm). Benzene, toluene, ethylbenzene, and xylenes (BTEX) concentrations in soil were non-detect. Crusader Fence Company is the current, or more recent, tenant at this property. This facility has received several administrative violations pertaining to hazardous materials storage. Based on this information, this facility is not expected to pose an environmental concern to the Property.

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that the above-stated database sites pose an environmental risk to the Property.

One property, Benicia State Recreation Area, was listed on the “Orphan Summary” list. This site is listed in the SWF/LF database. This listing does not represent a concern to the Property.

2.4 REGULATORY AGENCY FILES AND RECORDS

The following agencies were contacted pertaining to possible past development and/or activity at the Property.

TABLE 2.4-1: Regulatory Agency Records

NAME OF AGENCY	RECORDS REVIEWED
City of Vallejo Fire Department	We contacted the City of Vallejo Fire Department regarding hazardous materials and underground storage tanks. The City does not maintain these records.
City of Vallejo Building Department	We requested historical building permit records from the City of Vallejo Building Department. We did not receive a response to our request by the time of publication of this report.
Solano County Department of Environmental Health	We contacted Solano County Environmental Health regarding hazardous materials and underground storage tanks. We did not receive a response to our file review request by the time of publication of this report.
Solano County Assessor’s Office	We reviewed online parcel maps provided by Solano County Assessor’s Office. The parcel boundaries in the EDR radius map report are consistent with those provided by Solano County Assessor’s office.
California State Water Resources Control Board	We reviewed GeoTracker, the website maintained by the California State Water Resources Control Board, for records pertaining to the Property. The Property is not listed on GeoTracker.

DRAFT

NAME OF AGENCY	RECORDS REVIEWED
Department of Toxic Substances Control	We reviewed EnviroStor, the website maintained by the California Department of Toxic Substances Control, for records pertaining to the Property. The Property is not listed on EnviroStor.

2.5 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Public Health has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 13 tests were conducted within the Property zip code, with two tests exceeding the current EPA action level of 4 picocuries per liter (pCi/L)[1].

In accordance with ASTM E2600-15 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); there is one potential petroleum hydrocarbon source for vapor intrusion within 1/10 mile of the Property (California Highway Patrol Golden Gate Division) and no volatile organic compound (VOCs) sources within 1/3 mile of the Property. As discussed, the California Highway Patrol facility is not expected to pose a concern to the Property.

3.0 SITE RECONNAISSANCE

3.1 METHODOLOGY

ENGEO conducted a reconnaissance of the Property on April 13, 2022. The reconnaissance was performed by Jenna Keith, a Staff Engineer of ENGEO. The Property was viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The Property was also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Photographs taken during the site reconnaissance are presented in Figure 4.

The Property is vacant, vegetated land. Several unpaved paths have been constructed through the natural vegetation in the northern portion of the Property. The southern/southwestern portion of the Property was inaccessible due to natural marshy areas and barbed wire fencing.

3.2 EXTERIOR OBSERVATIONS

The following table summarizes our observations during the reconnaissance.

TABLE 3.2-1: Exterior Site Observations

FEATURE TYPE	OBSERVATIONS
Structures	No structures were observed during the site reconnaissance.

[1] California Department of Public Health – Radon Program– (https://www.cdph.ca.gov/Programs/CEH/DRSEM/CDPH%20Document%20Library/EMB/Radon/Radon%20Test%20Results.pdf).

DRAFT

FEATURE TYPE	OBSERVATIONS
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No hazardous substances or petroleum products were observed within the Property during the site reconnaissance.
Storage Tanks (underground and above-ground)	No above-ground storage tanks or evidence of existing underground storage tanks was observed during the site reconnaissance.
Odors	No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.
Pools of Potentially Hazardous Liquid	No pools of potentially hazardous liquid were observed within the Property at the time of our reconnaissance.
Drums	No drums were observed on the Property at the time of the reconnaissance.
Polychlorinated Biphenyls (PCBs) Containing Equipment	No potential PCB-containing equipment, including transformers, were observed within the Property during our site reconnaissance.
Hazardous Substances and Petroleum Product Containers	No hazardous substance or petroleum product containers were observed on the Property at the time of our reconnaissance.
Pits, Ponds, and Lagoons	No pits, ponds, or lagoons were observed within the Property at the time of our reconnaissance. There are several natural marshy areas which collect water from concrete drainage channels.
Stained Soil/Pavement	No stained soil or pavement was observed within the Property at the time of our reconnaissance.
Stressed Vegetation	No signs of stressed vegetation were observed on the Property at the time of our reconnaissance.
Solid Waste/Debris	No disposal of solid waste was observed at the Property.
Stockpiles/Fill Material	No stockpiles or fill material was observed on the Property during the reconnaissance.
Wastewater	No wastewater conveyance systems were observed at the Property during the reconnaissance. The Shady Lane Pump Station is located at the corner of Shady Lane and Wildflower Avenue, next to the northwestern area of the Property. The station is operated by Vallejo Sanitation & Flood Control District and overseen by Solano County Environmental Health.
Wells	No wells were found within the Property during our site reconnaissance.
Septic Systems	No septic systems were found within the Property during our site reconnaissance.

DRAFT

3.3 ASBESTOS, LEAD, AND PCB-CONTAINING MATERIALS

An asbestos, lead, and PCB-containing building material survey was not conducted as part of this assessment. No structures are currently located on the Property.

4.0 INTERVIEWS

Mr. Adam Smith completed a Client-based environmental site questionnaire pertaining to applicable environmental information regarding the Property. In the questionnaire, Mr. Smith noted that the Property is unimproved, undeveloped land, and did not identify potentially environmentally related issues with the Property. A summary is provided below.

Mr. Smith is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. Mr. Smith has indicated that the purchase price of the Property is reflective of fair market value of the Property. The questionnaire is presented in its entirety in Appendix G.

We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

5.0 FINDINGS AND CONCLUSIONS

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no RECs, no historical RECs, and no controlled RECs were identified for the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC.

This assessment has revealed no evidence of RECs in connection with the Property, and the Property is suitable for residential development. ENGEO recommends no further environmental studies at this time.

6.0 LIMITATIONS

6.1 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE

There were no significant assumptions or deviations from the ASTM Standard Practice during preparation of this report.

DRAFT

6.2 OPINIONS AND DATA GAPS

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gaps were identified during this assessment.

- We did not receive a response to our file review request from Solano County Environmental Health or the City of Vallejo Building Department prior to the publication of this report.

- We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

These data gaps do not affect the conclusions as to the presence or lack of presence of RECs at the Property.

6.3 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports, and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. ENGEO assumes no liability for the validity of the materials relied upon in the preparation of this report.

DRAFT

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after completion of the report. Updates of portions of the assessment may be necessary after a period of 180 days after completion.

This phase I environmental site assessment is not intended to represent a complete soil, soil gas, or groundwater characterization, nor define the depth or extent of soil, soil gas, or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. A more extensive assessment that would include a subsurface exploration with laboratory testing of soil, soil gas, and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for the Property and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

6.4 SPECIAL TERMS AND CONDITIONS

ENGEO has prepared this report for the exclusive use of our client, Sancerra. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the Client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the Client.

Laboratory testing of soil, soil gas, or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), or a mold survey. A radon evaluation was not performed.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. ENGEO would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List

US INST CONTROLS Institutional Controls Sites List

Federal ERNS list

ERNS Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF Solid Waste Information System

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

Database: RESPONSE, Date of Government Version: 10/25/2021 Facility Id: 48880001 Status: Certified				

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 2 HIST Cal-Sites sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date:	02/15/1996
Comments:	Removal Action: Tires - Approximately 150 cubic yards of investigation accumulated waste (including leather scraps and associated soil) were transported to BFI Keller Canyon Landfill in Pittsburg, California. Approximately 1,100 cubic yards of leather and associated soil were transported to Altamont Landfill in Livermore, California. Additionally, 154 tires were removed from the excavation and transported to Big Sky Enterprises, in Benicia California for recycling. The completed excavation was approximately 134 feet long by 30 feet wide by 10 feet at its deepest point. Removal Activities continued until background levels were achieved. Confirmation samples were collected 2 feet beyond observed waste (in each direction). 22

SOUTHAMPTON/COMPANY/BLAKE COURT (Continued) **S100714944**

confirmation samples were collected (10 side wall samples and 12 bottom samples) and analyzed for total and hexavalent chromium.

Background Info:	A portion of the Southampton community was formerly occupied by the Braito landfill, also referred to as the Solano County Sanitary Landfill. From about 1955 to 1978, the site was privately owned and operated, pursuant to permits issued by the Solano County Department of Environmental Management (SCDEM) and Bay Area Regional Water Quality Control Board (RWQCB), as a sanitary landfill. The landifll operated primarily in two areas: the 12.3 acre east canyon site and the 6.4 acre north canyon site. The area subject to this environmental investigation is the north canyon site. Historically the landfill was not classified as a hazardous or toxic materials disposal site, but rather a Class III landfill. However, historical records show that hazardous wastes (e.g. tannery wastes) were also disposed at the site, and that several related enforcement actions were taken. In the early 1980's, following transfer of site ownership to Southampton Comapny, excavation of most of the landfilled wastes, and RWQCB approved closure, houses were constructed at the site. Homes were never constructed on the Blake Court lots, however, apparently due to the high cost of stabilizing these prospective home sites, i.e., the costs of engineering measures to mitigate foundation conditions. During site excavation and grading activities, the decision had been made to leave wastes at Blake Court because the wastes appeared to be "substantially decomposed" In June of 1991, the discovery of subsidence in the backyard of one of the homes (Lot 50), led to the discovery of a soft "black material" (believed to be tannery wastes) buired beneath that home and adjacent lots. In the widening investigation that ensued, it has become apparent that approximately 24,000cy of hazardous waste (i.e. 22,000 cy of refuse and 2,200 cy of black material) remained buried at the site. Investigative work today has included soil and groundwater sampling and testing (for site characterization and waste classification purposes), soil gas testing, a geophysical survey, and slope stability study. The responsible parties completed the remedial investigation/feasibility study in March 1997. Not reported

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2022
Date Data Arrived at EDR: 02/03/2022
Date Made Active in Reports: 02/22/2022
Number of Days to Update: 19

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills
This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VALLEJO PROPERTIES - GLEN COVE
NOT REPORTED
VALLEJO, CA 94591

TARGET PROPERTY COORDINATES

Latitude (North):	38.081568 - 38ˆ 4’ 53.64’’
Longitude (West):	122.201037 - 122ˆ 12’ 3.73’’
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	570071.4
UTM Y (Meters):	4214960.5
Elevation:	117 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12008089 BENICIA, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

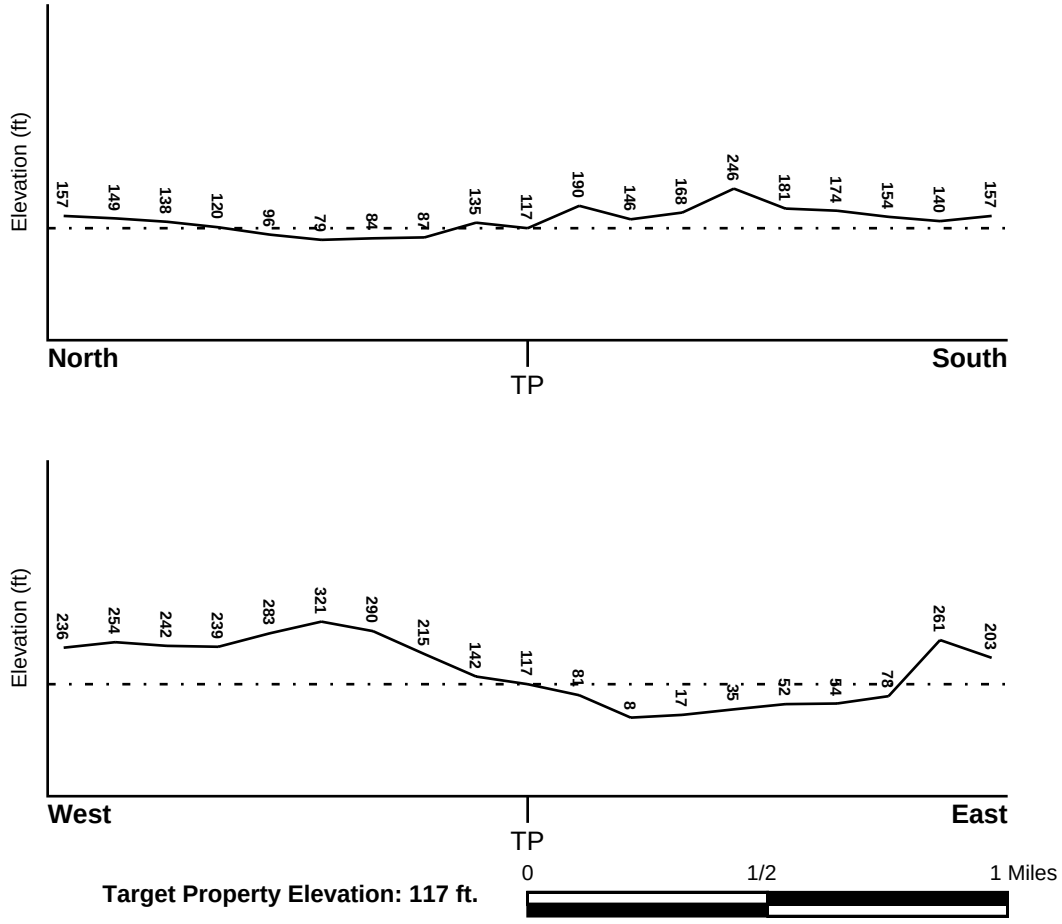
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 117 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06095C0630F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06095C0633E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BENICIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile ENE	WSW
2	1/2 - 1 Mile West	SSE
1G	1/4 - 1/2 Mile ENE	WSW
2G	1/2 - 1 Mile West	SSE

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Dibble

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
2	3 inches	20 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
3	20 inches	24 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:

Soil Map ID: 2

Soil Component Name: Dibble

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of February 04, 2022 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

TIMOTHY WEI, AS TRUSTEE OF THE TIMOTHY F. WEI TRUST DATED APRIL 1, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TERRENCE F. WEI, AS TRUSTEE OF THE TERRENCE F. WEI TRUST DATED MARCH 18, 2007; AS TO AN UNDIVIDED 1/9 INTEREST; TAMMY F. DONG, AS TRUSTEE OF THE TAMMY F. DONG TRUST DATED MARCH 17, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TINA T. DONG, AS TRUSTEE OF THE TINA T. DONG TRUST DATED FEBRUARY 26, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; LITTON L. CHEN, AS TRUSTEE OF THE LITTON L. CHEN TRUST DATED MARCH 18, 2007, AS AMENDED, AS TO AN UNDIVIDED 1/9 INTEREST; TIFFANY CHEN HERRERO, AS TRUSTEE OF THE TIFFANY L. CHEN TRUST DATED APRIL 3, 2007, AS AMENDED, AS TO AN UNDIVIDED 1/9 INTEREST; THOMAS L. CHEN, AS TRUSTEE OF THE THOMAS L. CHEN TRUST DATED MARCH 14, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TYLER C. CHUANG, MIKE M. CHUANG AND MARIE W. CHUANG, AS CO-TRUSTEES OF THE TYLER C. CHUANG TRUST DATED DECEMBER 31, 2008, AS TO AN UNDIVIDED 1/9 INTEREST; TROY CHUANG, MIKE M. CHUANG AND MARIE W. CHUANG, AS CO-TRUSTEES OF THE TROY CHUANG TRUST DATED DECEMBER 28, 2012, AS TO AN UNDIVIDED 1/9 INTEREST; ALL AS TENANTS IN COMMON

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee as to Parcel(s) One and Two, an easement as to Parcel(s) Three.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.

2. General and special taxes and assessments for the fiscal year 2021-2022.
First Installment: $1,845.49, PAID
Penalty: $0.00
Second Installment: $1,845.49, OPEN
Penalty: $0.00
Tax Rate Area: 7016
A. P. No.: 0079-120-100

Affects: Parcel One

3. General and special taxes and assessments for the fiscal year 2021-2022.
First Installment: $227.70, PAID
Penalty: $0.00
Second Installment: $227.70, OPEN
Penalty: $0.00
Tax Rate Area: 7047
A. P. No.: 0079-171-170

Affects: Parcel Two

4. The Land lies within the boundaries of proposed community facilities District No. 2014-1 (Clean Energy), as disclosed by a map filed August 27, 2015 in Book 0025, Page 55 of maps of assessment and community facilities districts and recorded August 27, 2015 as Instrument No. 201500078287 of Official Records.

5. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

6. The fact that the land lies within the boundaries of the Southeast Vallejo Redevelopment Project Area, as disclosed by various documents of record.

7. Abutter's rights of ingress and egress to or from the freeway have been relinquished in the document recorded October 20, 1958 as Book 944, Page 392 of Official Records.

Affects Parcel One

8. A waiver of any claims for damages by reason of the location, construction, landscaping or maintenance of a contiguous freeway, highway or roadway, as contained in the document recorded October 20, 1958 as Instrument No. 17024, Book 944, Page 392 of Official Records.

Affects Parcel One

9. An easement for ingress and egress and incidental purposes, recorded August 6, 1973 as Book 1844, Page 331 of Official Records.
In Favor of: City of Vallejo
Affects: A Portion of Said Land

The location of the easement cannot be determined from record information.

10. Covenants, conditions, restrictions and easements in the document recorded May 16, 1979 as Book 1979, Page 38579 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

    Document(s) declaring modifications thereof recorded October 25, 1979 as Book 1979, Page 91941 of Official Records.

    Affects Parcel Two

11. An easement shown or dedicated on the Map as referred to in the legal description

    For: Access, Landscape maintenance and incidental purposes.

    Affects: Parcel Two

12. Abutter's rights of ingress and egress to or from Shady Lane, have been dedicated or relinquished on the filed Map.

    Affects: Parcel Two

13. The terms and provisions contained in the document entitled Agreement To Maintain Area Within Landscape Maintenance District recorded May 29, 1987 as Page 71802 of Official Records.

    Affects Parcel Two

14. Any easements and/or servitudes affecting easement parcel(s) Three herein described.

15. Any right, title or interest of the spouse (if any) of Litton Chen, Tiffany Chen aka Tiffany Herrero and Timothy Wei.

16. Water rights, claims or title to water, whether or not shown by the Public Records.

17. Rights of parties in possession.

Prior to the issuance of any policy of title insurance, the Company will require:

18. A deed from the spouse (if any) of Litton Chen, Tiffany Chen aka Tiffany Herrero and Timothy Wei be recorded in the public records, or the joinder of the spouse named herein on any conveyance, encumbrance or lease to be executed by said married person.
    The deed should contain the following statement:
    "It is the express intent of the grantor, being the spouse of the grantee, to convey all right, title and interest of the grantor, community or otherwise, in and to the herein described property to the grantee as his/her sole and separate property."

19. With respect to the trust referred to in the vesting:
a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

LEGAL DESCRIPTION

Real property in the City of Vallejo, County of Solano, State of California, described as follows:

PARCEL ONE: (APN: 0079-120-100)

BEGINNING AT A POINT AT THE INTERSECTION OF THE NORTHWESTERLY LINE OF THAT CERTAIN PARCEL OF LAND, DESCRIBED IN DEED TO FRANK SPENGER, ET UX, RECORDED JULY 26, 1954, OFFICIAL RECORDS, IN BOOK 724, PAGE 474, SOLANO COUNTY RECORDS, WITH THE GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND, DESCRIBED IN DEED TO THE STATE OF CALIFORNIA FOR INTERSTATE FREEWAY 680 RECORDED IN BOOK 944, OFFICIAL RECORDS, PAGE 392, SOLANO COUNTY RECORDS; THENCE ALONG SAID NORTHWESTERLY LINE OF SPENGER, SOUTH 21° 58' 48" WEST 266.80 FEET AND SOUTH 22° 16' 28" WEST, 1675.30 FEET TO THE EASTERLY TERMINUS OF THE COMMON BOUNDARY LINE DESCRIBED IN THAT CERTAIN BOUNDARY AGREEMENT EXECUTED BY MARY A. SILVA, ET AL, DATED MAY 11, 1972 AND RECORDED MAY 30, 1972 IN BOOK 1754 OF OFFICIAL RECORDS, PAGE 21, AS INSTRUMENT NO. 12027; THENCE ALONG SAID COMMON BOUNDARY NORTH 59° 00' 20" WEST, 453.83 FEET; THENCE LEAVING SAID COMMON BOUNDARY AND RUNNING ALONG THE FOLLOWING COURSES AND DISTANCES: NORTH 30° 52' 36" EAST, 819.08 FEET; NORTH 59° 07' 24" WEST, 488.00 FEET; NORTH 16° 36' 03" WEST, 541.10 FEET; NORTH 26° 48' 16" WEST, 500.00 FEET; TO THE INTERSECTION THEREOF WITH THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND DESCRIBED IN DEED TO THE STATE OF CALIFORNIA; THENCE ALONG THE SAID GENERAL SOUTHERLY LINE THE FOLLOWING COURSES AND DISTANCES: NORTH 83° 15' 11" EAST 107.36 FEET; SOUTH 45° 09' 17"; EAST, 241.31 FEET; SOUTH 78° 53' 57" EAST, 676.07 FEET; NORTH 81° 38' 30" EAST, 324.45 FEET, AND SOUTH 64° 40' 59" EAST, 265.86 FEET TO THE POINT OF BEGINNING.

EXCEPTING THEREFROM:

THAT PORTION DESCRIBED IN THE DEED OF PARTIAL RECONVEYANCE RECORDED JULY 26, 1973 IN BOOK 1842, PAGE 355 AS INSTRUMENT NO. 18396, SOLANO COUNTY RECORDS AND BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT AT THE INTERSECTION OF THE SOUTHEASTERLY LINE OF COUNTY ROAD NO. 267, AS IT PRESENTLY EXISTS, 50 FEET IN WIDTH, SAID COUNTY ROAD NO. 267 ALSO KNOWN AS GLEN COVE ROAD, WITH THE GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA FOR INTERSTATE 680 FREEWAY BY DEED RECORDED IN BOOK 944 OF OFFICIAL RECORDS, PAGE 392, INSTRUMENT NO. 17024, SOLANO COUNTY RECORDS; THENCE ALONG THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA, NORTH 71° 44' 04" EAST, 132.30 FEET TO THE BEGINNING OF A NON-TANGENT CURVE WHOSE RADIAL BEARS SOUTH 0° 48' 57" EAST FROM ITS CENTER; THENCE ALONG THE SAID NON-TANGENT CURVE TO THE LEFT, CONCAVED TO THE NORTHWEST, HAVING A RADIUS OF 310 FEET, THROUGH A CENTRAL ANGLE OF 47° 53' 56", FOR AN ARC LENGTH OF 259.16 FEET TO THE END OF THE NON-TANGENT CURVE WHOSE RADIAL BEARS SOUTH 48° 42' 53" EAST FROM ITS CENTER; THENCE CONTINUING ALONG THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA, SOUTH 70° 17' 14" EAST, 628.79 FEET; NORTH 88° 35' 56" EAST, 306.96 FEET; SOUTH 66° 02' 26" EAST, 308.06 FEET; NORTH 83° 15' 11" EAST, 522.00 FEET TO THE TRUE POINT OF BEGINNING; THENCE LEAVING THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA, SOUTH 26° 48' 16" EAST, 500.00 FEET; SOUTH 16° 36' 03" EAST, 541.1 FEET; SOUTH 59° 07' 24" EAST, 488.00 FEET; NORTH 3° 27' 42" EAST, 945.96 FEET TO THE INTERSECTION THEREOF WITH THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF

CALIFORNIA; THENCE ALONG THE SAID GENERAL SOUTHERLY LINE OF THAT CERTAIN PARCEL OF LAND CONVEYED TO THE STATE OF CALIFORNIA, NORTH 78° 53' 57" WEST, 589.34 FEET; NORTH 45° 09' 17" WEST, 241.31 FEET; SOUTH 83° 15' 11" WEST, 107.36 FEET TO THE TRUE POINT OF BEGINNING.

PARCEL TWO: (APN: 0079-171-170)

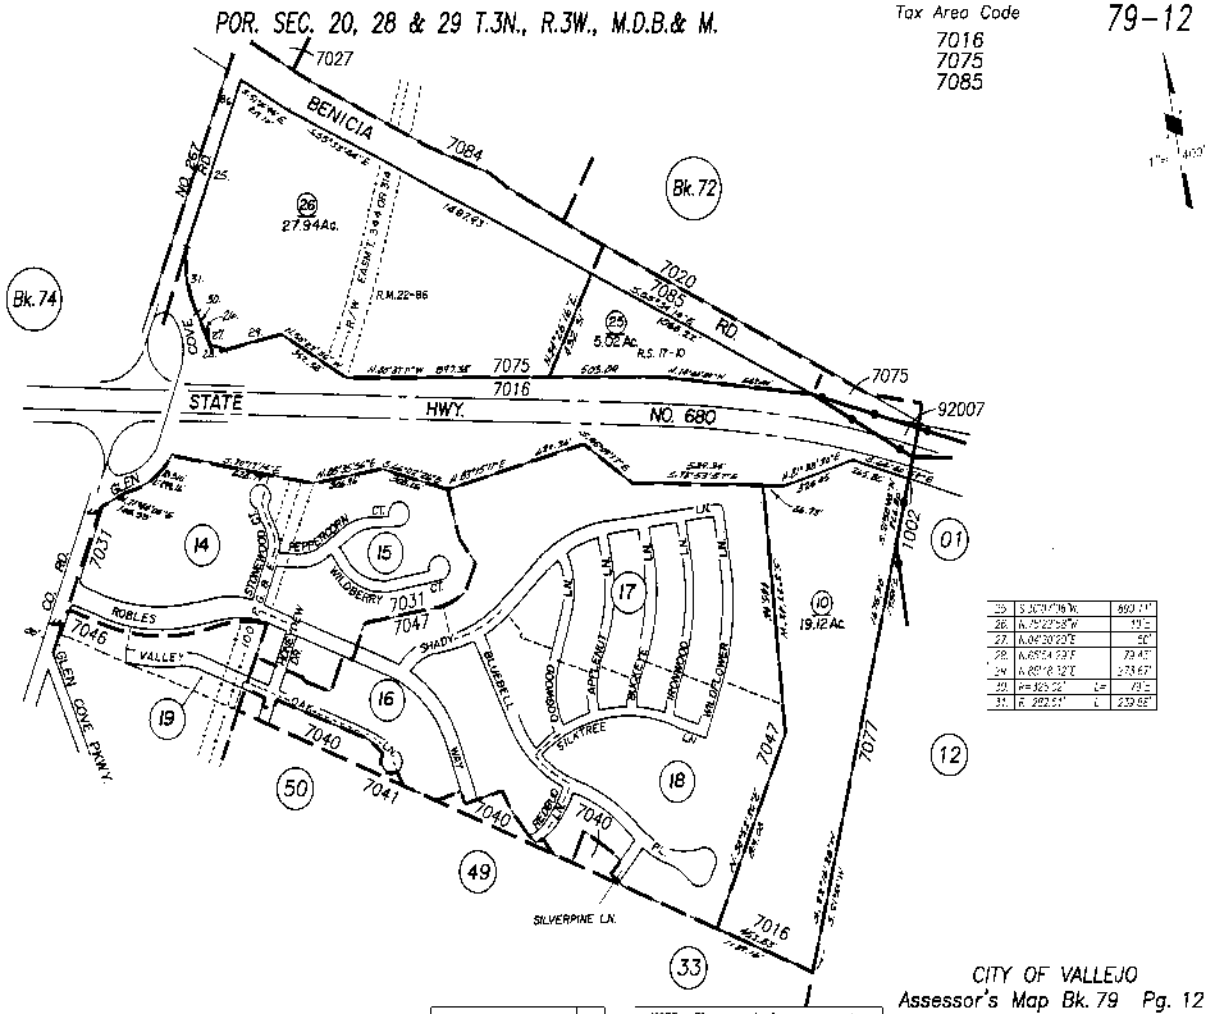
BEING A PORTION OF LOT 15, AS SAID LOT IS SHOWN UPON THE MAP OF GLEN COVE, UNIT II, RECORDED MAY 16, 1979, IN BOOK 36 OF MAPS AT PAGES 93 THROUGH 104, SOLANO COUNTY RECORDS, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING ON THE NORTHERLY LINE OF SHADY LANE AT THE INTERSECTION THERETO WITH THE NORTHERLY PROLONGATION OF THE CENTERLINE OF IRONWOOD LANE, AS SAID LANES AND CENTERLINE ARE SHOWN UPON SAID MAP OF GLEN COVE, UNIT II; THENCE FROM SAID POINT OF BEGINNING ALONG SAID NORTHERLY LINE NORTH 88° 41' 10" WEST 37.00 FEET; THENCE LEAVING SAID NORTHERLY LINE AT RIGHT ANGLES NORTH 1° 18' 50" EAST 128 FEET, MORE OR LESS, TO THE NORTHERLY LINE OF SAID LOT 15; THENCE ALONG SAID NORTHERLY LINE OF LOT 15 SOUTH 78° 47' 27" EAST 450 FEET, MORE OR LESS TO THE NORTHEASTERLY CORNER THEREOF; THENCE ALONG THE EASTERLY LINE OF SAID LOT 15 SOUTH 3° 34' 12" WEST 69.26 FEET TO THE SOUTHEASTERLY CORNER THEREOF, ALSO BEING THE NORTHEASTERLY CORNER OF LOT 16, AS SAID LOT 16 IS SHOWN UPON SAID MAP; THENCE ALONG THE COMMON LINE BETWEEN SAID LOTS 15 AND 16 NORTH 88° 41' 10" WEST 213.67 FEET TO THE NORTHWEST CORNER OF SAID LOT 16 IN THE EASTERLY LINE OF WILDFLOWER AVENUE AS SHOWN UPON SAID MAP; THENCE ALONG THE NORTHEASTERLY LINE OF SAID WILDFLOWER AVENUE IN A NORTHWESTERLY DIRECTION ON A TANGENT CURVE TO THE LEFT, HAVING A RADIUS OF 20.00 FEET, THROUGH A CENTRAL ANGLE OF 90° 00' 00", AN ARC DISTANCE OF 31.42 FEET TO SAID NORTHERLY LINE OF SHADY LANE; THENCE ALONG SAID LAST DESCRIBED NORTHERLY LINE NORTH 88° 41' 10" WEST 172.71 FEET TO THE POINT OF BEGINNING.

PARCEL THREE:

AN ACCESS EASEMENT OVER THAT REAL PROPERTY BEING A PORTION OF LOT 16, UNIT II OF THE GLEN COVE TRACT, IN THE CITY OF VALLEJO, COUNTY OF SOLANO, STATE OF CALIFORNIA, MAP RECORDED IN BOOK 36 OF MAPS, PAGES 93 THROUGH 104, IN THE OFFICE OF THE COUNTY RECORDER OF THE COUNTY OF SOLANO, DESCRIBED AS FOLLOWS:

BEGINNING AT THE NORTHWEST CORNER OF SAID LOT 16; THENCE ALONG THE NORTHERLY LOT LINE SOUTH 88° 41' 10" EAST, 25.00 FEET; THENCE SOUTH 54° 04' 45" WEST, 31.40 FEET TO A POINT ON THE WESTERLY LOT LINE; THENCE ALONG SAID WESTERLY LINE NORTH 1° 18' 50" EAST, 19.00 FEET TO THE POINT OF BEGINNING, AS GRANTED IN THE DEED FROM DONALD L. BREN COMPANY, RECORDED NOVEMBER 19, 1982 AT PAGE 76541, SOLANO COUNTY RECORDS, INSTRUMENT NO. 43623.



First American Title

Order Number: OSA-6781631 (RA)
Page Number: 10

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;

(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d),

14 or 16.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

Privacy Notice

Effective: October 1, 2019

Notice Last Updated: January 1, 2022

This Privacy Notice describes how First American Financial Corporation and its subsidiaries and affiliates (together referred to as "First American," "we," "us," or "our") collect, use, store, and share your information with the exception that a subsidiary or affiliate has their own privacy policy, that policy governs. This Privacy Notice applies to information we receive from you offline only, as well as from third parties, when you interact with us and/or use and access our services and products ("Products"). For more information about our privacy practices, including our online practices, please visit https://www.firstam.com/privacy-policy/. The practices described in this Privacy Notice are subject to applicable laws in the places in which we operate.

What Type Of Information Do We Collect About You? We collect a variety of categories of information about you. To learn more about the categories of information we collect, please visit https://www.firstam.com/privacy-policy/.

How Do We Collect Your Information? We collect your information: (1) directly from you; (2) automatically when you interact with us; and (3) from third parties, including business parties and affiliates.

How Do We Use Your Information? We may use your information in a variety of ways, including but not limited to providing the services you have requested, fulfilling your transactions, comply with relevant laws and our policies, and handling a claim. To learn more about how we may use your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Share Your Information? We do not sell your personal information. We only share your information, including to subsidiaries, affiliates, and to unaffiliated third parties: (1) with your consent; (2) in a business transfer; (3) to service providers; and (4) for legal process and protection. To learn more about how we share your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Store and Protect Your Information? The security of your information is important to us. That is why we take commercially reasonable steps to make sure your information is protected. We use our best efforts to maintain commercially reasonable technical, organizational, and physical safeguards, consistent with applicable law, to protect your information.

How Long Do We Keep Your Information? We keep your information for as long as necessary in accordance with the purpose for which it was collected, our business needs, and our legal and regulatory obligations.

Your Choices We provide you the ability to exercise certain controls and choices regarding our collection, use, storage, and sharing of your information. You can learn more about your choices by visiting https://www.firstam.com/privacy-policy/.

International Jurisdictions: Our Products are offered in the United States of America (US), and are subject to US federal, state, and local law. If you are accessing the Products from another country, please be advised that you may be transferring your information to us in the US, and you consent to that transfer and use of your information in accordance with this Privacy Notice. You also agree to abide by the applicable laws of applicable US federal, state, and local laws concerning your use of the Products, and your agreements with us.

We may change this Privacy Notice from time to time. Any and all changes to this Privacy Notice will be reflected on this page, and where appropriate provided in person or by another electronic method. **YOUR CONTINUED USE, ACCESS, OR INTERACTION WITH OUR PRODUCTS OR YOUR CONTINUED COMMUNICATIONS WITH US AFTER THIS NOTICE HAS BEEN PROVIDED TO YOU WILL REPRESENT THAT YOU HAVE READ AND UNDERSTOOD THIS PRIVACY NOTICE.**

First American Title™

For California Residents

If you are a California resident, you may have certain rights under California law, including but not limited to the California Consumer Privacy Act of 2018 ("CCPA"). All phrases used in this section shall have the same meaning as those phrases are used under California law, including the CCPA.

Right to Know. You have a right to request that we disclose the following information to you: (1) the categories of personal information we have collected about or from you; (2) the categories of sources from which the personal information was collected; (3) the business or commercial purpose for such collection and/or disclosure; (4) the categories of third parties with whom we have shared your personal information; and (5) the specific pieces of your personal information we have collected. To submit a verified request for this information, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097

Right of Deletion. You also have a right to request that we delete the personal information we have collected from and about you. This right is subject to certain exceptions available under the CCPA and other applicable law. To submit a verified request for deletion, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097.

Verification Process. For either a request to know or delete, we will verify your identity before responding to your request. To verify your identity, we will generally match the identifying information provided in your request with the information we have on file about you. Depending on the sensitivity of the information requested, we may also utilize more stringent verification methods to verify your identity, including but not limited to requesting additional information from you and/or requiring you to sign a declaration under penalty of perjury.

Notice of Sale. We do not sell California resident information, nor have we sold California resident information in the past 12 months. To the extent any First American affiliated entity has a different practice, it will be stated in the applicable privacy policy. We have no actual knowledge of selling the information of minors under the age of 16.

Right of Non-Discrimination. You have a right to exercise your rights under California law, including under the CCPA, without suffering discrimination. Accordingly, First American will not discriminate against you in any way if you choose to exercise your rights under the CCPA.

Notice of Collection. To learn more about the categories of personal information we have collected about California residents over the last 12 months, please see "What Information Do We Collect About You" in https://www.firstam.com/privacy-policy. To learn about the sources from which we have collected that information, the business and commercial purpose for its collection, and the categories of third parties with whom we have shared that information, please see "How Do We Collect Your Information", "How Do We Use Your Information", and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Notice of Sale. We have not sold the personal information of California residents in the past 12 months.

Notice of Disclosure. To learn more about the categories of personal information we may have disclosed about California residents in the past 12 months, please see "How Do We Use Your Information" and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # B899-4BA0-870E

PO # NA

Project 20164.000.001

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: B899-4BA0-870E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✓ Library of Congress
- ✓ University Publications of America
- ✓ EDR Private Collection

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR CLIENT

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

PART I

1. Property address and Assessor's Parcel Number (APN):

   Property is located at the NEC of Shady lane and Wildflower Street.
   Assessor Parcels 0079-120-100 and 0079-171-170

2. Current property owner (name, address, voice/fax number):

   Susan Chen and Litton Chen for the Timothy Wei Trust
   3620 Ralston Avenue | Hillsborough, CA 94010

3. Date current property owner assumed title of property:

   Records indicate the Timothy Wei Trust assumed owership on 11/29/2013

4. Current property development/improvements:

   Property is undeveloped land.

5. Past property use, development/improvements:

   The property has remained unimproved, undelveoped land.

6. Neighboring property uses:

   Immediately adjacent to the subject site, to the west, is a residential subdivsion. Immediately adjacent, the the east, is Benicia State Park.

PART II

1. Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law?	☐ Yes	☑ No	
2. Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes	☑ No	
3. Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes	☑ No	
4. If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*?	☑ Yes	☐ No	
5. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*	☐ Yes	☑ No	☐ N/A
6. Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a) do you know of specific chemicals that are present or once were present at the *property*? (b) do you know of spills or other chemical releases that have taken place at the *property*? (c) do you know of any environmental cleanups that have taken place at the *property*?	☐ Yes	☑ No	
7. Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?	☐ Yes	☑ No	

If a "Yes" response was provided to any of the above questions, please provide details below:

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

Name (Printed/Typed): Adam Smith

Signature: Adam Smith Date: 4/6/22

JEFFREY ADAMS, PHD, PE
Principal

Jeff joined ENGEO in 1999. He leads environmental assessment, characterization, remediation projects, and Geologic Hazard Abatement District (GHAD) formation. He has contributed to a wide range of remediation and development projects in high-density and low-density urban and suburban settings redeveloped for a variety of uses.

Jeff's research interests include green and sustainable remediation (GSR), resilient and sustainable infrastructure solutions, environmental applications, and emerging public/private financial mechanisms to mitigate flood-related losses. He has authored and co-authored numerous environmental remediation-related textbooks, instructional materials, and research papers that have been presented worldwide and published in a diverse group of academic and professional journals.

SELECT PROJECT EXPERIENCE

Howard Terminal—Oakland, CA
Lead Environmental Principal. Jeff has provided ongoing technical leadership during several environmental studies for the redevelopment of the Howard Terminal site. The approximately 62.1-acre Property is a former container terminal along the Port of Oakland's Inner Harbor. The Property was originally a bulk-break terminal dating back to the early 1900s, with a manufactured gas plant located in the eastern portion of the Property. The terminal was expanded and converted to a container terminal in the 1980s. Improvements will include a Major League Baseball stadium as well as mid-rise and high-rise buildings to provide a mix of residential, retail, and other commercial uses. ENGEO performed a Phase I Environmental Site Assessment (ESA), Phase II ESAs consisting of soil, soil gas, and groundwater sampling across the property, EIR preparation support, the preparation of a human health and ecological risk assessment (HHERA), and is developing a removal action work plan (RAW).

Google San Jose Downtown West—San Jose, CA
Project Manager. Jeff provided technical leadership and review for a comprehensive ESA for various industrial and commercial properties over approximately 50 acres in downtown San Jose considered for acquisition by Google. The purpose of the assessment was to identify known and unknown environmental concerns and recommended appropriate actions to quantify potential risks to inform due diligence efforts. The risk assessment utilized an innovative

Geographic Information System (GIS) digital interactive platform that provides additional data beyond typical environmental information and is scalable for future project plans.

The South Lathrop Commerce Center—Tracy, CA
Lead Environmental Principal. Jeff provided technical leadership and review for a Phase I ESA for the approximately 245-acre master-planned industrial development. The 4.2-million-square-foot development includes nine tilt-up concrete buildings, ranging in size from 282,000 square feet to over 1,000,000 square feet. Additional improvements for the logistics center include detention and retention basins, paved streets, parking, and drive lanes, a stormwater pump station and outfall, and a sewer lift station. Site development activities include grading operations, primarily consisting of minor cuts and fills, for individual pads and roadways, underground utility installation, pump station and outfall structure construction, flexible and rigid pavement construction, and vertical construction.

Crown Chevrolet Property—Dublin, CA
Project Manager. Jeff provided comprehensive environmental consultation services for the project. Working on behalf of the purchaser, Jeff collaborated with a multi-firm consulting team to characterize and mitigate environmental impacts resulting from previous on-site automotive maintenance activities and off-site businesses. Jeff designed and managed a site characterization program that definitively demonstrated that groundwater and soil gas impacts at the site were the result of off-site releases. He peer reviewed the design and implementation of a permeable reactive barrier (PRB), which serves to remediate an encroaching groundwater plume, as well as vapor intrusion mitigation systems for the site. He also completed a Phase I ESA for a remnant parcel subsequently developed for housing for veterans. The site consists of a multi-story commercial and residential apartment/condominium "transit village" complex.

3512 Clayton Road—Concord, CA
Lead Environmental Principal. Jeff provided technical leadership and review for a Brownfields redevelopment project in Concord. Following the Phase I and Phase II ESAs that identified soil and soil gas impacts, he assisted in the development of a remediation program that included a comprehensive pre-characterization program, accurately delineating soil impacts from past light-industrial uses and soil gas impacts from off-site businesses, allowing for accelerated field implementation. Following active soil remediation and post-remediation soil gas sampling, Jeff and the ENGEO team performed a vapor intrusion risk assessment that confirmed the site did not require long-term vapor mitigation systems. The site was granted case closure from the oversight regulatory agency within an accelerated review and approval timeframe. The project consists of a high-density residential development.

Blacow Road Project—Fremont, CA
Environmental Principal. Jeff has provided technical assistance for project remediation activities and prepared a Phase I ESA for site. The site is an active, open remediation site under the regulatory oversight of the San Francisco Bay Regional Water Quality Control Board (RWQCB). Impacts resulted from a variety of on-site and off-site commercial and industrial land uses dating back over 50 years. ENGEO has performed numerous characterization, remediation design, and monitoring services for the Site. Remediation activities are underway at the site to address groundwater and soil gas impacts from volatile organic compounds (VOCs) and petroleum hydrocarbons. The remediation approach consists of several remedial and mitigative technologies, including soil vapor extraction (SVE), in-situ enhanced bioremediation, and post-remediation vapor intrusion mitigation systems to be installed in future residential structures. The project consists of a residential development.

Eastvale 79—Eastvale, CA
*Environmental Principal***.** Jeff served in an Environmental Principal role for environmental studies at the site. ENGEO performed a Phase I ESA and a subsequent ESA update that included regulatory file reviews, interviews with property owners and regulatory agencies, a site reconnaissance, and preparation of a report documenting our findings. The approximately 16-acre site was historically associated with a portion of a dairy dating to at least 1967. During grading activities, a localized area of stained and odoriferous soil was observed in the southeast corner of the site. ENGEO coordinated and managed remediation efforts, confirmation sampling, and coordination with Riverside County DEH. Approximately 4,115 tons petroleum-impacted soil were removed and disposed. The DEH issued "No Further Action" status for the site.

Alameda Landing—Alameda, CA
Project Manager. Project Manager, Lead Environmental Principal. Jeff has provided comprehensive environmental consultation services for the Alameda Landing project. He has prepared and managed the completion of Phase I ESA and ESA Update studies for subunits of the greater project area. He directed environmental characterization operations for the site, which was suspected of having been affected by naturally occurring methane deposits within the subsurface. Working closely with innovative protocols, Jeff was able to demonstrate to regulatory oversight officials that expensive vapor intrusion mitigation systems were not necessary for proposed residential structures, potentially saving millions of dollars to the site developer. Additionally, he has prepared several Remedial Action Completion Reports (RACRs) of development phases to achieve regulatory case closure. The project consists of a multi-phased residential housing community built as part of a master-planned redevelopment of a former United States Navy facility.

VTA BART Silicon Valley Berryessa Extension Design-Build Project—San Jose, CA
Project Manager. As the lead project team member with respect to hazardous materials, Jeff provided a range of value engineering consulting services relating to existing soils, groundwater, and building materials. ENGEO provided a range of value engineering consulting services to address existing soils, hydrology resources, SWPPP, and building materials.

Following a complex right-of-way that extended through numerous developed areas and paralleled an existing rail line, the project generated hundreds of thousands of cubic yards of excavated soil with potential toxic and hazard concerns. The right-of-way intersected several groundwater plumes emanating from former industrial and commercial sources. Further, a number of structures in the project footprint harbored lead-based paint and asbestos-containing building materials. ENGEO led the effort to accurately quantify these materials and devise strategies to effectively manage and mitigate these materials to drive overall project cost savings.

Foster City Civic Center Lots—Foster City, CA
Assistant Project Manager. Jeff provided technical oversight for a Phase I ESA for the Foster City Civic Center site and environmental characterization operations for the site, which was suspected of having been affected by unauthorized petroleum hydrocarbon releases within the subsurface. Following the completion of a soil gas survey, Jeff and team demonstrated that vapor intrusion mitigation systems were not necessary for proposed development, providing a significant cost savings to the project. The project consists of a multi-use urban infill development.

Macedo Property Environmental Consultation—Livermore, CA
Project Manager. Jeff provided comprehensive environmental consultation services for a Brownfields redevelopment project in Livermore. The project included several challenges, including ongoing business activities at the site and complex contaminant conditions resulting

from a long history of site operation of an automotive service station. Following a comprehensive site characterization plan that he developed, Jeff developed a cost-effective remedial plan to address hydrocarbon-contaminated soil. Jeff worked closely with the design team to rapidly remediate the site contamination using a soil excavation program that minimized disturbance to the active businesses at the site. Through Jeff's project oversight, the characterization and remediation activities were completed on time and under budget. Because of his effective work with various project stakeholders, the site was granted case closure from the oversight regulatory agency within an accelerated timeframe, allowing redevelopment to occur on schedule. The project consists of a residential subdivision. The project consists of a residential subdivision.

1511 Jefferson—Oakland, CA
Project Manager. Jeff provided environmental and geotechnical consultation services for a Brownfields redevelopment project in downtown Oakland. The project included several challenges, including limited site access due to on-site business activities, environmental impact related to previous site use, and the presence of several adjacent mid-rise structures. Jeff developed efficient remedial value engineering solutions to mitigate the presence of geotechnical and environmental development constraints. Jeff worked with the design team to establish cost-effective retaining wall and foundation systems, designed and observed a subsurface environmental mitigation program, and assisted in the design of a structure-wide vapor barrier. The project, serving as a cornerstone of the revitalization of downtown Oakland, consists of a multi-story residential condominium structure.

Alamo Creek—Danville, CA
Project Manager. Jeff prepared guidance documents and helped to form a transit-focused County Service Area (CSA). The transit-focused CSA, believed to be the first in Contra Costa County, helped to establish commuter transit service for a recently constructed residential development. Utilizing market analysis research provided by other consultants, he prepared an Engineer's Report that outlined a three-part phased implementation of transit, beginning with vanpools and ultimately resulting in an airporter-style fleet of bus service to and from an existing Bay Area Rapid Transit station. Jeff also prepared a long-range budget and confirmed a yearly assessment to ensure financial solvency of the CSA over the lifetime of the development. The CSA serves the Alamo Creek development and vicinity in Contra Costa County, California.

Alcosta Boulevard/Interstate 680 Interchange Project—San Ramon, CA
Project Engineer. Jeff performed an Aerially Deposited Lead (ADL) assessment program for the Alcosta Boulevard/Interstate 680 Interchange Improvement. The purpose of the investigation was to determine existing lead levels in surface soils. The scope of services included the recovery of soil samples from the surface to a depth of 3 feet below the ground surface, analytical testing of the samples to determine hydrogen ion content (pH testing), total lead, STLC WET soluble lead, and STLC TCLP soluble lead analyses, and a statistical analysis to determine Confidence Intervals (CI) of soil lead concentrations. An innovative, risk-based statistical analysis was performed to assure site soils were suitable for on-site reuse in accordance with Caltrans/State of California regulations. The project consists of a rehabilitation and realignment of the interstate highway interchange.

Arroyo Crossing—Livermore, CA
Project Engineer. Jeff contributed to the award-winning project, which included an extensive scope of work, including supplemental geotechnical exploration, Phase I and II ESAs, underground storage tank removal and groundwater monitoring. Jeff provided environmental analysis of existing subsurface conditions, helping the design team to implement a comprehensive yet innovative geotechnical and environmental mitigation program. Following

completion of environmental remediation activities, Jeff was able to secure a substantial federal corporate income tax rebate on behalf of the client through the EPA's Brownfields Tax Incentive program. The project consists of a residential subdivision re-use of a former quarry.

Brookside - Guadalupe Mines Road—San Jose, CA
Senior Engineer. Jeff performed a review of existing environmental documents by others, consultation with the client, and peer review document preparation. This 16-acre commercial property is planned for redevelopment into a roughly 95-lot single-family residential development. Site challenges include pre-existing environmental impacts, existing fills, creek bank stability/meander, and faulting.

East Garrison Development - Operations and Maintenance Plan—Carmel, CA
Project Engineer. Jeff prepared an Operations and Maintenance Plan (OMP) that included an assemblage of projected capital and maintenance costs from a range of consultants into working 50-year budgets for both a County Service District (CSD) and a homeowner's association (HOA). He worked to reach agreement with a number of project stakeholders, including the developer, other consultants, and local government agencies. In addition to assisting in the preparation of capital expenditure projections, Jeff developed the two operating and maintenance budgets, maintenance activity schedules and checklists, and the governing document for the two maintenance entities. The project consists of a redevelopment from a former military facility to a residential subdivision.

Highlands Ranch, Unit 3 - Environmental T&O—Pittsburg, CA
Project Engineer. Jeff managed the remediation of a former petroleum tank farm located in a rural/exurban setting. The extensive remediation program was in support of a conversion of industrial site usage into residential site usage. At this prototypical Brownfield site, Jeff personally oversaw all field operations involving a series of subcontractors, including an innovative ex-situ enhanced bioremediation program of impacted soils. Following excavation, Jeff worked closely with California Department of Toxic Substances Control (DTSC) personnel to determine the suitability of the intended site reuse. Jeff implemented an innovative statistical procedure in accordance with State and Federal Environmental Agency Best Practices to assure the site was safe for residential use. The project consists of a large-scale residential subdivision.

Highway 4 Bypass - Lime Treatment Consultation—Brentwood, CA
Project Manager. Jeff served as Project Manager. He provided consultation services that consisted of a variety of forensic analyses pertaining to the lime treatment of sub-base soils. Jeff worked closely with the project contractor as well as a diverse range of stakeholders to determine if lime treatment materials used in construction had met project specification. Following several protocols, including ASTM methods, Jeff demonstrated the absence of a statistical correlation that would confirm the use of substandard materials. Jeff's work was used to produce an opinion on behalf of the project team that the treated materials would be expected to adequately perform over the design life of the project, saving significant cost overruns. The project consists of a multi-lane highway constructed within a rapidly growing region of Eastern Contra Costa County. The project consists of a multi-lane highway constructed within a rapidly growing region of Eastern Contra Costa County.

Lockheed Martin Storm Water Pond No 4—Sunnyvale, CA
Project Manager. Jeff provided permitting consultation services, including the federal and state permitting required for the maintenance of a stormwater detention system. Jeff has also provided geotechnical and environmental support to evaluate the geotechnical conditions of the site. He also determined the absence of environmentally impacted materials within the site area. The site

consists of a stormwater detention basin measuring approximately 4.5 acres in area and located adjacent to sensitive habitat.

New Farm Agricultural and Meteorological Assessment—Contra Costa County, CA
Project Manager. Jeff managed an agricultural suitability evaluation. As part of the project, a portion of hillside open space is to be devoted to cultivation as olive groves. Jeff led the effort to review USDA soil maps and to test onsite soils for the ability to support olive cultivation. The soils were compared to active olive orchards in other locations of Contra Costa County. The project consists of a residential development with agricultural-intensive open space. Jeff managed an agricultural suitability evaluation. As part of the project, a portion of hillside open space is to be devoted to cultivation as olive groves. Jeff led the effort to review USDA soil maps and to test on-site soils for the ability to support olive cultivation. The soils were compared to active olive orchards in other locations of Contra Costa County. The project consists of a residential development with agricultural-intensive open space.

San Ramon Village Plaza - Environmental Consultation—Dublin, CA
Project Manager. Jeff contributed to an environmental peer review of previous land uses, which included a former dry cleaner. Further investigation identified impact due to former site operations. Jeff assisted in a remediation program, closely collaborating with other consultants representing different parties of the property transaction. The site was efficiently remediated, allowing for redevelopment. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site.

Schaefer Ranch - GHAD Consultation—Dublin, CA
Project Engineer. Jeff assisted with the scoping, Plan of Control preparation, budget, and formation processes of a Geologic Hazard Abatement District (GHAD). The scope of the GHAD includes maintenance of slopes, water conveyance features, habitat, and other features. Proactive maintenance, assessment, repair and replacement are also the responsibility of the GHAD subject to the limitations of the Plan of Control. The project consists of a large-scale residential subdivision in the East Bay hills west of Dublin.

Sparklizing Cleaners and Laundry—Fremont, CA
Project Engineer. Jeff provided review and data analysis for this former dry cleaning facility that had released tetrachloroethylene (PCE) to site soil and groundwater. Work included site characterizations using direct push borings, soil gas surveys, well installations, and a remedial alternatives evaluation. He has also assisted in the development of a remedial program for the site. The project site consists of a dry-cleaning facility located within a commercial/retail center. Dry-cleaning operations occurred at the facility since 1974 and resulted in chlorinated solvent impacts to soil and groundwater beneath the site. As a result, the RWQCB opened a Spills, Leaks, Investigations, and Cleanups (SLIC) case and the site was referred to the Alameda County Water District (ACWD) for lead agency oversight. A series of soil and groundwater investigations identified a source area beneath the drycleaner suite and an adjoining retail suite. ENGEO prepared a Corrective Action Plan (CAP) and coordinated the in-situ chemical oxidation program that consisted of injecting 35,000 gallons of potassium permanganate to the subsurface to oxidize chlorinated solvents. The project is currently in the post-remediation monitoring phase.

Stone Lock District Development - Consulting Services—West Sacramento, CA
Project Engineer. Jeff prepared a pro forma analysis of infrastructure-related costs for a preliminary development concept of the property. The analysis included a cost estimate for all site improvements, grading, utilities, and non-structural facilities. Included in the analysis was an evaluation of the existing adjacent levee system. Jeff worked with other team members to provide

a preliminary assessment of the existing levee condition and prepared a cost estimate for levee rehabilitation and reconstruction. The project consists of a proposed mixed-use redevelopment as part of a city revitalization plan.

Torian Parcels - Additional Phase II Environmental Site Assessment—Newark, CA
Project Manager. Jeff served as Project Manager and Project Engineer. He provided comprehensive geotechnical and environmental evaluation. Several significant geotechnical and environmental conditions existed at the property, including compressible soils, liquefiable soils, and significant deposits of non-engineered fill and debris. Several areas of soil and groundwater environmental impact were present due to historic industrial use at and in the vicinity of the site. Jeff performed a financial analysis of several mitigation alternatives to identify the most cost effective remedial solution, one in which a single remedial program in several locations addressed both environmental and geotechnical impact. Additionally, Jeff worked closely with the environmental oversight agency to develop a work plan to assess potential environmental impact. In developing and implementing the work plan, Jeff was able to demonstrate that environmental impact at the property was not as extensive as previously believed. This allowed for an alteration of the proposed site plan to avoid areas of potential impact, saving significant projected redevelopment costs. The project consists of a residential redevelopment of a 40-acre property formerly used for industrial purposes. The project consists of a residential redevelopment of a 40-acre property formerly used for industrial purposes.

Los Banos Airport - Phase I ESA—Los Banos, CA
Project Engineer. Jeff provided a Phase I ESA, prepared a soil and groundwater characterization program, and developed a conceptual soil remediation work plan as part of a multi-phase development. The Los Banos Airport project measures approximately 112 acres in area.

Navlet's Garden Center Concord - Phase I ESA—Concord, CA
Project Manager. Jeff prepared a Phase I ESA for the site. Jeff was able to effectively navigate through the complex historic records and ownership legacy associated with the property. He prepared a report that satisfied the demands and deadline of both the ownership entity and the financial institutions associated with the property. The project consists of a Navlet's Garden Center.

Mare Island, 3rd and Connelly Utility Corridor Environmental Services—Vallejo, CA
Project Engineer. Jeff provided environmental consultation support. During excavation of the utility corridor, zones of impacted soil were identified and removed from an approximate 9,300-square-foot footprint area and depths from 5 to 10½ feet below existing grade. The project consisted of utility demolition and soil excavation activities required to prepare for construction of a 300-foot water and sewer utility corridor along Connelly Street between 3rd Street and Azuar Drive.

Maggiore Property - Soil Remediation—Brentwood, CA
Project Engineer. Jeff directed field remediation operations for the site, which had been affected by an unauthorized subsurface petroleum product release. He managed a site plume delineation and groundwater-monitoring program. Additionally, Jeff performed RBCA Tier I and Tier II assessments to determine feasibility of residential development of property. The project consists of a small residential subdivision.

Cree Court Slide Repair—San Ramon, CA
Project Engineer. Jeff assisted in the development and implementation of a custom-tailored "top-down" construction procedure, allowing the project to be constructed on time and under

budget. Additionally, Jeff helped develop an innovative non-structural grouting procedure to verify proper structural tieback performance. The project consisted of an integrated structural and grading-related repair for the mitigation of a large active landslide in proximity to existing homes. A 70-foot-high retaining wall is now in place to stabilize a major, active landslide.

Sequoia/Conifer Terrace - Structural Repair Design—Danville, CA
Project Engineer. Jeff assisted in the design of a structural repair system for a landslide remediation project within a residential setting. He provided recommendations to help optimize construction of system and lessen financial burden of project. The project consisted of a unique structural repair for the mitigation of a large active landslide in close proximity to existing homes.

DRAFT

ENGEO
Expect Excellence

MEMORANDUM

Date: March 25, 2025 **Job No.:** 24217-00

To: Florentina Craciun, LSA

From: Cem Atabek, Baseline Environmental Consulting

Subject: **Peer Review of Phase I Environmental Site Assessment, Vista Cove Planned Development Project, Vallejo, California**

Baseline Environmental Consulting (Baseline) has performed a peer review of the Phase I Environmental Site Assessment (ESA) prepared by ENGEO and dated April 26, 2022, for the approximately 29-acre property identified by Assessor's Parcel Numbers (APNs) 0079-171-170, 0079-120-100, and a portion of 0079-220-070 in Vallejo, California (Site). Baseline noted that the Vista Cove Planned Development Project (project) is located only on APNs 0079-171-170 and 0079-120-100 (project site) and does not include the southeastern portion of the Site evaluated in the Phase I ESA. Baseline's peer review was performed to evaluate whether the Phase I ESA was prepared in accordance with the ASTM International[1] Standard for Phase I ESAs and adequately evaluates the Site history, existing observable conditions, current Site use, and current and former uses of surrounding properties to identify the potential presence of Recognized Environmental Conditions (RECs) and other environmental concerns at the Site.

Compliance with ASTM Standard for Phase I ESA

Based on our review, we believe that the Phase I ESA was prepared in general accordance with ASTM E1527-21, which is the most current ASTM Standard for Phase I ESAs. Assumptions, limitations, and deviations from ASTM Standards are presented on pages 9 to 11 of the Phase I ESA and include the description of data gaps which ENGEO indicated do not affect the conclusions as to the presence or lack of presence of RECs at the Site. Baseline concurs that the data gaps should not affect the conclusions as to the presence or lack of presence of RECs at the Site.

Identification of RECs and Other Environmental Concerns

Based on our review, we believe that the Phase I ESA adequately evaluated the Site history, existing observable conditions, current Site use, and current and former uses of surrounding properties to identify the potential presence of RECs at the Site. Based on our review of the Phase I ESA, Baseline has not identified RECs or other environmental concerns at the project site.

APPENDIX G

DRAINAGE MEMORANDUM, PRELIMINARY STORMWATER CONTROL PLAN, AND DRAINAGE STUDY

ENGINEERING
SURVEYING • PLANNING

MEMORANDUM

To: Adam Smith, Sancerra

From: Andrew D. Palffy, P.E., dk Engineering

Date: May 3, 2023, Revised November 17, 2023

Subject: Drainage Study for Vista Cove in Vallejo, California

---

The existing property at the intersection of Wildflower Ave and Shady Lane in Vallejo, California is 20.13 acres and consists of an undeveloped grassy hillside. The proposed project covers the northern 11.78 acres of the 20.13 acre property, consisting of 51 single-family homes complete with roadways and sidewalk areas. Please refer to the Development Review, Minor Use, Small-Lot Subdivision and Tentative Map Package prepared by dk Engineering on May 3, 2023 for the existing conditions and proposed site plans.

To accommodate the City of Vallejo's requirements for stormwater detention, Contra Costa Clean Water Program's C.3 guidebook, City of Vallejo Appendix A: Local Exceptions and Additional Requirements, the City of Vallejo Final Hydromodification Management Plan and the Solano County Water Agency Hydrology Manual were referred to for the site design. Per the City of Vallejo Final Hydromodification Report, the project uses the HEC-HMS software to design on-site hydromodification controls that provide flow duration control. To run the HEC-HMS simulation for the site, the Solano County Water Agency Report Chapter 3 guidelines were used. As shown on the proposed project site plan, the project is proposed with 2 detention basins that have treatment-only bioretention at the basin base.

The existing site has 3 ridges which split the existing drainage direction (show in Attachment A). Ultimately, all the existing drainage is directed downhill to the Benicia State Park, where the stormwater runoff converges and is directed to the Carquinez Strait. For the HEC-HMS simulation, all three existing drainage areas used the Solano County Water Agency Hydrology Manual recommended initial losses for Open Fields with Minimal vegetation, a value of 0.2 inches.

The proposed developed project has 2 drainage areas (Attachment B) that converge at one outfall where the stormwater runoff is directed to a detention basin and then treated with bioretention. For the HEC-HMS simulation, the drainage areas use the weighted average of the Solano County Water Agency Hydrology Manual recommended initial losses for Paved Areas and Lawn Grass (see Table 1). The Average for DA 2A is 0.172 inches and for DA 2B is 0.183 inches. Proposed Basin 2A is 3.33 feet deep. Proposed Basin 2B is 5.5 feet deep. The privately-owned basins are sized to have a minimum of one (1) foot of freeboard in the 100-year storm event and utilize side slopes of 3:1. Table 2 below summarizes the design flows for the 15 year and 100 year storm events. The project's storm water is directed to the detention basin via a storm drain pipe system as well as sheet flow over landscaped areas. The basins have an overflow inlet which has orifices sized to control the outfall flow rates. From the overflow inlet, the water runs through an 18" storm drain pipe to the east side of the property where it outfalls into the existing marshland area that is adjacent to the Benicia State Park. Please see attachment C for the existing drainage pathway.

Hydrology and basin sizing will be finalized during the final design phase of this project.

1931 San Miguel Drive, Suite 100, Walnut Creek, CA 94596 Tel: (925) 932-6868 www.dkEngin.com

Table 1. HEC-HMS coefficients from the Solano County Water Agency Hydrology Manual Chapter 3

Hydrologic Soil Type: D	Recommended Constant Loss Rate: 0.02 in/hour
Recommend Initial Losses: Existing	*"Open Fields with Minimal vegetation"* = 0.2 inches
Recommended Initial Losses: DA 2A	Weighted average of *"Paved Area: 0.0 inches" and "Lawn Grass: 0.3 inches"* = 0.172 inches
Recommended Initial Losses: DA 2B	Weighted average of *"Paved Area: 0.0 inches" and "Lawn Grass: 0.3 inches"* = 0.183 inches
Snyder Standard Lag Times	(Equation 3-6) See Attachment A and Attachment B for specific lag times used.

I. PROJECT DATA

Table 1. Project Data

Project Name/Number	Vista Cove
Application Submittal Date	November 2023
Project Location	A portion of 0079-120-100, 0079-171-170, 0079-220-070; Shady Lane and Wildflower Road Vallejo, CA
Name of Developer	Sancerra
Project Phase No.	NA
Project Type and Description	Residential development with 51 single family homes
Project Watershed	Glen Cove
Total Project Site Area (acres)	Total Site Area (Lot 1): 10.395 Ac Parcel A: 8.356 Ac Parcel B: 1.381 Ac
Total Area of Land Disturbed (acres)	10.49 acres
Total New Impervious Surface Area (sq. ft.)	171, 896 sf
Total Replaced Impervious Surface Area	0 sf
Total Pre-Project Impervious Surface Area	0 sf
Total Post-Project Impervious Surface Area	171, 868 sf
50% Rule[*]	Applies
Project Density	2.53 units/acre
Applicable Special Project Categories	None.
Percent LID and non-LID treatment	100% LID treatment
HM Compliance [†]	Applies

[*50% rule applies if:
Total Replaced Impervious Surface Area > 0.5 x Pre-Project Impervious Surface Area]

[†HM required (unless project meets one of the exemptions on *Guidebook* p. 11) if:
(Total New Impervious Surface Area + Total Replaced Impervious Surface Area) ≥ 1 acre]

II. SETTING

II.A. Project Location and Description

The Vista Cove project site is located in the city of Vallejo, California at the intersection of Shady Lane and Wildflower Ave. The project plans to have 51 single family residential units with access roadways, bioretention areas and site landscaping. The site will have 51 lots and various sized landscaped parcels. The project's zoning is mix of Housing Types/Medium Density which requires lots to have front, corner side and rear yards and maximum lot coverage of 60% of the lot. The project is not anticipated to be phased. The property is located adjacent to the Glen Cove subdivision that consists of single-family homes. A vicinity map is provided as a supplemental attachment to this report.

II.B. Existing Site Features and Conditions

The existing undeveloped property is 20.13 acres and currently sits as fully vegetative covered area that slopes downhill to the southeastern side of the property. The property ranges in elevation from 75 to 155. There are currently no impervious areas on the site. There are 2 existing hydrologic features on the site, identified as a riparian area and a freshwater marsh. No existing municipal storm drain features exist on the property. The existing drainage for the site sheet flows off the site toward the adjacent 780 highway to the northeast, the riparian area in the property, the freshwater marsh in the property and off site to the adjacent City owned parcel to the southeast of the property. The existing soil type on the site includes lean clay with sand and sandstone and siltstone, the hydrologic soil group is category D and ground water was not encountered when borings were performed.

II.C. Opportunities for Stormwater Control

This site utilities 100% LID treatment via bioretention areas. The existing site drains to the southeastern boundary of the site. The natural direction of the flow is maintained to allow for prime bioretention space opportunities. The large difference in elevation for the site encourages the stormwater to flow via gravity to these bioretention areas and be treated prior to out falling to the existing water way location.

III. LOW IMPACT DEVELOPMENT DESIGN STRATEGIES

III.A. Optimization of Site Layout

III.A.1. Limitation of development envelope
The developable area consists of 11.78 acres of the property boundary. Parcel A is not a part of the project. The existing riparian area is to be avoided.

III.A.2. Preservation of natural drainage features
The riparian area in the middle of the developed area is preserved on the site as an enhanced feature of the site.

III.A.3. Setbacks from creeks, wetlands, and riparian habitats
The riparian limits clarified by the project biologists are accounted for in the site plan.

III.A.4. Minimization of imperviousness
Project pathways are designed to minimum widths but offer a walkable environment and landscaped areas are provided in lieu of potential impervious beautification features.

III.A.5. Use of drainage as a design element
Bioretention facilities are incorporated into the site as a design element to the site landscaping.

III.B. Use of Permeable Pavements

Permeable pavement material is not used at the site. The bioretention features meet the treatment sizing requirements for stormwater control.

III.C. Dispersal of Runoff to Pervious Areas

Where feasible, drainage from impervious areas is directed to pervious spaces. Ultimately, drainage from the site is all directed to pervious bioretention areas that are placed throughout the site.

III.D. Bioretention or other Integrated Management Practices

Bioretention areas have been designed per the IMP sizing calculator requirements. The site is graded to drain to low points, which is where the bioretention spaces are located throughout the site.

IV. DOCUMENTATION OF DRAINAGE DESIGN

IV.A. Descriptions of each Drainage Management Area

IV.A.1. Table of Drainage Management Areas

Table 2. Drainage Management Areas

DMA Name	*Area (SF)*	*Surface Type/Description*	*DMA Type/Drains to*
DMA 1	59,945	Impervious area and pervious area	Drains to bioretention area IMP 1
DMA 2	282,178	Impervious area and pervious area	Drains to bioretention area IMP 2
Self-Treating	101,865	Pervious Area	Self-Treating Area

IV.A.2. Drainage Management Area Descriptions

DMA 1, totaling 59,945 square feet, drains towards the northwest corner of the property. DMA 1, with 27,427 sf impervious area and 32,518 sf pervious area, drains to IMP 1, a bioretention area that has a treatment area of 1,228 sf.

DMA 2, totaling 282,178 square feet, drains towards the northwest corner of the property. DMA 2, with 144,462 sf impervious area and 137,716 sf pervious area, drains to IMP 2, a bioretention area that has a treatment area of 6,390 sf.

Self-treating DMA, totaling 101,865 square feet, consists of pervious area and drains to adjacent pervious space at the northeastern side of the property and the southeastern side of the property.

IV.B. Integrated Management Practice Descriptions

The bioretention areas are designed for treatment only. Flow control measures are incorporated via detention basins that sit above the bioretention area. The base rock layer of the bioretention is 12" deep. The overflow structure is also set at 1' below freeboard of the 100-year storm event. to allow for ponding prior to being treated and then traveling directly into the storm drain system. The facilities are sized per the Contra Costa IMP calculator and the results are included on the Stormwater Control Plan attached. Refer to the separate drainage study memo prepared by dk Engineering, Revised November 2023 for discussion on the hydromodification element of the proposed basins.

IV.C. Tabulation and Sizing Calculations

See IMP calculator results on the Stormwater Control Plan sheet (Attachment B).

V. SOURCE CONTROL MEASURES

V.A. Site activities and potential sources of pollutants

Potential sources of pollutants may include on-site dumping into storm drain inlets, the need for future or structural pest control, landscape/outdoor pesticide use, streets and sidewalks debris. To account for these potential sources, the source control table below lists control opportunities.

V.B. Source Control Table

Table 3. Source Controls

Potential source of runoff pollutants	Permanent source control BMPs	Operational source control BMPs
On-site dumping into storm drain inlets	All accessible on-site inlets require stainless steel markers with statement "No Dumping – Drains to Bay" or similar	Markings will be periodically replaced. Inlets and pipes conveying stormwater to BMPs will be inspected and maintained as part of BMP Operation and Maintenance Plan.
Need for future indoor or structural pest control		Integrated Pest Management (IPM) information will be provided to property owners.
Landscape/outdoor pesticide use	Final landscape plans will: Be designed to minimize irrigation and runoff and to minimize use of fertilizers and pesticides that can contribute to stormwater pollution. Specific plantings within bioretention areas and swales that are tolerant of the sandy loam soil and periodic inundation. Include pest-resistant plants. Include plantings appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, and plant interactions.	Landscape will be maintained using minimum or no pesticides. IPM information will be provided to property owners
Streets and Sidewalks		Sweep streets and sidewalks to prevent accumulation of litter and debris. Collect debris from pressure washing to prevent entry into the storm drain system. Collect wash water containing any cleaning agent or degreaser and discharge to the sanitary sewer, not to the storm drain.

V.C. Features, Materials, and Methods of Construction of Source Control BMPs

Source control BMPs will be designed and implemented per the CASQA BMP fact sheets and project construction specifications.

VI. STORMWATER FACILITY MAINTENANCE

VI.A. Ownership and Responsibility for Maintenance in Perpetuity

The ownership and responsibility for maintenance of the facilities will be determined when approved project improvements are available.

VI.B. Summary of Maintenance Requirements for Each Stormwater Facility

The maintenance requirements will be provided when approved project improvements are available.

EXECUTIVE SUMMARY

Urban Crossroads, Inc. has prepared this noise study to identify noise impacts and any necessary noise mitigation measures for the Vista Cove development ("Project") located at Shady Lane and Wildflower Road (APN's 0037-030-200, 0037-030-210, 0037-060-480), in the City of Vallejo. The proposed Project would subdivide 20.13 acres and develop 51 single-family detached homes on approximately 10 acres, with the remaining area being open space. This study has been prepared to satisfy the applicable City of Vallejo standards and thresholds of significance based on Appendix G of the California Environmental Quality Act (CEQA) Guidelines. (1)

EXTERIOR NOISE ABATEMENT

To satisfy the City of Vallejo exterior noise level standard of 60 dBA L_{dn} for single-family residential land uses, the construction of a noise barrier is recommended for the outdoor living area (backyards) of Lots 8 and 16, adjacent to Interstate 780 (I-780). With the recommended noise barriers shown in Exhibit ES-A, the future exterior noise levels will range from 26.9 to 59.5 dBA CNEL. This noise analysis shows that the recommended noise barrier will satisfy the City of Vallejo 60 dBA L_{dn} exterior noise level standards for single-residential land uses. The effective noise barrier height recommendations represent the minimum wall and/or berm combination height required to satisfy the City of Vallejo exterior noise level standards.

The recommended noise control barriers shall be constructed so that the top of each wall and /or berm combination extends to the planned height above the pad elevation of the lot it is shielding. When the road is elevated above the pad elevation, the barrier shall extend to the recommended height above the highest point between the residential home and the road. The barrier shall provide a surface area weight of at least 4 pounds per square foot with no decorative cutouts or line-of-sight openings between shielded areas and the roadways or a minimum transmission loss of 20 dBA. (2) The noise barrier shall be constructed using the following materials:

- Masonry block;
- Stucco veneer over wood framing (or foam core), or 1-inch-thick tongue and groove wood of sufficient weight per square foot;
- Glass (1/4-inch-thick), or other transparent material with sufficient weight per square foot capable of providing a minimum transmission loss of 20 dBA;
- Earthen berm;
- Any combination of these construction materials.
- The barrier shall consist of a solid face from top to bottom. Unnecessary openings or decorative cutouts shall not be made. All gaps (except for weep holes) should be filled with grout or caulking.

EXHIBIT ES-A: RECOMMENDED BARRIER LOCATIONS

INTERIOR NOISE ABATEMENT

Typical building construction will provide a Noise Reduction (NR) of approximately 12 dBA with "windows open" and a minimum 25 dBA noise reduction with "windows closed." (3) The interior noise level analysis shows that the City of Vallejo 45 dBA CNEL interior noise standard can be satisfied using standard windows and mechanical ventilation (e.g., air conditioning) being provided for all units. Since Project architectural plans are unavailable at this time, the Project should submit a final interior noise analysis to the building department during the final plan check.

OFF-SITE TRAFFIC NOISE

The expected Project is anticipated to generate approximately 510 trips per day. The location where the greatest chance of an impact occurs is at the residence near the Project site entrance and at Shady Lane and Wildflower Avenue. Without consideration of any barriers, the Project is predicted to generate a noise level of 50.2 dBA CNEL at the nearest building façade. Therefore, the Project would not expose existing noise-sensitive receivers to excessive noise levels, and the off-site traffic noise level impacts due to the Project are considered *less than significant*.

OPERATIONAL NOISE

The Project's primary noise sources would be air conditioners. Project operational noise levels at off-site receiver locations are expected to range from 23.7 to 33.3 dBA $L_{eq.}$ Project operational noise levels will satisfy Section 16.502.09 of the City of Vallejo Municipal Code daytime and nighttime noise standards of 60 dBA and 50 dBA L_{eq}, respectively, at all residential receivers. Therefore, Project-related operational noise impacts would be *less than significant*.

CONSTRUCTION NOISE ANALYSIS

Construction noise levels are expected to create temporary and intermittent high noise levels at receivers surrounding the Project site when activities occur at the closest point to the nearby receiver locations from the edge of Project construction activity. Using reference noise levels to represent the construction activities at the Project site, this analysis estimates the Project-related construction noise levels at nearby sensitive receiver locations. The results of the analysis show the highest construction noise levels at the potentially impacted receiver locations are expected to approach 65.0 dBA L_{eq}.

The Project related construction equipment noise levels are anticipated to satisfy the City of Vallejo Municipal Code construction noise level standards of 80 dBA for mobile equipment during typical Project construction activities at all receiver locations. Therefore, the short-term Project construction impacts are considered a *less than significant.*

CONSTRUCTION VIBRATION ANALYSIS

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that ground-borne vibration from Project construction activities would cause only intermittent,

localized intrusion. Project construction vibration velocity levels are expected to approach 0.07 in/sec PPV at the nearby receiver locations, and will therefore, not exceed the vibration threshold of 0.10 in/sec PPV. Therefore, construction related vibration impacts would be *less than significant*.

SUMMARY OF SIGNIFICANCE FINDINGS

The results of this Vista Cove Noise Impact Analysis are summarized below based on the significance criteria in Section 4 of this report. Table ES-1 shows the findings of significance for each potential noise and/or vibration impact before and after incorporation of Project design features.

TABLE ES-1: SUMMARY OF SIGNIFICANCE FINDINGS

Operational Noise	10	*Less Than Significant*	-
Construction Noise	11	*Less Than Significant*	-
Construction Vibration		*Less Than Significant*	-

1 INTRODUCTION

This noise analysis has been completed to determine the noise impacts associated with the development of the Vista Cove ("Project"). This noise study describes the Project, provides information regarding noise and vibration fundamentals, outlines the local regulatory setting, provides the study methods and procedures for performing noise analysis, evaluates potential noise impacts from the project, and identifies mitigation measures to reduce impacts, as necessary.

1.1 SITE LOCATION

The Project is located at Shady Lane and Wildflower Road in the City of Vallejo. APN's 0037-030-200, 0037-030-210, 0037-060-480, in the City of Vallejo. The Project's location in relation to the surrounding area is shown in Exhibit 1-A. The surrounding land use designations are Residential (Primarily Single Gamily) to the west, Saint Patrick Saint Vincent High School (Public Facilities and Institutions) to the north across Interstate 780 (I-780), and Parks, Recreation and Open Space to the south and east.

1.2 PROJECT DESCRIPTION

The proposed Project would subdivide 20.13 acres and develop 51 single-family detached homes on approximately 10 acres, with the remaining area being open space. At Buildout the Project is anticipated to generate 510 trips per day. The primary operational noise sources are air conditioning units.

2 FUNDAMENTALS

Noise has been simply defined as "unwanted sound." Sound becomes unwanted when it interferes with normal activities, when it causes actual physical harm or when it has adverse effects on health. Noise is measured on a logarithmic scale of sound pressure level known as a decibel (dB). A-weighted decibels (dBA) approximate the subjective response of the human ear to broad frequency noise source by discriminating against very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear. Exhibit 2-A presents a summary of the typical noise levels and their subjective loudness and effects that are described in more detail below.

EXHIBIT 2-A: TYPICAL NOISE LEVELS

COMMON OUTDOOR ACTIVITIES	COMMON INDOOR ACTIVITIES	A - WEIGHTED SOUND LEVEL dBA	SUBJECTIVE LOUDNESS	EFFECTS OF NOISE
THRESHOLD OF PAIN		140	INTOLERABLE OR DEAFENING	HEARING LOSS
NEAR JET ENGINE		130		
		120		
JET FLY-OVER AT 300m (1000 ft)	ROCK BAND	110		
LOUD AUTO HORN		100	VERY NOISY	
GAS LAWN MOWER AT 1m (3 ft)		90		
DIESEL TRUCK AT 15m (50 ft), at 80 km/hr (50 mph)	FOOD BLENDER AT 1m (3 ft)	80		SPEECH INTERFERENCE
NOISY URBAN AREA, DAYTIME	VACUUM CLEANER AT 3m (10 ft)	70	LOUD	
HEAVY TRAFFIC AT 90m (300 ft)	NORMAL SPEECH AT 1m (3 ft)	60		
QUIET URBAN DAYTIME	LARGE BUSINESS OFFICE	50	MODERATE	SLEEP DISTURBANCE
QUIET URBAN NIGHTTIME	THEATER, LARGE CONFERENCE ROOM (BACKGROUND)	40

LOWEST THRESHOLD OF HUMAN HEARING	LOWEST THRESHOLD OF HUMAN HEARING	0		

Source: Environmental Protection Agency Office of Noise Abatement and Control, Information on Levels of Environmental Noise Requisite to Protect Public Health and Welfare with an Adequate Margin of Safety (EPA/ONAC 550/9-74-004) March 1974.

2.1 RANGE OF NOISE

Since the range of intensities that the human ear can detect is so large, the scale frequently used to measure intensity is a scale based on multiples of 10, the logarithmic scale. The scale for measuring intensity is the decibel scale. Each interval of 10 decibels indicates a sound energy ten times greater than before, which is perceived by the human ear as being roughly twice as loud. (4) The most common sounds vary between 40 dBA (very quiet) to 100 dBA (very loud). Normal conversation at three feet is roughly at 60 dBA, while loud jet engine noises equate to 110 dBA

at approximately 100 feet, which can cause serious discomfort. (5) Another important aspect of noise is the duration of the sound and the way it is described and distributed in time.

2.2 NOISE DESCRIPTORS

Environmental noise descriptors are generally based on averages, rather than instantaneous, noise levels. The most commonly used figure is the equivalent level (L_{eq}). Equivalent sound levels are not measured directly but are calculated from sound pressure levels typically measured in A-weighted decibels (dBA). The equivalent sound level (L_{eq}) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period and is commonly used to describe the "average" noise levels within the environment.

To describe the time-varying character of environmental noise, the statistical or percentile noise descriptors L_{50}, L_{25}, L_8 and L_2, are commonly used. The percentile noise descriptors are the noise levels equaled or exceeded during 50 percent, 25 percent, 8 percent, and 2 percent of a stated time. Sound levels associated with the L_2 and L_8 typically describe transient or short-term events, while levels associated with the L_{50} describe the steady state (or median) noise conditions. While the L_{50} describes the median noise levels occurring 50 percent of the time, the L_{eq} accounts for the total energy (average) observed for the entire hour. Therefore, the L_{eq} noise descriptor is generally 1-2 dBA higher than the L_{50} noise level.

Peak hour or average noise levels, while useful, do not completely describe a given noise environment. Noise levels lower than peak hour may be disturbing if they occur during times when quiet is most desirable, namely evening and nighttime (sleeping) hours. To account for this, the Community Noise Equivalent Level (CNEL), representing a composite 24-hour noise level is utilized. The CNEL is the weighted average of the intensity of a sound, with corrections for time of day, and averaged over 24 hours. The time-of-day corrections require the addition of 5 decibels to dBA L_{eq} sound levels in the evening from 7:00 p.m. to 10:00 p.m., and the addition of 10 decibels to dBA L_{eq} sound levels at night between 10:00 p.m. and 7:00 a.m. These additions are made to account for the noise sensitive time periods during the evening and night hours when sound appears louder. CNEL does not represent the actual sound level heard at any time, but rather represents the total sound exposure. The City of Vallejo relies on the 24-hour CNEL level to assess land use compatibility with transportation related noise sources.

2.3 SOUND PROPAGATION

When sound propagates over a distance, it changes in level and frequency content. The way noise reduces with distance depends on the following factors.

2.3.1 GEOMETRIC SPREADING

Sound from a localized source (i.e., a stationary point source) propagates uniformly outward in a spherical pattern. The sound level attenuates (or decreases) at a rate of 6 dB for each doubling of distance from a point source. Highways consist of several localized noise sources on a defined path and hence can be treated as a line source, which approximates the effect of several point sources. Noise from a line source propagates outward in a cylindrical pattern, often referred to as cylindrical spreading. Sound levels attenuate at a rate of 3 dB for each doubling of distance from a line source. (4)

2.3.2 GROUND ABSORPTION

The propagation path of noise from a highway to a receptor is usually very close to the ground. Noise attenuation from ground absorption and reflective wave canceling adds to the attenuation associated with geometric spreading. Traditionally, the excess attenuation has also been expressed in terms of attenuation per doubling of distance. This approximation is usually sufficiently accurate for distances of less than 200 ft. For acoustically hard sites (i.e., sites with a reflective surface between the source and the receptor, such as a parking lot or body of water), no excess ground attenuation is assumed. For acoustically absorptive or soft sites (i.e., those sites with an absorptive ground surface between the source and the receptor such as soft dirt, grass, or scattered bushes and trees), an excess ground attenuation value of 1.5 dB per doubling of distance is normally assumed. When added to the cylindrical spreading, the excess ground attenuation results in an overall drop-off rate of 4.5 dB per doubling of distance from a line source. (6)

2.3.3 ATMOSPHERIC EFFECTS

Receptors located downwind from a source can be exposed to increased noise levels relative to calm conditions, whereas locations upwind can have lowered noise levels. Sound levels can be increased at large distances (e.g., more than 500 feet) due to atmospheric temperature inversion (i.e., increasing temperature with elevation). Other factors such as air temperature, humidity, and turbulence can also have significant effects. (4)

2.3.4 SHIELDING

A large object or barrier in the path between a noise source and a receptor can substantially attenuate noise levels at the receptor. The amount of attenuation provided by shielding depends on the size of the object and the frequency content of the noise source. Shielding by trees and other such vegetation typically only has an “out of sight, out of mind” effect. That is, the perception of noise impact tends to decrease when vegetation blocks the line-of-sight to nearby resident. However, for vegetation to provide a substantial, or even noticeable, noise reduction, the vegetation area must be at least 15 feet in height, 100 feet wide and dense enough to completely obstruct the line-of sight between the source and the receiver. This size of vegetation may provide up to 5 dBA of noise reduction. The FHWA does not consider the planting of vegetation to be a noise abatement measure. (6)

2.4 NOISE CONTROL

Noise control is the process of obtaining an acceptable noise environment for an observation point or receptor by controlling the noise source, transmission path, receptor, or all three. This concept is known as the source-path-receptor concept. In general, noise control measures can be applied to these three elements.

2.5 NOISE BARRIER ATTENUATION

Effective noise barriers can reduce noise levels by 10 to 15 dBA, cutting the loudness of traffic noise in half. A noise barrier is most effective when placed close to the noise source or receptor. Noise barriers, however, do have limitations. For a noise barrier to work, it must be high enough and long enough to block the path of the noise source. (6)

2.6 LAND USE COMPATIBILITY WITH NOISE

Some land uses are more tolerant of noise than others. For example, schools, hospitals, churches, and residences are more sensitive to noise intrusion than are commercial or industrial developments and related activities. As ambient noise levels affect the perceived amenity or livability of a development, so too can the mismanagement of noise impacts impair the economic health and growth potential of a community by reducing the area's desirability as a place to live, shop and work. For this reason, land use compatibility with the noise environment is an important consideration in the planning and design process. The FHWA encourages State and Local government to regulate land development in such a way that noise-sensitive land uses are either prohibited from being located adjacent to a highway, or that the developments are planned, designed, and constructed in such a way that noise impacts are minimized. (7)

2.7 VIBRATION

Per the Federal Transit Administration (FTA) *Transit Noise and Vibration Impact Assessment Manual* (8), vibration is the periodic oscillation of a medium or object. The rumbling sound caused by the vibration of room surfaces is called structure-borne noise. Sources of ground-borne vibrations include natural phenomena (e.g., earthquakes, volcanic eruptions, sea waves, landslides) or human-made causes (e.g., explosions, machinery, traffic, trains, construction equipment). Vibration sources may be continuous, such as factory machinery, or transient, such as explosions. As is the case with airborne sound, ground-borne vibrations may be described by amplitude and frequency.

Additionally, in contrast to airborne noise, ground-borne vibration outdoors is not a common environmental problem and annoyance from ground-borne vibration is almost exclusively an indoor phenomenon (9). Therefore, the effects of vibrations should only be evaluated at a structure and the effects of the building structure on the vibration should be considered. Wood-frame buildings, such as typical residential structures, are more easily excited by ground vibration than heavier buildings. In contrast, large masonry buildings with spread footings have a low response to ground vibration (9). In general, the heavier a building is, the lower the response will

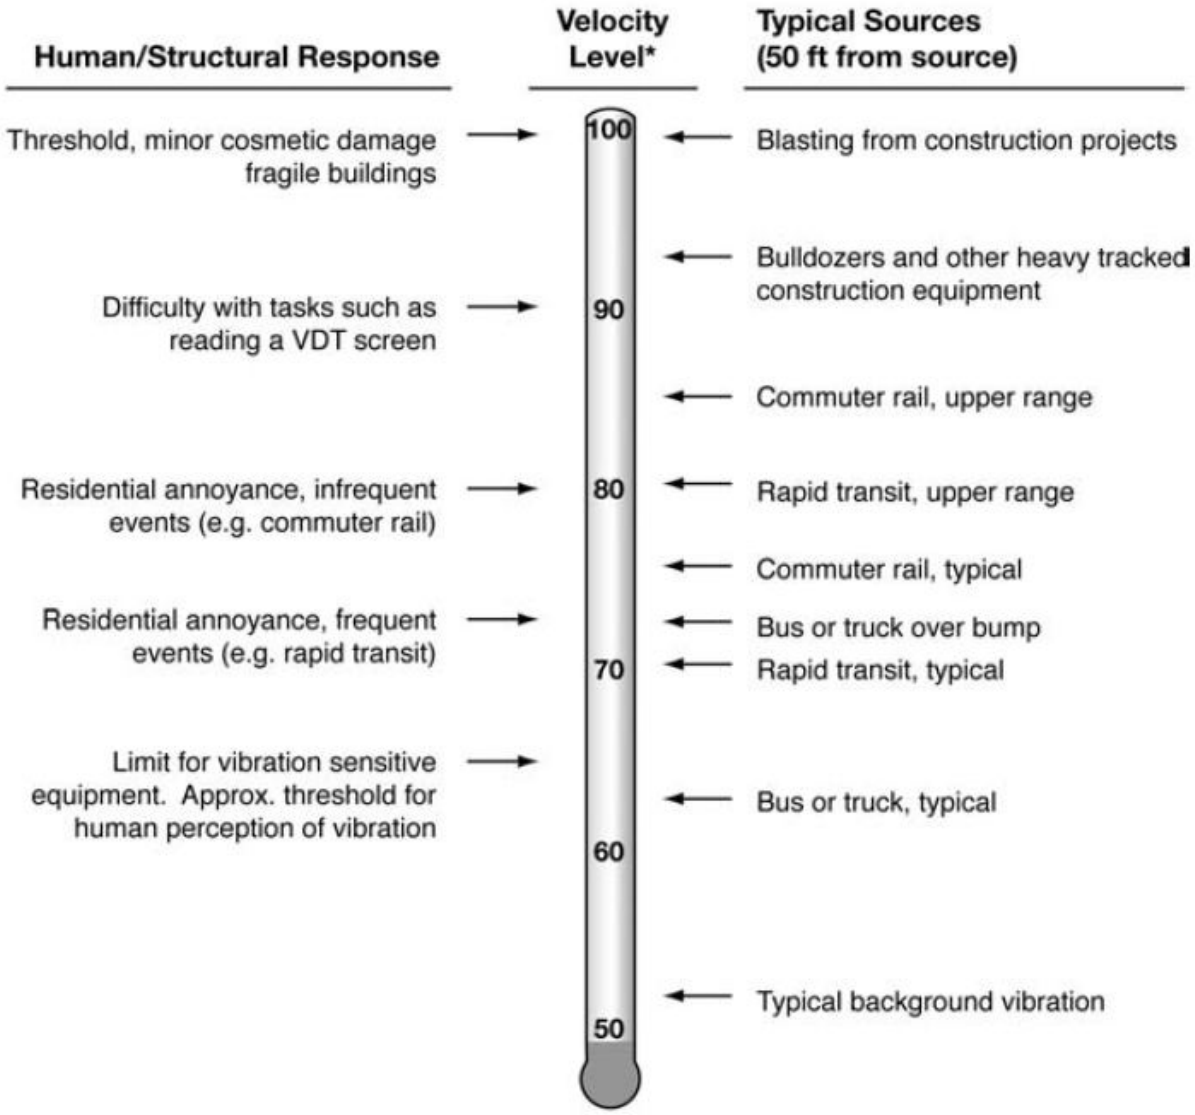
be to the incident vibration energy. However, all structurers reduce vibration levels due to the coupling of the building to the soil.

There are several different methods that are used to quantify vibration. The peak particle velocity (PPV) is defined as the maximum instantaneous peak of the vibration signal (9). The PPV is most frequently used to describe vibration impacts to buildings but is not always suitable for evaluating human response (annoyance) because it takes some time for the human body to respond to vibration signals. Instead, the human body responds to average vibration amplitude often described as the root mean square (RMS). The RMS amplitude is defined as the average of the squared amplitude of the signal and is most frequently used to describe the effect of vibration on the human body (9). However, the RMS amplitude and PPV are related mathematically, and the RMS amplitude of equipment is typically calculated from the PPV reference level. The RMS amplitude is approximately 70% of the PPV (10). Thus, thus either can be used on the description of vibration impacts.

While not universally accepted, vibration decibel notation (VdB) is another vibration notation developed and used by the FTA in their guidance manual to describe vibration levels and provide a background of common vibration levels and set vibration limits (8). Decibel notation (VdB) serves to reduce the range of numbers used to describe vibration levels and is used in this report to describe vibration levels.

As stated in the FTA guidance manual, the background vibration-velocity level in residential areas is generally 50 VdB. Ground-borne vibration is normally perceptible to humans at approximately 65 VdB. For most people, a vibration-velocity level of 75 VdB is the approximate dividing line between barely perceptible and distinctly perceptible levels (9). Typical outdoor sources of perceptible ground-borne vibration are construction equipment, steel-wheeled trains, and traffic on rough roads. If a roadway is smooth, the ground-borne vibration is rarely perceptible. The range of interest is from approximately 50 VdB, which is the typical background vibration-velocity level, to 100 VdB, which is the general threshold where minor damage can occur in fragile buildings. Exhibit 2-B illustrates common vibration sources and the human and structural response to ground-borne vibration.

EXHIBIT 2-B: TYPICAL LEVELS OF GROUND-BORNE VIBRATION



** RMS Vibration Velocity Level in VdB relative to 10^{-6} inches/second*

Source: Federal Transit Administration (FTA) Transit Noise Impact and Vibration Assessment.

3 REGULATORY SETTING

To limit population exposure to physically and/or psychologically damaging as well as intrusive noise levels, the federal government, the State of California, various county governments, and most municipalities in the state have established standards and ordinances to control noise. In most areas, automobile and truck traffic is the major source of environmental noise. Traffic activity generally produces an average sound level that remains constant with time. Air and rail traffic, and commercial and industrial activities are also major sources of noise in some areas. Federal, state, and local agencies regulate different aspects of environmental noise. Federal and state agencies generally set noise standards for mobile sources such as aircraft and motor vehicles, while regulation of stationary sources is left to local agencies.

3.1 STATE OF CALIFORNIA NOISE REQUIREMENTS

The State of California regulates freeway noise, sets standards for sound transmission, provides occupational noise control criteria, identifies noise standards and provides guidance for local land use compatibility. State law requires that each county and city adopt a General Plan that includes a Noise Element, which is to be prepared according to guidelines adopted by the Governor's Office of Planning and Research. (11) The purpose of the Noise Element is to *limit the exposure of the community to excessive noise levels*. In addition, the California Environmental Quality Act (CEQA) requires that all known environmental effects of a project be analyzed, including environmental noise impacts.

3.2 STATE OF CALIFORNIA BUILDING CODE

The State of California's noise insulation standards for dwelling and sleeping units are codified in the California Code of Regulations, Title 24, Building Standards Administrative Code, Chapter 12, Section 1206 Sound Control. These noise standards are applied to new construction in California for controlling interior noise levels resulting from exterior noise sources within habitable rooms of dwelling and sleeping units. For new construction, the acceptable interior noise limit is 45 dBA CNEL in habitable rooms (12).

3.3 CITY OF VALLEJO GENERAL PLAN NOISE STANDARDS

The City of Vallejo has adopted a noise standards specifying land use compatibility standards in the Nature & Built Environment Chapter of the General Plan to limit exposure to noise and to minimize adverse effects on sensitive receptors like homes and schools. (13) The General Plan specifies the exterior noise levels, described in L_{dn}, allowable for new developments impacted by transportation noise sources such as arterial roads, freeways, airports and railroads. (13) To ensure compatible noise levels at noise sensitive receivers the City of Vallejo General Plan contains the following policies and actions related to the Project:

POLICY NBE-5.13 Noise Control. Ensure that noise does not affect quality of life in the community.

Action NBE-5.13C Update City regulations to restrict the allowable hours to between 7 AM and 7 PM on weekdays for construction, demolition, maintenance, and loading/unloading activities that may impact noise-sensitive land uses.

POLICY NBE-5.14 *Vibration Control. Ensure that vibration does not affect quality of life in the community.*

Action NBE-5.14A *Update City regulations to establish quantified vibration level limits similar to commonly used guidelines found in the Federal Transit Administration document "Transit Noise and Vibration Impact Assessment" (2006)*

POLICY NBE-5.15 *Noise Compatibility Standards. Apply the General Plan noise and land use compatibility standards to all new residential, commercial, and mixed-use development and redevelopment*

Action NBE-5.15A *For new single-family residential projects, use a standard of 60 L_{dn} for exterior noise in private use areas, and require appropriate impact mitigation.*

Action NBE-5.15D *Require maximum interior noise levels at 45 L_{dn} in all new residential units, and require appropriate impact mitigation*

Action NBE-5.15E *When approving new development, limit project-related noise increases to the following for permanent stationary and transportation-related noise sources:*

- *no more than 10 dB in non-residential areas;*
- *no more than 5 dB in residential areas where the with-project noise level is less than the maximum "normally acceptable" level in the Noise and Land Use Compatibility figure; and*
- *no more than 3 dB where the with-project noise level exceeds the "normally acceptable" level in Noise and Land Use Compatibility figure.*

Action NBE-5.15F *Require acoustical studies with appropriate mitigation measures for projects that are likely to be exposed to noise levels that exceed the 'normally acceptable' standard and for any other projects that are likely to generate noise in excess of these standards.*

The noise policies consider land use compatibility and identify exterior noise level compatibility standards for transportation related noise. Table NBE-1 of the City of Vallejo General Plan, *California Land Use Compatibility for Community Noise Environments* matrix shown on Exhibit 3-A, provides the City of Vallejo with a planning tool to gauge the compatibility of new sensitive land uses relative to existing and future exterior noise levels. To limit exposure to noise and to minimize adverse effects on sensitive receptors (Policy NBE.515), Table NBE-1 identifies a 60 dBA CNEL as a *normally acceptable* and 70 dBA CNEL as *conditionally acceptable* noise levels for single-family residential land uses impacted by transportation noise sources. According to Table NBE-1, noise levels in excess of *normally acceptable* levels require that *a detailed analysis of the noise reduction requirements must be made and needed noise-insulation features must be included in the design.*

3.4 OPERATIONAL NOISE STANDARDS

To analyze noise impacts originating from the operation of the Project, noise from operational activities are typically limited to the hours of operation established under the Municipal Code. The Municipal Code noise standards for operational sources are described below for the City of

Vallejo to determine the potential noise impacts at the nearby sensitive receiver locations. The operational-related noise standards are summarized in Exhibit 3-B and Exhibit 3-C shows the maximum noise level adjustments by time and type.

The City of Vallejo has established maximum exterior and interior noise levels for Project operational noise sources. Section 16.502.09(C)(2) of the Municipal Code identifies limits on noise levels from operational activities as shown on Exhibits 3-C. The nearest noise-sensitive receivers to the Project site consist of existing single-family residential homes. For single-family residential development, operational exterior noise levels may not exceed 60 dBA during the daytime hours (7:00 a.m. to 10:00 p.m.). (14) The standard limits in Exhibit-B shall be adjusted by 5 decibels for any noise that contains a steady, pure tone such as a whine, screech or hum, or an impulsive sound such as hammering or riveting, or contains music or speech. The City of Vallejo Municipal Code is included in Appendix 3.1.

EXHIBIT 3-B: CITY OF VALLEJO EXTERIOR AND INTERIOR NOISE LIMITS

TABLE 16.502-C: MAXIMUM NOISE LEVEL BY NOISE ZONE			
Noise Zoning districts	Maximum Noise Level in dBA (level not to be exceeded more than 30 minutes in any hour)		Maximum Noise Level in dBA (level not to be exceeded more than 5 minutes in any hour)
	Measured at Property Line or District Boundary	Measured at Any Boundary of a Residential Zone	Between 10 PM and 7AM, Measured at Any Boundary of a Residential Zone
Single-Unit Residential	60	60	-
Multiple-Unit Residential	65	65	-
Commercial and Mixed-Use, Medical, Office	70	60	50 or ambient noise level
Light Industrial	75	65	50 or ambient noise level
General Industrial	75	65	50 or ambient noise level
Public Facilities and Community Use	65	60	50 or ambient noise level
Open Space and Recreational Districts	65	60	50 or ambient noise level

EXHIBIT 3-C: CITY OF VALLEJO MAXIMUM NOISE LEVEL ADJUSTMENT

TIME AND TYPE OF NOISE	ADJUSTMENT (DECIBELS)
Any type other than construction and related activities between 7 am and 10 pm	+5
Noise of unusual impulsive character (e.g., hammering or drilling)	-5
Noise of unusual periodic character (e.g., hammering or screeching)	-5

3.5 CONSTRUCTION NOISE STANDARDS

To analyze noise impacts originating from the construction of the Project, noise from construction activities are typically limited to the hours of operation established under the Municipal Code. The Municipal Code noise standards for construction are described below for

the City of Vallejo to determine the potential noise impacts at the nearby sensitive receiver locations. The construction-related noise standards are summarized in Exhibit 3-D.

The City of Vallejo has established maximum noise levels for mobile and stationary construction equipment. Table 16.502-E of Section 16.502, Performance Standards, of the Municipal Code identifies limits on noise levels from construction activities as shown on Exhibits 3-C for mobile and stationary equipment. The nearest noise-sensitive receivers to the Project site consist of existing single-family residential homes. For single-family residential development, mobile equipment noise levels may not exceed 80 dBA and stationary equipment noise levels may not exceed 65 dBA during the daytime hours. (14) In addition, the Municipal Code identifies hours during which mobile and stationary equipment may operate, between 7:00 a.m. to 6:00 p.m. weekdays, between 9:00 a.m. to 6:00 p.m. Saturdays, and no activity allowed on Sundays or holidays (City of Vallejo Municipal Code, Section 16.502.099(D)(1). The City of Vallejo Municipal Code is included in Appendix 3.1.

EXHIBIT 3-D: CITY OF VALLEJO CONSTRUCTION NOISE STANDARDS

TABLE 16.502-E: MAXIMUM NOISE LEVEL FOR TEMPORARY CONSTRUCTION ACTIVITY			
Time	**RR, RLD**	**RMD, RHD, NMX, NC**	**Commercial (Including medical and office) and Industrial**
Mobile construction equipment—non-scheduled, intermittent, and short-term for less than 15 days			
Weekdays 7am to 6pm	75 dBA	80 dBA	85 dBA
Saturdays 9am to 6pm	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None
Stationary construction equipment			
Weekdays 7am to 6pm	60 dBA	65 dBA	70 dBA
Saturdays 9am to 6pm	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None

3.6 CONSTRUCTION VIBRATION STANDARDS

Construction activity can result in varying degrees of ground-borne vibration, depending on the equipment and methods used, distance to the affected structures and soil type. Construction

vibration is generally associated with pile driving and rock blasting. Other construction equipment, such as air compressors, light trucks, hydraulic loaders, etc., generates little or no ground vibration. (9)

To analyze vibration impacts originating from the operation and construction of the Vista Cove, vibration-generating activities are appropriately evaluated against standards established under a City's Municipal Code, if such standards exist. However, City of Vallejo General Plan noise policy NBE-5.14 and Section 16.502.08, Vibration, of the Municipal Code do not identify specific vibration level limits. Therefore, for analysis purposes, the Caltrans *Transportation and Construction Vibration Guidance Manual*, (10 p. 38) Tables 19 and 20 are used in this noise study to assess potential temporary construction-related impacts at adjacent building locations. The construction vibration damage potential criteria include consideration of the building conditions. (5 p. 182) The existing buildings adjacent to the Project site can best be described as "older residential structures" with a maximum acceptable continuous vibration threshold of 0.3 PPV (in/sec). The construction vibration annoyance potential criteria include consideration of the perception of vibration, which indicates a maximum acceptable continuous vibration threshold of 0.1 PPV (in/sec) would be considered strongly perceptible. While vibration impacts are only assessed within structures and temporary annoyance is not generally considered a substantial effect on the environment, for purposes of this analysis, the more conservative 0.1 PPV (in/sec) threshold is used to evaluate potential construction vibration impacts at nearby receivers.

4 SIGNIFICANCE CRITERIA

The following significance criteria are based on currently adopted guidance provided by Appendix G of the California Environmental Quality Act (CEQA) Guidelines. (15) For the purposes of this report, impacts would be potentially significant if the Project results in or causes:

A. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

B. Generation of excessive ground-borne vibration or ground-borne noise levels?

C. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

While the City of Vallejo General Plan Guidelines provide direction on noise compatibility and establish noise standards by land use type that are sufficient to assess the significance of noise impacts, they do not define the levels at which increases are considered substantial for use under Guideline A. CEQA Appendix G Guideline C applies to nearby public and private airports, if any, and the Project's land use compatibility. Table 4-1 shows the significance criteria summary matrix.

4.1 CEQA GUIDELINES NOT FURTHER ANALYZED

The Project site is not located within two miles of an airport or airstrip. The closest major airport is the Buchanan Field Airport and Napa County Airport are located roughly 9.6 miles southeast and northwest, respectively, of the Project site. As such, the Project site would be located outside the 55 dBA CNEL airport noise contour for both airports, and therefore, impacts are considered *less than significant,* and no further noise analysis is conducted in relation to Appendix G to the CEQA Guidelines, Noise Threshold C.

4.2 NOISE-SENSITIVE RECEIVERS

Noise level increases resulting from the Project are evaluated based on the Appendix G CEQA Guidelines described above at the closest sensitive receiver locations. Under CEQA, consideration must be given to the magnitude of the increase, the existing ambient noise levels, and the location of noise-sensitive receivers to determine if a noise increase represents a significant adverse environmental impact. This approach recognizes *that there is no single noise increase that renders the noise impact significant.* (16)

Unfortunately, there is no completely satisfactory way to measure the subjective effects of noise or of the corresponding human reactions of annoyance and dissatisfaction. This is primarily because of the wide variation in individual thresholds of annoyance and differing individual experiences with noise. Thus, an important way of determining a person's subjective reaction to a new noise is the comparison of it to the existing environment to which one has adapted—the so-called *ambient* environment. In general, the more a new noise exceeds the previously existing

ambient noise level, the less acceptable the new noise will typically be judged. The Federal Interagency Committee on Noise (FICON) (17) developed guidance to be used for the assessment of project-generated increases in noise levels that consider the ambient noise level. The FICON recommendations are based on studies that relate aircraft noise levels to the percentage of persons highly annoyed by aircraft noise. Although the FICON recommendations were specifically developed to assess aircraft noise impacts, these recommendations are often used in environmental noise impact assessments involving the use of cumulative noise exposure metrics, such as the average-daily noise level (CNEL) and equivalent continuous noise level (L_{eq}).

As previously stated, the approach used in this noise study recognizes *that there is no single noise increase that renders the noise impact significant*, based on a 2008 California Court of Appeal ruling on Gray v. County of Madera. (16) For example, if the ambient noise environment is quiet (<60 dBA) and the new noise source greatly increases the noise levels, an impact may occur if the noise criteria may be exceeded. Therefore, for this analysis, FICON identifies a *readily perceptible* 5 dBA or greater project-related noise level increase is considered a significant impact when the noise criteria for a given land use is exceeded. Per the FICON, in areas where the without project noise levels range from 60 to 65 dBA, a 3 dBA *barely perceptible* noise level increase appears to be appropriate for most people. When the without project noise levels already exceed 65 dBA, any increase in community noise louder than 1.5 dBA or greater is considered a significant impact if the noise criteria for a given land use is exceeded, since it likely contributes to an existing noise exposure exceedance.

The FICON guidance provides an established source of criteria to assess the impacts of substantial temporary or permanent increase in ambient noise levels. Based on the FICON criteria, the amount to which a given noise level increase is considered acceptable is reduced when the without Project noise levels are already shown to exceed certain land-use specific exterior noise level criteria. The specific levels are based on typical responses to noise level increases of 5 dBA or *readily perceptible*, 3 dBA or *barely perceptible*, and 1.5 dBA depending on the underlying without Project noise levels for noise-sensitive uses. These levels of increases and their perceived acceptance are consistent with guidance provided by both the Federal Highway Administration (18 p. 9) and Caltrans (19 p. 2_48).

4.3 SIGNIFICANCE CRITERIA SUMMARY

Noise impacts shall be considered significant if any of the following occur as a direct result of the proposed Project. Table 4-1 shows the significance criteria summary matrix.

TABLE 4-1: SIGNIFICANCE CRITERIA SUMMARY

Analysis	Receiving Land Use	Condition(s)	Significance Criteria	
			Daytime	Nighttime
Off-Site	Noise-Sensitive[1]	Residential areas where with project is less than maximum "normally acceptable" level in Exhibit 3-A[2]	≥ 5 dBA CNEL Project increase	
		Project exceeds "normally acceptable" level in Exhibit 3-A[2]	≥ 3 dBA CNEL Project increase	
	Non-Noise Sensitive[1,3]	Ambient[2]	≥ 10 dBA CNEL Project increase	
On-Site[3]	Noise Sensitive	Exterior Noise Level Standard	60 dBA L_{dn}	
		Interior Noise Level Standard	45 dBA L_{dn}	
Operational	Noise-Sensitive	Residential areas where with project is less than maximum "normally acceptable" level in Exhibit 3-A[2]	≥ 5 dBA CNEL Project increase	
		Project exceeds "normally acceptable" level in Exhibit 3-A[2]	≥ 3 dBA CNEL Project increase	
		Residential[4]	60 dBA L_{eq}	
Construction		Noise Level Threshold[5]	80 dBA L_{eq}	n/a
		Vibration Level Threshold[6]	0.30 PPV (in/sec)

5 EXISTING ON-SITE NOISE LEVELS

To assess the existing noise level environment, noise levels are referenced from the *Propel Vallejo General Plan 2040 and Sonoma Boulevard Specific Plan Draft EIR*. (20) Based on Figure 4.10-1, the Project lies within the 70 dBA CNEL traffic noise contour of I-780. In addition, Table 4.10-13 shows that the freeway segment from Columbus Parkway to Glen Cove Parkway exposes adjacent land uses to 77.7 dBA CNEL at 100 feet from the centerline. However, these noise levels are likely over-exaggerated since they are intended to be used for planning and generally do not consider the actual topography. The background ambient noise levels in the Project study area are considered to be dominated by the transportation-related noise associated with I-780.

6 TRAFFIC NOISE METHODS AND PROCEDURES

The following section outlines the methods and procedures used to model and analyze the future traffic noise environment.

6.1 FHWA TRAFFIC NOISE PREDICTION MODEL

The estimated roadway noise impacts from vehicular traffic were calculated using a computer program that replicates the Federal Highway Administration (FHWA) Traffic Noise Prediction Model- FHWA-RD-77-108. (21) The FHWA Model arrives at a predicted noise level through a series of adjustments to the Reference Energy Mean Emission Level (REMEL). In California the national REMELs are substituted with the California Vehicle Noise (Calveno) Emission Levels. (22) Adjustments are then made to the REMEL to account for: the roadway classification (e.g., collector, secondary, major or arterial), the roadway active width (i.e., the distance between the center of the outermost travel lanes on each side of the roadway), the total average daily traffic (ADT), the travel speed, the percentages of automobiles, medium trucks, and heavy trucks in the traffic volume, the roadway grade, the angle of view (e.g., whether the roadway view is blocked), the site condition" ("hard" or "soft" relates to the absorption of the ground, pavement, or landscaping), and the percentage of total ADT which flows each hour throughout a 24-hour period.

6.2 ON-SITE TRAFFIC NOISE PREDICTION MODEL INPUTS

The on-site roadway parameters, including the ADT volumes used for this analysis, are presented in Table 6-1. Based on the City of Vallejo General Plan Circulation Element Map MTC-3, I-780 is classified as a four (4) lane divided Freeway. (23) Future average daily traffic volumes, shown on Table 6-1, were obtained from the City of Vallejo General Plan Update and Sonoma Boulevard Specific Plan EIR (24), and reflect future long-range traffic conditions needed to assess the on-site traffic noise environment and to identify the appropriate noise mitigation measures that address the worst-case future noise conditions.

Table 6-2 presents the time-of-day vehicle splits by vehicle type and roadway classification, and Table 6-3 presents the total traffic flow distributions (vehicle mixes) used for this analysis (25). The vehicle mix provides the hourly distribution percentages of automobiles, medium trucks, and heavy trucks for input into the FHWA Model based on roadway types. The vehicle splits shown in Table 6-2 are reported as a percentage of the overall percentage.

For the purposes of this analysis, soft site conditions were used to analyze the on-site traffic noise impacts for the Project study area. Soft site conditions account for the sound propagation loss over natural surfaces such as normal earth and ground vegetation. A conservative -3dBA offset was applied to future 1-780 traffic noise levels to account for shielding of the western and northern portion of the Project site that would be provided by existing knoll, reducing full exposure to 1-780 traffic noise levels. Research by Caltrans has shown that the use of soft site conditions and applying a shielding offset to account for intervening topographic features is appropriate for the application of the FHWA traffic noise prediction model used in this analysis. (26)

To predict the future noise environment at each building within the Project site, coordinate information was collected to identify the noise transmission path between the noise source and receiver. The coordinate information is based on the Project site plan showing the location of each building, as shown in Exhibit 1-B. The site plan is used to identify the relationship between the roadway centerline elevation, the pad elevation and the centerline distance to any intervening noise barriers or topography, and the building façade. The exterior noise level impacts were placed five feet above the finished floor elevation at the outdoor living areas and proposed building façades. Second-floor receivers were located 14 feet above the finished floor elevation. Appendix 4-1 shows the scaled site plan.

7 ON-SITE TRANSPORTATION NOISE IMPACTS

An on-site exterior noise impact analysis has been completed to determine the noise exposure levels that would result from adjacent traffic noise sources in the Project study area, and to identify potential noise control measures that would achieve acceptable Project exterior and interior noise levels. The primary source of traffic noise affecting the Project site is anticipated to be from I-780. The Project will experience some background traffic noise from the Project's internal local streets, however, due to low traffic volume/speed, traffic noise from these roads will not make a significant contribution to the noise environment. Modeled receiver locations are shown in Exhibit 7-A.

7.1 EXTERIOR NOISE ANALYSIS

Using the FHWA traffic noise prediction model and the parameters outlined in Tables 6-1 to 6-3, the expected future exterior noise levels were calculated at the private outdoor living spaces (backyards) and at the residential building façades. Table 7-1 presents a summary of future exterior noise levels at the private outdoor living spaces (backyards) and at the residential building façades. The on-site transportation analysis indicates that the unmitigated exterior noise levels for on-site receivers are estimated to range from 46.5 to 68.8 dBA CNEL. The Exterior traffic noise analysis calculations are provided in Appendix 7.1.

To satisfy the City of Vallejo exterior noise level standard of 60 dBA L_{dn} for single-family residential land uses, the construction of a noise barrier is recommended for the outdoor living area (backyards) of Lots 3, 7 through 9, 16, and 17 through 20, adjacent to I-780. Specifically, a minimum 4-foot-high noise barrier is recommended for Lot 9, 5-foot minimum height barriers for Lots 8, 16, and 18 through 20, and 6-foot minimum height barriers for Lots 3, 7, and 9. With the recommended noise barriers shown in Exhibit ES-A, the future exterior noise levels will range from 46.5 to 60.0 dBA CNEL. This noise analysis shows that the recommended noise barrier will satisfy the City of Vallejo exterior noise level standards for residential land uses adjacent to I-780. The effective noise barrier height recommendations represent the minimum wall and/or berm combination height required to satisfy the City of Vallejo exterior noise level standards. As such, the future on-site traffic noise impacts at the private outdoor living spaces (backyards) are considered *less than significant* impacts.

EXHIBIT 7-A: ON-SITE RECEIVER LOCATIONS

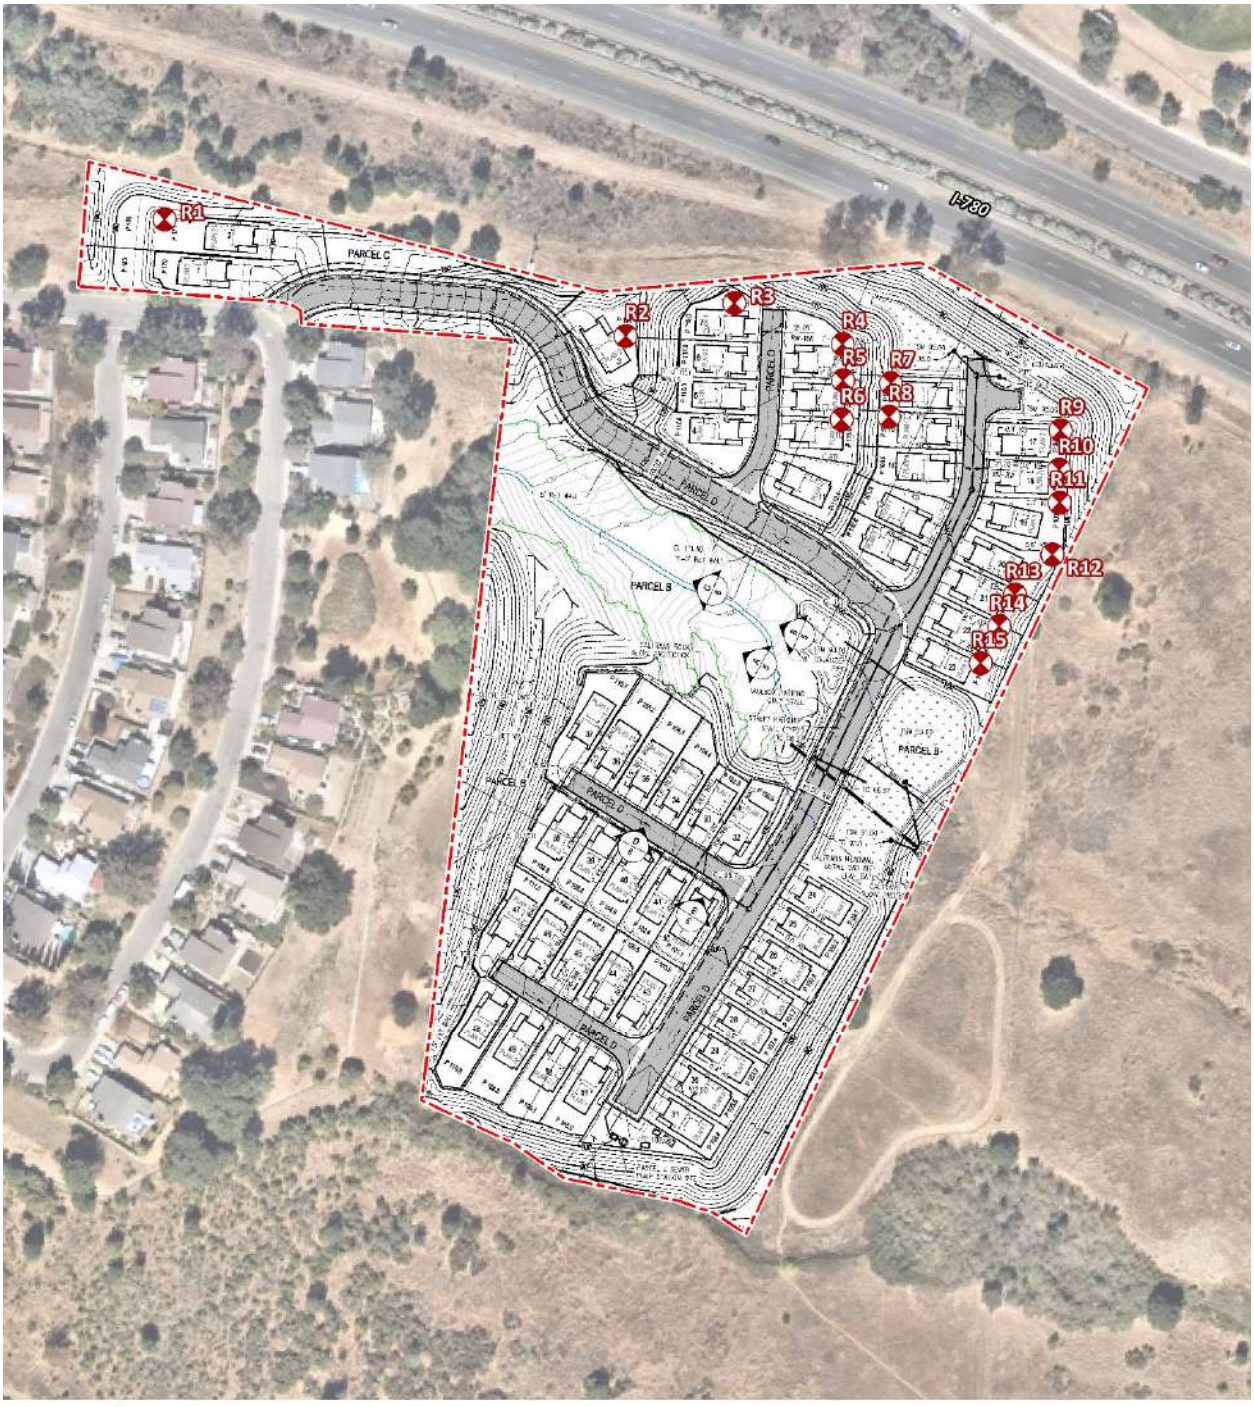

TABLE 7-1: EXTERIOR TRAFFIC NOISE LEVELS (DBA CNEL)

Receiver Number[1]	Lot Number	Source	Unmitigated Noise Level (dBA CNEL)	Mitigated Noise Level (dBA CNEL)	Barrier Height (Feet)	Does the Project exceed the exterior limit?

Bold numbers indicate an exceedance of the standard.
[1] See Exhibit 5-A for the analysis locations.
[2] Exterior noise calculations are included in Appendix 7.1.

7.2 INTERIOR NOISE ANALYSIS

To ensure that the interior noise levels comply with the City of Vallejo interior noise level standard of 45 dBA CNEL, future noise levels were calculated at the estimated building façade locations. It should be noted that Project architectural plans are unavailable and the Project should provide a final interior noise analysis as part of the plan check process.

7.2.1 NOISE REDUCTION METHODOLOGY

The interior noise level is the difference between the predicted exterior noise level at the building facade and the noise reduction of the structure. Typical building construction will provide a Noise Reduction (NR) of approximately 12 dBA with "windows open" and a minimum 25 dBA noise reduction with "windows closed." (3) However, sound leaks, cracks and openings within the window assembly can greatly diminish its effectiveness in reducing noise. Several methods are used to improve interior noise reduction, including: (1) weather-stripped solid core exterior doors; (2) upgraded dual glazed windows; (3) mechanical ventilation/air conditioning; and (4) exterior wall/roof assembles free of cut outs or openings.

7.2.2 INTERIOR NOISE LEVEL ASSESSMENT

Tables 7-2 to 7-3 show that the buildings adjacent to I-780 will experience future unmitigated noise levels ranging from 46.1 to 60.0 dBA CNEL at first-floor building façades and 51.3 to 69.9 dBA CNEL at second-floor building façades.

The interior noise level analysis shows that the City of Vallejo 45 dBA CNEL interior noise standard can be satisfied at most locations with no requirements, with a windows closed condition and a means of mechanical ventilation (e.g., air conditioning). Therefore, standard construction without upgraded windows or doors will comply with the City of Vallejo interior noise level standard of 45 dBA CNEL.

TABLE 7-2: FIRST-FLOOR INTERIOR TRAFFIC NOISE IMPACTS (CNEL)

Receiver Number	Noise Level at Façade[1]	Required Interior NR[2]	Estimated Interior NR[3]	Upgraded Windows[4]	Interior Noise Level[5]	Threshold	Threshold Exceeded?

8 OFF-SITE TRANSPORTATION NOISE IMPACTS

The expected Project is anticipated to generate approximately 510 trips per day. The location where the greatest chance of an impact occurs is at the residence near the Project site entrance and at Shady Lane and Wildflower Avenue. Assuming a typical speed of 25 mph, a predominately automobile traffic mix, and without no barriers, the Project is predicted to generate a noise level of 50.2 dBA CNEL at the nearest building façade of 196 Wildflower Avenue. Therefore, the Project would not expose existing noise-sensitive receivers to excessive noise levels, and the off-site traffic noise level impacts due to the Project are considered *less than significant*.

This page intentionally left blank.

9 SENSITIVE RECEIVER LOCATIONS

To assess the potential for long-term operational and short-term construction noise impacts, the following sensitive receiver locations, as shown on Exhibit 9-A, were identified as representative locations for analysis. Sensitive receivers are generally defined as locations where people reside or where the presence of unwanted sound could otherwise adversely affect the use of the land. Noise-sensitive land uses are generally considered to include schools, hospitals, single-family dwellings, mobile home parks, churches, libraries, and recreation areas. Moderately noise-sensitive land uses typically include multi-family dwellings, hotels, motels, dormitories, out-patient clinics, cemeteries, golf courses, country clubs, athletic/tennis clubs, and equestrian clubs. Land uses that are considered relatively insensitive to noise include business, commercial, and professional developments. Land uses that are typically not affected by noise include: industrial, manufacturing, utilities, agriculture, undeveloped land, parking lots, warehousing, liquid and solid waste facilities, salvage yards, and transit terminals.

To describe the potential off-site Project noise levels, six receiver locations in the vicinity of the Project site were identified. All distances are measured from the Project site boundary to the outdoor living areas (e.g., private backyards) or at the building façade, whichever is closer to the Project site. The selection of receiver locations is based on FHWA guidelines and is consistent with additional guidance provided by Caltrans and the FTA, as previously described in Section 5.2. Other sensitive land uses in the Project study area that are located at greater distances than those identified in this noise study will experience lower noise levels than those presented in this report due to the additional attenuation from distance and the shielding of intervening structures. Distance is measured in a straight line from the project boundary to each receiver location.

R1: Location R1 represents existing noise sensitive single-family residence at 190 Buckeye Lane, approximately 90 feet southwest of the Project site. Receiver R1 is placed near the private outdoor living area (backyard) facing the Project site.

R2: Location R2 represents the existing noise sensitive single-family residence at 180 Ironwood Lane, approximately 80feet south of the Project site. Receiver R2 is placed near the private outdoor living area (backyard) facing the Project site.

R3: Location R3 represents the existing noise sensitive single-family residence at 196 Shady Lane, approximately 30 feet south of the Project site. Receiver R3 is placed near the private outdoor living area (backyard) facing the Project site.

R4: Location R4 represents the existing noise sensitive single-family residence at 156 Wildflower Avenue, approximately 114 feet west of the Project site. Receiver R4 is placed near the private outdoor living area (backyard) facing the Project site.

R5: Location R5 represents the existing noise sensitive single-family residence at 124 Shady Lane, approximately 188 feet west of the Project site. Receiver R5 is placed near the private outdoor living area (backyard) facing the Project site.

R6: Location R6 represents the existing noise sensitive Saint Patrick Saint Vincent High School at 1500 Benicia Road and the multi-family uses to the east of the school, approximately 339 feet north of the Project site. Receiver R6 is representative of an outdoor area and the building façade, in terms of distance.

EXHIBIT 8-A: RECEIVER LOCATIONS

10 OPERATIONAL NOISE IMPACTS

This section analyzes the potential stationary-source operational noise impacts at the nearest receiver locations, identified in Section 9, resulting from the operation of the proposed Vista Cove Project. Exhibit 10-A identifies the representative noise source locations used to assess the operational noise levels.

10.1 OPERATIONAL NOISE SOURCES

This operational noise analysis is intended to describe noise level impacts associated with the expected typical of daytime and nighttime activities at the Project site. To present the potential worst-case noise conditions, this analysis assumes the Project would be operational 24 hours per day, seven days per week. The on-site Project-related noise sources are expected to include: air conditioning units.

AIR CONDITIONING UNITS

To assess the noise levels created by the air conditioning units, reference noise levels were taken from equipment specifications for a 3-ton residential packaged air conditioning unit (Carrier Model: R4A4S18AKANA). Each air conditioning unit was modeled as operating 60 minutes per hour during the daytime and nighttime. For this noise analysis, the air conditioning units are expected to be ground-mounted adjacent to the proposed buildings. The air conditioning units are anticipated to be located 3 feet above the ground level. According to the manufacturer's specification sheets, the Carrier R4A4S18AKANA generates a maximum sound power level of 76 dBA L_w for 4 to 5-ton units or approximately 44.4 dBA L_{max} at 50 feet.

10.2 REFERENCE NOISE LEVELS

To estimate the Project operational noise impacts, reference noise level measurements were collected from similar types of activities to represent the noise levels expected with the development of the proposed Project. This section provides a detailed description of the reference noise level measurements shown in Table 10-1 used to estimate the Project operational noise impacts. These sources of noise activity will likely vary throughout the day.

TABLE 10-1: REFERENCE NOISE LEVELS

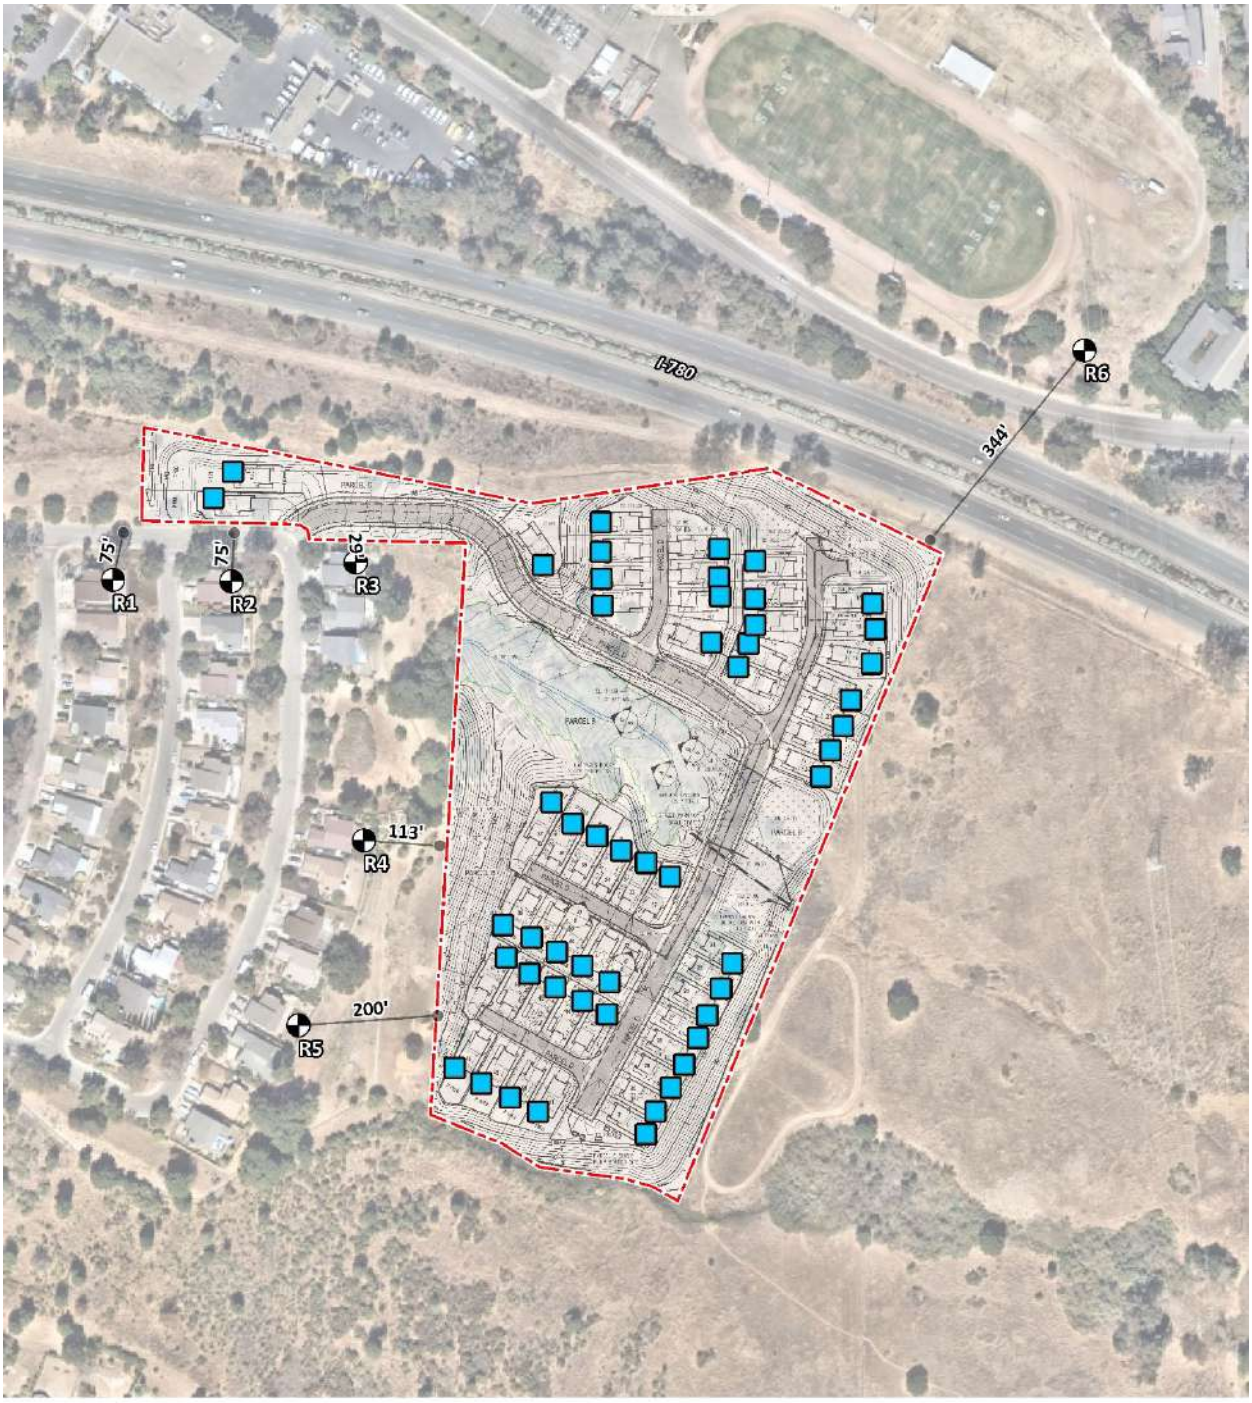
Noise Source	Noise Source Height (Feet)	Min./Hour[2]		Reference Noise Level (dBA L_{eq}) '@ 50 Feet	Sound Power Level (dBA)[3]
		Day	Night		
Air Conditioning Units[1]	3'	60	60	44.4	76.0

[1] Carrier Model R4A4S18AKANA, Appendix 10.1.

[2] Anticipated duration (minutes within the hour) of noise activity during typical hourly conditions expected at the Project site. "Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

[3] Sound power level represents the total amount of acoustical energy (noise level) produced by a sound source independent of distance or surroundings. Sound power levels calculated using the CadnaA noise model at the reference distance to the noise source.

EXHIBIT 9-A: OPERATIONAL NOISE SOURCE LOCATIONS



10.3 CADNAA NOISE PREDICTION MODEL

To fully describe the exterior operational noise levels from the Project, Urban Crossroads, Inc. developed a noise prediction model using the CadnaA (Computer Aided Noise Abatement) computer program. CadnaA can analyze multiple types of noise sources using the spatially accurate Project site plan, georeferenced Nearmap aerial imagery, topography, buildings, and barriers in its calculations to predict outdoor noise levels.

Using the ISO 9613 protocol, CadnaA will calculate the distance from each noise source to the noise receiver locations, using the ground absorption, distance, and barrier/building attenuation inputs to provide a summary of noise level at each receiver and the partial noise level contributions by noise source. Consistent with the ISO 9613 protocol, the CadnaA noise prediction model relies on the reference sound power level (L_w) to describe individual noise sources. While sound pressure levels (e.g., L_{eq}) quantify in decibels the intensity of given sound sources at a reference distance, sound power levels (L_w) are connected to the sound source and are independent of distance. Sound pressure levels vary substantially with distance from the source and diminish because of intervening obstacles and barriers, air absorption, wind, and other factors. Sound power is the acoustical energy emitted by the sound source and is an absolute value that is not affected by the environment.

The operational noise level calculations provided in this noise study account for the distance attenuation provided due to geometric spreading, when sound from a localized stationary source (i.e., a point source) propagates uniformly outward in a spherical pattern. A default ground attenuation factor of 0.5 was used in the CadnaA noise analysis to account for mixed ground representing a combination of hard and soft surfaces. Appendix 10.1 includes the detailed noise model inputs used to estimate the Project operational noise levels presented in this section.

10.4 PROJECT OPERATIONAL NOISE LEVELS

Using the reference noise levels to represent the proposed Project operations that include air conditioning units, Urban Crossroads, Inc. calculated the operational source noise levels that are expected to be generated at the Project site and the Project-related noise level increases that would be experienced at each of the sensitive receiver locations. Table 10-2 shows the Project operational noise levels during the daytime hours of 7:00 a.m. to 10:00 p.m. The daytime hourly noise levels at the off-site receiver locations are expected to range from 24.6 to 34.3 dBA L_{eq}.

TABLE 10-2: PROJECT OPERATIONAL NOISE LEVELS

Noise Source[1]	Operational Noise Levels by Receiver Location (dBA Leq)					
	R1	R2	R3	R4	R5	R6
Air Conditioning Units	29.8	32.5	29.7	31.6	33.3	23.7
Total (All Noise Sources)	**29.8**	**32.5**	**29.7**	**31.6**	**33.3**	**23.7**

[1] See Exhibit 10-A for the noise source locations. CadnaA noise model calculations are included in Appendix 10.2.

10.5 PROJECT OPERATIONAL NOISE LEVEL COMPLIANCE

To demonstrate compliance with local noise regulations, the Project-only operational noise levels are evaluated against exterior noise level thresholds based on the City of Vallejo exterior noise level standards at nearby noise-sensitive receiver locations. Table 10-4 shows the operational noise levels associated with Vista Cove Project will satisfy the City of Vallejo daytime 60 dBA L_{eq} and nighttime 50 dBA L_{eq} exterior noise level standards at all nearby noise sensitive receiver locations. Therefore, the operational noise impacts are considered *less than significant* at the nearby noise-sensitive receiver locations.

TABLE 10-4: OPERATIONAL NOISE LEVEL COMPLIANCE

Receiver Location[1]	Project Operational Noise Levels (dBA Leq)[2]	Noise Level Standards (dBA Leq)[3]		Noise Level Standards Exceeded?[4]	
		Daytime	Nighttime	Daytime	Nighttime

[4] Do the estimated Project operational noise source activities exceed the noise level standards? "Daytime" = 7:00 a.m. - 10:00 p.m.; "Nighttime" = 10:00 p.m. - 7:00 a.m.

# #

11 CONSTRUCTION IMPACTS

This section analyzes potential impacts resulting from the short-term construction activities associated with the development of the Project. Exhibit 11-A shows the construction noise source locations in relation to the nearby sensitive receiver locations previously described in Section 9.

11.1 CONSTRUCTION NOISE LEVELS

Noise generated by the Project construction equipment will include a combination of trucks, power tools, concrete mixers, and portable generators that when combined can reach high levels. The number and mix of construction equipment is expected to occur in the following stages:

- Site Preparation
- Grading
- Building Construction
- Paving
- Architectural Coating

11.2 CONSTRUCTION REFERENCE NOISE LEVELS

To describe peak construction noise activities, this construction noise analysis was prepared using reference noise level measurements published in the *Update of Noise Database for Prediction of Noise on Construction and Open Sites* by the Department for Environment, Food and Rural Affairs (DEFRA). (27). The DEFRA database provides the most recent and comprehensive source of reference construction noise levels. Table 11-1 provides a summary of the DEFRA construction reference noise level measurements expressed in hourly average dBA L_{eq} using the estimated FHWA Roadway Construction Noise Model (RCNM) usage factors (28) to describe the typical construction activities for each stage of Project construction.

EXHIBIT 11-A: CONSTRUCTION ACTIVITY

TABLE 11-1: TYPICAL CONSTRUCTION REFERENCE NOISE LEVELS

Construction Stage	Reference Construction Equipmnet[1]	Reference Noise Level @ 50 Feet (dBA L_{eq})	Composite Reference Noise Level (dBA L_{eq})	Reference Power Level (dBA L_w)
Site Preparation	Dozer	78.0	83.4	115.1
	Front End Loader	75.0		
	Grader	81.0		
Grading	Excavator	77.0	84.0	115.6
	Tractor	80.0

11.3 CADNAA NOISE PREDICTION MODEL

To fully describe the construction noise levels from the Project, Urban Crossroads, Inc. developed a noise prediction model using the CadnaA (Computer Aided Noise Abatement) computer program. CadnaA can analyze multiple types of noise sources using the spatially accurate Project site plan, georeferenced Nearmap aerial imagery, topography, buildings, and barriers in its calculations to predict outdoor noise levels.

Using the ISO 9613 protocol, CadnaA will calculate the distance from each noise source to the noise receiver locations, using the ground absorption, distance, and barrier/building attenuation inputs to provide a summary of noise level at each receiver and the partial noise level contributions by noise source. Consistent with the ISO 9613 protocol, the CadnaA noise prediction model relies on the reference sound power level (L_w) to describe individual noise sources. While sound pressure levels (e.g., L_{eq}) quantify in decibels the intensity of given sound sources at a reference distance, sound power levels (L_w) are connected to the sound source and are independent of distance. Sound pressure levels vary substantially with distance from the source and diminish because of intervening obstacles and barriers, air absorption, wind, and other factors. Sound power is the acoustical energy emitted by the sound source and is an absolute value that is not affected by the environment.

The construction noise level calculations provided in this noise study account for the distance attenuation provided due to geometric spreading, when sound from a localized stationary source

(i.e., a point source) propagates uniformly outward in a spherical pattern. A default ground attenuation factor of 0.5 was used in the noise analysis to account for mixed ground representing a combination of hard and soft surfaces.

11.4 TYPICAL CONSTRUCTION NOISE ANALYSIS

Using the reference construction equipment noise levels and the CadnaA noise prediction model, calculations of the Project construction noise level impacts at the nearest sensitive receiver locations were completed. To assess the worst-case construction noise levels, the Project construction noise analysis relies on the highest noise level impacts when the equipment with the highest reference noise level is operating at the closest point from the edge of primary construction activity (Project site boundary) to each receiver location. As shown on Table 11-2, the construction noise levels are expected to range from 45.5 to 65.0 dBA L_{eq}, and the highest construction levels are expected to range from 53.3 to 65.0 dBA L_{eq} at the nearest receiver locations. Appendix 11.1 includes the detailed CadnaA construction noise model inputs.

TABLE 11-2: TYPICAL CONSTRUCTION EQUIPMENT NOISE LEVEL SUMMARY

Receiver Location[1]	Construction Noise Levels (dBA L_{eq})					
	Site Preparation	Grading	Building Construction	Paving	Architectural Coating	Highest Levels[2]
R1	58.8	59.3	52.7	53.2	51.5	59.3
R2	61.3	61.8	55.2	55.7	54.0	61.8
R3	64.5	65.0	58.4	58.9	57.2	65.0
R4	59.6	60.1	53.5	54.0	52.3	60.1
R5	58.9	59.4	52.8	53.3	51.6	59.4
R6	52.8	53.3	46.7	47.2	45.5	53.3

[1] Noise receiver locations are shown in Exhibit 11-A.
[2] Construction noise level calculations based on distance from the construction activity, which is measured from the Project site boundary to the nearest receiver locations. CadnaA construction noise model inputs are included in Appendix 11.1.

11.5 TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

To evaluate whether the Project will generate potentially significant short-term noise levels at nearest receiver locations, a construction-related daytime noise level threshold of 80 dBA L_{eq} is used as a reasonable threshold to assess the daytime construction noise level impacts. The construction noise analysis shows that the nearest receiver locations will satisfy the reasonable daytime 80 dBA L_{eq} significance threshold during Project construction activities as shown on Table 11-3. Therefore, the noise impacts due to Project construction noise is considered *less than significant* at all receiver locations.

TABLE 11-3: TYPICAL CONSTRUCTION NOISE LEVEL COMPLIANCE

Receiver Location[1]	Construction Noise Levels (dBA L_{eq})		
	Highest Construction Noise Levels[2]	Threshold[3]	Threshold Exceeded?[4]
R1	59.3	80	No
R2	61.8	80	No
R3	65.0	80	No

[2] Highest construction noise level calculations based on distance from the construction noise source activity to the nearest receiver locations.
[3] Construction noise level thresholds as shown in Table 4-1.
[4] Do the estimated Project construction noise levels exceed the construction noise level threshold?

11.6 TYPICAL CONSTRUCTION VIBRATION IMPACTS

Construction activity can result in varying degrees of ground vibration, depending on the equipment and methods used, distance to the affected structures and soil type. It is expected that ground-borne vibration from Project construction activities would cause only intermittent, localized intrusion. Ground-borne vibration levels resulting from typical construction activities occurring within the Project site were estimated by data published by the Federal Transit Administration (FTA). (26) However, while vehicular traffic is rarely perceptible, construction has the potential to result in varying degrees of temporary ground vibration, depending on the specific construction activities and equipment used. Ground vibration levels associated with various types of construction equipment are summarized on Table 11-4. Based on the representative vibration levels presented for various construction equipment types, it is possible to estimate the potential Project construction vibration levels using the following vibration assessment methods defined by Caltrans. To describe the human response (annoyance) associated with vibration impacts Caltrans provides the following equation: $PPV_{equip} = PPV_{ref} \times (25/D)^{1.1}$

TABLE 11-4: VIBRATION SOURCE LEVELS FOR CONSTRUCTION EQUIPMENT

Equipment	PPV (in/sec) at 25 feet
Small bulldozer	0.003
Jackhammer	0.035
Loaded Trucks	0.076
Large bulldozer	0.089

Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual

Using the vibration source level of construction equipment provided on Table 11-4 and the construction vibration assessment methodology published by the FTA, it is possible to estimate the Project vibration impacts. Table 11-5 presents the expected Project related vibration levels at the nearby receiver locations. At distances ranging from 29 to 344 feet from the Project construction activities to the nearest adjacent off-site structure, construction vibration velocity levels are estimated to range from less than 0.02 to 0.07 in/sec PPV. Based on maximum acceptable continuous vibration threshold of 0.10 in/sec PPV, the typical Project construction vibration levels will not exceed the vibration thresholds at any local receiver. Additionally, since the vibration levels would be well below 0.30 in/sec PPV, there would be no structural vibration impacts. Therefore, the Project-related vibration impacts associated with construction activities are considered *less than significant*.

TABLE 11-5: PROJECT CONSTRUCTION VIBRATION LEVELS

Receiver Location[1]	Distance to Const. Activity (Feet)[2]	Typical Construction Vibration Levels PPV (in/sec)[3]					Thresholds PPV (in/sec)[4]	Thresholds Exceeded?[5]
		Small bulldozer	Jack-hammer	Loaded Trucks	Large Bulldozer	Highest Vibration Level		
R1	90'	0.00	0.01	0.02	0.02	0.02	0.10	No

APPENDIX 3.1:

CITY OF VALLEJO MUNICIPAL CODE

This page intentionally left blank

16.502.08 - Vibration.

No use shall be operated in a manner that produces vibrations discernible without instruments at any point on the property line of the lot on which the use is located.

16.502.09 - Noise.

A. Purpose. The purpose of these regulations is to implement the general plan policies on noise exposure and land use compatibility policies. More specifically, the purpose of the noise standards is to:
   1. Establish the principles and context for the application of noise limits, standards for noise exposure and land use compatibility, and requirements for reasonable noise attenuation measures;
   2. Protect noise sensitive uses from excessive noise exposure from other uses;
   3. Establish regulations for maximum noise limits and procedures for enforcing them
   4. Prevent any land use from generating sound that exceeds specific maximum levels based on the type uses and the type of noise.

B. Exemptions. The following facilities and uses are exempt from these regulations:
   1. Emergencies. The emission of sound for the purpose of alerting persons to the existence of an emergency, the performance of emergency work, or the operation of emergency equipment including, but not limited to, generators.
   2. Warning Devices. Warning devices necessary for the protection of the public safety, such as police, fire, and ambulance sirens.
   3. Special Events. Occasional outdoor gatherings, public dances, shows, and sporting and entertainment events, provided that such events are conducted pursuant to a permit or license issued by the city.
   4. Religious Institutions and Other Similar Organizations. Unamplified bells, chimes, or other similar devices used by religious institutions and other houses of religious worship.
   5. Time signals. Signals produced by places of employment or worship and school recess signals providing no one sound exceeds five seconds in duration and no one series of sounds exceeds twenty-four seconds in duration.
   6. Municipal Solid Waste Collection. Collection of solid waste, vegetative waste, and recyclable materials by the city or under contract with the city.
   7. Public Works Construction Projects, Maintenance, and Repair. Street, utility, and similar construction projects undertaken by or under contract to or direction of the city, or the state of California or a public utility regulated by the California Public Utilities Commission,

as well as maintenance and repair operations conducted by such parties, including street sweeping, debris and litter removal, removal of downed wires, restoring electrical service, repairing traffic signals, unplugging sewers, vacuuming catch basins, repairing of damaged poles, removal of abandoned vehicles, repairing of water hydrants and mains, gas lines, oil lines, sewers, storm drains, roads, and sidewalks.

8. Transportation equipment. Sounds from transportation equipment such as trucks and buses used primarily in the movement of goods and people to and from given premises and in connection with temporary construction or demolition work.
9. Utility Facilities. Facilities including without limitation sixty-cycle electric power transformers and related equipment, sewer lift stations, municipal wells, and pumping stations.

C. General Requirements.

1. No person shall make, or cause to suffer, or permit to be made upon any public property, public right-of-way or private property, any excessive noise, annoying noise, amplified sound or vibrations that are physically annoying to reasonable persons of normal sensitivity or that are so harsh or so prolonged or unnatural or unusual in their use, time or place as to cause or contribute to the unnecessary and unreasonable discomfort of any persons of normal sensitivity located at the lot line of the property from which these noises emanate or that interfere with the peace and comfort of residents or their guests, or the operators or customers in places of business in the vicinity, or that may detrimentally or adversely affect such residences or places of business.
2. Noise standards. Table 16.502-C classifies uses and facilities and establishes exterior and interior noise standards applicable to all uses and facilities in each classification that is not exempt from these requirements pursuant to Subsection B. The requirements impose limits on regularly occurring noise for the specified time periods, averaged over an hour, and do not apply to incidental, infrequent, or unexpected noise, which are subject to Vallejo Municipal Code Chapter 7.84, Regulations of Noise Disturbances. The prohibitions contained in Municipal Code Chapter 7.84, apply to all land uses and activities in the city, and, in the case of a conflict, the more restrictive provisions apply.

TABLE 16.502-C: MAXIMUM NOISE LEVEL BY NOISE ZONE		
Noise Zoning districts	Maximum Noise Level in dBA (level not to be exceeded more than 30 minutes in any hour)	Maximum Noise Level in dBA (level not to be exceeded more than 5 minutes in any hour)

	Measured at Property Line or District Boundary	Measured at Any Boundary of a Residential Zone	Between 10 PM and 7AM, Measured at Any Boundary of a Residential Zone
Single-Unit Residential	60	60	-
Multiple-Unit Residential	65	65	-
Commercial and Mixed-Use, Medical, Office	70	60	50 or ambient noise level
Light Industrial	75	65	50 or ambient noise level
General Industrial	75	65	50 or ambient noise level
Public Facilities and Community Use	65	60	50 or ambient noise level
Open Space and Recreational Districts	65	60	50 or ambient noise level

3. The standard limits in Table 16.502-D shall be adjusted by five decibels for any noise that contains a steady, pure tone such as a whine, screech or hum, or an impulsive sound such as hammering or riveting, or contains music or speech, as described in the following table.

TABLE 16.502-D: MAXIMUM NOISE LEVEL ADJUSTMENT BY TIME AND TYPE	
TIME AND TYPE OF NOISE	ADJUSTMENT (DECIBELS)

Any type other than construction and related activities between 7 am and 10 pm	+5
Noise of unusual impulsive character (e.g., hammering or drilling)	-5
Noise of unusual periodic character (e.g., hammering or screeching)	-5

D. Additional Regulations. In addition to the following restrictions, hours may be modified with condition imposed by any conditional use permit or variance. The most restrictive hours shall apply.

1. Construction hours. Construction, demolition, and related loading/unloading activities that may generate noise exceeding levels in Table 16.502.E shall be limited to hours between 7:00 a.m. and 7:00 p.m. in residential zoning districts and in any mixed-use district.

TABLE 16.502-E: MAXIMUM NOISE LEVEL FOR TEMPORARY CONSTRUCTION ACTIVITY			
Time	RR, RLD	RMD, RHD, NMX, NC	Commercial (Including medical and office) and Industrial
Mobile construction equipment—non-scheduled, intermittent, and short-term for less than 15 days			
Weekdays 7 a.m. to 6 p.m.	75 dBA	80 dBA	85 dBA
Saturdays 9 a.m. to 6 p.m.	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None
Stationary construction equipment			
Weekdays 7 a.m. to 6 p.m.	60 dBA	65 dBA	70 dBA

Saturdays 9 a.m. to 6 p.m.	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None

2. Noise measurement. In determining whether any noise exceeds the maximum exterior noise limits set forth in this chapter, measurements shall be taken at the property line of the property from which the noise emanates, except that for noise emanating from property in a IG Zoning District, measurement shall be taken at boundary of the zoning district in which the property is located. Residential noise levels.
    a. Interior. No person shall operate or cause to be operated within a dwelling unit, any source of sound that causes the sound level when measured inside a neighboring receiving dwelling unit to exceed the allowable noise level, for any period of time.
    b. Exterior. The exterior noise limits for any source of noise within any residential zone shall be reduced by ten dBA between 10:00 p.m. and 7:00 a.m. The exterior noise limits for any source of noise in any zone other than a residential zone shall be reduced between 10:00 p.m. and 7:00 a.m. so that when the noise measured at the property line of a "noise-sensitive use" does not exceed fifty dBA. The interior noise level for steady state continuous noise from exterior sources in any residential bedroom with windows open between 10:00 p.m. and 7:00 a.m. shall not exceed thirty dBA.
    c. Mitigation required. New single-unit residential projects shall be located and designed so the noise levels in private use areas does not exceed sixty Ldn. For new multiple-unit residential projects a standard of sixty-five Ldn shall apply to outdoor areas excluding balconies.
    d. Noise from sources not under local jurisdiction such as freeways and aircraft shall be exempt.
    e. Developers of mixed-use projects that include residential development shall notify all potential residents that they may be exposed to noise from adjacent and nearby commercial, retail, entertainment, and circulation activity.

E. Noise level measurement. The following provisions establish a means for measuring noise levels. Where these provisions conflict with other requirements of the Vallejo Municipal Code, the following shall remain applicable for purposes of the Zoning Code:
    1. Setting of Meter. Any sound or noise level measurement made pursuant to the provisions of this title shall be measured with a sound level meter using an A-weighting and "slow"

response pursuant to applicable manufacturer's instructions, except that for sounds of a duration of two seconds or less, the "fast" response shall be used and the average level during the occurrence of the sound reported.

2. Calibration of Meter. The sound level meter shall be approximately calibrated and adjusted as necessary by means of an acoustical calibrator of the coupler-type to assure meter accuracy within the tolerances set forth in American National Standards ANSI-SI.4-1971.
3. Location of Microphone. All measurements shall be taken at any lot line of a lot within the applicable zoning district. The measuring microphone shall not be less than four feet above the ground, at least four feet distant from walls or other large reflecting surfaces and shall be protected from the effects of wind noises by the use of appropriate wind screens. In cases when the microphone shall be located within ten feet of walls or similar large reflecting surfaces, the actual measured distances and orientation of sources, microphone and reflecting surfaces shall be noted and recorded. In no case shall a noise measurement be taken within five feet of the noise source.
4. Measured Sound Levels. The measurement of sound level limits shall be the average sound level for a period of one hour.

F. Compliance. The director may require the applicant for a building permit, prior to the issuance of such permit, to submit such information with respect to proposed machinery, processes, products, or environmental impacts as may be necessary to demonstrate the ability of the proposed uses to comply with the requirements of this chapter.
   1. Acoustic studies that include assessment of noise levels and recommend mitigation measures shall be required for projects that are likely to be exposed to noise levels exceeding the standards in this chapter based on project location and surrounding uses.
   2. The California Land Use Compatibility standards for community noise environments published by the Governor's Office of Planning and Research shall be used as a basis for review of any new residential, commercial and mixed-use development.
   3. Whenever an environmental impact report has been submitted and determined to be adequate under state and city guidelines, no further information shall be required.

a. Locating air intakes away from high volume roadways and/or truck loading zones.

b. Ensuring that building heating, ventilation, and air conditioning systems include appropriately sized maximum efficiency rating (MERV) filters

5. Measures identified in the HRA shall be included in the environmental document and/or incorporated into the site development plan as a component of the proposed project. The air intake design and MERV filter requirements shall be noted and/or reflected on all building plans submitted to the City for review and verification by the Director and the City Building Official.

16.502.08 VIBRATION

No use shall be operated in a manner that produces vibrations discernible without instruments at any point on the property line of the lot on which the use is located.

16.502.09 NOISE

A. **Purpose.** The purpose of these regulations is to implement the General Plan policies on noise exposure and land use compatibility policies. More specifically, the purpose of the noise standards is to:

1. Establish the principles and context for the application of noise limits, standards for noise exposure and land use compatibility, and requirements for reasonable noise attenuation measures;
2. Protect noise sensitive uses from excessive noise exposure from other uses;
3. Establish regulations for maximum noise limits and procedures for enforcing them
4. Prevent any land use from generating sound that exceeds specific maximum levels based on the type uses and the type of noise.

B. **Exemptions.** The following facilities and uses are exempt from these regulations:

1. **Emergencies.** The emission of sound for the purpose of alerting persons to the existence of an emergency, the performance of emergency work, or the operation of emergency equipment including, but not limited to, generators.
2. **Warning Devices.** Warning devices necessary for the protection of the public safety, such as police, fire, and ambulance sirens.
3. **Special Events.** Occasional outdoor gatherings, public dances, shows, and sporting and entertainment events, provided that such events are conducted pursuant to a permit or license issued by the City.
4. **Religious Institutions and Other Similar Organizations.** Unamplified bells, chimes, or other similar devices used by religious institutions and other houses of religious worship.
5. **Time signals.** Signals produced by places of employment or worship and school recess signals providing no one sound exceeds 5 seconds in duration and no one series of sounds exceeds 24 seconds in duration.
6. **Municipal Solid Waste Collection.** Collection of solid waste, vegetative waste, and recyclable materials by the City or under contract with the City.
7. **Public Works Construction Projects, Maintenance, and Repair.** Street, utility, and similar construction projects undertaken by or under contract to or direction of the City, or the State of California or a public utility regulated by the California Public Utilities Commission, as well as maintenance and repair operations conducted by such parties, including street sweeping, debris and litter removal, removal of downed wires, restoring electrical service, repairing traffic signals, unplugging sewers, vacuuming catch basins, repairing of damaged poles, removal of abandoned vehicles, repairing of water hydrants and mains, gas lines, oil lines, sewers, storm drains, roads, and sidewalks.
8. **Transportation equipment.** Sounds from transportation equipment such as trucks and buses used primarily in the movement of goods and people to and from given premises and in connection with temporary construction or demolition work.
9. **Utility Facilities.** Facilities including without limitation 60-cycle electric power transformers and related equipment, sewer lift stations, municipal wells, and pumping stations.

C. **General Requirements.**

1. No person shall make, or cause to suffer, or permit to be made upon any public property, public right-of-way or private property, any excessive noise, annoying noise, amplified sound or vibrations that are physically annoying to reasonable persons of normal sensitivity or that are so harsh or so prolonged or unnatural or unusual in their use, time or place as to cause or contribute to the unnecessary and unreasonable discomfort of any persons of normal sensitivity located at the lot line of the property from which these noises emanate or that interfere with the peace and comfort of residents or their guests, or the operators or customers in places of business in the vicinity, or that may detrimentally or adversely affect such residences or places of business.
2. **Noise standards. Table 16.502-C** classifies uses and facilities and establishes exterior and interior noise standards applicable to all uses and facilities in each classification that is not exempt from these requirements pursuant to Subsection B. The requirements impose limits on regularly occurring noise for the specified time periods, averaged over an hour, and do not apply to incidental, infrequent, or unexpected noise, which are subject to Vallejo Municipal Code Chapter 7.84, Regulations of Noise Disturbances. The prohibitions contained in Municipal Code Chapter 7.84, apply to all land uses and activities in the City, and, in the case of a conflict, the more restrictive provisions apply.

TABLE 16.502-C: MAXIMUM NOISE LEVEL BY NOISE ZONE

Noise Zoning districts	Maximum Noise Level in dBA (level not to be exceeded more than 30 minutes in any hour)		Maximum Noise Level in dBA (level not to be exceeded more than 5 minutes in any hour)
	Measured at Property Line or District Boundary	Measured at Any Boundary of a Residential Zone	Between 10 PM and 7AM, Measured at Any Boundary of a Residential Zone
Single-Unit Residential	60	60	-
Multiple-Unit Residential	65	65	-
Commercial and Mixed-Use, Medical, Office	70	60	50 or ambient noise level
Light Industrial	75	65	50 or ambient noise level
General Industrial	75	65	50 or ambient noise level
Public Facilities and Community Use	65	60	50 or ambient noise level
Open Space and Recreational Districts	65	60	50 or ambient noise level

3. The standard limits in **Table 16.502-D** shall be adjusted by 5 decibels for any noise that contains a steady, pure tone such as a whine, screech or hum, or an impulsive sound such as hammering or riveting, or contains music or speech, as described in the following table.

TABLE 16.502-D : MAXIMUM NOISE LEVEL ADJUSTMENT BY TIME AND TYPE

TIME AND TYPE OF NOISE	ADJUSTMENT (DECIBELS)
Any type other than construction and related activities between 7 am and 10 pm	+5
Noise of unusual impulsive character (e.g., hammering or drilling)	-5
Noise of unusual periodic character (e.g., hammering or screeching)	-5

D. **Additional Regulations.** In addition to the following restrictions, hours may be modified with condition imposed by any conditional use permit or variance. The most restrictive hours shall apply.

1. **Construction hours.** Construction, demolition, and related loading/unloading activities that may generate noise exceeding levels in **Table 16.502.E** shall be limited to hours between 7 am and 7 pm in Residential Zoning Districts and in any mixed-use district.

TABLE 16.502-E: MAXIMUM NOISE LEVEL FOR TEMPORARY CONSTRUCTION ACTIVITY

Time	RR, RLD	RMD, RHD, NMX, NC	Commercial (Including medical and office) and Industrial
Mobile construction equipment—non-scheduled, intermittent, and short-term for less than 15 days			
Weekdays 7am to 6pm	75 dBA	80 dBA	85 dBA
Saturdays 9am to 6pm	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None
Stationary construction equipment			
Weekdays 7am to 6pm	60 dBA	65 dBA	70 dBA
Saturdays 9am to 6pm	60 dBA	65 dBA	70 dBA
Sundays and legal holidays	None	None	None

2. **Noise measurement.** In determining whether any noise exceeds the maximum exterior noise limits set forth in this Chapter, measurements shall be taken at the property line of the property from which the noise emanates, except that for noise emanating from property in a IG Zoning District, measurement shall be taken at boundary of the zoning district in which the property is located. **Residential noise levels.**

a. **Interior.** No person shall operate or cause to be operated within a dwelling unit, any source of sound that causes the sound level when measured inside a neighboring receiving dwelling unit to exceed the allowable noise level, for any period of time.

b. **Exterior.** The exterior noise limits for any source of noise within any residential zone shall be reduced by 10 dBA between 10:00 p.m. and 7:00 a.m. The exterior noise limits for any source of noise in any zone other than a residential zone shall be reduced between 10:00 p.m. and 7:00 a.m. so that when the noise measured at the property line of a "noise-sensitive use" does not exceed 50 dBA. The interior noise level for steady state continuous noise from exterior sources in any residential bedroom with windows open between 10:00 p.m. and 7:00 a.m. shall not exceed 30 dBA.

c. **Mitigation required.** New single-unit residential projects shall be located and designed so the noise levels in private use areas does not exceed 60 Ldn. For new multiple-unit residential projects a standard of 65 Ldn shall apply to outdoor areas excluding balconies.

d. Noise from sources not under local jurisdiction such as freeways and aircraft shall be exempt.

e. Developers of mixed-use projects that include residential development shall notify all potential residents that they may be exposed to noise from adjacent and nearby commercial, retail, entertainment, and circulation activity.

E. **Noise level measurement.** The following provisions establish a means for measuring noise levels. Where these provisions conflict with other requirements of the Vallejo Municipal Code, the following shall remain applicable for purposes of the Zoning Code:

1. **Setting of Meter.** Any sound or noise level measurement made pursuant to the provisions of this title shall be measured with a sound level meter using an A-weighting and "slow" response pursuant to applicable manufacturer's instructions, except that for sounds of a duration of 2 seconds or less, the "fast" response shall be used and the average level during the occurrence of the sound reported.

2. **Calibration of Meter.** The sound level meter shall be approximately calibrated and adjusted as necessary by means of an acoustical calibrator of the coupler-type to assure meter accuracy within the tolerances set forth in American National Standards ANSI-SI.4-1971.

3. **Location of Microphone.** All measurements shall be taken at any lot line of a lot within the applicable zoning district. The measuring microphone shall not be less than 4 feet above the ground, at least 4 feet distant from walls or other large reflecting surfaces and shall be protected from the effects of wind noises by the use of appropriate wind screens. In cases when the microphone shall be located within 10 feet of walls or similar large reflecting surfaces, the actual measured distances and orientation of sources, microphone and reflecting surfaces shall be noted and recorded. In no case shall a noise measurement be taken within 5 feet of the noise source.
4. **Measured Sound Levels.** The measurement of sound level limits shall be the average sound level for a period of one hour.

F. **Compliance.** The Director may require the applicant for a building permit, prior to the issuance of such permit, to submit such information with respect to proposed machinery, processes, products, or environmental impacts as may be necessary to demonstrate the ability of the proposed uses to comply with the requirements of this Chapter.

1. Acoustic studies that include assessment of noise levels and recommend mitigation measures shall be required for projects that are likely to be exposed to noise levels exceeding the standards in this Chapter based on project location and surrounding uses.
2. The California Land Use Compatibility standards for community noise environments published by the Governor's Office of Planning and Research shall be used as a basis for review of any new residential, commercial and mixed-use development.
3. Whenever an environmental impact report has been submitted and determined to be adequate under state and city guidelines, no further information shall be required.

16.503 TRIP-REDUCTION MEASURES

16.503.01 PURPOSE AND APPLICABILITY

These regulations are established to make Vallejo a more attractive and healthful place to live, work, visit, and do business by reducing traffic congestion, demand for parking and associated air pollution noise, fuel consumption. More specifically, the provisions of this Chapter are intended to:

A. Implement State requirements requiring cities to address greenhouse gas emissions contributing to climate change and General Plan policies to decrease dependence on single-occupant vehicles by requiring development to incorporate measures to reduce Vehicle Miles Traveled (VMT);

B. Improve the mobility and general efficiency of circulation and transportation systems by increasing reliance on public transit, ridesharing, walking, car-sharing, cycling and focusing development in areas close to transit and employment;

C. Reduce traffic impacts within the community and region, vehicular air pollutant emissions, energy usage, and ambient noise levels through a reduction in the number of per capita vehicle miles traveled and management of traffic congestion;

D. Inform residents, workers, employers and other business owners about travel options and the impacts of travel choices;

E. Coordinate transportation system management, TDM, and transportation facility development strategies Citywide, with other cities in the region and through regional agencies; and,

F. Support local and regional efforts to relieve traffic congestion in and around the City.

G. The requirements of this Chapter apply to:

1. New multi-unit development of 10 units or more;
2. New non-residential development of 10,000 square feet or more; and
3. Employers with 50 or more employees at a single worksite within the City except for employers subject to Bay Area Air Quality Management District (BAAQMD) Regulation 13, Rule 1, Trip Reduction Requirements for Large Employers.

SAN LUIS OBISPO

MEMORANDUM

DATE: January 9, 2025

TO: Cesar Orozco, City of Vallejo

FROM: Arthur Black, Principal

SUBJECT: Transportation Analysis for the Vista Cove Project (LSA Project No. 20241845)

LSA reviewed the proposed construction of 51 single family residential dwelling units at the northeast corner of Shady Lane and Wildflower Street (Vista Cove Project or proposed project) to determine if the project would conflict with or create inconsistency with California Environmental Quality Act (CEQA) Guidelines Section 15064.3, subdivision (b), as required. This memorandum provides supporting evidence that the project would be consistent with the State's priorities of reducing greenhouse gas (GHG) emissions and encouraging housing development, which is the intent of Senate Bill (SB) 743.

The project would be located south of Interstate 780 (I-780) on the southeast border of Vallejo, California. Residential land uses are west and south of the project site. The project site is currently vacant land immediately adjacent to an existing residential neighborhood.

PROJECT TRIP GENERATION

As stated previously, the Vista Cove project would construct 51 single-family homes. The Institute of Transportation Engineers (ITE) *Trip Generation Manual*, 11th Edition (2021) provides trip generation rates for this land use. These trip rates are based on data collected at more than 150 single-family residential communities between the 1980s and 2010s, which were pre-pandemic and prior to the rise in prevalence of remote work. As such, these trip rates may be higher than current residential trip production, and are therefore a conservative approach. Table A summarizes the projected project trip generation for the proposed project. As Table A indicates, the proposed project is anticipated to generate 481 new daily trips.

Table A: Trip Generation

Land Use (ITE Land Use Code)	Size	Unit	ADT	AM Peak Hour			PM Peak Hour		
				In	Out	Total	In	Out	Total
Trip Rates[1]									
Single-Family Detached Housing (210)		DU	9.43	0.17	0.53	0.70	0.59	0.35	0.94
Proposed Project Trip Generation									
Proposed Project	51	DU	481	9	26	35	30	18	48
Total Trip Generation			**481**	**9**	**26**	**35**	**30**	**18**	**48**

[1] Trip rates based on the Institute of Transportation Engineers (ITE) *Trip Generation* Manual, 11th Edition (2021).
ADT = average daily traffic
DU = dwelling unit

ANALYSIS THRESHOLD

The State revised its *State CEQA Guidelines* in January 2019. Among the revisions, vehicle delay and level of service analysis have been removed from consideration under CEQA consistent with SB 743. The current *State CEQA Guidelines* prescribe the evaluation of transportation impacts on a project's effect on vehicle miles traveled (VMT). At the time of this revision, a deadline of July 1, 2020 was established for jurisdictions to adopt thresholds for evaluation of transportation impacts according to VMT. Staff at the City of Vallejo (City) prepared draft *CEQA Transportation Impact Analysis Guidelines* in July 2020, which were revised in October 2020; however, they have not been formally adopted. Prior to the revised *State CEQA Guidelines,* the City adopted the *City of Vallejo Traffic Impact Analysis/Study Guidelines*, which established that small projects that would add fewer than 500 daily two-way trips or 100 peak period two-way trips were below the threshold for requiring transportation analysis.

State CEQA Guidelines Section 15064.7(c) states:

> When adopting or using thresholds of significance, a lead agency may consider thresholds of significance previously adopted or recommended by other public agencies or recommended by experts, provided the decision of the lead agency is supported by substantial evidence.

In addition, Solano County has also not adopted guidelines regarding VMT or thresholds of significance. In the absence of formally adopted thresholds the City, as the lead agency, may consider a threshold of significance supported by substantial evidence.

Simultaneous with clearance of the revised *State CEQA Guidelines*, the Governor's Office of Planning and Research (OPR), now known as Governor's Office of Land Use and Climate Innovation (LCI) released the *Technical Advisory for Evaluating Transportation Impacts under CEQA*, December 2018 (Technical Advisory). The Technical Advisory states that the document's purpose is "to provide advice and recommendations, which agencies and other entities may use at their discretion." The Technical Advisory goes on to state that it "does not alter lead agency discretion in preparing environmental documents subject to CEQA" and "should not be construed as legal advice."

The Technical Advisory suggests that small projects generating fewer than 110 trips per day, residential and office projects in VMT efficient areas, projects near high-quality transit, affordable residential development, and local-serving retail uses may be presumed to have a less than significant impact on VMT. As shown in Table A, the project would generate more than 110 trips per day. While the Technical Advisory recommends a threshold of 110 trips per day for a small project this recommendation is not relevant to the original intent of modifications to the *State CEQA Guidelines*, which was to reduce GHG emissions. In addition, the recommendation is not specific to residential development as it solely references office development (see footnote 19 of the Technical Advisory).

The State has prioritizes the reduction of GHG emissions while also encourages housing development. To this end, Section 1(b)(2) of SB 743 identifies that support of infill development was an intent of the Legislature when passing SB 743. This memorandum provides analysis and evidence demonstrating that the recommended 110-daily-trip threshold is not appropriate to meet the State's simultaneous priorities of reducing GHG emissions and encouraging housing development or the intent of the Legislature when passing SB 743 to support infill development. Infill development is generally situated within existing city boundaries and is surrounded by urban development. The project site is located within the existing city boundary, is adjacent to an existing residential neighborhood and interstate highway with additional urban development located north, south, and east of the project site beyond the interstate highway.

SMALL PROJECT EFFECT ON GHG EMISSIONS

One of the stated goals of SB 743 is to reduce GHG emissions. The California Emissions Estimator Model (CalEEMod) is provided by the California Air Resources Board to be used Statewide for developing project-level GHG emissions. LSA used results from this model to correlate the effect of changes in residential project-related daily trips to the resulting GHG emissions. CalEEMod was used with built-in default trip lengths and types to show the vehicular GHG emissions from incremental amounts of daily trips. Table B shows the resulting annual VMT and GHG emissions from the incremental daily trips.

Table B: Representative VMT and GHG Emissions from CalEEMod

Daily Trips	Annual Vehicle Miles Traveled (VMT)	GHG Emissions (Metric Tons CO2e per year)
200	683,430	258
300	1,021,812	386
400	1,386,416	514
500	1.703,020	643
600	2,043,623	771

Source: CalEEMod version 2016.3.2.
CalEEMod = California Emissions Estimator Model
CO_2e = carbon dioxide equivalent
GHG = greenhouse gas

A common GHG emission threshold is 3,000 metric tons (MT) of carbon dioxide equivalent (CO_2e) per year. The vehicle emissions are typically more than 50 percent of the total project GHG

emissions, the other 50 percent coming from on-site and project-related activities (e.g., electricity generation). Thus, a project with 500 daily trips (i.e., the City's pre-existing screening threshold for transportation analysis) would generally have total project emissions that could be less than 1,300 MT CO_2e/year (i.e., 50 percent or 643 MT CO_2e/year coming from vehicle emissions and the other 50 percent coming from other project activities). As this level of GHG emissions would be less than 3,000 MT CO_2e/year, the emissions of GHG from a project up to 500 ADT would typically be less than significant.

The CalEEMod analysis described above is consistent with guidance from the Bay Area Air Quality Management District (BAAQMD). BAAQMD provides guidelines for jurisdictions in the Bay Area (such as Vallejo) in regard to analysis, mitigation, and management of air pollutant and GHG under CEQA. Table 4-4 of the *California Environmental Quality Act Air Quality Guidelines* (BAAQMD, 2022) provides screening levels for single land use projects. These guidelines state that up to 421 single family homes would be appropriately screened from analysis as they would operate below the GHG emissions thresholds. The project proposes about 12 percent of the 421 single family homes that would be presumed to have a less than significant impact on GHG according to BAAQMD guidelines. If a residential project producing fewer than 500 daily trips produces fewer GHG emissions according to CalEEMod than the emissions threshold and is below the screening threshold of the BAAQMD guidelines and one of the stated goals of the VMT enabling legislation is to reduce GHG emissions, then the City's pre-existing threshold of 500 daily trips is still valid to determine when small projects would have a less than significant impact on transportation.

PROJECT SIGNIFICANCE

The Vista Cove project is immediately adjacent to an existing residential neighborhood and would construct 51 dwelling units extending that existing residential neighborhood within the city limits of Vallejo. Section 1(b)(2) of SB 743 identifies that support of infill development was an intent of the Legislature when passing SB 743. Another stated goal is to reduce GHG emissions. CEQA allows a lead agency discretion to use a threshold supported by substantial evidence. Given that the proposed project's 51 dwelling units is below the 421 dwelling unit screening level identified by BAAQMD and the 481 daily trips would produce GHG emissions at a level below a common threshold of significance, the City could apply these findings as substantial evidence for a determination of less than significant.

The proposed project extends existing residential development and would have a less than significant impact on GHG emissions because it is a small project, and as such would not conflict or be inconsistent with *State CEQA Guidelines* section 15064.3, subdivision (b).

MEMORANDUM

DATE: January 15, 2026

TO: Cesar Orozco, Planning Manager, City of Vallejo

FROM: Theresa Wallace, AICP, Principal
Florentina Craciun, Senior Environmental Planner

SUBJECT: Vista Cove Planned Development Project Subsequent Initial Study/Mitigated Negative Declaration Text Revisions

This memorandum presents specific changes to the text of the Subsequent Initial Study/Mitigated Negative Declaration (IS/MND) that are being made to clarify and supplement materials in the Subsequent IS/MND. The revised text does not provide new information that would result in any new significant impact not already identified in the Subsequent IS/MND or a substantial increase in the severity of an impact identified in the Subsequent IS/MND that cannot be mitigated to a less than significant level with implementation of mitigation measures agreed to by the project sponsor. Thus, none of the text revisions would require recirculation pursuant to *State CEQA Guidelines* Section 15088.5. The text revisions identified below are incorporated into the Final Subsequent IS/MND for the Vista Cove Planned Development Project. In the revisions shown below, added text is indicated with double underlined text. Text deleted is shown in ~~strikeout~~.

SUBSEQUENT INITIAL STUDY/MITIGATED NEGATIVE DECLARATION TEXT REVISIONS

Revisions to Chapter 2.0, Project Description

Based on comments received from the Vallejo Flood and Wastewater District (VFWD), the City has revised Section 2.2.5.2, Wastewater, and Section 2.2.6, Operations and Maintenance, in Chapter 2.0, Project Description, of the Subsequent IS/MND to add mention of the 6-inch sewer force main to connect the lift station to the existing sewer force main located in Shady Lane and to clarify that only the sanitary sewer would be publicly maintained, while the storm drains would be privately maintained. Text has also been added to state that the current lift station would be relocated and upsized.

In addition, Figure 2-4, Conceptual Site Plan, has been revised to show that Parcel E would be a VFWD-owned and maintained Sewer Pump Station. The original and revised Figure 2-4 are provided on the following pages.

Vista Cove Planned Development Project
Revised Conceptual Site Plan

Section 2.2.5.2, Wastewater, Page 2-20

The Vallejo Flood and Wastewater District (VFWD) maintains existing sanitary sewer lines within the vicinity of the project site. A new 8-inch sewer lateral would connect to the existing 8-inch public sanitary sewer main line located in Shady Lane at the northwestern corner of the project site. The sanitary sewer would be designed and installed to VFWD standards. The project would also include the replacement of the existing sewer lift station that currently serves the 141 single-family home development to the west of the proposed project site with an upgraded system to serve both communities and a new 6-inch sewer force main to connect the lift station to the existing sewer force main located in Shady Lane. The new lift station would be owned and maintained by the VFWD and the existing lift station would be relocated and upsized.

Section 2.2.6, Operations and Maintenance, Page 2-2

Within the residential areas, the individual lots, open space, common open space areas, and water quality basin would be privately owned by a dedicated homeowners association (HOA). The streets that serve the residential lots would also be dedicated to the HOA for private ownership and maintenance. The other remaining 10 acres of open space would be privately owned, managed, and maintained by the HOA.

All ~~U~~utility infrastructure located within the private streets, except for stormwater infrastructure, would be dedicated and maintained by the City/VFWD.~~, while~~ Stormwater infrastructure and utility infrastructure within the private alleys/paseos would be owned and maintained by the HOA.

Revisions to Section 4.3, Air Quality

Based on comments received from the VFWD, the City has revised Section 4.3, Air Quality, to discuss potential odor impacts associated with the proposed sewer lift station.

Section 4.3.3, Impact Analysis, Page 4-30

d. Would the project result in other emissions (such as those leading to odors) adversely affecting a substantial number of people? ***(Less than Significant Impact, No New Impact)***

During project construction, some odors may be present due to diesel exhaust. However, these odors would be temporary and limited to the construction period. Once operational, the proposed project would generally not include any activities or operations that would generate objectionable odors and once operational, the project would not be a source of odors. However, the proposed sewer lift station may generate odors due to the presence of hydrogen sulfides, volatile organic compounds, and other factors. The lift station would be owned and maintained by the VFWD and would be subject to VFWD standards. In addition, the proposed sewer lift station is not a new facility, but rather a replacement and upgrade to the existing lift station that currently serves the 141 single-family residences located west of the project site. The proposed lift station would continue to serve the existing community while also accommodating the development proposed under the project. Therefore, the proposed lift station would not introduce a new odor source to the area that would adversely affect a substantial number of people.

Furthermore, odor emissions are regulated under California Health and Safety Code Section 41700, which prohibits the discharge of air contaminants in quantities that cause a nuisance or annoyance to the public, as well as by the Bay Area Air District Regulation 7, Odorous Substances. Should the Air Pollution Control Officer receive ten or more odor complaints within a 90-day period, then the applicant would be subject to enforcement and corrective action, such as the installation of further odor control features. Therefore, the proposed project would not result in other emissions (such as those leading to odors) adversely affecting a substantial number of people. This impact would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Revisions to Section 4.4, Biological Resources

Based on comments received from the California Department of Fisha and Wildlife (CDFW), Section 4.4, Biological Resources, has been updated to include a discussion of Swainson's hawk and tricolored blackbird, and include recommended mitigation measures related to burrowing owl.

Section 4.4.3, Impact Analysis, Page 4-39

a. Would the project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? ***(Less than Significant with Mitigation Incorporated, No New Impact)***

Special-status species are defined as follows:

1. Species that are listed, formally proposed, or designated as candidates for listing as threatened or endangered under the federal Endangered Species Act or California Endangered Species Act.

1. Plant species assigned to California Rare Plant Ranks (CRPR) 1A, 1B, 2A, 2B, or 3.

2. Animal species designated as Species of Special Concern or Fully Protected Species by the California Department of Fish and Wildlife (CDFW).

3. Species that meet the definition of rare, threatened, or endangered under Section 15380 of the *State CEQA Guidelines*.

4. Species considered as a taxon of special concern by local agencies.

As discussed in Section 4.4.2.1, 65 special-status plant species have been documented in the vicinity of the project site; however, no special-status plant species were observed on site during the habitat assessments completed for the Biological Resources Report and the species documented in the greater vicinity have unlikely or no potential to occur on the project site. Therefore, the proposed project would result in no impacts to special-status plant species.

As discussed in Section 4.4.2.1, 52 special-status wildlife species have been documented in the vicinity of the project site. Of the 52 special-status species known from the region, five species were determined to have a moderate or high potential to occur within the project site, including the following: white-tailed kite (*Elanus leucurus*), northern harrier (*Circus hudsonius [cyaneus]*), short-eared owl (*Asio flammeus*), silver-haired bat (*Lasionycteris noctivagans*), and hoary bat (*Lasiurus cinereus*). Although Swainson's hawk (*Buteo swainsoni*) is known to occur within the region, the project site is located outside of the breeding range of Swainson's hawk document in literature and Swainson's hawk is deemed to have potential to occur on the [project site for seasonal migratory stopover only. Similarly, although the tricolor blackbird (*Agelaius tricolor*) is known to occur within the region, the seasonal wetland in the project area does not form reed or tule cover thick enough to support a tricolored blackbird breeding colony is the area is dominated by low growing (less than two feet tall) vegetation. In addition, the freshwater marsh wetland on the southern end of the project site, which would be avoided, is linear and less than the minimum 15-meter width of covered wetland habitat that tricolored blackbird requires to establish breeding colonies. Further, the dense vegetation along the southern tributary is a well-developed riparian canopy and does not support suitable vegetation for a breeding colony.

Construction activities associated with the proposed project could result in direct mortality of white-tailed kite, northern harrier, short-eared owl, and other native bird species nests, which would be considered a potentially significant impact. Impacts to active nests of this species and their eggs, chicks and young could occur during the removal of trees, vegetation, or other ground-disturbing activities. These activities could result in the direct removal or destruction of active nests, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in nest abandonment. To reduce potential impacts to white-tailed kite, northern harrier, short-eared owl, and other native nesting birds to a less than significant level, **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** would be implemented, which require the completion of pre-construction bird surveys should construction activities occur during the nesting bird season.

Project Specific Mitigation Measure BIO-1a	**Avoidance of Nesting Bird Season.** To avoid adverse effects to the active nests of special-status and other native bird species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur during the non-nesting season, between September 1 through January 31.
Project Specific Mitigation Measure BIO-1b	**Pre-Construction Nesting Bird Surveys.** A pre-construction nest survey for white-tailed kite, northern harrier, short-eared owl, and other native bird species shall be conducted prior to initial ground disturbance, including tree removal or vegetation removal if it begins during the nesting bird season (defined as February 1 through August 31). If active nests (containing eggs, chicks or young) are discovered during these surveys, a qualified

biologist shall establish a species-specific no-work buffer around the active nest. Work may resume in the buffer after the nesting season ends, or a qualified biologist confirms the nest is inactive.

Project Specific Mitigation Measure BIO-1b would be implemented in compliance with state and federal regulations. Buffers would be implemented on a "species-specific" basis and special status species with potential for nesting, such as white-tailed kite, would have more substantial avoidance buffers implemented in the case of observance of active nests. Because potential impacts to special-status species would be avoided, no Incidental Take Permit (ITP) would be required.

As discussed in the *Biological Resources Impact Analysis*[1] prepared for the proposed project, there is no potential for the project site to support breeding burrowing owl and the project site represents poor wintering habitat, indicating that burrowing owl presence is unlikely. In addition to the lack of burrows, the project site is characterized by steeply sloping hillsides dominated by tall, unmanaged vegetation, conditions that are not conducive to burrowing owl presence. Nevertheless, in an abundance of caution, the proposed project would implement **Project Specific Mitigation Measures BIO-5a** and **BIO-5b** to ensure that potential impacts to burrowing owls would be less than significant.

Project Specific Mitigation Measure BIO-5a **Burrowing Owl Habitat Assessment, Surveys, and Protection.** A qualified biologist shall conduct a habitat assessment and surveys for wintering burrowing owl prior to construction if construction starts during the burrowing wintering season (September 1 to January 31). Surveys shall be conducted if warranted based on the habitat assessment and shall begin on or within three days of August 1. The habitat assessment and surveys shall follow the Department of Fish and Game Staff Report on Burrowing Owl Mitigation methodology and the qualified biologist shall prepare a report documenting the survey results. The habitat assessment and surveys shall encompass the project site and a sufficient buffer zone to detect owls nearby that may be impacted, which is up to 500 meters (1,640 feet) around the project site pursuant to the above methodology. Habitat assessments and surveys shall occur annually for the duration of the project, as conditions may change annually and suitable refugia for burrowing owl, such as small mammal burrows, can be created

[1] WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

	within a few hours or days, unless otherwise approved in writing by CDFW. Surveys for non-breeding burrowing owl shall be spread over four visits during the nonbreeding season (i.e., wintering) and shall start on or within 3 days of August 1 and continue to January 31, unless otherwise approved in writing by CDFW. Time lapses between surveys or project activities shall trigger subsequent surveys including, but not limited to, a final survey within 24 hours prior to ground disturbance. The qualified biologist shall have a minimum of two years of experience implementing the above methodology. The project applicant shall immediately notify CDFW if burrowing owl is detected and implement a construction avoidance buffer around any detected burrowing owl pursuant to the buffer distances outlined in the Department of Fish and Game Staff Report on Burrowing Owl Mitigation, which may be up to 500 meters (1,640 feet). Any detected owl shall be monitored by the qualified biologist to ensure it is not disturbed during construction activities. If take of burrowing owl cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP before Project activities may commence.
Project Specific Mitigation Measure BIO-5b	**Covering of Entrapment Hazards.** To prevent burrowing owl from sheltering or nesting in exposed material; all construction pipes, culverts, hoses or similar materials greater than two inches in diameter stored at the project site shall be capped or covered before the end of each workday and shall be inspected thoroughly for wildlife before the pipe or similar structure is buried, capped, used, or moved.

With implementation of **Project Specific Mitigation Measure BIO-5a**, which requires a burrowing owl habitat assessment and surveys for wintering burrowing owl prior to construction if construction starts during the burrowing owl wintering season (September 1 to January 31), and **Project Specific Mitigation Measure BIO-5b,** which requires all construction pipes, culverts, hoses or similar materials be capped or covered to prevent burrowing owl from shelter or nesting in exposed materials, potential impacts on burrowing owl would be reduced to less than significant.

The removal of 69 trees from the northern half of the project site could result in direct mortality of silver-haired bat and hoary bat adults and maternity roosts, which would be considered a potentially significant impact. Impacts to active maternity roosts of this species and their pups could occur during the removal of trees, vegetation, or other ground-disturbing activities in proximity to roost sites. These activities could result in the direct removal or destruction of active roosts, as well as generate audible, vibratory and/or visual disturbances that might indirectly result in roost abandonment. To reduce potential impacts to the silver-haired bat and hoary bat to a less than significant level, **Project Specific Mitigation Measures BIO-2a** and **BIO-2b** would be implemented, which require the completion of a bat roost assessment should construction activities occur during the maternity roost season.

Project Specific Mitigation Measure BIO-2a

Avoidance of Maternity Roosting Season. To avoid adverse effects to maternity roosts of special-status and other bat species, tree removal, vegetation removal, and initial ground disturbance should be prioritized to occur outside the maternity roosting season, between September 1 through April 30. Large trees (diameter at breast height [DBH] > 24 inches) removed during this season (September 1–April 30) shall be cut using a two-phased system where branches and limbs are cut and left on the ground overnight prior to chipping or removal from the site.

Project Specific Mitigation Measure BIO-2b

Pre-Construction Roost Surveys. During the maternity roost season (May 1–August 31), at least 30 days prior to the removal of any large tree (DBH > 24 inches) a bat roost assessment shall be conducted by a qualified biologist to determine if potential roost habitat is present.

If no maternity roost habitat is present, trees shall be removed using a two-phased cut. Cut branches and limbs shall be left on the ground overnight prior to chipping or removal from the site.

If potential maternity roosting habitat is present, the qualified biologist shall conduct an emergence survey to determine if the roost is occupied or assume the roost is occupied and establish a no-work buffer. If an emergence survey is conducted and does not detect bats, the tree may be removed with no further measures required to protect roosting bats. If roosting bats are detected, or the tree is assumed to be an active roost, the tree shall be given a 100-foot no work buffer and shall be

avoided until after the maternity roosting season is complete. Once the maternal roosting season is complete, tree removal shall follow the two-phase approach for tree removal.

With implementation of **Project Specific Mitigation Measures BIO-1a, BIO-1b, BIO-2a,** ~~and~~ **BIO-2b**, **BIO-5a**, and **BIO-5b**, the proposed project would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS. Impacts would be less than significant with mitigation incorporated. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Revisions to Section 4.7, Geology and Soils

The City has updated Section 4.7, Geology and Soils, to reference the memorandum prepared by ENGEO that states that the conclusions and recommendations provided in the *Preliminary Geotechnical Exploration* prepared for the proposed project are still valid.

Section 4.7.2, Background, Page 4-65

Unless otherwise noted, the following analysis is based on the *Preliminary Geotechnical Exploration* prepared for the proposed project[1] and the peer review conducted as part of the environmental review process[2]. Although the *Preliminary Geotechnical Exploration* was prepared in 2022 and is only valid for two years, ENGEO has prepared a memorandum[3] that indicates the conclusions and recommendations provided in the *Preliminary Geotechnical Exploration* are still valid. A copy of the *Preliminary Geotechnical Exploration*, ~~and~~ peer review, and memorandum stating the conclusions and recommendations provided in the *Preliminary Geotechnical Exploration* are still valid are included in **Appendix E** of this Initial Study.

Revisions to Section 4.13, Noise

Based on comments received from the VFWD, the City has revised Section 4.13, Noise, to discuss potential operational noise impacts associated with the proposed sewer lift station.

Section 4.13.3, Impact Analysis, Page 4-120

Off-Site Operational Noise Impacts. Adjacent off-site land uses would potentially be exposed to stationary-source noise impacts from the proposed ground mounted air conditioning units. These units are anticipated to operate intermittently throughout the day and night. The analysis considered worst-case conditions, assuming 24-hour operation, seven days per week. Based on the

---

1 ENGEO. 2022a. *Vallejo Properties – Vista Cove, Vallejo, California, Preliminary Geotechnical Exploration.* September 12.

2 Baseline Environmental Consulting. 2025. *Peer Review of Preliminary Geotechnical Exploration, Vista Cove Planned Development Project, Vallejo, California.* March 26.

3 ENGEO. 2026. Geotechnical Report Clarification. January 7.

reference noise levels detailed in the Noise Impact Analysis,[1] the highest operational noise level would average 33.3 dBA L_{eq} at the sensitive receiver locations, which would not exceed the daytime or nighttime noise level thresholds of 60 dBA L_{eq} or 50 dBA L_{eq}, respectively, at any receiver location. As such, the air conditioning units, which represent the primary source of operational noise, would not exceed the City's established thresholds for residential areas. In addition, periodic testing of the proposed lift station during operation would also generate some noise. However, noise levels would meet the VFWD's requirements for limited noise to ensure that this noise would be less than 4 dBA along the nearest residential property line. Therefore, the operational noise generated by the proposed project would not result in a substantial permanent increase in ambient noise levels in excess of local standards as the project noise impacts were within the noise impacts evaluated in the General Plan EIR. Impacts would be less than significant. No new impacts or substantially more severe significant impacts would result with implementation of the proposed project when compared to those analyzed in the General Plan EIR.

Revisions to Section 4.18, Tribal Cultural Resources

Based on comments received from the Confederated Villages of Lisjan Nation, the City has revised Section 4.18, Tribal Cultural Resources, to add an additional mitigation measure related to the inadvertent discovery of tribal cultural resources.*Section 4.18.3, Impact Analysis, Page 4-147*

In the event that cultural items or human remains determined to be of Native American origin are encountered during project ground disturbing activities, **Project Specific Mitigation Measures TCR-1** and **TCR-2** shall be implemented.

Project Specific Mitigation Measure TCR-1

Protocol for Discovery of Native American Human Remains ~~Cultural Items.~~ The preferred protocol upon the discovery of Native American human remains is to secure the area, stop work within 25 feet of the find, cover any exposed human remains or other cultural items and avoid further disturbances in the area. All parties are advised to treat the remains with appropriate dignity, as provided in Public Resources Code (PRC) Section 5097.98. All parties shall treat tribal representatives and the event itself with appropriate respect.

If, after the appropriate Tribal representative has been granted access to the site and it is determined that avoidance is not feasible, an examination of the human remains will be conducted to confirm they are human and to determine the position, posture, and orientation of the remains. The following procedures shall be followed:

[1] Urban Crossroads. 2025. *Vista Cove Noise Impact Analysis, City of Vallejo.* April.

- All excavation in the vicinity of the human remains shall be conducted using fine hand tools and fine brushes to sweep loose dirt free from the exposure.

- In order to determine the nature and extent of the grade and its contents, controlled excavation should extend to a full buffer zone around the perimeter of the remains.

- To initiate the exposure, a perimeter balk (especially, a shallow trench) should be excavated, representing a reasonable buffer a minimum of 10 centimeters around the maximum extent of the known skeletal remains, with attention to counterintuitive discoveries or unanticipated finds relating to this or other remains. The dirt from the perimeter balk should be bucketed, distinctly labeled, and screened for cultural materials.

- Excavation should then proceed inward from the walls of the balk as well as downward from the surface of the exposure. Loose dirt should be scooped out and brushed off into a dustpan or other collective device. Considerable care should be given to ensure that human remains are not further impacted by the process of excavation.

- Buckets, collection bags, notes, and tags should be fully labeled per provenience, and a distinction should be made between samples collected from: (1) Perimeter Balk (described above), (2) Exposure (dirt removed in exposing the exterior/burial plan and associations, and (3) Matrix (dirt from the interstices between bones or associations). Thus, each burial may have three bags, “Burial 1 Perimeter Balk,” “Burial 1 Exposure Balk,” “Burial 1 Matrix.”

- The following records should be compiled in the field: (1) a detailed scale drawing of the burial, including the provenience of and full for all human remains, associated artifacts, and the

configuration of all associated phenomena such as burial pits, evidence for pre-interment grave pit burning, soil variability, and intrusive disturbance, (2) complete a formal burial record using the consultants proprietary form or other standard form providing information on site #, unit or other proveniences, level depth, depth and location of the burial from a fixed datum, workers, date(s), artifact list, skeletal inventory, and other pertinent observations, (3) crew chief and worker field notes that may supplement or supersede information contained in the burial recording form, and (4) photographs, including either standard photography or high-quality (400-500 DPI or 10 MP recommended) digital imaging.

- Photographs and images may be used only for showing location or configuration of questionable formation or for the position of the skeleton. They are not to be duplicated for publication unless a written release is obtained from the Tribe.

- Association between the remains and other cultural materials should be determined in the field in consultation with an authorized Tribal representative and may be amended per laboratory findings. Records of provenience and sample labels should be adequate to determine association or degree of likelihood of association of human remains and other cultural materials.

- For each burial, all Perimeter Balk soil is to be 1/8”-screened. All Exposure soil is to be 1/8”-screened, and a minimum of one 5-gallon bucket of excavated but unscreened Exposure soil is to be collected, placed in a plastic garbage bag in the bucket. All Matrix soil is to be carefully excavated, screened as appropriate, and then collected in plastic bags placed in 5-gallon buckets.

- Human remains are not to be cleaned in the field.

- Prior to any physical action related to human remains, a designated tribal representative will conduct prayers and blessings over the remains. The archaeological consultant will be responsible for insuring that individuals and tools involved in the action are available for traditional blessings and prayers, as necessary.

- No laboratory studies are permitted without consultation with the tribe. Lab methods are determined on a project-specific basis in consultation with Confederated Villages of Lisjan Nation representatives. The following procedures shall be implemented:

- The primary archaeological consultant shall be responsible for insuring that all lab procedures follow stipulations made by the Tribe.

- Prior to any laboratory activities related to the remains, a designated tribal representative will conduct prayers and blessings over the remains. The archaeological consultant shall be responsible for ensuring that individuals and tools involved in the action are available for traditional blessings and prayers, as necessary.

- To the extent possible, all remains, associations, samples, and original records are to be kept together throughout the laboratory process. In particular, Matrix dirt is to be kept in buckets and shall accompany the remains to the lab. The primary archaeological consultant shall be responsible for copying all field records and images and ensuring that the original notes and records accompany the remains throughout the process.

- Laboratory study should be done making every effort to identify unanticipated finds or materials missed in the field, such as objects encased in dirt or human remains misidentified

as faunal remains in the field. In the event of discovery of additional remains, materials, and other associations the tribal representatives are to be contacted immediately.

- No laboratory studies are permitted on human remains and funerary objects. The preferred treatment preference for exhumed Native American human remains is reburial in an area not subject to further disturbance. Any objects associated with remains will be reinterred with the remains. Laboratory study should be done making every effort to identify unanticipated finds or materials missed in the field, such as objects encased in dirt or human remains misidentified as faunal remains in the field. In the event of discovery of additional remains, materials, and other associations the tribal representatives are to be contacted immediately.

- Should all, or a sample, of any archaeological materials collected during the data recovery activities – with the exception of human remains – need to be curated, an inventory and location information of the curation facility shall be given to the Tribe for their records.

Project Specific Mitigation Measure TCR-2 **Inadvertent Discovery of Tribal Cultural Resources:** If cultural resources of Native American origin are identified during grading or excavation of the proposed project, all ground disturbing activities within 25 feet shall cease until a representative from the appropriate Tribal representative (consulting Tribe(s)) is consulted by the government agency. If the entity in consultation with the consulting Tribe(s), determines that the resource is a Tribal Cultural Resource and thus significant under CEQA, the entity shall retain a Tribal representative and, if applicable, a qualified archaeologist, at the applicant's expense, to prepare a mitigation plan, which shall be implemented in consultation with the consulting Tribe. The mitigation plan shall include avoidance of the resource or, if avoidance of the resource is not feasible, the plan shall outline

appropriate treatment of the resource in coordination with the consulting Tribe. Examples of appropriate mitigation for Tribal Cultural Resources include, but are not limited to, protecting the cultural character and integrity of the resources, protecting traditional use of the resources, protecting the confidentiality of the resources, or heritage recovery.

[…] Nevertheless, implementation of **Project Specific Mitigation Measures CUL-1, CUL-2,** and **Project Specific Mitigation Measures TCR-1** and **TCR-2**, are required to address the potential impacts to unanticipated tribal cultural resources, human remains, and associated funerary or ceremonial objects, the implementation of which would reduce impacts to less than significant with mitigation.

Revisions to Section 4.19, Utilities and Service Systems

Based on comments received from the VFWD, the City has revised Section 4.19, Utilities and Service Systems, to describe the installation of a new 6-inch sewer force main extending from the new lift station to tie into the existing sewer force main.

Section 4.19.3, Impact Analysis, Page 4-156

Wastewater. The VFWD provides wastewater collection and treatment services for Vallejo. A new 8-inch sewer lateral would connect to the existing 8-inch public sanitary sewer main line located in Shady Lane at the northwestern corner of the project site. The project would also include the replacement of the existing sewer lift station that currently serves the 141 single-family-home development to the west of the proposed project site with an upgraded system to serve both communities and a new 6-inch sewer force main to connect the lift station to the existing sewer force main located in Shady Lane. The new lift station would be owned and maintained by the VFWD ~~City of Vallejo~~ and the sanitary sewer and lift station would be designed and installed to VFWD standards. Utility installation would occur within the project footprint and there would be no impacts unique to infrastructure installation that would result in significant effects beyond those evaluated in the Initial Study.

Revisions to Appendix F, Phase I Environmental Site Assessment (ESA)

In response to comments received, **Appendix F** has been replaced to include the final version of the Phase I Environmental Site Assessment (ESA). The content and conclusions of the replaced Phase I ESA is the same as the draft version circulated as part of the Subsequent IS/MND. T

MITIGATION MONITORING AND REPORTING PROGRAM

This Mitigation Monitoring and Reporting Program (MMRP) has been formulated based upon the findings of the Subsequent Initial Study/Mitigated Negative Declaration (IS/MND) prepared for the Vista Cove Planned Development Project (proposed project).

The MMRP, which is provided in Table A, lists mitigation measures that would be applicable to the proposed project and identifies monitoring requirements. As the Lead Agency, the City of Vallejo is responsible for ensuring full compliance with all mitigation measures adopted for the proposed project. The City will monitor and report on all mitigation activities. Mitigation measures will be implemented at different stages of development throughout the project area. In this regard, the responsibilities for implementation have been assigned to the Applicant, Contractor, or a combination thereof. If during the course of project implementation, any of the mitigation measures identified herein cannot be successfully implemented, the City shall be immediately informed, and the City will then inform any affected responsible agencies. The City, in conjunction with any affected responsible agencies, will then determine if modification to the project is required and/or whether alternative mitigation is appropriate.

This MMRP has been prepared to comply with the requirements of State law (Public Resources Code Section 21081.6). State law requires the adoption of an MMRP when mitigation measures are required to avoid significant impacts. The MMRP is intended to ensure compliance during implementation of the proposed project and the conceptual development project. The MMRP must be adopted when the City Council makes a final decision on the project.

	for acres of mitigation to acres impacted shall be 1:1.					
Project Specific Mitigation Measure BIO-4a	**Construction Fencing.** Prior to ground-disturbing activities, construction fencing or flagging shall be installed to delineate the riparian and freshwater marsh boundaries. The fencing will be checked regularly during construction activities to ensure that the fencing remains intact and functional, and that encroachment has not occurred into the sensitive habitat or boundary; any repairs to the fence or encroachment correction will be conducted immediately. At the end of the project all temporary flagging, fencing, or other materials would be removed from the work areas and vicinity of the channel.	Prior to ground disturbance	Qualified Biologist	Qualified Biologist/ Project Contractor	Regular checks during construction; repairs as needed.	Implementation of construction fencing to delineate sensitive habitats and prevent encroachment throughout construction.
Project Specific Mitigation Measure BIO-4b	**Construction Best Management Practices.** Erosion control measures would be utilized throughout all phases of the Project where sediment runoff from construction may potentially enter nearby waters. Appropriate sediment and erosion control BMPs (e.g., use of silt fencing and/or straw waddles around the perimeter of the construction zone) will be implemented during and following construction to minimize	Throughout all phases of construction	Qualified Biologist	Qualified Biologist/ Project Contractor	Daily/ongoing monitoring for erosion, spills, and equipment maintenance.	Implementation of BMPs, including erosion and sediment control, spill prevention, and invasive species avoidance, to protect water quality during construction.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	surface runoff originating from the Project and thereby protect water quality of the freshwater marsh. Erosion control structures would be monitored for effectiveness and would be repaired or replaced as needed. i. Prior to construction, a Stormwater Pollution Prevention Plan (SWPPP) would be developed. The plan would include the implementation and maintenance of erosion control measures. ii. Prior to construction, an Accidental Spill Prevention and Cleanup Plan would be prepared. This plan would include required spill control absorbent material, for use beneath stationary equipment, to be present on-site and available at all times. iii. No fueling, cleaning, or maintenance of vehicles or equipment would take place within any areas where an accidental discharge may cause hazardous materials to enter waterways. iv. Any equipment or vehicles used for the Project would be checked and maintained daily to prevent					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	leaks of fluids that could be deleterious to aquatic habitats. v. All equipment would be cleaned before arriving on the site and before removal from the site to prevent spread of invasive plants. vi. To avoid establishment of invasive, non-native plant species on or adjacent to the Project Area, the following measures will be implemented: a. Vegetation disturbances will be limited to those areas identified on construction plans and maps as slated for development or construction staging. b. Erosion and sediment control materials will be certified as weed-free. vii. Staging and storage areas for equipment, materials, fuels, lubricants and solvents, would be located outside of the stream channel banks and outside of nearby waters. viii. Stationary equipment such as motors, pumps, and generators, located adjacent to aquatic features would be positioned over secondary containment					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	sufficient to arrest a catastrophic failure. **ix.** Stockpiles of excavated soil or other materials would be covered when not in active use (i.e., would not be used or moved for 72 hours). All trucks hauling soil, sand, and other loose materials would be covered.					
Project Specific Mitigation Measure BIO-4c	**Tree Protection Measures.** In order to protect trees adjacent to the project area: In order to protect trees adjacent to the Project Area: i. Trees not proposed for removal but adjacent to Project activities shall have orange construction fencing installed at the dripline. This shall be known as the tree protection zone (TPZ). ii. Work within the TPZ shall be minimized to the maximum extent feasible. iii. If work must occur within the TPZ, the fence can be removed temporarily, the tree trunk shall be wrapped in a waddle, and the fence shall be placed back as soon as work is completed.	During construction	Qualified Biologist	Qualified Biologist/ Project Contractor	Continuous monitoring for work within tree protection zones (TPZs)	Implementation of tree protection measures, including fencing, pruning standards, and TPZ management, to protect trees adjacent to the project area.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	iv. All equipment and stockpiles must be in designated staging areas away from all TPZ. v. All trees to be removed shall be felled away from any trees to be avoided. vi. If trees not proposed for removal require pruning, pruning shall follow ANSI A300 standards or be performed by a certified arborist. **vii.** If any roots are exposed from trees to be avoided, roots can be pruned up to the diameter of 2 inches and pruned at 90-degree angles. The roots shall be covered by a damp burlap sack or damp towel while exposed.					
Project Specific Mitigation Measures BIO-5a	**Burrowing Owl Habitat Assessment, Surveys, and Protection.** A qualified biologist shall conduct a habitat assessment and surveys for wintering burrowing owl prior to construction if construction starts during the burrowing wintering season (September 1 to January 31). Surveys shall be conducted if warranted based on the habitat assessment and shall begin on or within three days of August 1. The habitat assessment and surveys shall follow the *Department of*	Prior to Construction; During the burrowing wintering season (September 1 to January 31)	Qualified Biologist	Qualified Biologist	One time habitat assessment and surveys prior to the start of construction; annual habitat assessment and surveys for the duration of the construction; if any owl is determined to be present, continued	Implementation of habitat assessment and surveys to ensure that burrowing owls are identified and protected.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	Fish and Game Staff Report on Burrowing Owl Mitigation methodology and the qualified biologist shall prepare a report documenting the survey results. The habitat assessment and surveys shall encompass the project site and a sufficient buffer zone to detect owls nearby that may be impacted, which is up to 500 meters (1,640 feet) around the project site pursuant to the above methodology. Habitat assessments and surveys shall occur annually for the duration of the project, as conditions may change annually and suitable refugia for burrowing owl, such as small mammal burrows, can be created within a few hours or days, unless otherwise approved in writing by CDFW. Surveys for non-breeding burrowing owl shall be spread over four visits during the nonbreeding season (i.e., wintering) and shall start on or within 3 days of August 1 and continue to January 31, unless otherwise approved in writing by CDFW. Time lapses between surveys or project activities shall trigger subsequent surveys including, but not limited to, a final survey within 24 hours prior to ground disturbance. The				monitoring during construction activities.	

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	qualified biologist shall have a minimum of two years of experience implementing the above methodology. The project applicant shall immediately notify CDFW if burrowing owl is detected and implement a construction avoidance buffer around any detected burrowing owl pursuant to the buffer distances outlined in the *Department of Fish and Game Staff Report on Burrowing Owl Mitigation*, which may be up to 500 meters (1,640 feet). Any detected owl shall be monitored by the qualified biologist to ensure it is not disturbed during construction activities. If take of burrowing owl cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP before Project activities may commence.					
Project Specific Mitigation Measures BIO-5b	**Covering of Entrapment Hazards.** To prevent burrowing owl from sheltering or nesting in exposed material; all construction pipes, culverts, hoses or similar materials greater than two inches in diameter stored at the project site shall be capped or covered before the end of each workday and shall be inspected thoroughly for wildlife before the pipe or similar	During Construction	Construction Contractor	Construction Contractor	At the end of each workday.	Inspections of and the covering/capping of all construction pipes, culverts, hoses or similar materials greater than two inches in diameter stored at the project site to prevent burrowing owl from sheltering or nesting in exposed material.

	structure is buried, capped, used, or moved.					
Cultural Resources						
Project Specific Mitigation Measure CUL-1	**Unknown Discovery of Archaeological Resources**. Should an archaeological deposit be encountered during project subsurface construction activities, all ground-disturbing activities within 25 feet shall be redirected and a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for Archaeology contacted to assess the situation, determine if the deposit qualifies as a historical resource, consult with agencies as appropriate, and make recommendations for the treatment of the discovery. If the deposit is found to be significant (i.e., eligible for listing in the California Register of Historical Resources), the project applicant shall be responsible for funding and implementing appropriate mitigation measures. Mitigation measures may include recording the archaeological deposit, data recovery and analysis, and public outreach regarding the scientific and cultural importance of the discovery. Upon completion of the selected	During Ground Disturbance	Construction Contractor/Qualified Archaeologist	Construction Contractor / Qualified Archaeologist	Monitoring would occur continuously during all ground-disturbing activities within 25 feet of any discovered archaeological resources.	Implementation of discovery protocol and assessment of archaeological finds, with work halted within 25 feet until evaluation is complete.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	mitigations, a report documenting methods, findings, and recommendations shall be prepared by the qualified archaeologist and submitted to the City of Vallejo for review, and the final report shall be submitted to the Northwest Information Center at Sonoma State University. Significant archaeological materials shall be submitted to an appropriate local curation facility and used for future research and public interpretive displays, as appropriate.					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
Project Specific Mitigation Measure CUL-2	**Protocol for Human Remains Discovery.** If human remains are encountered, State Health and Safety Code Section 7050.5 states that no further disturbance shall occur until the County Coroner has made a determination of origin and disposition pursuant to State PRC Section 5097.98. The County Coroner and the City must be notified of the find immediately. If the remains are determined to be Native American, the County Coroner would notify the Native American Heritage Commission (NAHC), which would determine and notify a Most Likely Descendant (MLD) and the following provisions shall apply: ● The Medical Examiner shall immediately be notified, ground disturbing activities in that location shall cease within 25 feet of the discovery and the Tribe shall be allowed, pursuant to California Public Resources Code (PRC) Section 5097.98(a) to inspect the site of the discovery and make determinations as to how the human remains and grave goods	During ground disturbance	Construction Contractor/Qualified Archaeologist	City / County Coroner/Tribe	If remains are discovered monitoring would occur during ground disturbing activities.	Implementation of human remains discovery procedures per State law and tribal consultation, including site protection and culturally appropriate treatment.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	should be treated and disposed of with appropriate dignity. ● The Tribe shall complete its inspection and make its MLD recommendation within forty-eight (48) hours of getting access to the site. The Tribe shall have the final determination as to the disposition and treatment of human remains and grave goods. Said determination may include avoidance of the human remains, reburial on-site or reburial on tribal or other lands that will not be disturbed in the future. ● The Tribe may wish to rebury said remains and grave goods or ceremonial and cultural items on or near the site of their discovery, in an area which will not be subject to future disturbances over a prolonged period of time. Reburial of human remains shall be accomplished in compliance with California PRC Sections 5097.98(a) and (b). The term "human remains" encompasses more than human bones because the Tribe's traditions call for the burial of associated cultural items with the deceased (funerary objects), and/or					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	the ceremonial burning of Native American human remains, funerary objects, grave goods, and animals. Ashes, soils, and other remnants of these burning ceremonies, as well as associated funerary objects and unassociated funerary objects buried with or found near the Native American remains are to be treated in the same manner as bones or bone fragments that remain intact. ● Unless otherwise required by law, the site of any reburial of Native American human remains shall not be disclosed and will not be governed by public disclosure requirements of the California Public Records Act (California Government Code Section 6250 et. seq). The Medical Examiner shall withhold public disclosure of information related to such reburial pursuant to the specific exemption set forth in California Government Code Section 6254(r). The Tribe will require that the location for reburial is recorded with the California Historic Resources Inventory System (CHRIS) on a form that is acceptable to the CHRIS					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	center. The Tribe may also suggest that the landowner enter into an agreement regarding the confidentiality of site information that will run with title on the property. ● Treatment of all cultural items, including ceremonial items and archaeological items will reflect the religious beliefs, customs, and practices of the Tribe. All cultural items, including ceremonial items and archaeological items, which may be found at a Project site should be turned over to the Tribe for appropriate treatment, unless otherwise ordered by a court of agency of competent jurisdiction. The project applicant should waive any and all claims to ownership of Tribal ceremonial and cultural items, including archaeological items, which may be found on a project site in favor of the Tribe. If any intermediary (e.g., an archaeological retained by the project applicant) is necessary, said entity or individual shall not possess those items for longer than is reasonably necessary, as determined solely by the Tribe.					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	● If additional significant sites or sites not identified as significant in the environmental review process, but later determined to be significant are located within a project impact area, such sites will be subjected to further archaeological and cultural significance evaluation by the project applicant, Solano County and the Tribe to determine if additional mitigation measures are necessary to treat sites in a culturally appropriate manner consistent with CEQA requirements for mitigation of impacts to cultural resources. If there are human remains present that have been identified as Native American, all work will cease for a period of up to 30 days in accordance with Federal Law.

Tribal Cultural Resources						
Project Specific Mitigation Measure TCR-1	**Protocol for Discovery of Native American Human Remains.** The preferred protocol upon the discovery	During Ground Disturbance	Construction Contractor/Consulting Tribes	Construction Contractor/Consulting Tribes	Monitoring would occur continuously during all ground-	Implementation of discovery protocol for human remains, with work

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	of Native American human remains is to secure the area, stop work within 25 feet of the find, cover any exposed human remains or other cultural items and avoid further disturbances in the area. All parties are advised to treat the remains with appropriate dignity, as provided in Public Resources Code (PRC) Section 5097.98. All parties shall treat tribal representatives and the event itself with appropriate respect. If, after the appropriate Tribal representative has been granted access to the site and it is determined that avoidance is not feasible, an examination of the human remains will be conducted to confirm they are human and to determine the position, posture, and orientation of the remains. The following procedures shall be followed: • All excavation in the vicinity of the human remains shall be conducted using fine hand tools and fine brushes to sweep loose dirt free from the exposure. • In order to determine the nature and extent of the grade and its contents, controlled excavation should				disturbing activities within 25 feet of any discovered human remains.	halted within 25 feet until evaluation is complete.

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	extend to a full buffer zone around the perimeter of the remains. • To initiate the exposure, a perimeter balk (especially, a shallow trench) should be excavated, representing a reasonable buffer a minimum of 10 centimeters around the maximum extent of the known skeletal remains, with attention to counterintuitive discoveries or unanticipated finds relating to this or other remains. The dirt from the perimeter balk should be bucketed, distinctly labeled, and screened for cultural materials. • Excavation should then proceed inward from the walls of the balk as well as downward from the surface of the exposure. Loose dirt should be scooped out and brushed off into a dustpan or other collective device. Considerable care should be given to ensure that human remains are not further					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	impacted by the process of excavation. • Buckets, collection bags, notes, and tags should be fully labeled per provenience, and a distinction should be made between samples collected from: (1) Perimeter Balk (described above), (2) Exposure (dirt removed in exposing the exterior/burial plan and associations, and (3) Matrix (dirt from the interstices between bones or associations). Thus, each burial may have three bags, "Burial 1 Perimeter Balk," "Burial 1 Exposure Balk," "Burial 1 Matrix." • The following records should be compiled in the field: (1) a detailed scale drawing of the burial, including the provenience of and full for all human remains, associated artifacts, and the configuration of all associated phenomena such as burial pits, evidence for pre-interment grave pit					

Table A: Mitigation Monitoring and Reporting Program

Project Specific Mitigation Measure/General Plan EIR Mitigation Measures	Avoidance and Minimization Measure	Timing	Monitoring Party	Implementing Party	Frequency and Duration of Monitoring	Performance Criteria
	burning, soil variability, and intrusive disturbance, (2) complete a formal burial record using the consultants proprietary form or other standard form providing information on site #, unit or other proveniences, level depth, depth and location of the burial from a fixed datum, workers, date(s), artifact list, skeletal inventory, and other pertinent observations, (3) crew chief and worker field notes that may supplement or supersede information contained in the burial recording form, and (4) photographs, including either standard photography or high-quality (400-500 DPI or 10 MP recommended) digital imaging. • Photographs and images may be used only for showing location or configuration of questionable formation or for the position of the skeleton. They are not to be

MEMORANDUM

DATE: January 16, 2026

TO: Cesar Orozco, Planning Manager, City of Vallejo

FROM: Theresa Wallace, AICP, Principal
Florentina Craciun, Senior Environmental Planner

SUBJECT: Vista Cove Planned Development Project Subsequent Initial Study/Mitigated Negative Declaration - Response to Comments

In accordance with Section 15074 of the *State CEQA Guidelines*, prior to approving a project, the decision-making body of the lead agency shall consider the proposed environmental document together with any comments received during the public review process. Although there is no legal requirement to formally respond to comments on a proposed Mitigated Negative Declaration (MND) as there is for an Environmental Impact Report (EIR), this memorandum provides a response to the written and verbal comments received on the Vista Cove Planned Development Project Subsequent Initial Study/Mitigated Negative Declaration (IS/MND) to aid the City of Vallejo decision-makers in their review of the project.

The Subsequent IS/MND was initially circulated for public review for a period of 30 days, from November 10, 2025, to December 10, 2025. Copies of the IS/MND were made available for public review on the City's website on November 10, 2025. A total of 17 comment letters from agencies, organizations, and interested individuals were received during the public review period.

Per CEQA Guidelines Section 15088, applicable to responses to comments on EIRs, this document focuses primarily on responding to comments that relate to the adequacy of the information and environmental analysis provided in the IS/MND. In addition to responses to individual comments, this memorandum also identifies text changes to the Supplemental IS/MND, provided in Attachment B. These include revisions resulting from written comments received, as well as staff-initiated changes as they relate to mitigation measures for Tribal Cultural Resources and Biological Resources. The changes included herein do not provide new information that would result in any new significant impact not already identified in the subsequent IS/MND or a substantial increase in the severity of an impact identified in the subsequent IS/MND that cannot be mitigated to a less than significant level with implementation of mitigation measures agreed to by the project sponsor. Thus, none of the text revisions would require recirculation pursuant to *State CEQA Guidelines* Section 15088.5.

COMMENTS AND RESPONSES

This section includes responses to each substantive CEQA-related comment. Table A provides a list of the agencies, organizations, and interested individuals that commented on the IS/MND prior to the close of the public comment period. The comments received have been organized in a manner that facilitates a comprehensive response to a particular comment or set of comments. Each comment letter received is indexed with an alphanumeric code in Table A, below.

The comment letter index number is provided at the top of the comment letter and each comment is bracketed and keyed to the category identified in Table B, below. Specifically, the comments and responses are organized by subject and generally appear in the same order as presented in the IS/MND. Table B provides an overview of the comments and responses in this memorandum, including section numbers, topic code prefixes, and corresponding page numbers.

Table B: Comment Organization

Topic	Topic Code	Page No.
Project Description	PD	3
Aesthetics	AES	4
Air Quality	AIR	6
Biological Resources	BIO	7
Cultural Resources	CUL	13
Geology and Soils	GEO	14
Hazards	HAZ	15
Hydrology and Water Quality	HYD	18
Noise	NOI	21
Population and Housing	POP	23
Public Services	PS	24
Transportation	TRA	25
Tribal Cultural Resources	TCR	30
Utilities and Service Systems	UTL	31
Cumulative Impacts	CUM	33
Non-CEQA Issues	NON	34

Within each topic, similar comments are grouped together under subheadings, designated by a topic code and sequential number. For example, the comments in Cultural Resources, coded as "CUL,", are organized under subheading CUL-1.

Under each subheading, the applicable comment letters are listed by comment letter index number, as provided below, with the full comment letters provided in Attachment A. Each individual comment within the letters is bracketed with the corresponding subheading (PD-1, PD-2, etc.). A comprehensive response is provided to address environmental issues raised in the comments and clarify or augment information in the IS/MND, as appropriate.

PROJECT DESCRIPTION

The comments and corresponding responses in this section relate to the proposed project description. The comment topics include:

- **PD-1**: Project Access and Amenities
- **PD-2**: Construction Timeline

Response to Comment PD-1: Project Access and Amenities

This response addresses comments in the following letter:

- Carol and Kay McKenzie, 12/05/2025 (I-9)

As discussed in Section 2.0, Project Description (page 2-21), the proposed development would be owned and maintained by a dedicated Home Owners Association (HOA). In Section 4.16, Recreation (page 4-134), the proposed project would include the construction and development of various outdoor amenities within the project site, including 3.55 acres of common open space, walkways, a

loop walk around a flexible-use turf area, and a vista overlook for residents. These private amenities would be for use by residents of the development and not for public recreational use. While the project site may currently be used informally by members of the public for recreation, such use does not constitute a designated, improved, or maintained public recreational facility. The proposed project does not include the construction, expansion, or improvement of any public recreational facilities that could result in an adverse physical effect on the environment. Although the proposed development would not be constructed as a gated community, this does not convert privately owned open space into public recreational facilities under CEQA.

Response to Comment PD-2: Construction Timeline

This response addresses comments in the following letter:

- Alison Egan, 11/12/2025 (I-1)

As stated in Section 2.0, Project Description (page 2-22), construction of the proposed project is anticipated to begin in June 2026 and would occur over an approximately one-year period. Construction is expected to include site preparation, grading, building construction, paving, and architectural coating. As detailed in **Appendix A**, California Emissions Estimator Model (CalEEMod) Outputs, of the Subsequent IS/MND, the durations for individual construction phases (e.g., five days for site preparation and 25 days for grading) were assumed for the purpose of air quality and greenhouse gas emissions modeling, based on information provided by the project sponsor and as recommended by the Bay Area Air District (Air District). These phase durations represent conservative modeling assumptions used to estimate daily construction emissions and do not represent a detailed or final construction schedule. The overall construction duration analyzed in CalEEMod is consistent with the approximately one-year construction period as detailed in the Project Description.

AESTHETICS

The comments and corresponding responses in this section address comments received related to aesthetics. The comment topics include:

- **AES-1**: Visual Character
- **AES-2**: Scenic Vistas

Response to Comment AES-1: Visual Character

This response addresses comments in the following letters:

- Christine Giposon, 11/16/2025 (I-3)
- Gina Blair, 11/21/2025 (I-7)
- Annette Hilts, 11/21/2025 (I-8)

Although the project site is currently undeveloped and therefore perceived as open space, the project site is designated for residential development and future development of the project site with residential uses has been contemplated and planned for through the City's General Plan and

zoning process. In addition, as detailed in Section 4.1, Aesthetics (page 4-10) of the Subsequent IS/MND, the proposed project would have a consistent architectural style of a modern farmhouse design. The proposed project would be required to undergo Development Review and Design Review consistent with Chapters 16.604 and 16.605 of the Vallejo Municipal Code (VMC), which would provide for the review of the physical improvements to the project site, to ensure compatibility and compliance with City requirements. In addition, the proposed development would be consistent with the existing General Plan land use designations and would not exceed the allowable densities associated with the Mix of Housing Types/Medium Density (R-MH) and Primarily Single Family (R-SF) designations. The proposed project would also be consistent with the development regulations of the Planned Development (PD) Zoning District upon approval of the proposed rezone from Residential Medium Density (RMD) and Residential Low Density (RLD) to PD. These procedures are mandatory for new construction and ensure that all proposed physical improvements to the site—including building orientation, architectural design, grading, landscaping, and lighting—are evaluated for consistency with the City's zoning regulations, design objectives, and adopted plans.

Pursuant to VMC Section 16.604.02, Design Review evaluates projects for compatibility with adjacent development in terms of scale, massing, materials, and overall visual character, as well as conformance with the City's adopted design guidelines. Approval of the project through these processes is required prior to the issuance of any building permits. The proposed project must comply with all applicable standards and any conditions of approval imposed during the review process. The proposed project would have a less than significant impact related to conflicts with applicable zoning and other regulations governing scenic quality.

Further, the proposed project would be consistent with, and would represent a continuation of, the existing residential development in the surrounding area and there would be an approximately 0.3-mile visual buffer between the proposed project and the BSRA. Therefore, implementation of the proposed project would not result in a degraded transition between the recreational area and development.

For these reasons, redevelopment of the project site would not result in substantial impacts related to aesthetics, and the proposed project would be consistent with the visual character of the area and surrounding neighborhood.

Response to Comment AES-2: Scenic Vistas

This response addresses comments in the following letter:

- Alison Egan, 11/12/2025 (I-1)

As detailed in Section 4.1, Aesthetics (page 4-9) of the Subsequent IS/MND, the area surrounding the project site is characterized by urban development with some open space and recreational uses in the nearby vicinity. In addition, although the proposed project site is located approximately 0.85 mile northwest of the Carquinez Strait and 0.3 mile southeast of the Benicia State Recreation Area, none of these features are identified as a scenic vista or significant visual resource in the City's General Plan. San Pablo Bay, Mare Island Strait, the Vallejo Waterfront, Sulphur Springs Mountain,

Vaca Mountains, White Slough, Napa River Wetlands, and Sky Valley, the resources designated as scenic vistas, are not visible from the project site or nearby vicinity. These features are located over two miles from the project site and views of these resources are obstructed by intervening development, topography, and mature trees. The project site and surrounding areas are not located within the residential view district and would not impact scenic vistas of designated views; therefore, no impact would occur. In addition, as stated above, the proposed project would also be consistent with the development regulations of the PD Zoning District and would be subject to Development Review and Design Review as required by VMC Sections 16.604 and 16.605. These procedures are mandatory for new construction and ensure that all proposed physical improvements to the site—including building orientation, architectural design, grading, landscaping, and lighting—are evaluated for consistency with the City's zoning regulations, design objectives, and adopted plans. For these reasons, development of the project site with the proposed project would not result in substantial impacts related to aesthetics or scenic vistas, and the proposed project would be consistent with the surrounding neighborhood.

AIR QUALITY

The comments and corresponding responses in this section address comments received related to air quality. The comment topics include:

- **AIR-1**: Odors
- **AIR-2**: Construction Health Risk Impacts

Response to Comment AIR-1: Odors

This response addresses comments in the following letter:

- VFWD, 12/05/2025 (A-2)

As discussed in Section 4.3, Air Quality (page 4-30), once operational, the proposed project would generally not include any activities or operations that would generate objectionable odors.

Vallejo Flood and Wastewater (VFWD) expressed concerns related to potential operations odors from the proposed sewer lift station due to the presence of hydrogen sulfides, volatile organic compounds, and other factors. The lift station would be owned and maintained by the VFWD and would be subject to VFWD standards. It is noted that the proposed sewer lift station is not a new facility, but rather a replacement and upgrade to the existing lift station that currently serves the 141 single-family residences located west of the project site. The existing lift station located at the end of Shady Lane and Wildflower Avenue will be relocated to the end of the new private street and would continue to serve the existing community while also accommodating the proposed development. Therefore, the lift station would not introduce a new odor source to the area.

Furthermore, odor emissions are regulated under California Health and Safety Code Section 41700, which prohibits the discharge of air contaminants in quantities that cause a nuisance or annoyance to the public, as well as by the Bay Area Air District Regulation 7, Odorous Substances. Should the Air Pollution Control Officer receive ten or more odor complaints within a 90-day period, then VFWD would need to take corrective action, such as the installation of further odor control features.

Therefore, impacts related to objectional odors would remain less than significant, as identified in the Subsequent IS/MND. Section 4.3, Air Quality, has been revised to include this additional information (refer to **Attachment B** of this Response to Comments memorandum).

Response to Comment AIR-2: Construction Health Risk Impacts

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Christine Giposon, 11/16/2025 (I-3)
- Gina Blair, 11/21/2025 (I-7)
- Linda Zupan-McKenna, 12/08/2025 (I-10)

As discussed in Section 4.3, Air Quality (pages 4-24 through 4-27), although the proposed project would include short-term construction emissions through the release of particulate matter (i.e., fugitive dust) generated by grading, hauling, and other activities, the proposed project would be required to implement **General Plan EIR Mitigation Measure AQ-2b.1**, which requires development projects to implement the Air District Basic Best Management Practices (BMPs). These measures include watering exposed surfaces, covering haul trucks, limiting vehicle speeds on unpaved roads, using wet power sweepers, and suspending work during high winds. Additional requirements involve paving surfaces promptly, washing vehicles before site exit, stabilizing unpaved access roads, and posting contact information for dust complaints. These measures would ensure that short-term impacts associated with the generation of particulate matter and fugitive dust would be reduced to the extent feasible and would ensure that this impact would be less than significant. Impacts related to material import and export were adequately evaluated in the emissions modeling prepared for the project.

Because the proposed project is located in proximity to existing single-family residential uses, construction activities could result in temporary exposure of nearby sensitive receptors to diesel exhaust emissions. Therefore, a construction Health Risk Assessment (HRA) was prepared to evaluate potential acute, chronic, and carcinogenic health risks to off-site receptors associated with construction-related diesel particulate matter (DPM) emissions. The construction HRA considered impacts to the most sensitive members of the population, including the maximally exposed residential receptor, schoolchild receptor, and worker receptor. For the maximally exposed residential receptor, a worst-case scenario was modeled wherein exposure lasts for the entire construction period. This conservative approach to analysis encompasses all sensitive receptor types and is consistent with HRA guidance issued by the State
Office of Environmental Health Hazard Assessment. Further, the meteorological dataset from the Vallejo meteorological site from years 2013 to 2017 is the most recent available data for that site from the Air District and is appropriate for use in the construction HRA.[1]

[1] Bay Area Air District. AERMOD-Ready Meteorological Data. Website: https://www.baaqmd.gov/plans-and-climate/california-environmental-quality-act-ceqa/ceqa-tools/ceqa-modeling-data (accessed January 2026).

To determine whether construction emissions would result in a significant air quality impact, the project's health risks were compared to the Air District's significance thresholds and as outlined in Section 4.3, Air Quality, of the IS/MND, construction of the proposed project would not exceed applicable Air District thresholds and would not expose nearby sensitive receptors to substantial pollutant concentrations.

BIOLOGICAL RESOURCES

The comments and corresponding responses in this section address comments received related to biological resources. The comment topics include:

- **BIO-1**: Wildlife Impacts and Mitigation
- **BIO-2**: Riparian and Wetland Impacts and Mitigation
- **BIO-3**: Tree Removal
- **BIO-4**: Habitat Fragmentation and Wildlife Movement
- **BIO-5:** Consistency with City Policies

Response to Comment BIO-1: Wildlife Impacts and Mitigation

This response addresses comments in the following letteers:

- California Department of Fish and Wildlife (CDFW), 12/4/2025 (A-1)
- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)
- Sandra Zarate, 11/21/2025 (I-6)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenne, 12/08/2025 (I-10)

Section 4.4, Biological Resources (page 4-39), of the Subsequent IS/MND detailed potential impacts on wildlife and special-status species and identified mitigation measures to reduce these potential impacts to less than significant. As discussed in Section 4.4, implementation of **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** related to nesting birds and **Project Specific Mitigation Measures BIO-2a** and **BIO-2b** related to roosting bats would ensure that implementation of the proposed project would not have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or United States Fish and Wildlife Service (USFWS).

Further, additional mitigation measures recommended by CDFW related to special-status species have been incorporated into the Subsequent IS/MND, as discussed below. These mitigation measures would be implemented by the project sponsor and construction contractor and would be performed and verified by a quality biologist as required by the Mitigation Monitoring and Reporting Program (MMRP) prepared for the proposed project. Implementation of the MMRP is required pursuant to Public Resources Code Section 21081.6 and *State CEQA Guidelines* Section 15097 and the City as the Lead Agency is responsible for ensuring compliance with the MMRP through its discretionary approval authority.

White-tailed Kite, Northern Harrier, Short-Eared Owl, Swainson Hawk, and Tricolored Blackbird

As discussed in Section 4.4 Biological Resources (page 4-38), of the Subsequent IS/MND, of the 52 special-status wildlife species known to occur in the region, five species were determined to have a moderate or high potential to occur within the project site, including the following: white-tailed kite (*Elanus leucurus*), northern harrier (*Circus hudsonius [cyaneus]*), short-eared owl (*Asio flammeus*), silver-haired bat (*Lasionycteris noctivagans*), and hoary bat (*Lasiurus cinereus*). Although Swainson's hawk (*Buteo swainsoni*) is known to occur within the region, the project site is located outside of the breeding range of Swainson's hawk as documented in literature, and Swainson's hawk is deemed to have potential to occur on the project site for seasonal migratory stopover only. Similarly, although the tricolor blackbird (*Agelaius tricolor*) is known to occur within the region, the seasonal wetland in the project area does not form reed or tule cover thick enough to support a tricolored blackbird breeding colony, and the area is dominated by low growing (less than two feet tall) vegetation. In addition, the freshwater marsh wetland on the southern end of the project site, which would be avoided, is linear and less than the minimum 15-meter width of covered wetland habitat that tricolored blackbird requires to establish breeding colonies. Further, the dense vegetation along the southern tributary is a well-developed riparian canopy and does not support suitable vegetation for a breeding colony. Therefore, **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** identified in the Subsequent IS/MND, which prohibit tree removal, vegetation removal, and initial ground disturbance during the nesting bird season (September 1 through January 31) and requires pre-construction nest survey for bird species and buffers during construction (if necessary), would adequately reduce potential impacts special-status bird species, including white-tailed kite, northern harrier, short-eared owl, Swainson hawk, and tricolored blackbird, as well as other nesting birds.

Specific mitigation measures related to Swainson's hawk and tricolored blackbird are unnecessary as it is highly unlikely for either species to breed on the project site and there is no nexus to require such measures. As such, no additional mitigation is necessary.

Project Specific Mitigation Measure BIO-1b would be implemented in compliance with state and federal regulations. Buffers would be implemented on a "species-specific" basis and special status species with potential for nesting, such as white-tailed kite, would have more substantial avoidance buffers implemented in the case of observance of active nests. Because potential impacts to special-status species would be avoided, no Incidental Take Permit (ITP) would be required.

Burrowing Owl

As discussed in the Biological Resources Impact Analysis[2] (**Appendix C** of the Subsequent IS/MND) prepared for the proposed project, there is no potential for the project site to support breeding burrowing owl and the project site represents poor wintering habitat, indicating that burrowing owl presence is unlikely. In addition to the lack of burrows, the project site is characterized by steeply sloping hillsides dominated by tall, unmanaged vegetation, conditions that are not conducive to burrowing owl presence. Nevertheless, in an abundance of caution, the proposed project would

[2] WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

implement **Project Specific Mitigation Measures BIO-5a** and **BIO-5b**, as recommended by the CDFW, to ensure that potential impacts to burrowing owls would be less than significant.

Project Specific Mitigation Measure BIO-5a requires a burrowing owl habitat assessment and surveys for wintering burrowing owl prior to construction, if construction starts during the burrowing owl wintering season (September 1 to January 31) and **Project Specific Mitigation Measure BIO-5b** requires all construction pipes, culverts, hoses or similar materials be capped or covered to prevent burrowing owl from shelter or nesting in exposed materials. Section 4.4., Biological Resources, of the Subsequent IS/MND has been revised to include these mitigation measures (refer to **Attachment B** of this Response to Comments memorandum). These additional mitigation measures are included in an abundance of caution and are not considered new mitigation that would address a new or substantially more severe environmental impact that was not previously disclosed and analyzed in the Subsequent IS/MND. As such, the environmental effects of the proposed project related to burrowing owl remain within the scope of impacts disclosed in the Subsequent IS/MND.

Although the CDFW also recommended additional mitigation that details provisions for potential impacts to an unoccupied wintering burrowing owl burrow (as determined by the burrowing owl habitat assessment and surveys), this measure was determined to be unnecessary as implementation of **Project Specific Mitigation Measures BIO-5a** would sufficiently cover avoidance of wintering burrowing owl in the highly unlikely event that a wintering burrow is observed on the project site.

As previously discussed, it is highly unlikely that burrowing owl would use the project site for any extended period of time as the topography of the project site and absence of suitable burrows indicates that the species would not be drawn to the project site for overwintering. This is supported by the fact that high quality overwintering habitat exists near the project site in the form of flat expansive saltmarsh areas within the Benecia State Recreation Area (BSRA), where wintering burrowing owls have been observed on several recent occasions.

Similarly, although the CDFW also recommended additional mitigation related to burrowing owl foraging habitat, this mitigation measure was determined to be unnecessary as there is no scientific basis for considering the project site as suitable for or consisting of sensitive foraging habitat for burrowing owl that warrants compensatory mitigation. Burrowing owls prefer to forage within 600 meters of their wintering areas and have a strong preference for open areas with sparse vegetation, such as flat open grasslands, agricultural fields, and saltmarshes. As this habitat is not present on the project site, it is unlikely that burrowing owls would use the project site for foraging, and **Project Specific Mitigation Measures BIO-5a** is sufficient to avoid impacts to burrowing owl.

Common Wildlife Species

Under CEQA, the analysis of potential impacts on biological resources focuses on the protection of rare, threatened, endangered, or otherwise designated special-status species and sensitive natural communities, as well as impacts that would substantially reduce the long-term viability of wildlife populations or habitat. CEQA does not require detailed analysis of project effects on common or widely distributed wildlife species that are not afforded special protection under state or federal

law. Impacts to common wildlife species that are abundant, resilient, and not locally or regionally declining are generally considered less than significant, provided that the proposed project would not result in a substantial reduction in habitat, disrupt breeding in a manner that affects population sustainability, or otherwise cause a meaningful adverse change to biological resources, as defined in *State CEQA Guidelines* Appendix G. As the proposed project would not result in a substantial reduction in habitat, disruption of breeding in a manner that affects population sustainability or otherwise cause a meaningful adverse change to the populations of common wildlife species that may be present at the project site, impacts on common wildlife species would be less than significant.

Response to Comment BIO-2: Riparian and Wetland Impacts and Mitigation

This response addresses comments in the following letters:

- CDFW, 12/4/2025 (A-1)
- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)
- Carol and Kay McKenzie, 12/05/2025 (I-9)

As discussed in Section 4.4, Biological Resources (page 4-42), of the Subsequent IS/MND, the project site contains freshwater marsh habitat, an intermittent stream and a seasonal wetland, and the proposed project has been designed to avoid and minimize impacts to these sensitive natural communities to the greatest extent feasible. The design plans account for the avoidance of the intermittent stream, freshwater marsh, and riparian vegetation; however, the proposed project would convert 0.49 acre of the seasonal wetland into a stormwater basin on the project site. Although the stormwater basin would be vegetated and seasonally inundated, it would result in permanent loss of the seasonal wetland on the project site. As such, the Subsequent IS/MND identified **Project Specific Mitigation Measure BIO-3a**, which would require compensatory mitigation for permanent loss of 0.49 acre of the seasonal wetland and would be satisfied through purchase of mitigation bank credits from an approved mitigation bank, payment of in-lieu fees to an approved public agency or conservation organization (e.g., local land trust), for implementation of compensatory mitigation projects, or via a permittee responsible mitigation involving creation, restoring, or enhancing analogous habitat. Further, the stormwater treatment facilities incorporated into the proposed project would ensure that the proposed project would not adversely affect the hydrology of the Southampton Bay wetlands.

While off-site mitigation banking for wetlands does not provide local/site-specific ecological replacement, under CEQA, mitigation is considered adequate where it avoids, minimizes, rectifies, reduces, or compensates for a project's significant environmental effects in a manner that is feasible, enforceable, and effective, consistent with Public Resources Code Section 21002 and *State CEQA Guidelines* Sections 15126.4 and 15370. Compensatory mitigation is an accepted and appropriate form of mitigation under CEQA when impacts cannot be fully avoided or reduced on-site, and when the compensatory measures are designed to offset the loss of resources or functions affected by the project. In this case, the compensatory mitigation measures are specifically tailored to the impacted resource (i.e., seasonal wetland), are based on established performance standards, and are subject to monitoring and reporting requirements through the adopted MMRP. Therefore,

implementation of **Project Specific Mitigation Measure BIO-3a** would offset the proposed project's impacts on seasonal wetlands by ensuring no net loss of biological function or value. Accordingly, the use of compensatory mitigation complies with CEQA requirements and provides a legally sufficient basis for concluding that the project's impacts would be adequately mitigated to less than significant levels.

In addition, to reduce potential project specific impacts to the riparian and freshwater marsh and riparian trees to a less than significant level, **Project Specific Mitigation Measures**, **BIO-4a**, **BIO-4b**, and **BIO-4c** would be implemented during project construction which require installation of construction fencing or flagging to delineate the riparian and freshwater marsh boundaries, utilization of erosion control measures, and implementation of tree protection measures.

Therefore, implementation of the proposed project would not result in significant impacts on wetland and riparian habitats with implementation of identified mitigation.

Response to Comment BIO-3: Tree Removal

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)

The proposed project includes the removal of 69 trees from the northern half of the project site and the planting of 141 new 15 gallon replacement trees,. As discussed in Section 4.4, Biological Resources, of the Subsequent IS/MND (pages 4-47 through 4-49), the removal of 69 trees from the northern half of the project site could result in impacts on nesting birds and the direct mortality of silver-haired bat and hoary bat adults and maternity roosts, which would be considered a potentially significant impact. As such, the Subsequent IS/MND identified **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** and **Project Specific Mitigation Measures BIO-2a** and **BIO-2b.** As previously discussed, **Project Specific Mitigation Measures BIO-1a** and **BIO-1b** prohibit tree removal, vegetation removal, and initial ground disturbance during the nesting bird season (September 1 through January 31) and requires pre-construction nest survey for bird species and buffers during construction (if necessary). **Project Specific Mitigation Measures BIO-2a** and **BIO-2b** would require the completion of a bat roost assessment should construction activities occur during the maternity roost season. Implementation of these mitigation measures would ensure that tree removal as part of the proposed project would not result in significant impacts on nesting birds and bat species.

In addition, although proposed tree removal and replanting may result in an interim loss of mature tree canopy, tree removal would not occur during the nesting bird season (**Project Specific Mitigation Measures BIO-1a**), and this interim loss of mature tree canopy is not expected to result in substantial adverse impacts on wildlife species.

Therefore, tree removal associated with implementation of the proposed project would not result in a significant impact on biological resources, as identified in the Subsequent IS/MND.

Response to Comment BIO-4: Habitat Fragmentation and Wildlife Movement

This response addresses comments in the following letters:

- Christine Gipson, 11/16/2025 (I-3)
- Carol and Kay McKenzie, 12/05/2025 (I-9)

As discussed in Section 4.4, Biological Resources, of the Subsequent IS/MND (pages 4-46 through 4-47), the project site is not within a designated wildlife corridor.[3] Further, the project site is located adjacent to a larger tract of housing developments intersected by several highways and non-native grasslands in Solano County, and development of the proposed project would represent a continuation of existing residential development in the surrounding area. Therefore, the proposed project would not fragment habitat in a manner that would substantially affect biological resources, including wildlife species.

Although the BSRA is approximately 1,000 feet southeast of the project site, the project site does not provide connection to other tidal marsh habitats, nor does it contain such habitat. While common wildlife species presumably utilize the site to some degree for movement at a local scale, the project site itself does not provide corridor functions beyond connecting similar ruderal grassland parcels to surrounding areas. Therefore, implementation of the proposed project would not interfere with the movement of any native resident or migratory fish or wildlife species or impede the use of migratory wildlife corridors. Impacts would be less than significant, as identified in the Subsequent IS/MND.

Response to Comment BIO-5: Consistency with City Policies

This response addresses comments in the following letter:

- Carol and Kay McKenzie, 12/05/2025 (I-9)

As described in Section 4.4, Biological Resources of the Subsequent IS/MND (pages 4-31 through 4-49), the City's General Plan includes goals, policies, and actions related to biological resources that are intended to protect and enhance natural resources, sensitive biological resources, and open space. Specifically, Policy NBE-1.1 (Natural Resources) provides for the protection and enhancement of hillsides, waterways, wetlands, occurrences of special-status species and sensitive natural communities, and aquatic and important wildlife habitat through land use decisions that avoid and mitigate potential environmental impacts on these resources to the extent feasible and Policy NBE-1.2 (Sensitive Resources) requires that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, and wetlands are avoided and mitigated to the greatest extent feasible as development takes place. As discussed above, the proposed project would not result in significant impacts to special-status species with implementation of **Project Specific Mitigation Measures BIO-1a** and **BIO-1b, Project Specific Mitigation Measures BIO-2a** and **BIO-2b,** and **Project Specific Mitigation Measures BIO-5a** and

[3] WRA, Inc. 2024. *Biological Resources Technical Report Vista Cove Project, Vallejo, Solano County, California.* February.

BIO-5b. In addition, the proposed project would not result in significant impacts related to sensitive natural communities, aquatic resources, or wetlands with implementation of **Project Specific Mitigation Measures BIO-3a**, **BIO-4a**, **BIO-4b**, and **BIO-4c.**

Therefore, implementation of the proposed project would be consistent with City policies related to the protection of biological resources.

CULTURAL RESOURCES

The comments and corresponding responses in this section relate to cultural resources. The comment topics relate to:

- **CUL-1**: Inadvertent Discovery of Cultural Resources

Response to Comment CUL-1: Inadvertent Discovery of Cultural Resources

This response addresses comments in the following letter:

- Christine Gipson, 11/16/2025 (I-3)

As discussed in Section 4.5, Cultural Resources, of the Subsequent IS/MND (page 4-53), no cultural resources were recorded by the Northwestern Information Center (NWIC) of the California Historical Resources Information System (CHRIS) at Sonoma State University within the project site and no cultural resources including prehistoric or historic archaeological sites or historic-period buildings were identified during the archaeological pedestrian field survey of the project site conducted on January 20, 2025. Based on these results, and given that the project site consists of severe slopes and is adjacent to existing developments, the Cultural Resources Assessment determined that the project site has a low potential for in situ subsurface cultural resources. However, construction activities, such as grading and other ground- disturbing activities, have the potential to uncover previously unknown or unidentified cultural resources. As such, the proposed project would implement standard measures to address the potential to disturb subsurface archaeological resources consistent with the General Plan EIR mitigation measures, as detailed in **Project Specific Mitigation Measure CUL-1**, to mitigate the impact to a level of less than significant.

Project Specific Mitigation Measure CUL-1 outlines procedures if archaeological resources are discovered during construction, such as work stoppage within 25 feet of the find, and a qualified archaeologist must evaluate the discovery. If the deposit is determined to be a significant historical resource, the project sponsor must implement standard measures for the treatment of archaeological resources, which may include documentation, excavation, analysis, and public outreach. A final report would be required to be submitted to the City and archived at the NWIC with significant materials curated for future research or public display. With the implementation of **Project Specific Mitigation Measure CUL-1,** the proposed project would not result in significant impacts to previously undiscovered archaeological resources, as the resources would be avoided, recovered, and evaluated, as needed. These are standard measures applied to all construction projects throughout the Bay Area and the State.

At the completion of project construction, the proposed project would not result in further disturbance of native soils on the project site and, therefore, project operations would have no potential to impact previously undiscovered archaeological resources.

GEOLOGY AND SOILS

The comments and corresponding responses in this section relate to geology and soils. The comment topics relate to:

- **GEO-1**: Slope Stability
- **GEO-2:** Geotechnical Report

Response to Comment GEO-1: Slope Stability

This response addresses comments in the following letteers:

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson 11/16/2025 (I-3)
- Rick Zavatsky, 11/19/2025 (I-4)
- Sabrina Cardoso and David 12/09/2025 (I-11)

As discussed in Section 4.7, Geology and Soils (page 4-69), of the Subsequent IS/MND, due to the steep slopes at the project site, the Preliminary Geotechnical Exploration[4] includes corrective grading recommendations to ensure the stability of graded slopes, including removal of compressible colluvium, excavation of buttress keyways, cut and cut-fill lot excavation, differential fill excavation, and construction of subsurface drainage facilities. In addition, a design-level geotechnical investigation would be prepared prior to construction of the proposed project, as required and detailed in **Project Specific Mitigation Measure GEO-1,** which may identify additional slope stability measures to be applied during construction, if necessary. Additional slope stability measures could include the monitoring of grading and foundation construction work or retaining walls, if deemed necessary by a licensed Geotechnical Engineer.

To address potential impacts associated with slope instability, the project sponsor would be required to implement all of the recommendations of the Preliminary Geotechnical Exploration and any recommendations included in a design-level geotechnical investigation into the project development plans, as required and detailed in **Project Specific Mitigation Measure GEO-1.** As specified in **Project Specific Mitigation Measure GEO-1**, at the end of construction, a licensed Geotechnical Engineer shall provide a letter regarding contractor compliance with project plans and specifications and with the recommendations of the geotechnical investigations and any supplemental recommendations issued during construction. The letter would be submitted for review to the City of Vallejo Building Division and the City Engineer and confirmed prior to issuance of a certificate of occupancy. As such, the implementation of slope stability measures detailed in the Preliminary Geotechnical Exploration, including corrective grading recommendations to ensure the

[4] ENGEO. 2022. *Vallejo Properties – Vista Cove, Vallejo, California, Preliminary Geotechnical Exploration.* September 12.

stability of graded slopes, removal of compressible colluvium, excavation of buttress keyways, cut and cut-fill lot excavation, and differential fill excavation, and any recommendations included in a design-level geotechnical investigation would be verified by both the licensed Geotechnical Engineer and the City.

In addition, as required by Chapter 12.40, Excavations, Grading, and Filling, of the City's Municipal Code, a grading permit would be required before any grading, clearing, brushing, or grubbing can occur. As outlined the City's Grading Permit Guidelines, which implements Chapter 12.40 of the City's Municipal Code, the grading plans, erosion control plans, and geotechnical reports required as part of the grading permit application would be reviewed and approved by the City of Vallejo Engineer for compliance with the City's Municipal Code and applicable standards prior to issuance of the grading permit.

With implementation of **Project Specific Mitigation Measure GEO-1** and adherence to the City's Municipal Code, potential impacts related to slope stability would be less than significant, as identified in Section 4.7, Geology and Soils, of the Subsequent IS/MND.

Response to Comment GEO-2: Geotechnical Report

This response addresses comments in the following letter:

- Rick Zavatsky, 11/19/2025 (I-4)
- Linda Zupan-McKenne, 12/08/2025 (I-10)

As stated in the Preliminary Geotechnical Exploration prepared for the proposed project, the conclusions and recommendations contained in the report are valid for a period of no more than 2 years from the date of report issuance. As the report was prepared in September 2022, ENGEO has prepared a memorandum, dated January 7, 2026, indicating that the conclusions and recommendations provided in the Preliminary Geotechnical Exploration are still valid. Section 4.7, Geology and Soils, has been updated to include this memorandum (refer to **Attachment B** of this Response to Comments memorandum).

HAZARDS

The comments and corresponding responses in this section relate to hazards. The comment topics relate to:

- **HAZ-1**: Emergency Access and Evacuation

Response to Comment HAZ-1: Emergency Access and Evacuation

This response addresses comments in the following letters:

- Marty, 11/16/2025 (I-2)
- Christine Gipson, 11/16/2025 (I-3)
- Rick Zavatsky, 11/19/2025 (I-4)
- Gina Blair, 11/21/2025 (I-7)

- Annette Hilts, 11/21/2025 (I-8)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenna, 12/08/2025 (I-10)

As discussed in Section 4.9 Hazards and Hazardous Materials (pages 4-95 through 4-96) of the Subsequent IS/MND, the proposed project was reviewed for consistency with the policies outlined in the Solano County General Plan Public Health and Safety chapter, the City of Vallejo General Plan Nature and Built Environment chapter, the Solano County Emergency Operations Plan (EOP), and the Solano County Multi-Jurisdictional Hazard Mitigation Plan (MJHMP). The proposed project was found to be consistent with these policies.

Additionally, the proposed project would be designed to meet State and local standards regarding turning radius, road width, and emergency vehicle access. Accordingly, the proposed project would not alter or block adjacent roadways, and implementation of the proposed project would not be expected to impair the function of nearby emergency evacuation routes. In addition, operation of the proposed project would not cause permanent alterations to vehicle circulation routes or patterns, nor would it impede public access or travel on public rights-of-way, as the proposed internal roadways would be accessible to neighborhood users and would terminate at the project site. Furthermore, prior to approval of final maps and improvement plans for any development project within Vallejo, including the proposed project, plan review and approval by the Vallejo Fire Department would be required. For these reasons, the proposed project would have a less than significant impact on an adopted emergency response plan or emergency evacuation plan and would be consistent with applicable policies related to emergency evacuation.

Moreover, according to the City of Vallejo General Plan 2040, there are no Very High Fire Hazard Areas in or adjacent to Vallejo. Although the project site is located within a moderate- to high-risk wildfire area,[5] operation of the proposed project would be consistent with adjacent residential uses and allowable zoning for the project site. The project would be subject to applicable design standards and guidelines outlined in the City of Vallejo Municipal Code and would undergo Development Review to ensure that proposed structures conform to all applicable regulations. The proposed project would also be subject to the requirements of Section 13000 et seq. of the California Health and Safety Code, the California Building Standards Code, and the California State Fire Code, which include regulations addressing the following: building standards for fire protection; fire protection and notification systems such as extinguishers and smoke alarms; safety for firefighters and emergency responders during emergency operations; minimum standards for hazardous vegetation and fuel management, defensible space, and building construction; and minimum standards for emergency access and water supply for fire response.

Additionally, on October 27, 2025, a supplemental Evacuation Assessment[6] (refer to **Attachment D** of this memorandum) was prepared in support of the proposed project. This supplemental assessment evaluated the project's likelihood of mass evacuation, the viability of evacuation routes, existing alert and warning systems, vehicle demand, proximity to public safety resources, and

5 Vallejo, City of. 2017. *Propel Vallejo General Plan 2040, Map NBE-4.* August 29.

6 CAS Safety Consulting, LLC. 2025. *Vista Cove Evacuation Assessment.* October 27.

operational demand to assess whether the proposed project would materially degrade evacuation operations or create a substantial impediment to emergency egress or ingress.

The Evacuation Assessment determined that, in this setting, the proposed project would not present a substantial evacuation concern and would be compatible with evacuation operations for the surrounding community. This determination is based on (1) the project site's low likelihood of mass evacuation from natural hazards, as it is located outside mapped Wildland–Urban Interface (WUI) fire-hazard areas and the tsunami hazard area, has no wildfire history, and is not subject to other natural events that commonly trigger mass evacuations; (2) the availability of two viable evacuation routes, including a primary route located near the front of the neighborhood outflow with a short, direct connection to Interstate 780, and an alternate, less favorable route available if the primary route is compromised; (3) the presence of established alert and warning systems, including Solano County's Alert Solano with Wireless Emergency Alerts/Integrated Public Alert & Warning System (WEA/ IPAWS), law-enforcement hi-lo sirens as an audible redundancy, and pre-determined evacuation zones under the County's Emergency Operations Plan; (4) operationally manageable vehicle demand supported by traffic control points and short-term staging while preserving responder ingress when conditions allow; (5) the project's reduced 51-unit scale, which is favorable from an evacuation-management standpoint; (6) the project site's location within evacuation zone VLJ-1236 and its proximity to Vallejo Fire Department Station 26, located at 1335 Fulton Avenue, and the California Highway Patrol local area office, located at 1551 Benicia Road; and (7) the availability of County and State mutual aid to support evacuation operations during significant incidents.

For these reasons, the proposed project's potential impacts to an adopted emergency response plan or emergency evacuation plan would be less than significant.

Response to Comment HAZ-2: Phase I Environmental Site Assessment

This response addresses comments in the following letter:

- Linda Zupan-McKenna, 12/9/2025 (I-10)

In response to this comment, **Appendix F** of the Subsequent IS/MND has been replaced to include the final version of the Phase I Environmental Site Assessment (ESA). The content and conclusions of the replaced Phase I ESA is the same as the draft version circulated as part of the Subsequent IS/MND.

HYDROLOGY AND WATER QUALITY

The comments and corresponding responses in this section address comments received related to hydrology and water quality. The comment topics include:

- **HYD-1**: Drainage Patterns
- **HYD-2**: Stormwater Management and Treatment – Construction and Operation
- **HYD-3**: Erosion and Sediment Control
- **HYD-4**: Flooding

Response to Comment HYD-1: Drainage Patterns

This response addresses comments in the following letter:

- VFWD, 12/05/2025 (A-2)

As discussed in Section 4.10, Hydrology and Water Quality, a *Drainage Study*[7] was prepared for the proposed project by Qualus Engineering CA, LLP. The *Drainage Study* identified both the existing and proposed drainage pattern at the project site. Qualus Engineering CA, LLP reviewed the comment from VFWD, which requested revisions to the existing drainage areas (DA) 2 and 3 as provided in the *Drainage Study* to include contributing areas to the west. Based on Qualus Engineering CA, LLP's review of the existing drainage conditions, the inclusion of the property to the west in DAs 2 and 3 will be provided in the final engineering and improvement plans for the proposed project, as part of the final entitlement package for the proposed project. The inclusion of this additional area within DAs 2 and 3 does not result in any changes to the proposed project's impacts on drainage conditions as evaluated and documented in the *Drainage Study* and the Subsequent IS/MND.

Response to Comment HYD-2: Stormwater Management and Treatment – Construction and Operation

This response addresses comments in the following letters:

- VFWD, 12/05/2025 (A-2)
- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenne, 12/08/2025 (I-10)

As discussed in Section 4.10, Hydrology and Water Quality (page 4-100), of the Subsequent IS/MND, the proposed project would be required to comply with the State Water Resources Control Board (SWRCB) National Pollution Discharge Elimination System (NPDES) General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities, Order No. 2022-0057-DWQ, NPDES No. CAS000002 (CGP) during construction and the California Regional Water Quality Control Board (RWQCB) San Francisco Bay Region's Municipal Regional Stormwater (MRP) NPDES Permit, Order No. R2-2022-0018, as amended by Order No. R2-2023-0019, NPDES Permit No. CAS612008 during operation.

Pursuant to the CGP, a Stormwater Pollution Protection Plan (SWPPP) would be prepared that identifies the Construction Best Management Practices (BMPs) that would be implemented during construction activities. Construction BMPs would include, but not be limited to, Erosion Control and Sediment Control BMPs designed to minimize erosion and retain sediment on site, as well as Good Housekeeping BMPs to prevent spills, leaks, and discharge of construction debris and waste into receiving waters. As such, adherence to the CGP and implementation of Construction BMPs, specifically the Good Housekeeping BMPs, would ensure that stormwater runoff from the project

[7] DK Engineering. 2023. Op. cit.

site during construction would not contaminate receiving waters, including the Carquinez Strait. In addition, the Erosion Control and Sediment Control BMPs would ensure that grading and construction activities near the riparian/wetland area of the project site would not result in significant hydrological changes or sedimentation impacts to the riparian/wetland area or the Benecia State Recreation Area (BSRA).

As discussed in Chapter 2.0, Project Description (page 2-21), of the Subsequent IS/MND, implementation of the proposed project would result in approximately 3.95 acres of impervious surface area (19.6 percent of the project site), which represents an increase in impervious surface area at the project site from existing conditions, which would increase stormwater runoff from the project site and more effectively transport pollutants to receiving waters. As discussed in Section 4.10, Hydrology and Water Quality (page 4-102), of the Subsequent IS/MND, required by the MRP, a Stormwater Control Plan and Stormwater Facility Operation and Maintenance Plan would be prepared and implemented during operation of the proposed project. These plans would be reviewed and approved by the City prior to issuance of any grading or building permits for the proposed project.

Pursuant to Provision C.3 of the MRP, the Stormwater Control Plan would detail the site-specific source control, site design, and stormwater treatment measures for new and redevelopment projects to address both soluble and insoluble stormwater runoff pollutant discharges and prevent increases in runoff flows from new projects. Source control BMPs are preventative measures that are implemented to prevent the introduction of pollutants into stormwater. Site design BMPs are stormwater management strategies that emphasize conservation and use of existing site features to reduce the amount of runoff and pollutant loading generated from a project site. Stormwater treatment Control BMPs are structural BMPs, which typically include Low Impact Design (LID) BMPs, designed to treat and reduce pollutants in storm water runoff prior to releasing it to receiving waters. LID BMPs mimic a project site's natural hydrology by using design measures that capture, filter, store, evaporate, detain, and infiltrate runoff.

According to the Preliminary Stormwater Control Plan[8] prepared for the proposed project, the proposed project would include two detention basins and approximately 7,617 square feet of bioretention space that would act as stormwater treatment BMPs and be used for stormwater control and treatment to reduce pollutants of concern in stormwater prior to release into the marshland area adjacent to Benicia State Park. The two detention basins would be designed and sized to treat stormwater runoff from the entire project sized, as required by the MRP.

In addition, the two detention basins would be designed and sized to detain the design capture volume (DCV) of the project site and gradually release to receiving waters in order to ensure that increased stormwater runoff from an increase in impervious surface area would not result in impacts to downstream receiving waters, including sedimentation. Further, the Stormwater Facility Operation and Maintenance Plan would ensure that the post-construction stormwater treatment system would be monitored and properly maintained to ensure that the stormwater runoff is adequately addressed throughout operation of the proposed project. As such, adherence to the

[8] Sancerre. 2023. *Preliminary Stormwater Control Plan. Vista Cove.* November

MRP and implementation of source control, site design, and stormwater treatment measures (i.e., detention basins), would ensure that increased stormwater runoff from the project site during operation would not contaminate receiving waters or result in significant downstream sedimentation.

Overall, as discussed in Section 4.10, Hydrology and Water Quality, of the Subsequent IS/MND, and summarized above, the proposed project would meet all applicable NPDES permit requirements pursuant to the SWRCB and San Francisco RWQCB, which would ensure that stormwater runoff is properly managed and treated during construction and operation of the proposed project. Therefore, hydrology and water quality impacts associated with the proposed project would be less than significant during construction and operation.

Response to Comment HYD-3: Erosion and Sediment Control

This response addresses comments in the following letters:

- Christine Gipson, 11/16/2025 (I-3)
- Carol and Kay McKenzie, 12/05/2025 (I-9)

As discussed in Section 4.10, Hydrology and Water Quality (page 4-103), of the Subsequent IS/MND, exposed soil during construction of the proposed project would result in an increased potential for soil erosion and siltation compared to existing conditions. Additionally, during a storm event, soil erosion and siltation could occur at an accelerated rate. However, as discussed above, the proposed project would be subject to the requirements of the CGP, including preparation of a SWPPP and implementation of Construction BMPs, including Erosion Control and Sediment Control BMPs. The Erosion Control and Sediment Control BMPs would be designed to minimize erosion and retain sediment on site and would ensure that grading and construction activities near the riparian/wetland area of the project site would not result in significant hydrological changes or sedimentation impacts to the riparian/wetland area or the BSRA.

In addition, as discussed in Section 4.10, Hydrology and Water Quality (page 4-103), of the Subsequent IS/MND, operation of the proposed project would result in an increase in impervious surfaces on the project site from 0 acres to approximately 3.95 acres, which would result in a net increase in stormwater runoff that could lead to downstream erosion in receiving waters. However, as discussed above, the proposed project includes two detention basins and approximately 7,617 square feet of bioretention space which would be used for stormwater control and treatment pursuant to the MRP. The two detention basins would be designed and sized to treat stormwater runoff from the entire project sized, as required by the MRP. In addition, the two detention basins would be designed and sized to detain the design capture volume (DCV) of the project site and gradually release to receiving waters in order to ensure that increased stormwater runoff from an increase in impervious surface area would not result in impacts to downstream receiving waters, including sedimentation.

Further, the Stormwater Facility Operation and Maintenance Plan would ensure that the post-construction stormwater treatment system would be monitored and properly maintained to ensure that the stormwater runoff is adequately addressed throughout operation of the proposed project.

As such, adherence to the MRP and implementation of source control, site design, and stormwater treatment measures (i.e., detention basins), would ensure that increased stormwater runoff from the project site during operation would not result in significant downstream erosion impacts, including on the riparian/wetland area and the BSRA.

Response to Comment HYD-4: Flooding

This response addresses comments in the following letter:

- Linda Zupan-McKenne, 12/08/2025 (I-10)
- Christine Gipson, 11/16/2025 (I-3)

As discussed in Section 4.10, Hydrology and Water Quality (page 4-105), of the Subsequent IS/MND, and according to the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) No. 06095C0629G, the project site is located in Zone X, which is identified as an area of minimal flood hazard.[9] Although FEMA FIRM Map No. 06095C0629G depicts Special Flood Hazard Areas located east of the project site, associated with the unnamed creek and marshland within the BSRA that extends north along Columbus Parkway, this area is outside the project site. Therefore, flooding in this area would not impact the proposed project or its future residents.

Although the Drainage Study[10] *p*repared for the proposed project did not include an analysis of sea level rise, rising tides are not anticipated to be a concern for the proposed project and its future residents. According to the National Oceanic and Atmospheric Administration (NOAA) Sea Level Rise Viewer,[11] which depicts community-level impacts from coastal flooding or sea level rise (up to 10 feet above average high tides), the proposed project would not become inundated even if tides rise 10 feet. Therefore, impacts related to flooding associated with rising sea levels or tides would be less than significant.

NOISE

The comments and corresponding responses in this section address comments received related to noise. The comment topics include:

- **NOI-1**: Construction and Operational Noise

Response to Comment NOI-1: Noise - Construction and Operation

This response addresses comments in the following letters:

- VFWD, 12/05/2025 (A-2)

---

9 Federal Emergency Management Agency (FEMA). 2016. Flood Insurance Rate Map No. 06095C0629G. Map Revised August 3, 2016. Website: https://msc.fema.gov/portal/search (accessed January 5, 2026).

10 DK Engineering. 2023. *Drainage Study for Vista Cove in Vallejo, California*. November.

11 National Oceanic and Atmospheric Administration (NOAA). Sea Level Rise Viewer. Website: https://coast.noaa.gov/slr/#/layer/slr/10/-13603198.473069413/4590765.801025945/14.367/satellite/none/0.8/2050/interHigh/noAccretion/NOS_Minor (accessed January 5, 2026).

- Alison Egan, 11/12/2025 (I-1)
- Sandra Zarate, 11/21/2025 (I-6)
- Gina Blair, 11/21/2025 (I-7)
- Annette Hilts, 11/21/2025 (I-8)
- Linda Zupan-McKenne, 12/08/2025 (I-10)

As discussed in Section 4.13, Noise (page 4-120), of the Subsequent IS/MND, construction of the proposed project would result in increased noise associated with construction equipment, which would include a combination of trucks, power tools, concrete mixers, and portable generators that when combined can reach high noise levels. In addition, during operation, the proposed project would generate increased noise associated with transportation (i.e., vehicles traveling to and from the project site) and stationary-source noise impacts from the proposed ground mounted air conditioning units.

However, based on the construction noise levels provided in the *Noise Impact Analysis* (**Appendix H** of the Subsequent IS/MND) prepared for the proposed project, the highest anticipated noise levels during construction, occurring when the loudest equipment operates closest to the nearest sensitive receptor, would average approximately 65 A-weighted decibel (dBA) equivalent continuous sound level (L_{eq}). This is below the City's daytime construction noise threshold of 80 dBA L_{eq} at all sensitive receptor locations. In addition, the project would be required to comply with noise-related provisions of the City of Vallejo Municipal Code, Chapters 12.40 and 16.502, which establish allowable hours of construction activity and prohibit construction noise that exceeds established performance standards. During construction, construction activities shall be limited to the hours of 7:00 a.m. to 6:00 p.m., Monday through Friday, and 9:00 a.m. to 6:00 p.m. on Saturdays. Construction is prohibited on Sundays and City-observed holidays, unless a special permit is issued by the City. Compliance with these existing regulatory requirements would ensure that construction activities occur only during permitted hours and would not generate excessive noise levels. Therefore, as construction noise would be below the City's established noise threshold, the proposed project would not result in significant noise impacts during construction.

In addition, according to the *Noise Impact Analysis* prepared for the proposed project, off-site transportation noise impacts associated with the proposed project are predicted to generate a noise level of 50.2 dBA CNEL at the nearest building façade of 196 Wildflower Avenue. Further, the highest operational noise level would average 33.3 dBA L_{eq} at the nearest sensitive receiver locations. These noise levels would be below the City's maximum exterior noise level of 55 dBA for resource conservation and rural residential development and the maximum exterior noise level of 60 dBA for all other residential uses, as provided in Section 16.72.030, Performance Standards/Noise, of the City's Municipal Code.

In addition, as identified by the VFWD, periodic testing of the proposed lift station during operation would also generate some noise. However, noise levels would meet the VFWD's requirements for limited noise to ensure that this noise would be less than 4 dBA along the nearest residential property line. Section 4.13, Noise, has been updated to include this discussion of potential noise impacts associated with periodic testing of the proposed lift station (refer to **Attachment B** of this Response to Comments memorandum). Based on the above discussion and because operational

noise would be below the City's and the VFWD's established noise thresholds, the proposed project would not result in significant noise impacts during operation and would not require any noise mitigation. There is no nexus to require additional noise-reduction measures, such as soundwalls.

POPULATION AND HOUSING

The comments and corresponding responses in this section address comments received related to population and housing. The comment topics include:

- **POP-1**: Impacts on Essential Services and Businesses

Response to Comment POP-1: Impacts on Essential Services and Businesses

This response addresses comments in the following letter:

- Alison Egan, 11/12/2025 (I-1)

As stated in Section 4.14 Population and Housing (pages 4-123 through 4-124) of the Subsequent IS/MND, the proposed project would increase the local population by approximately 143 persons, based on the City of Vallejo's average household size (2019–2023) of 2.79 persons per household. [12] Given that the City's population was estimated to be approximately 122,807 persons as of July 1, 2023,[13] the anticipated population growth associated with the proposed project represents less than a 1 percent increase in the City's current population. Furthermore, the City's population is projected to grow by 24,826 persons to a total of 142,744 persons by 2040.[14] Therefore the proposed project represents approximately 0.6 percent of the population growth anticipated through 2040.

Although the proposed project would incrementally increase the number of residents in the City, this increase would not be substantial or unplanned. The project is consistent with the City's General Plan land use and zoning designations for the site and is therefore consistent with population growth assumed under General Plan buildout. As a result, the proposed project would not induce substantial unplanned population growth.

With respect to essential services such as grocery stores and other businesses, CEQA requires evaluation of whether a project would result in substantial adverse physical impacts associated with the need for new or expanded public facilities, such as schools, police protection, or fire protection. CEQA does not require analysis of economic effects on individual private businesses, such as grocery stores or neighborhood retail establishments, nor does it require analysis of market competition or changes in demand for private services. Because the proposed project would not result in

---

12 United States Census Bureau. *QuickFacts, Vallejo city, California; United States.*2024. Website: https://www.census.gov/quickfacts/fact/table/vallejocitycalifornia,US/PST045224 (accessed February 28, 2025).

13 Ibid.

14 City of Vallejo. 2016. Propel Vallejo General Plan Update and Sonoma Boulevard Specific Plan EIR for the City of Vallejo. July.

substantial unplanned population growth or require the construction of new or expanded public facilities, impacts related to population growth would be less than significant.

PUBLIC SERVICES

The comments and corresponding responses in this section address comments received related to public services. The comment topics include:

- **PS-1**: Police Protection Services
- **PS-2**: School Services

Response to Comment PS-1: Police Protection Services

This response addresses comments in the following letter:

- Rick Zavatsky, 11/19/2025 (I-4)

As discussed in Section 4.15, Public Services, under Impact Threshold 4.15.3 (ii) (pages 4-128 through 4-129), although development of the proposed project would generate an incremental increase in demand for police services, this increase would be consistent with existing population growth contemplated under the City's General Plan and would not require the construction of new police facilities or the expansion of existing facilities. Additionally, the Vallejo Polce Department (VPD) would continue to provide service to the project site and would not require additional officers to serve the proposed project, considering the negligible increase in population that would result from the proposed project (less than 1 percent of the City's current population). Furthermore, the project sponsor would be required to pay Solano County public facilities impact mitigation fees used to fund capital costs associated with constructing new public facilities and purchasing equipment for new public facilities. Payment of public facilities impact mitigation fees commensurate with the increased demand for services in the City would offset any increase in demand for police protection services.

Police services would continue to be provided citywide and to the proposed project, and current staffing levels would be addressed through the City's ongoing budgeting and service planning processes. Therefore, the proposed project would not result in a substantial increase in demand such that police services could not serve the project, and impacts would remain less than significant.

Response to Comment PS-2: School Services

This response addresses comments in the following letter:

- Sandra Zarate, 11/21/2025 (I-5)

As discussed in Section 4.15, Public Services, under Impact Threshold 4.15.3 (iii) (pages 4-129 through 4-130), the estimated number of students the proposed project would generate is derived by multiplying the number of students per dwelling unit (the student yield factor) by the number of dwelling units in the proposed project (51 new units). The California State Allocation Board Office of Public School Construction reports that the Statewide student yield factor of 0.7 student per

dwelling unit is applicable for unified school districts. Applying the statewide average student yield factor, the proposed project would generate 36 students.

The commenters expressed concern regarding increased demand or congestion at existing schools however, pursuant to State law (Senate Bill [SB] 50), the project sponsor would be required to pay school impact fees prior to issuance of building permits to mitigate impacts on school facilities. Payment of these fees is deemed full mitigation for impacts to school facilities under CEQA. Therefore, impacts associated with increased demand on schools would remain less than significant.

TRANSPORTATION

The comments and corresponding responses in this section address comments received related to transportation and traffic. The comment topics include:

- **TRA-1**: VMT Methodology
- **TRA-2**: Traffic Analysis Methodology
- **TRA-3**: Road Conditions and Maintenance
- **TRA-4**: Safety and Emergency Access
- **TRA-5**: Increased Traffic and Congestion
- **TRA-6**: Alternative Modes of Transportation
- **TRA-7**: Cumulative Transportation Impacts
- **TRA-8**: Site Access

Response to Comment TRA-1: VMT Methodology

This response addresses comments in the following letter:

- Caltrans, 12/3/2025 (A-3)
- Christine Gipson, 11/16/2025 (I-3)

As discussed in the Transportation Analysis[15] in **Appendix I** of the Subsequent IS/MND, the City has adopted transportation thresholds under which small projects that would generate fewer than 500 daily two-way vehicle trips are considered to result in less than significant transportation impacts. Solano County likewise has not adopted VMT thresholds of significance.

As explained in the Transportation Analysis, it is not appropriate to rely solely on the Governor's Office of Planning and Research *Technical Advisory on Evaluating Transportation Impacts under CEQA* (December 2018). Instead, the Transportation Analysis provides independent substantial evidence supporting the application of the City's small-project threshold. Subsequent to preparation of the Transportation Analysis, a California Court of Appeal decision, *Cleveland National Forest Foundation v. County of San Diego (2025)*, confirmed that reliance on the Technical Advisory's small-

[15] LSA Associates, Inc. 2025. *Transportation Analysis for the Vista Cove Project* (LSA Project No. 20241845). January 9.

project screening threshold, without additional supporting evidence, is improper. Consistent with that decision, the Transportation Analysis does not rely exclusively on the Technical Advisory.

One of the stated objectives of SB 743 is the reduction of greenhouse gas (GHG) emissions. The Transportation Analysis established relationship between VMT and GHG emissions and, using adopted GHG thresholds, demonstrates that projects generating fewer than 500 daily two-way trips would result in negligible GHG effects. While the Transportation Analysis does not rely on the Bay Area Air Quality Management District's CEQA Air Quality Guidelines as a threshold of significance, it notes that the project's estimated transportation-related emissions are below the thresholds identified in those guidelines as an additional point of reference. *State CEQA Guidelines* Section 15064.7(c) allows a lead agency to consider thresholds of significance adopted or recommended by other public agencies or experts, provided the lead agency's determination is supported by substantial evidence. Furthermore, the Transportation Analysis provides independent substantial evidence that is consistent with, but not dependent upon, previously adopted thresholds of significance.

Response to Comment TRA-2: Traffic Analysis Methodology

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)
- Linda Zupan-McKenna, 12/08/2025 (I-10)

As stated in Section 4.17, Transportation (pages 4-140 through 4-142) of the Subsequent IS/MND, the Transportation Analysis for the proposed project (**Appendix I**) was prepared in January 2025 and applied trip generation rates published in the latest version of ITE *Trip Generation Manual*. The 11th Edition was published in 2021 and, for single family homes, includes data collected nationwide (including in California) between the 1990s and 2020s. In August 2025 the 12th edition of the ITE *Trip Generation Manual* was published. This latest version includes additional data collected between 2021 and 2025. As the result of including more recent data, the trip generation rate for single family housing decreased (e.g., from 9.43 daily trips per home to 9.09 daily trips per home). Therefore, estimates of the daily trip generation for the proposed project included in the Subsequent IS/MND are more conservative than current rates.

Response to Comment TRA-3: Road Conditions and Maintenance

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)

As stated in Section 4.17, Transportation and Circulation (page 4-142) of the Subsequent IS/MND, the design, construction, and maintenance of project access points and on-site roads would be required to comply with the City's Municipal Code and applicable City standards. In addition, West of Dogwood Lane, Shady Lane is approximately 35 to 40 feet wide and accommodates parallel parking on both sides of the street. East of Dogwood Lane, the roadway begins to narrow, and east

of Applenut Lane, Shady Lane is approximately 25 to 30 feet wide and is signed to prohibit on-street parking. Even in its narrowest segments, Shady Lane meets applicable design standards and exceeds the minimum 24-foot width necessary to accommodate two-way vehicle traffic without on-street parking.

Pursuant to *State CEQA Guidelines* Section 15064(b), a project is responsible only for its incremental effects on the environment, and existing roadway conditions alone do not constitute a significant impact. In addition, *State CEQA Guidelines* Section 15064.3(b) requires that transportation impacts be evaluated based on the project's effect on VMT, rather than pre-existing roadway design characteristics. Accordingly, the project applicant is not required to repair or upgrade off-site roadways.

Response to Comment TRA-4: Safety and Emergency Access

This response addresses comments in the following letters:

- Marty 11/16/2025 (I-2)
- Christine Gipson 11/16/2025 (I-3)
- Rick Zavatsky, 11/19/2025 (I-4)
- Gina Blair 11/21/2025 (I-7)
- Annette Hilts, 11/21/2025 (I-8)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenna 12/08/2025 (I-10)

Please refer to Comment HAZ-1 for a discussion of emergency access. Additionally, as discussed in Section 4.17 Transportation (page 4-142), the design of the proposed project does not include any hazardous geometric design features, such as sharp horizontal curves, sudden curve transitions, or offset intersections, or incompatible uses that could substantially increase circulation/traffic hazards. Vehicular access to the project site would be provided by one full access residential street through an established community to the west off the intersection of Shady Lane and Wildflower Avenue. The proposed project would include new private internal residential streets that would be 28 feet wide curb-to-curb with parking on one side, and a 4.5-foot attached sidewalk. The project would also include private alleys which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting them. Private alleys would include a 33-foot public utility easement/planting easement, and a 10-foot travel way in each direction with no parking allowed. Accordingly, the design, construction, and maintenance of project access locations and on-site roads would be required to comply with the City's Municipal Code and relevant City standards.

Response to Comment TRA-5: Increased Traffic and Congestion

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Marty, 11/16/2025 (I-2)
- Christine Gipson, 11/16/2025 (I-3)

- Rick Zavatsky, 11/19/2025 (I-4)
- Don Spilman, 11/20/2025 (I-5)
- Sandra Zarate, 11/21/2025 (I-6)
- Gina Blair, 11/21/2025 (I-7)
- Annette Hilts, 11/21/2025 (I-8)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenna, 12/08/2025 (I-10)
- Sabrina Cardoso and David Ingalls, 12/09/2025 (I-11)

As stated in Section 4.17, Transportation, the *City of Vallejo Public Works Department Traffic Impact Analysis/Study Guidelines* identify thresholds for determining if the contribution of project traffic to an intersection would be significant. The significance thresholds identify whether project traffic volume would increase the volume-to-capacity ratio of key intersections. The significance threshold is lower for intersections at or near full capacity and higher for intersections performing at a better level of service, but no significant impact would occur at any intersection operating at the best levels of service (i.e., level of service [LOS] A and B). The guidelines also provide a screening threshold of 100 peak hour trips for determining when a traffic impact analysis should be prepared. For a project below 100 peak hour trips, project volume at key intersections would not trigger the established significance threshold. The proposed project peak hour trip generation is 48, less than half of the established screening threshold for peak hour trips. The proposed project daily trip generation is also less than the established screening threshold for daily trips. Even though the proposed project trip generation is less than the established screening thresholds, an analysis of the traffic impacts at the key intersection of Glen Cove Parkway/Robles Way was prepared. This intersection was found to operate at LOS B even with the addition of project traffic and the project would not have a significant impact. Intersections along neighborhood streets do not operate near their capacity limit, would similarly have a good LOS, would continue to operate well below their capacity with the addition of project traffic volume, and the established thresholds of significance would not be crossed by the project's low traffic volume.

Further, the trip generation for the proposed project was developed using rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (2021)[16] for Land Use Code 210 (Single-Family Detached Housing), the proposed project is anticipated to generate 481 daily trips of which 35 would occur in the AM peak hour and 48 would occur in the PM peak hour. As such, the project's trip generation is below the thresholds established by the City's guidelines and the preparation of a traffic analysis is not required for the proposed project. The project traffic is included within the traffic generated by the General Plan build out, and the project would not result in a new significant impact or in a substantial in Because the project would generate fewer trips than the threshold for review established by the City and in the Congestion Management Program (CMP), and because project traffic was not found to degrade the operation of the intersection of Glen Cove Parkway/ Robles Way to below LOS E, it is determined that the project does not have the potential to significantly affect roadway operations, and the project would not conflict with General Plan policies regarding LOS.

[16] Institute of Transportation Engineers (ITE). 2021. *Trip Generation Manual,* 11th Edition.

Additionally, although traffic construction phase traffic impacts were not modeled for the proposed project, the traffic volumes generated by project construction would be less than 500 trips per day and would not exceed the operational traffic as discussed above.

Response to Comment TRA-6: Alternative Modes of Transportation

This response addresses comments in the following letters:

- Christine Gipson, 11/16/2025 (I-3)
- Annette Hilts, 11/21/2025 (I-8)
- Carol and Kay McKenzie, 12/05/2025 (I-9)

As discussed in Section 4.17, Transportation, of the Subsequent IS/MND (pages 4-138 through 4-143) and in the Transportation Analysis prepared for the project (**Appendix I)**, the project site is served by an existing network of streets, sidewalks, transit routes, and bikeways. The project would construct 4.5-foot-wide attached sidewalks along internal residential streets, connecting homes to common open space areas and linking to existing sidewalks along Shady Lane, Wildflower Avenue, and nearby streets. The increase in pedestrian activity generated by the project is expected to be minimal and would not exceed the capacity of the existing facilities.

Bicycle access is available via existing Class II bikeways along Glen Cove Parkway, approximately 0.5 mile from the project site. The project would not remove or interfere with existing bicycle facilities, nor would it require new off-site bicycle infrastructure.

Transit service in the project vicinity is provided by SolTrans Routes 3 and 8, with stops approximately 0.5 mile west along Glen Cove Parkway. Pedestrian connections to these stops are available via existing sidewalks. The project is not expected to generate a volume of transit trips that would exceed the capacity of existing transit service or interfere with planned service.

Furthermore, because the proposed project would not significantly affect roadway operations and would not conflict with or be inconsistent with *State CEQA Guidelines* Section 15064.3, subdivision (b), the project is not required to implement a Transportation Demand Management (TDM) plan. CEQA requires mitigation measures only for significant environmental impacts (Public Resources Code [PRC] Section 21002.1(a); *State CEQA Guidelines* Section 15126.4(a): “Mitigation measures shall be feasible, and shall be adopted, if the measure is capable of reducing the significant effects on the environment to a less than significant level”). As the proposed project would have less than significant impacts on vehicle to VMT, roadways, pedestrian and bicycle facilities, and transit service no additional TDM strategies are necessary to reduce impacts to a less than significant level.

Response to Comment TRA-7: Cumulative Transportation Impacts

This response addresses comments in the following letter:

- Christine Gipson, 11/16/2025 (I-3)

The Vallejo Design Review Board made recommendations to the Planning Commission to approve the design and landscape of the Rollingwood Subdivision project, which now is preparing an

environmental review. Appropriate analysis of the Rollingwood Drive subdivision project potential transportation impacts would be included in that environmental review and the proposed project would be a cumulative project.

Please also refer to Comment TRA-5 which details the intersection analysis. The proposed project would generate less traffic than the established threshold for providing a quantitative analysis of intersection level of service.

Response to Comment TRA-8: Site Access

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)
- Don Spilman, 11/20/2025 (I-5)
- Gina Blair, 11/21/2025 (I-7)
- Annette Hilts, 11/21/2025 (I-8)
- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Linda Zupan-McKenna, 12/08/2025 (I-10)

TRIBAL CULTURAL RESOURCES

The comments and corresponding responses in this section address comments received related to tribal cultural resources. The comment topics include:

- **TCR-1**: Inadvertent Discovery of Tribal Cultural Resources and Human Remains
- **TCR-2**: Tribal Consultation

Response to Comment TCR-1: Inadvertent Discovery of Tribal Cultural Resources and Human Remains

This response addresses comments in the following letters:

- Christine Gipson, 11/16/2025 (I-3)
- Lisjan Nation, 11/14/2025 (O-1)

As discussed in Section 4.18, Tribal Cultural Resources, of the Subsequent IS/MND (page 4-147), no information regarding specific known tribal cultural resources on the project site was provided to the City and no human remains are known to be on the project site or are anticipated to be discovered during project construction. In addition, no cultural resources, including tribal cultural resources were identified during the archaeological pedestrian field survey of the project site conducted on January 20, 2025. Based on these results, the Cultural Resources Assessment[17] (**Appendix D** of the Subsequent IS/MND) determined that the project site has a low potential for in situ subsurface cultural resources and the potential for encountering unknown buried cultural resources, including tribal cultural resources, during project construction is low. However,

[17] LSA Associates, Inc. (LSA). 2025. *Cultural Resources Assessment, Vista Cove Development Project, Vallejo, Solano County, California.* March.

construction activities, such as grading and other ground-disturbing activities, has the potential to uncover previously unknown or unidentified tribal cultural resources. In addition, as detailed on page 4-148, of the Subsequent IS/MND, **Project Specific Mitigation Measure TCR-1**, which requires immediate cessation of work within 25 feet of a discovery, securing and protecting the find, and treatment of the resource in accordance with applicable sections of the California Public Resources (PRC) Section 5097.98. These regulations establish the process the process for the immediate cessation of work, securing and protecting the discovery area, providing Tribal access to the site, and ensuring the culturally appropriate and respectful treatment of Native American human remains and associated cultural materials.

The Lisjan Nation requests that work be halted within 100 feet of a potential Tribal Cultural Resource and that the Subsequent IS/MND modify **Project Specific Mitigation Measure TCR-1** and adopt a separate tribal cultural resources-specific mitigation measure to provide two separate mitigation measures, one for tribal cultural items and one for human remains, as well as to name the Lisjan Nation as a consulting entity.

As no additional substantial evidence has been provided that demonstrates a 100-foot buffer would be required in order to avoid or reduce a significant environmental impact, beyond the protections already afforded by state law and the performance standards contained in **Project Specific Mitigation Measures CUL-1, CUL-2,** and **TCR-1,** increasing the avoidance buffer from 25 feet to 100 feet is not warranted. The 25-foot buffer is established based on the archaeological field survey results and the site-specific likelihood of intact resources documented in the project's Cultural Resources Assessment in **Appendix D**. In addition, background research at the project site returned a negative result for the project site's potential to contain tribal cultural resources. The existing stop work measures fully comply with the procedural requirements for the treatment of archaeological resources, Tribal Cultural Resources, and human remains under State law. If a consulting Tribe provides credible evidence that a larger buffer is warranted for a specific find, the City shall implement a larger buffer (up to 100 feet) pending evaluation and agreement with the consulting Tribe(s).

However, the City acknowledges the need for two separate mitigation measures to establish procedures as requested by the Tribe for specific identification of tribal cultural resources, and as such **Project Specific Mitigation Measure TCR-1** has been modified and **Project Specific Mitigation Measures TCR-2** has been added to address potential impacts of previously undiscovered tribal cultural resources (refer to **Attachment B** of this Response to Comments memorandum).

Project Specific Mitigation Measure TCR-1 outlines procedures if tribal cultural resources are discovered during construction and **Project Specific Mitigation Measure TCR-2** outlines procedures if human remains are discovered during construction, such as work stoppage within 25 feet of the find and coordination with tribal representatives. With the implementation of **Project Specific Mitigation Measures TCR-1** and **TCR-2,** the proposed project would not result in significant impacts to previously undiscovered tribal cultural resources.

At the completion of project construction, the proposed project would not result in further disturbance of native soils on the project site and, therefore, project operations would have no potential to impact previously undiscovered archaeological resources.

Response to Comment TCR-2: Tribal Consultation

This response addresses comments in the following letters:

- Wilton Rancheria, 11/14/2025 (O-2)
- Yocha Dehe, 12/4/2025 (O-3)
- Linda Zupan-McKenna, 12/8/2025 (I-10)

As discussed in Section 4.18, Tribal Cultural Resources (page 146), of the Subsequent IS/MND, the City provided notice of the proposed project to the Native American contacts provided by the Native American Heritage Commission (NAHC) and the tribes that had previously requested notification, pursuant to Assembly Bill (AB) 52 provisions, in August 2024. On October 10, 2024, the Confederated Villages of Lisjan Nation responded to the City's notice and requested a copy of the final California Historic Resources Inventory System (CHRIS) records search, the EIR, the Sacred Lands File (SLF) search results from the NAHC, and a copy of any additional archaeological reports. The City provided a response on February 10, 2025, providing the Confederated Villages of Lisjan Nation with the database searches and available information. No further responses were received.

The Yocha Dehe Wintun Nation reached out to request consultation on the proposed project on October 24, 2024. The City responded on November 18, 2024, and a meeting took place on December 9, 2024. As part of the consultation process, the City provided the Yocha Dehe Wintun Nation with draft Tribal Monitoring Mitigations on January 17, 2025. The City resent this information on February 13, 2025, and March 17, 2025, and no additional responses were received.

As no additional or further requests for tribal consultation were received, the City officially closed tribal consultation pursuant to AB 52 in March 2025.

UTILITIES AND SERVICE SYSTEMS

The comments and corresponding responses in this section address comments received related to utilities and service systems. The comment topics include:

- **UTL-1**: Sewer System and Lift Station
- **UTL-2**: Permits and Approvals

Response to Comment UTL-1: Sewer System and Lift Station

This response addresses comments in the following letter:

- VFWD, 12/05/2025 (A-2)

In response to the comments received from the VFWD, the City has revised Section 2.2.5.2, Wastewater, and Section 2.2.6, Operations and Maintenance, in Chapter 2.0, Project Description (page 2-21), of the Subsequent IS/MND to add mention of the 6-inch sewer force main to connect the lift station to the existing sewer force main located in Shady Lane and to clarify that only the sanitary sewer would be publicly maintained, while the storm drains would be privately maintained. In addition, Section 4.19, Utilities and Service Systems (page 4-156), of the Subsequent IS/MND has

been updated to describe the installation of a new 6-inch sewer force main extending from the new lift station to tie into the existing sewer force main. Text has also been added to state that the current lift station would be relocated and upsized. Refer to **Attachment B** of this Response to Comments memorandum.

In addition, Figure 2-4, Conceptual Site Plan, has been revised to show that Parcel E would be a VFWD-owned and maintained Sewer Pump Station (refer to **Attachment C** of this memorandum).

Response to Comment UTL-2: Permits and Approvals

This response addresses comments in the following letter:

- VFWD, 12/05/2025 (A-2)

In response to the comments received from the VFWD, Table 2.A: Potential Permits and Approvals in Section 2.0, Project Description, of the Subsequent IS/MND has been revised to include City of Vallejo Public Works approvals for grading, water quality, and road improvements, as well as for VFWD, which issues permits and approves sewer, storm drain, and lift station improvements. Similarly, Section 4.19, of Utilities and Services Systems, has been revised to clarify that the storm drain system will be privately maintained by the Home Owners Association (HOA). Refer to **Attachment B** of this Response to Comments document.

CUMULATIVE IMPACTS

The comments and corresponding responses in this section address comments received related to cumulative impacts. The comment topics include:

- **CUM-1**: Rezoning Action

Response to Comment CUM-1: Rezoning Action

This response addresses comments in the following letters:

- Alison Egan, 11/12/2025 (I-1)
- Christine Gipson, 11/16/2025 (I-3)

Population growth associated with the project is approximately 143 persons, representing less than 1 percent of the current City population and 0.6 percent of the projected growth through 2040. As such, the incremental increase in the number of residents in the City would not be substantial or unplanned. In addition, the proposed project is consistent with the City's General Plan land use and zoning designations for the site and is therefore consistent with population growth assumed under General Plan buildout. As a result, the proposed project would not induce substantial unplanned population growth

Additionally, rezoning to PD does not authorize development of adjacent parcels or additional development outside of project area and any future projects on nearby land would require separate

CEQA review and City approvals. Cumulative impacts, including population, housing, and land use, were analyzed in the General Plan EIR, which anticipated residential development in this area.

NON-CEQA ISSUES

The comments and corresponding responses in this section address comments received related to non-CEQA issues. The comment topics include:

- **NON-1**: Parking

Response to Comment NON-1: Parking

This response addresses comments in the following letters:

- Carol and Kay McKenzie, 12/05/2025 (I-9)
- Marty, 11/ 14/2025 (I-2)
- Christine Gipson, 11/16/2025 (I-3)

As Stated in Section 2.2.4 Proposed Access, Circulation, and Parking of the Project Description (page 2-20) in the Subsequent IS/MND, the proposed project would provide 102 covered garage spaces (2 per unit), 102 driveway stalls (2 per unit), 24 on-street stalls, and 1 mailbox parking stall, for a total of 229 parking spaces. In addition, the proposed project would also include new private internal residential streets that would be 28 feet wide curb-to-curb with parking on one side. As discussed in Section 4.1 Aesthetics (pages 4-11 through 4-12), the proposed project would be required to undergo Development Review and Design Review consistent with Sections 16.604 and 16.605 of the City of Vallejo Municipal Code (VMC), which would provide for the review of the physical improvements to the project site, to ensure compatibility and compliance with City requirements. In addition, VMC Section 16.508 establishes standards for off-street parking and loading facilities that meet the urban design objectives of the General Plan. The proposed project meets the requirements established in Table 16.508-B.

Comment Letter A-1

December 4, 2025

Cesar Orozco
City of Vallejo
555 Santa Clara Street
Napa, CA 95490
Cesar.Orozco@cityofvallejo.net

Subject: Vista Cove Planned Development Project, Subsequent Initial Study/Mitigated Negative Declaration, SCH No. 2025030788, Solano County

Dear Cesar Orozco:

The California Department of Fish and Wildlife (CDFW) received a Subsequent Initial Study/Mitigated Negative Declaration (IS/MND) from the City of Vallejo (City) for the Vista Cove Planned Development Project (Project) pursuant the California Environmental Quality Act (CEQA) and CEQA Guidelines. The IS/MND was preceded by a Notice of Preparation (NOP) for a Draft Environmental Report (EIR), for which CDFW provided comments in a letter dated April 18, 2025. However, rather than prepare an EIR it appears that the Lead Agency changed course and prepared a Subsequent IS/MND tiered from the General Plan 2040 and Sonoma Boulevard Specific Plan Draft Environmental Impact Report.

CDFW is submitting comments on the IS/MND to inform the City as the Lead Agency, of potentially significant impacts to biological resources associated with the Project. The comments in this letter are similar to those provided in CDFW's NOP comment letter.

CDFW ROLE

CDFW is a **Trustee Agency** with responsibility under CEQA pursuant to CEQA Guidelines section 15386 for commenting on projects that could impact fish, plant, and wildlife resources. CDFW is also considered a **Responsible Agency** if a project would require discretionary approval, such as permits issued under the California Endangered Species Act (CESA), the Lake and Streambed Alteration (LSA) Program, or other provisions of the Fish and Game Code that afford protection to the state's fish and wildlife trust resources.

PROJECT DESCRIPTION SUMMARY

Proponent: Sancerra Vista Cove, LLC

Objective: The Project would rezone, subdivide, and develop the 20.13-acre Project area, of which approximately 10 acres would be developed, while the remaining

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

acreage would be retained as undeveloped open space. The residential portion of the Project would include approximately 10.39 acres of residential space and 51 single-family residential units and associated improvements, including front and rear yards, front driveways, two-car garages, fencing, and landscaping.

The Project would include 9.74 acres of undisturbed open space, to remain undeveloped. The Project would remove or potentially remove several trees within the riparian zone of two unnamed tributaries to Southampton Creek within the Project area, and would result in the permanent loss of a 0.49-acre seasonal on-stream wetland located on the northern unnamed tributary and the conversion of this wetland to a stormwater basin.

Location: The Project is located near the northeast corner of Shady Lane and Wildflower Avenue; Assessor's Parcel Numbers 0079-171-170 and 0079-120-100; in the City of Vallejo, CA 945490, Solano County; with a Project area center at approximately 38.08128 °N, -122.20112 °W.

REGULATORY REQUIREMENTS

California Fully Protected Species

California Fully Protected species may not be taken or possessed at any time and no licenses or permits may be issued for their take except as follows:

- Take is for necessary scientific research;
- Efforts to recover a fully protected, endangered, or threatened species, live capture and relocation of a bird species for the protection of livestock; or
- They are a covered species whose conservation and management is provided for in a Natural Community Conservation Plan (Fish & G. Code, §§ 3511, 4700, 5050, & 5515).

Specified types of infrastructure projects may be eligible for an Incidental Take Permit (ITP) for unavoidable impacts to fully protected species if certain conditions are met (Fish & G. Code, § 2081.15). Project proponents should consult with CDFW early in the project planning process. **The Project has the potential to impact nesting white-tailed kite (*Elanus leucurus*), as further described below.**

California Endangered Species Act

Please be advised that a CESA ITP must be obtained if the Project has the potential to result in "take" of plants or animals listed or candidate species under CESA, either during construction or over the life of the Project. **The Project has the potential to impact Swainson's hawk (*Buteo swainsoni*), CESA listed as threatened; tricolored**

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

blackbird (*Agelaius tricolor*), CESA listed as threatened; and burrowing owl (*Athene cunicularia*), a CESA candidate species, as further described below. Issuance of an ITP is subject to CEQA documentation; the CEQA document must specify impacts, mitigation measures, and a mitigation monitoring and reporting program. If the Project will impact CESA listed species, early consultation is encouraged, as significant modification to the Project and mitigation measures may be required in order to obtain an ITP.

CEQA requires a Mandatory Finding of Significance if a project is likely to substantially restrict the range or reduce the population of a threatened or endangered species. (Pub. Resources Code, §§ 21001, subd. (c) & 21083; CEQA Guidelines, §§ 15380, 15064, & 15065.). Impacts must be avoided or mitigated to less-than-significant levels unless the CEQA Lead Agency makes and supports Findings of Overriding Consideration (FOC). The CEQA Lead Agency's FOC does not eliminate the Project proponent's obligation to comply with CESA.

Lake and Streambed Alteration

An LSA Notification, pursuant to Fish and Game Code section 1600 et. seq. is required for Project activities affecting lakes or streams and associated riparian habitat. Notification is required for any activity that will substantially divert or obstruct the natural flow; change or use material from the bed, channel, or bank including associated riparian or wetland resources; or deposit or dispose of material where it may pass into a river, lake or stream. **It appears the Project would impact two unnamed tributaries to Southampton Creek, including a seasonal on-stream wetland connected to the northern unnamed tributary; therefore, an LSA Notification is likely warranted as further described below**. Work within ephemeral streams, washes, wetlands hydrologically connected to streams, watercourses with a subsurface flow, and floodplains are subject to LSA Notification requirements. CDFW, as a Responsible Agency under CEQA, would consider the CEQA document for the Project and may issue an LSA Agreement. CDFW may not execute the final LSA Agreement until it has complied with CEQA as a Responsible Agency.

COMMENTS AND RECOMMENDATIONS

CDFW offers the comments and recommendations below to assist the County in adequately identifying and/or mitigating the Project's significant, or potentially significant, direct and indirect impacts on fish and wildlife (biological) resources. Based on the Project's avoidance of significant impacts on biological resources with implementation of mitigation measures, including those CDFW recommends below and included in **Attachment 1** Draft Mitigation Monitoring and Reporting Program, CDFW concludes that an MND is appropriate for the Project.

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

I. MANDATORY FINDING OF SIGNIFICANCE. Does the Project have potential to substantially reduce the number or restrict the range of an endangered, rare, or threatened species?

And,

Would the Project have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by CDFW or U.S. Fish and Wildlife Service (USFWS)?

COMMENT 1: Burrowing Owl, Environmental Setting and Related Impact Shortcoming

Issue: The IS/MND does not adequately evaluate potential impacts to wintering burrowing owl. Page 22 of Appendix C states that burrowing owl has been documented numerous times within 5 miles of the Project area but dismisses the species due to no ground squirrel burrows being observed on February 28, 2022.

Specific impacts, why they may occur and be potentially significant: The absence of burrows in 2022 does not preclude the potential for fossorial animals to excavate new burrows and for burrowing owl to occupy them in later years. If the Project proceeds without assessing whether burrowing owl currently uses the Project area or adjacent habitat, the Project could result in injury or mortality of adult burrowing owl wintering in burrows or other suitable refugia on or within up to 500 meters (1,640 feet) of the Project site, and permanent wintering (i.e., non-nesting) habitat loss. Burrowing owl have been extirpated from 16 percent of their former range and are at risk of being extirpated from another 13 percent of their range in the State (CDFW 2024). Information indicates a decline in burrowing owl's range over time, burrowing owl has experienced population declines in regions of California and threats to BUOW, coupled with long-term population declines, suggest a high degree and immediacy of threat to burrowing owl in California (CDFW 2024). Burrowing owl population viability and survival are adversely affected by risk factors such as precipitous declines from habitat loss, fragmentation, and degradation; evictions from nesting sites without habitat mitigation; wind turbine mortality; human disturbance; and eradication of California ground squirrels resulting in a loss of suitable burrows required by burrowing owl for nesting, protection from predators, and shelter (Shuford and Gardali 2008; Department of Fish and Game Staff Report on Burrowing Owl Mitigation (2012); personal communication, CDFW Statewide Burrowing Owl Coordinator Esther Burkett, May 13, 2022). Preliminary analyses of regional patterns for breeding populations of burrowing owl have detected declines both locally in their central and southern coastal breeding areas, and statewide where the species has experienced breeding range retraction (Department of Fish and Game Staff Report on Burrowing

BIO-1

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

Owl Mitigation 2012). Burrowing owl is a candidate species under CESA. Based on the foregoing, if burrowing owl are wintering on or within up to 500 meters of the Project site, Project impacts to burrowing owl would be *potentially significant.*

The Project area appears to overlap with Valley Floor Grassland habitat which may be used by burrowing owl for foraging according to the Draft Solano Habitat Conservation Plan (HCP). The HCP includes mitigating burrowing owl foraging habitat at a minimum 1:1 ratio according to the Draft Solano HCP Mitigation Measure BO 2 for burrowing owl (see Section 6.4.9 and Figure 4-22 of the draft Solano HCP at: https://www.scwa2.com/solano-multispecies-habitat-conservation-plan/).

Recommended Mitigation Measures: To reduce potential impacts to burrowing owl to less-than-significant and comply with CESA and Fish and Game Code section 3500 et seq., CDFW recommends including the below mitigation measures in the MND.

Mitigation Measure BIO-5a: Burrowing Owl Habitat Assessment, Surveys, and Protection: A qualified biologist shall conduct a habitat assessment and surveys for wintering burrowing owl prior to construction if construction starts during the burrowing wintering season (September 1 to January 31). Surveys shall be conducted if warranted based on the habitat assessment and shall begin on or within three days of August 1. The habitat assessment and surveys shall follow the *Department of Fish and Game Staff Report on Burrowing Owl Mitigation* (2012) methodology (https://wildlife.ca.gov/Conservation/Survey-Protocols#377281284-birds) and the qualified biologist shall prepare a report documenting the survey results. The habitat assessment and surveys shall encompass the Project site and a sufficient buffer zone to detect owls nearby that may be impacted, which is up to 500 meters (1,640 feet) around the Project site pursuant to the above methodology. Habitat assessments and surveys shall occur annually for the duration of the Project, as conditions may change annually and suitable refugia for burrowing owl, such as small mammal burrows, can be created within a few hours or days, unless otherwise approved in writing by CDFW. Surveys for non-breeding burrowing owl shall be spread over four visits during the nonbreeding season (i.e., wintering) and shall start on or within 3 days of August 1 and continue to January 31, unless otherwise approved in writing by CDFW. Time lapses between surveys or Project activities shall trigger subsequent surveys including, but not limited to, a final survey within 24 hours prior to ground disturbance. The qualified biologist shall have a minimum of two years of experience implementing the above methodology. The Project shall immediately notify CDFW if burrowing owl is detected and implement a construction avoidance buffer around any detected burrowing owl pursuant to the buffer distances outlined in the *Department of Fish and Game Staff Report on Burrowing Owl Mitigation* (2012), which may be up to 500 meters (1,640 feet). Any

BIO-1

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

detected owl shall be monitored by the qualified biologist to ensure it is not disturbed during construction activities. If take of burrowing owl cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP before Project activities may commence.

Mitigation Measure 5b: Covering of Entrapment Hazards: To prevent burrowing owl from sheltering or nesting in exposed material; all construction pipes, culverts, hoses or similar materials greater than two inches in diameter stored at the Project site shall be capped or covered before the end of each workday and shall be inspected thoroughly for wildlife before the pipe or similar structure is buried, capped, used, or moved.

Mitigation Measure 5c: Burrowing Owl Wintering Burrow Mitigation: If the Project would impact an unoccupied wintering burrowing owl burrow or burrow surrogate (i.e., a burrow known to have been used in the past three years for wintering), the following habitat mitigation shall be implemented prior to Project construction.

Impacts to each unoccupied burrowing owl wintering site shall be mitigated by permanent preservation of two burrowing owl occupied wintering sites with appropriate foraging habitat, unless otherwise approved by CDFW, through a conservation easement and implementing and funding a long-term management plan in perpetuity. If the Project would impact burrowing owl and obtains an ITP, any more rigorous requirements of the ITP shall apply. BIO-1

The Project may implement alternative methods for preserving habitat with written acceptance from CDFW.

Mitigation Measure 5d: Burrowing Owl Foraging Habitat Mitigation: Impacts to burrowing owl foraging habitat shall be quantified by a qualified biologist based on the final Project design plans, and the Project shall obtain written acceptance of the acreage of habitat impacts from CDFW. Prior to Project construction, the Project shall provide burrowing owl foraging habitat mitigation at a minimum 1:1 ratio, which shall include: 1) permanent preservation of the species' foraging habitat through a conservation easement and implementing and funding a long-term management plan in perpetuity, or 2) purchase of burrowing owl foraging habitat credits at a CDFW-approved mitigation bank, unless otherwise approved in writing by CDFW. If the Project would impact burrowing owl and obtains an ITP, any more rigorous requirements of the ITP shall apply.

COMMENT 2: General Nesting Birds, Swainson's Hawk, Tricolored Blackbird, and White-Tailed Kite, Mitigation Measure and Related Impact Shortcoming.

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

Issue: MM BIO-1a of the IS/MND does not specify nesting bird survey distances nor does it specify response and/or agency coordination actions if Swainson's hawk, tricolored blackbird, or white-tailed kite may be impacted by the Project.

Specific impacts and why they may occur and be significant: The Project has the potential to impact nesting Swainson's hawk through auditory or visual disturbances above ambient levels within 0.5 miles of Project activities, or through direct removal of an active nest site. The Project area is within the mapped summer range of Swainson's hawk and includes tree removal. Disturbances from Project activities may result in Swainson's hawk nest abandonment and loss of eggs or reduced health and vigor and loss of young. Swainson's hawk is CESA listed as a threatened species and therefore is considered to be a threatened species pursuant to CEQA Guidelines section 15380. Therefore, if an active Swainson's hawk nest is disturbed by the Project, the Project may result in a substantial reduction in the number of a threatened species, which is considered a *mandatory finding of significance* pursuant to CEQA Guidelines section 15065, subdivision (a)(1).

Page C-16 of the Biological Resources Reports and Peer Reviews (Appendix C) states that tricolored blackbird is unlikely to occur on the Project area, despite the Project's impact to 0.42 acres of seasonal wetland onsite because "The seasonal wetland lacks riparian thickets or tall, dense emergent vegetation suitable to support nesting for this species." However, according to aerial imagery, there is a patch of dense vegetation growing from the southern tributary less than 500 feet from the Project area shown in Figure 2-2 of the IS/MND. The IS/MND does not address potential disturbances to nesting tricolored blackbird that could result from Project activities within 500 feet of suitable habitat, including the vegetation patch. BIO-1

Human activity and removal of habitat has contributed to the loss of a significant proportion of the total number of birds in the United States and Canada since the 1970s (Rosenburg et al. 2019). Nesting birds such as white-tailed kite, a California Fully Protected species for which take is prohibited except in limited circumstances as described above, may be disturbed by habitat removal, Project noise and visual disturbances, which could result in active nest loss or abandonment or reduced health and vigor of young, *a potentially significant impact.*

Recommended Mitigation Measures: To reduce impacts to Swainson's hawk, tricolored blackbird, white-tailed kite and other nesting birds to less-than-significant and comply with Fish and Game Code sections 3500 et seq. and the federal Migratory Bird Treaty Act (MBTA), CDFW recommends replacing the current Mitigation Measures BIO-1a and BIO-1b with the following mitigation measures:

Mitigation Measure BIO-1a: Nesting Bird Surveys. If construction, grading, vegetation removal, or other Project-related activities are scheduled during the

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

avian nesting season, February 1 to September 15, a qualified biologist shall conduct a survey for active bird nests within 7 days prior to the beginning of Project-related activities. The survey shall cover the entire Project site and a minimum 500-foot buffer around the Project site. If a lapse in Project-related work of 7 days or longer occurs, another survey shall be conducted before Project work can be reinitiated. If an active nest is found during surveys, the qualified biologist shall immediately notify the CDFW contact below, or if unavailable another CDFW representative, and establish site- and species-specific no-work buffers to ensure the nest is not disturbed. The buffer distances shall be specified to protect the bird's normal behavior to prevent nesting failure or abandonment and comply with Fish and Game Code section 3500 et seq. and the federal MBTA. Abnormal nesting behaviors which may cause reproductive harm include, but are not limited to, defensive flights/vocalizations directed towards Project personnel, standing up from a brooding position, and flying away from the nest. The qualified biologist shall have authority to order the cessation of all nearby Project activities if the nesting birds exhibit abnormal behavior which may cause reproductive failure (nest abandonment and loss of eggs and/or young) until an appropriate buffer is established.

The qualified biologist shall monitor the behavior of the birds (adults and young, when present) at the nest site to ensure that they are not disturbed by Project work. Nest monitoring shall continue during Project work until the young have fully fledged (have completely left the nest site and are no longer being fed by the parents), as determined by the qualified biologist, unless otherwise approved in writing by CDFW. BIO-1

Mitigation Measure BIO-1b: Tricolored Blackbird Avoidance. If nesting tricolored blackbird or evidence of their presence is found during nesting bird surveys, CDFW shall be notified immediately, and work shall not occur without written approval from CDFW allowing the Project to proceed. Project activities shall not occur within 500 feet of an active nest unless otherwise approved in writing by CDFW. If take of tricolored blackbird cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP.

Mitigation Measure BIO-1c: Swainson's Hawk Avoidance. If active Swainson's hawk nests are detected during nesting bird surveys or otherwise, the Project shall immediately notify CDFW and implement a 0.5-mile construction avoidance buffer around the nest until the nest is no longer active as determined by a Qualified Biologist, unless otherwise approved by CDFW in writing. Any detected nesting Swainson's hawk shall be monitored by the Qualified Biologist to ensure it is not disturbed during construction activities, unless otherwise approved in writing by CDFW. If take of Swainson's hawk cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP.

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

II. Would the Project have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by CDFW or the USFWS?

COMMENT 3: Impacts to Unnamed Tributaries to Southampton Creek and Connected Seasonal Wetland, Environmental Setting and Related Impact Shortcoming

Issue: The Project would result in permanent impacts to stream and riparian habitat including the removal of a 0.49-acre on-stream seasonal wetland along the northern unnamed tributary to Southampton Creek (IS/MND page 4-42; Appendix C, Figure 2); and removal of riparian trees along both unnamed tributaries within the Project area (IS/MND Appendix C, Figure 4). However, the IS/MND does not clearly indicate stream habitat would be impacted or include a mitigation measure for notifying CDFW for impacts to the streams and connected wetland.

Specific impacts and why they may occur and be significant: Project activities would result in permanent loss of stream habitat from removal and conversion of the on-stream seasonal wetland habitat, and riparian tree removal. Removal of the on-stream wetland could result in reduction or loss of stream flows, loss of stream connectivity, and desiccation of existing stream habitat. Impacts could also include inputs of deleterious materials, obstructions, and disturbances to riparian corridors, special status wildlife and their habitats, and nesting birds. Due to the ecological importance and sensitivity of stream and connected wetland habitat, the above impacts would be *potentially significant*.

BIO-2

Recommended Mitigation Measure: To comply with Fish and Game Code section 1600 et seq., the Clean Water Act, and the Porter Cologne Water Quality Control Act, CDFW recommends including the below mitigation measure in the IS/MND.

Mitigation Measure BIO-6: Impacts to Stream. Prior to the commencement of Project activities, the Project shall notify CDFW for Project impacts to the stream resulting from riparian tree and seasonal wetland removal and any additional Project impacts to stream and riparian habitat. More information for the notification process is available at https://wildlife.ca.gov/Conservation/Environmental-Review/LSA.The Project shall comply with all measures of the Lake and Streambed Alteration (LSA) Agreement, if issued, and shall not commence activities with the potential to impact the stream until the LSA Agreement process is completed. Restoration to mitigate impacts to any stream shall include a qualified biologist preparing and implementing a restoration plan with permanent impacts restored at a minimum 3:1 restoration to impact ratio, temporary impacts restored, success criteria, a minimum of five years of monitoring and maintenance, and achieving success criteria, unless otherwise approved in writing by CDFW. CDFW may consider the purchase of wetland or stream creation credits from an approved

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

mitigation bank at a reduced ratio. The Project shall also obtain any necessary authorization from the U.S. Army Corps of Engineers (USACE) and Regional Water Quality Control Board (RWQCB) pursuant to the Clean Water Act and Porter Cologne Water Quality Control Act.

Please be advised that a Streambed Alteration Agreement, if issued for the Project, would likely include the above recommended mitigation measures, as applicable, and may include additional measures to protect fish and wildlife resources, such as protocol level plant surveys pursuant to *Protocol for Surveying and Evaluating Impacts to Special Status Native Plant Populations and Sensitive Natural Communities* (https://wildlife.ca.gov/Conservation/Survey-Protocols#377281280-plants). BIO-2

ENVIRONMENTAL DATA

CEQA requires that information developed in environmental impact reports and negative declarations be incorporated into a database which may be used to make subsequent or supplemental environmental determinations. (Pub. Resources Code, § 21003, subd. (e).) Accordingly, please report any special-status species and natural communities detected during Project surveys to the California Natural Diversity Database (CNDDB). The CNDDB field survey form can be filled out and submitted online at the following link: https://wildlife.ca.gov/Data/CNDDB/Submitting-Data. The types of information reported to CNDDB can be found at the following link: https://www.wildlife.ca.gov/Data/CNDDB/Plants-and-Animals.

ENVIRONMENTAL DOCUMENT FILING FEES

The Project, as proposed, would have an impact on fish and/or wildlife, and assessment of environmental document filing fees is necessary. Fees are payable upon filing of the Notice of Determination by the Lead Agency and serve to help defray the cost of environmental review by CDFW. Payment of the environmental document filing fee is required in order for the underlying project approval to be operative, vested, and final. (Cal. Code Regs, tit. 14, § 753.5; Fish & G. Code, § 711.4; Pub. Resources Code, § 21089.)

CONCLUSION

CDFW appreciates the opportunity to comment on the subsequent IS/MND to assist the City in identifying and mitigating Project impacts on biological resources.

Questions regarding this letter or further coordination should be directed to Nicholas Magnuson, Environmental Scientist, at (707) 815-4166 or Nicholas.Magnuson@wildlife.ca.gov; or Melanie Day, Senior Environmental Scientist (Supervisory), at (707) 210-4415 or Melanie.Day@wildlife.ca.gov.

Draft Mitigation Monitoring and Reporting Program (MMRP)

CDFW provides the following language to be incorporated into the MMRP for the Project.

Biological Resources (BIO)			
Mitigation Measure	**Description**	**Timing**	**Responsible Party**
MM BIO-1a, 1b, & 1c	Mitigation Measure BIO-1a: Nesting Bird Surveys. If construction, grading, vegetation removal, or other Project-related activities are scheduled during the avian nesting season, February 1 to September 15, a qualified biologist shall conduct a survey for active bird nests within 7 days prior to the beginning of Project-related activities. The survey shall cover the entire Project site and a minimum 500-foot buffer around the Project site. If a lapse in Project-related work of 7 days or longer occurs, another survey shall be conducted before Project work can be reinitiated. If an active nest is found during surveys, the qualified biologist shall immediately notify the CDFW contact below, or if unavailable another CDFW representative, and establish site- and species-specific no-work buffers to ensure the nest is not disturbed. The buffer distances shall be specified to protect the bird's normal behavior to prevent nesting failure or abandonment and comply with Fish and Game Code section 3500 et seq. and the federal MBTA. Abnormal nesting behaviors which may cause reproductive harm include, but are not limited to, defensive flights/vocalizations directed towards Project personnel, standing up from a brooding position, and flying away from the nest. The qualified biologist shall have authority to order the cessation of all nearby Project activities if the nesting birds exhibit abnormal behavior which may cause reproductive failure (nest abandonment and loss of eggs and/or young) until an appropriate buffer is established. The qualified biologist shall monitor the behavior of the birds (adults and young, when present) at the nest site to ensure that they are not disturbed by Project work. Nest monitoring shall continue during Project work until the young have fully fledged (have completely left the nest site and are no longer being fed by the parents),	Prior to Ground Disturbance and for Duration of Project	Project Applicant

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

	as determined by the qualified biologist, unless otherwise approved in writing by CDFW. Mitigation Measure BIO-1b: Tricolored Blackbird Avoidance. If nesting tricolored blackbird or evidence of their presence is found during nesting bird surveys, CDFW shall be notified immediately, and work shall not occur without written approval from CDFW allowing the Project to proceed. Project activities shall not occur within 500 feet of an active nest unless otherwise approved in writing by CDFW. If take of tricolored blackbird cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP. Mitigation Measure BIO-1c: Swainson's Hawk Avoidance. If active Swainson's hawk nests are detected during nesting bird surveys or otherwise, the Project shall immediately notify CDFW and implement a 0.5-mile construction avoidance buffer around the nest until the nest is no longer active as determined by a Qualified Biologist, unless otherwise approved by CDFW in writing. Any detected nesting Swainson's hawk shall be monitored by the Qualified Biologist to ensure it is not disturbed during construction activities, unless otherwise approved in writing by CDFW. If take of Swainson's hawk cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP.		
MM BIO-5a, 5b, 5c, & 5d	Mitigation Measure BIO-5a: Burrowing Owl Habitat Assessment, Surveys, and Protection: A qualified biologist shall conduct a habitat assessment and surveys for wintering burrowing owl prior to construction if construction starts during the burrowing wintering season (September 1 to January 31). Surveys shall be conducted if warranted based on the habitat assessment and shall begin on or within three days of August 1. The habitat assessment and surveys shall follow the *Department of Fish and Game Staff Report on Burrowing Owl Mitigation* (2012) methodology (https://wildlife.ca.gov/Conservation/Survey-Protocols#377281284-birds) and the qualified biologist shall prepare a report documenting the survey results. The habitat assessment and surveys shall encompass the Project site and a sufficient buffer zone to detect owls nearby that may be impacted, which is up to 500 meters (1,640 feet) around the Project site pursuant to the above methodology. Habitat assessments and surveys shall occur annually for the duration of the Project, as conditions may change annually and suitable refugia for burrowing owl, such as small	Prior to Ground Disturbance and for Duration of Project	Project Applicant

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

	mammal burrows, can be created within a few hours or days, unless otherwise approved in writing by CDFW. Surveys for non-breeding burrowing owl shall be spread over four visits during the nonbreeding season (i.e., wintering) and shall start on or within 3 days of August 1 and continue to January 31, unless otherwise approved in writing by CDFW. Time lapses between surveys or Project activities shall trigger subsequent surveys including, but not limited to, a final survey within 24 hours prior to ground disturbance. The qualified biologist shall have a minimum of two years of experience implementing the above methodology. The Project shall immediately notify CDFW if burrowing owl is detected and implement a construction avoidance buffer around any detected burrowing owl pursuant to the buffer distances outlined in the *Department of Fish and Game Staff Report on Burrowing Owl Mitigation* (2012), which may be up to 500 meters (1,640 feet). Any detected owl shall be monitored by the qualified biologist to ensure it is not disturbed during construction activities. If take of burrowing owl cannot be avoided, the Project shall consult with CDFW pursuant to CESA and obtain an ITP before Project activities may commence. Mitigation Measure 5b: Covering of Entrapment Hazards: To prevent burrowing owl from sheltering or nesting in exposed material; all construction pipes, culverts, hoses or similar materials greater than two inches in diameter stored at the Project site shall be capped or covered before the end of each workday and shall be inspected thoroughly for wildlife before the pipe or similar structure is buried, capped, used, or moved. Mitigation Measure 5c: Burrowing Owl Wintering Burrow Mitigation: If the Project would impact an unoccupied wintering burrowing owl burrow or burrow surrogate (i.e., a burrow known to have been used in the past three years for wintering), the following habitat mitigation shall be implemented prior to Project construction. Impacts to each unoccupied burrowing owl wintering site shall be mitigated by permanent preservation of two burrowing owl occupied wintering sites with appropriate foraging habitat, unless otherwise approved by CDFW, through a conservation easement and implementing and funding a long-term management plan in perpetuity. If the Project would impact burrowing owl and obtains an ITP, any more rigorous requirements of the ITP shall apply.		

Docusign Envelope ID: B09B4C6E-97F8-4733-9358-FEF4F3B0B082

	The Project may implement alternative methods for preserving habitat with written acceptance from CDFW. Mitigation Measure 5d: Burrowing Owl Foraging Habitat Mitigation: Impacts to burrowing owl foraging habitat shall be quantified by a qualified biologist based on the final Project design plans, and the Project shall obtain written acceptance of the acreage of habitat impacts from CDFW. Prior to Project construction, the Project shall provide burrowing owl foraging habitat mitigation at a minimum 1:1 ratio, which shall include: 1) permanent preservation of the species' foraging habitat through a conservation easement and implementing and funding a long-term management plan in perpetuity, or 2) purchase of burrowing owl foraging habitat credits at a CDFW-approved mitigation bank, unless otherwise approved in writing by CDFW. If the Project would impact burrowing owl and obtains an ITP, any more rigorous requirements of the ITP shall apply.		
MM BIO-6	Mitigation Measure BIO-6: Impacts to Stream. Prior to the commencement of Project activities, the Project shall notify CDFW for Project impacts to the stream resulting from riparian tree and seasonal wetland removal and any additional Project impacts to stream and riparian habitat. More information for the notification process is available at https://wildlife.ca.gov/Conservation/Environmental-Review/LSA. The Project shall comply with all measures of the LSA Agreement, if issued, and shall not commence activities with the potential to impact the stream until the LSA Agreement process is completed. Restoration to mitigate impacts to any stream shall include a qualified biologist preparing and implementing a restoration plan with permanent impacts restored at a minimum 3:1 restoration to impact ratio, temporary impacts restored, success criteria, a minimum of five years of monitoring and maintenance, and achieving success criteria, unless otherwise approved in writing by CDFW. CDFW may consider the purchase of wetland or stream creation credits from an approved mitigation bank at a reduced ratio. The Project shall also obtain any necessary authorization from the USACE and RWQCB pursuant to the Clean Water Act and Porter Cologne Water Quality Control Act. VALLEJO FLOOD AND WASTEWATER DISTRICT
(VFWD)

INITIAL STUDY/SUBSEQUENT MND REVIEW

December 5, 2025

SUBJECT: Vista Cove Subdivision and Vesting TM

LOCATION: East end of Shady Lane

PERMIT NO.: DVR23-0042

FROM: Alan Mitchell, P.E., VFWD – Ponticello Enterprises

TO: Cesar Orozco, Planning Manager, City of Vallejo

THRU: David Espinoza, P.E., Senior Engineer, VFWD

VFWD has reviewed the IS/SMND, dated November 2025, and offers the following comments for your consideration.

Figure 2-4, Conceptual Site Plan

Parcel E will be a VFWD owned and maintained Sewer Pump Station

2.2.6 Operations and Maintenance

Only SS will be publicly maintained. Not SD.

UTL-1

Table 2.A: Potential Permits and Approvals

City of Vallejo Public Works - Consider adding grading, water quality, roads

Add Vallejo Flood and Wastewater: issues permit for sewer and storm drain, and will approve those improvements and the lift station improvements

UTL-2

4.3.3 Impact Analysis; para d.

The proposed sewer lift station may generate odors. The presence of hydrogen sulfides, volatile organic compounds and other factors can contribute to wastewater odors for the SSPS.

AIR-1

4.9.3 Impact Analysis; para b.

Is it prudent to mention the unlikely potential for a sewer spill from the sewer lift station? HYD-2

4.10.3 Impact Analysis; para c. iii. Stormwater Drainage System Capacity

excerpt from VFWD COA: Based on the existing contours, EX DA 3 and EX DA 2 appear to have more contributing areas to the west. Revise the existing and developed conditions drainage areas accordingly. Update the drainage study calculations and confirm compliance with all VFWD Standards. HYD-1

4.13.3 Impact Analysis; para a. Operation

Periodic testing of the lift station standby generator will produce noise pollution. The standby engine-generator set will meet the VFWD requirements for limiting noise to 70dBA maximum along the nearby property lines and ensure that the generator noise is less than 50dBA along the nearest residential property line. NOI-1

4.19.3 Impact Analysis; para a. Wastewater

Also installing a new 6" sewer force main which will extend from new lift station to tie into the existing sewer force main.

The current lift station will be relocated and upsized, and new lift station owned and maintained by VFWF UTL-1

4.19.3 Impact Analysis; para a. Stormwater

The storm drain system will be privately maintained by the HOA. UTL-1

Hydrology and basin sizing will be finalized during the final design phase of this project. HYD-1

Vallejo, CA 95490

Re: Vista Cove Planned Development Project – Mitigated Negative Declaration (MND)

Dear Cesar Orozco:

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the Vista Cove Planned Development Project. The Local Development Review (LDR) Program reviews land use projects and plans to ensure consistency with our mission and state planning priorities. The following comments are based on our review of the November 2025 MND.

Please note this correspondence does not indicate an official position or approval by Caltrans on this project and is for informational purposes only.

Project Understanding
The proposed project would result in the subdivision of a 20.13-acre site near Interstate (I)-780, of which approximately 10 acres would be developed with 51 residential lots, while the remaining acreage would be retained as undeveloped open space.

Travel Demand Analysis
Caltrans requests the Lead Agency to provide further justification of its vehicle miles traveled (VMT)-related methodology, particularly as it relates to the use of the Bay Area Air District's California Environmental Quality Act Air Quality Guidelines in evaluating VMT thresholds for this project. TRA-1

Thank you again for including Caltrans in the environmental review process. Should you have any questions regarding this letter, please contact Llisel Ayon, Associate Transportation Planner, via LDR-D4@dot.ca.gov. For future early coordination

opportunities or project referrals, please visit Caltrans LDR website (*link*) or contact LDR-D4@dot.ca.gov.

Sincerely,

YUNSHENG LUO
Branch Chief, Local Development Review
Office of Regional and Community Planning

Public Comment on Vista Cove SMND

Introduction

My name is Alison Egan, and I have lived at 196 Wildflower Avenue since 1987. My home is the closest residence to the proposed entry point for the Vista Cove Planned Development Project. After reviewing both the Mitigated Negative Declaration (MND) and the Supplemental Mitigated Negative Declaration (SMND) for the Vista Cove project, I have identified significant risks and concerns that suggest the project may not be suitable for approval at this time or may require additional review.

Environmental Review Limitations and Ecological Concerns

The Environmental Impact Report (EIR) from 2015 was used to inform aspects of the current risk assessment, but it was not specifically focused on the Vista Cove area. Over the years, I have witnessed environmental changes here, such as the recent appearance of bobcats and a noticeable shift in the bird population, including an increase in raptors. Residents have witnessed seasonal weather-related changes, as well. Accurately assessing which animal and bird species depend on this environment and assessing the impacts of seasonal weather variances requires a more focused and updated study. BIO-1

The project would permanently remove 0.49 acres of seasonal wetland. The effectiveness of proposed mitigation for this wetland depends heavily on the quality of implementation and ongoing agency oversight. There is no certainty that ecological functions will be fully replaced, and if mitigation or long-term maintenance is insufficient, local biodiversity will suffer. It is unclear whether the City of Vallejo has the necessary resources to commit to this long-term responsibility. BIO-2

Impacts on Adjacent Public Lands and Scenic Views

The proposed development is adjacent to the Benicia State Recreation Area (BSRA), which would be affected both visually and ecologically. The General Plan 2040 emphasizes the need to preserve scenic views and green spaces. All new homes would be visible from the recreation area, and construction and grading would disrupt park users, the green space corridor, and wildlife, particularly bird populations. There is no clear plan to ensure the continued viability of these animal populations following construction, raising concerns about permanent ecological disruption. AES-2 BIO-1

Unique Ecosystems and Wetland Vulnerability

According to information from the BSRA brochure, the rare and endangered wetland near the site supports salt grass, pickleweed, coyote bush, and the endangered soft bird's-beak. Native plant communities such as chaparral, valley grassland, and coastal scrub thrive on the hillsides that would be altered by the project. Discharge of stormwater from the development into the existing marshland could impact this rare wetland, and there is uncertainty about the long-term safety of the marsh and the broader ecosystem. A longer-term seasonal study is necessary to monitor rainfall impacts, marsh changes, and to provide for adaptive management based on climate and weather variations. Oversight and responsibility for the ongoing safety of the marshland remain unclear.

BIO-2

HYD-2

Tree Removal and Habitat Loss

The project will clear many mature trees, and while new trees will be planted, these will be small and will not immediately compensate for lost habitat. The interim loss of mature tree canopy will have a long-term negative effect on birds and other wildlife. The incremental loss of open space and mature trees further degrades regional habitat quality.

BIO-3

Reliance on Mitigation and Agency Resources

Many mitigation measures depend on effective implementation, long-term monitoring, and enforcement by city and agency staff. There is concern that current resources and staffing levels may not be adequate to ensure these measures are successful. Therefore, the effectiveness of mitigation outlined in the MND is not guaranteed.

BIO-1

BIO-2

Residual Impacts and Recommendations for Further Study

Despite the MND's identification of sensitive resources and proposed mitigation, the permanent loss of wetland and mature trees, as well as the presence of special-status species, create lasting and potentially significant harms. Stronger, enforceable mitigation measures and increased scrutiny are warranted. The Planning Commission should consider requiring a focused Environmental Impact Report (EIR) and specific on-site avoidance measures before approving the project.

Rezoning to Planned Development (PD) allows for coordinated development across multiple parcels and could open adjacent lands to future development. The MND does not limit the scale of future projects, setting a precedent for further loss of open space toward Benicia State Park. Given the rarity and fragility of the marsh ecosystem, this is a serious concern.

CUM-1

Traffic and Neighborhood Impacts

The project is projected to generate 481 to 520 new daily vehicle trips, a significant increase from the current fewer than 30 daily trips past my residence. This change will cause additional wear and tear on Shady Lane. It is unclear whether there is a plan to address road maintenance. The traffic analysis only included the Glen Cove Parkway & Robles Way intersection, omitting other critical access points such as Robles Way & Shady Lane, Wildflower Avenue, and Silktree Lane. These quiet residential streets will experience years of heavy construction traffic and increased long-term use, which may alter the character of the neighborhood and create safety risks for residents, especially children and pets. TRA-5

The increase in residents will also strain already limited local resources, as grocery stores and other businesses in Vallejo have been closing. There is concern about how increased population will affect access to these essential services. POP-1

Construction Impacts: Noise and Timeline Concerns

Prolonged use of heavy equipment during construction will raise noise levels for existing residents. Although these levels may be deemed below the City of Vallejo Municipal Code thresholds, they will still be significant and disruptive to those living nearby. NOI-1

The construction schedule lists the site preparation phase as lasting five days and the grading phase as twenty-five days. These timelines appear to be underestimated, particularly for grading which has some challenges because of unstable soils and slope instability. PD-2

Geotechnical and Environmental Safety Measures

There must be verification of slope stability measures and an independent review of the final grading plan. Post-construction monitoring for erosion and sediment control is necessary, and a long-term stormwater system maintenance plan should be established. Oversight by a certified geotechnical engineer during grading and foundation work is essential.

Although the MND claims that all geological and environmental hazards can be mitigated to less-than-significant levels, the site's hillside setting, clay soils, and potential regional seismic activity present ongoing risks. Strong oversight during construction, maintenance of drainage systems, and adherence to geotechnical recommendations are critical for ensuring long-term stability. GEO-1

Key Unresolved Issues

- Uncertainty regarding the sufficiency of wetland loss mitigation
- Spill prevention and water quality protection during construction
- Construction-phase noise and dust may create health risks to residents

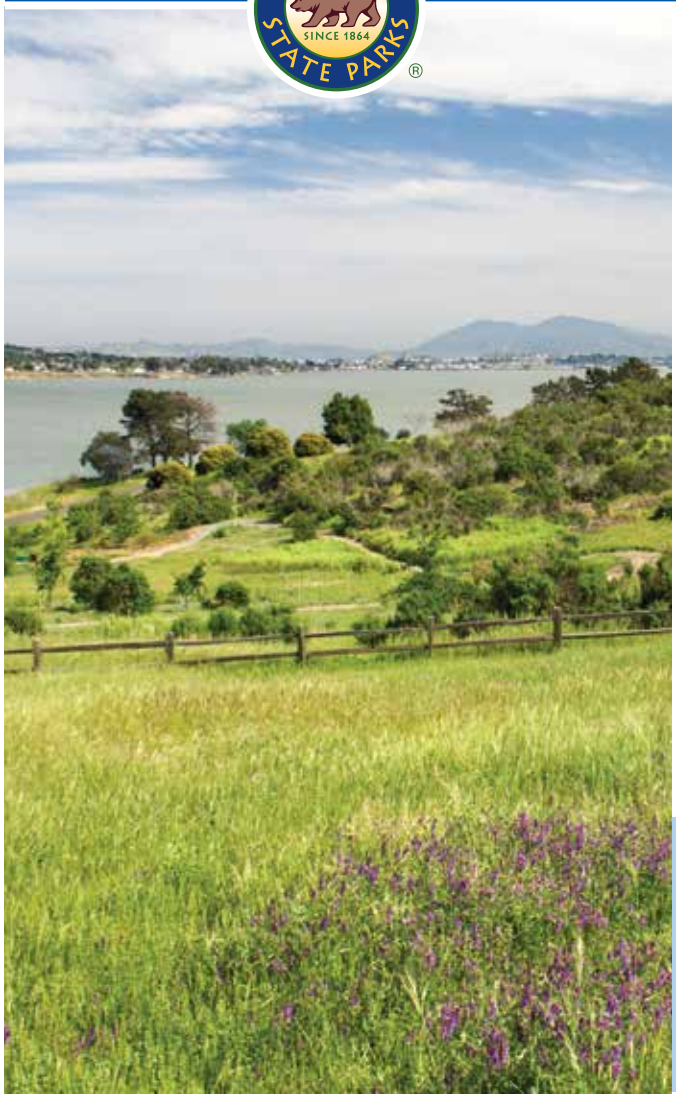
- Reliance on outdated environmental analyses without a full EIR update
- Significant increase in daily vehicle trips and potential traffic impacts
- Permanent loss of 0.49 acre of seasonal wetland, with proposed 1:1 mitigation unlikely to fully restore ecological function
- Removal of 69 trees (47 significant), with 3:1 replacement not immediately restoring mature habitat
- Presence of special-status birds and animals, with proposed surveys and buffers reducing but not eliminating risks
- Sedimentation and hydrology risks to adjacent riparian and marsh areas

Conclusion and Recommendations

The scale of ecological and visual impacts, along with the reliance on outdated environmental review, are significant causes for concern. The City should reject the current Mitigated Negative Declaration and instead require a full Environmental Impact Report. Alternatively, the site should be preserved as open space and integrated into a regional habitat and recreation corridor adjacent to Benicia State Park.

Benicia

State Recreation Area



Our Mission

The mission of California State Parks is to provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.

California State Parks supports equal access. Prior to arrival, visitors with disabilities who need assistance should contact the park at **(707) 648-1911.** If you need this publication in an alternate format, contact **interp@parks.ca.gov**.

Printed on Recycled Paper

The tidal marsh—where the rivers meet the bay—forms a unique habitat, home to rare and endangered plants and wildlife.

The combined waters of fourteen tributaries of the Sacramento and San Joaquin rivers surge through the Carquinez Strait, past Benicia State Recreation Area, and west into San Pablo Bay on their way to the Pacific Ocean.

Over the past 150 years, these waters have carried silt and clay from historic hydraulic gold mines and timber logging sites of the Sierra and deposited the particles where fresh water meets salt water at Southampton Bay. The mudflat and marsh make up most of the recreation area, providing habitat for some unusual and endangered species.

The climate may be windy and cool year-round, with frequent fog. Summer temperatures may reach 101 degrees; in winter, average rainfall is 3 inches with temperatures dipping to 40 degrees.

PARK HISTORY

Native Americans

Today's Solano County was first settled by the Patwin, who spoke the Southern Wintuan language. Historians estimate that about 3,300 Southern Patwin lived in the area before European encroachment.

From 1800 through the 1820s, Spanish Franciscan padres from Mission Dolores, Mission San José, and Mission San Francisco Solano tried to convert the Southern Patwin to Catholicism.

After the mission era ended in 1834, Mexican commandant General Mariano Guadalupe Vallejo used these new converts, called neophytes, as a labor force to work on his vast land holdings—nearly 175,000 acres.

A century later, only about 200 Patwin were left—lost to deprivation and unfamiliar European diseases.

Doña Francisca Benicia Carrillo de Vallejo

Euro-American Settlement

The city of Benicia was founded in 1847 by General Vallejo, Dr. Robert Semple, and Thomas O. Larkin. Benicia was originally named "Francisca" in honor of Vallejo's wife, Doña Francisca Benicia Carrillo.

Francisca's founders changed the town's name to Benicia on June 12, 1847, after nearby Yerba Buena was officially renamed San Francisco. With its strategic location skirting Southampton Bay and the Carquinez Strait, Benicia built the area's first deep-water harbor capable of docking large ships.

Park Property

The sandstone point at Benicia SRA has been known as Rocky Point, Quarry Point, and now Dillon Point. Stonecutter Patrick Dillon came to California from Tipperary, Ireland, during the 1849 gold rush. He settled in Benicia in 1851. General Vallejo leased Dillon the tidal flat at Southampton Bay and Rocky Point peninsula for a sandstone quarry.

Dillon eventually purchased the property; he built a brick kiln and began making red clay bricks. Sandstone and raw materials for the bricks were eventually exhausted. The Dillon family and subsequent owners tried sheep ranching and raising grapes until the State acquired the property for the Benicia State Recreation Area in 1967.

NATURAL HISTORY

Geology and Habitat

Nearly 70 percent of the parkland is tidal marsh wetland, ringed by grassy hills and open water. The Southampton mudflat formed by upriver silt and clay deposits is more than 1,000 feet thick. The principal habitats here are brackish marsh, saltwater marsh, and freshwater marsh.

Plants and Wildlife

This rare and endangered wetland ecosystem is covered with marsh plants such as salt grass, pickleweed, coyote bush, and soft bird's-beak. Bird's-beak is an endangered gray-green annual herb in the snapdragon family. Non-native trees provide light shade at the park entrance and picnic table areas. Native plant communities such as chaparral, valley grassland, and coastal scrub bloom on the hillsides.

Native Plant Botanic Garden

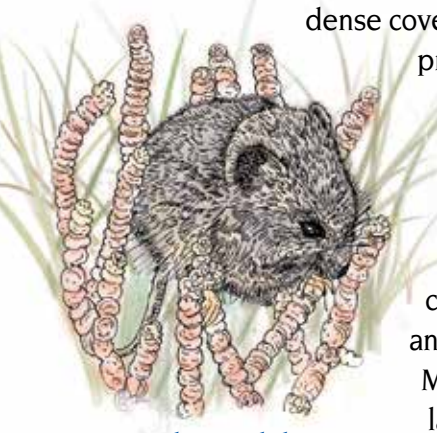
The Forrest Deaner Native Plant Botanic Garden represents over 250 species on 3.5 acres overlooking Southampton Bay.

The garden pays tribute to the late Forrest Deaner, founder of the Willis Linn Jepson Chapter (Solano County) of the California Native Plant Society. In spring, colorful magenta redbuds, golden poppies, blue lupines, and pink-flowered currants bloom. Summer and early fall deepen native plant foliage into russets and browns.

Several demonstration gardens—Memorial, Residential/Sensory, Native American, Butterfly/Hummingbird, Wildflower Meadow, and Riparian—display flora varieties, each marked with color-coded labels. The Botanic Garden is fully maintained by volunteers and funded through grants and individual donations. For more information, visit **www.cnpsjepsonchapter.org**.

Wildlife

Endangered northern salt marsh harvest mice depend on the park's pickleweed for its dense cover. Marsh erosion, predators, and severe habitat loss have reduced this mouse population. Other park mammals include coyote, beaver, otter, and muskrat.



Salt marsh harvest mouse in pickleweed

Marine birds float lazily on thermal updrafts at this designated Important Bird Area, which provides essential habitat for bird species. Virginia rails, endangered California clapper rails, and black rails hide in marsh vegetation. Visitors may see herons and egrets fishing or pelicans and terns diving. The marsh resounds with Suisun song sparrows and saltmarsh common yellowthroats. On their journey along the Pacific Flyway, many waterfowl winter in the park, such as Canada geese or canvasback and goldeneye ducks.

Sweeping marsh and bay views

RECREATION

The park has 2.25 miles of paved road and bike paths. Dogs and bicycles are allowed on the Benicia Bay Trail, part of the Bay Area Ridge Trail. California State Parks built the Benicia Bay Trail in collaboration with the Bay Area Ridge Trail Coalition and the San Francisco Bay Trail Foundation.

Dillon Point offers prime shore fishing for sturgeon, starry flounder, and striped bass. Anglers age 16 and over must carry a valid California fishing license.

ACCESSIBLE FEATURES

The Mike Taugher Trail—a dual-direction, paved, accessible trail—begins near the Military West entrance and runs 0.75 miles to the main park entrance, joining Dillon Point Road for 1.5 miles.

A portable restroom at Military West is designated accessible. For updates, see **http://access.parks.ca.gov**.

PLEASE REMEMBER

- Park is open from 8 a.m. to sunset daily.
- Pay the day-use vehicle fee at entrance.
- Dogs must be on a leash no more than six-feet long. Dogs and bikes are not allowed on marsh nature trails.
- Tent camping is not permitted. For a fee, RVs may camp *en route* for one night, space permitting, near the park entrance.

Mitigated Negative Declaration
Vista Cove Planned Development Project

My concern is that Shady Lane isn't wide enough for the increased traffic. It now is parking on the South side, which narrows it down to one safe lane. There could be widening of and additional drive lane plus parking lane with ADA sidewalk, right now you have to walk in the street. The side walk on the south side is not maintained. TRA-5
I do not see any over flow parking in the plan. The first set of houses could be devoted for that or in the undeveloped area. NON-1

thanks
Marty

From: Christine G

Subject: Vista Cove – Public Comment on SMND
Date: Sunday, November 16, 2025 3:40:02 PM

This Message Is From an External Sender
This message came from outside your organization.

Thank you for this opportunity to share input on the recent documentation provided in the Subsequent Mitigated Negative Declaration for the proposed Vista Cove Planned Development Project. While the City's Mitigated Negative Declaration (MND) concludes that environmental impacts are less than significant with mitigation, a review of the documentation reveals multiple areas of unresolved risk, insufficient
mitigation, and irreversible loss of valuable open space.

Loss of Open Space and Visual Character
The site is one of the last remaining undeveloped hillside parcels adjacent to Benicia State Recreation Area. Development would permanently alter scenic views identified as valuable in the General Plan 2040, disrupting natural vistas and degrading the visual transition between the park and residential neighborhoods. The housing will be highly visible from many areas of the state part, the 780 freeway and act as a visually disruptive entrance to Vallejo from Benicia. AES-1

Conversion of the site to housing reduces local open space and could fragment habitat corridors between the study area and Benicia State Recreation Area, potentially reducing regional habitat connectivity over time. The MND asserts no substantial corridor impacts, but this finding depends on mitigations and off-site compensation that may not preserve local landscape function. BIO-4

Wetland and Habitat Degradation
The MND confirms the project will fill or disturb nearly half an acre of seasonal wetland and discharge stormwater into an existing marshland connected to the Carquinez Strait. The marshland contained in Southampton Bay is considered "endangered" and mitigation through off-site banking does not ensure local ecological replacement or sustained hydrological function. BIO-2

Permanent Loss of Seasonal Wetland (0.49 acre)
The project would permanently convert approximately 0.49 acre of seasonal wetland to a stormwater basin. Compensatory mitigation is proposed at a 1:1 ratio via mitigation banking or restoration. A 1:1 ratio is commonly considered minimal and may not fully replace lost wetland function and hydrology, especially when lost wetlands provide local connectivity to downstream marshes. BIO-2

Removal of Mature Trees and Canopy (69 trees; 47 protected)
The project proposes removal of 69 trees, including 47 'significant' trees protected under Vallejo's ordinance. Although replacement at a 3:1 ratio is required, replacement plantings do not compensate for the immediate and long-term ecological functions of mature trees (roosting, shading, erosion control, and habitat). Loss of trees increases risk to bat and raptor roosting and nesting resources. Tree replacement and habitat restoration may deliver benefits in future decades but the large-scale destruction of the existing landscape will leave an immediate and long-term ecological deficit. BIO-3

Impacts to Special-status Birds and Raptors (White-tailed kite; Northern harrier; Short-eared owl)
White-tailed kite were observed on-site during the brief study of the land. I can confirm they have been a regular presence in the 5 years we have lived here, we see them every year with a suspicion they have nested in trees surrounding the development site. According to the study provided, northern harriers and short-eared owls have moderate potential to nest. Construction, tree removal, and grading during nesting season could result in nest destruction or abandonment without strong protections. The MND relies on seasonal avoidance and pre-construction surveys (BIO-1a/BIO-1b) to reduce impacts. There is no guarantee of enforcement or monitoring during construction. While useful, these measures are procedural and do not fully remove the risk of disturbance or long-term habitat loss. I would seek the plan to implement strict timing and construction controls: prohibit tree removal and major grading during nesting and maternity seasons unless a qualified biologist clears specific trees; require phased removal with supervised hand-felling for trees with potential roosts. Additionally, requiring an independent peer review of the mitigation plan and a performance-based monitoring program with clear stop-work triggers if monitoring shows restoration failure. BIO-1

Bat Roosting and Maternity Colony Risk (Silver-haired and Hoary bats)
Large oak trees present on-site provide potential maternity/roosting habitat. The MND prescribes bat roost assessments and 100-foot no-work buffers if roosts are detected, plus phased tree removal. Nonetheless, direct loss of roost trees and the potential for undetected maternity colonies during removal remains a significant biological concern. BIO-1

Sedimentation, Hydrology, and Proximity Effects to Riparian and Freshwater Marsh Areas
Grading and construction adjacent to riparian and freshwater marsh features risks increased sedimentation and root damage. The MND proposes fencing, erosion control, and tree protection zones; however, proximity of heavy grading and stormwater changes could alter hydrology in ways not fully mitigated by standard BMPs. HYD-3

Require verification of slope stability measures and independent review of the final grading plan. GEO-1
Implement post-construction monitoring for erosion and sediment control performance. HYD-2
Establish a stormwater system maintenance plan to ensure long-term function of basins and drains.
Require construction oversight by a certified geotechnical engineer during grading and foundation work GEO-1

Insufficient Transit and Infrastructure Planning
The project will be 100% dependent on car-based access with limited street parking (only 24 spaces beyond garages and driveways for 51 homes) and the severely limited public transit service. The community has been advised SolTrans is considering cutting or reducing service in the area. Housing not supported by public transit access conflicts with Vallejo's sustainability and greenhouse gas reduction goals as noted in the city's general plan. TRA-6

Outdated and Overgeneralized Trip Generation Data
The analysis uses trip rates from the ITE Trip Generation Manual (11th Edition, 2021) based on pre-2010 data. While labeled 'conservative,' no local validation was done using Vallejo or Solano County data. Without this calibration, the 481-trip estimate may misrepresent real traffic conditions on Glen Cove Parkway. TRA-2

Lack of Comprehensive Intersection Study
Only one intersection (Glen Cove Parkway & Robles Way) was analyzed. No measurements were taken at the intersections the project will also rely on for access to the property including Robles Way & Shady Lane, Wildflower Ave and Silktree Lane. What are quiet residential streets will be exposed to years of heavy equipment during the construction phase, then the additional volume of traffic to support 51 additional households. There are days where Wildflower Ave, where I reside, sees only a dozen or so cars as a closed loop street. With the only access to Vista Cove coming from Shay Lane, construction traffic will be forced to use Wildflower and Skiltree, in addition to Shady Lave, as the width of Shady is only about 25' at the what will become the entrance to Vista Cove and this can't support two way traffic. The peace of our community would forever be altered and create risks for residents and pets. TRA-2

Road Surface Conditions
According to the City of Vallejo's "pavement condition dashboard" all streets within GC II are "Category V - Very Poor" with cracks, rutting and potholes. While Shady Lane had a slurry seal applied within the last 12 months, there is no other planned maintenance identified in Vallejo's general plan for the next decade. With the additional traffic demands during both the construction phase and the long term residential usage, the impact on the condition of our streets could be disastrous and render roads dangerous to all traffic. TRA-3

Incomplete Vehicle Miles Traveled (VMT) Analysis
The study disregards the State Technical Advisory's 110-trip threshold and instead applies Vallejo's outdated 500-trip standard. The site is on the city's fringe with limited transit, making the 'infill efficiency' claim questionable. TRA-1

Minimal Consideration of Pedestrian, Bicycle, and Transit Access
The report notes the lack of high-quality transit and omits quantitative pedestrian or bicycle safety evaluation. No transportation demand management (TDM) strategies are proposed to mitigate car dependency. TRA-6

Cumulative and Construction Impacts Ignored
No cumulative analysis with other Glen Cove or I-780 area developments is provided, including the recently approved 130 home development by KB Homes on Rollingwood Drive which will feed directly into the Glen Cove Parkway / 780 access points. Construction-phase traffic impacts were not modeled, potentially underestimating short-term safety and congestion issues. TRA-2

Construction Phase Risks and Disruption
The project involves diesel-powered equipment, fuel storage, and hazardous material handling (fuels, paints, solvents). Mitigation measures require emergency response plans and containment, but accidental spills remain a risk, particularly given the site's drainage connection to the Carquinez Strait. Local communities will also face the potential risk of localized air quality degradation during construction, especially for sensitive groups (children, elderly). Given the demographics of the existing Glen Cove Hills II, we have a strong representation of both populations. HYD-2

Expansive and Unstable Soils
The existing Sequoia clay loam soils exhibit moderate expansion potential, creating risk of differential settlement or heaving. Mitigation includes over-excavation, controlled compaction, and engineered fill. Therefore, there may be slope stability and landslide risk as portions of the site contain moderate to steep slopes. Planned grading includes cuts and fills up to 24 feet. Engineering controls such as retaining walls and slope stabilization are required where there could exist residual hazards with localized slope failure during intense rainfall or if construction controls fail. GEO-1

Hydrology and Drainage Alteration
New impervious surfaces alter runoff patterns. Proposed drainage basins and storm drains reduce off-site flooding risk. Residual hazard: if drainage systems fail or are not maintained, localized flooding and erosion could occur. HYD-4

Cultural and Tribal Resource Sensitivity
The MND acknowledges consultation with the Yocha Dehe Winton Nation and the likelihood of buried cultural materials. The project's hillside grading—up to 24 feet deep over 10 acres—presents a significant risk of disturbing cultural or ancestral sites. TCR-1

Precedent for Further Development
Rezoning to Planned Development (PD) allows 'coordinated development' across multiple parcels, potentially opening adjacent lands to future projects. The MND does not limit future development scope, setting a precedent for incremental loss of open space east toward Benicia State Park. CUM-1

Many measures rely on proper implementation, long-term monitoring, and enforcement by the City and agencies which we know are lacking in resources, budget and the levels of personnel necessary to perform any of this work. Therefore, the mitigation factors and resulting effectiveness is not guaranteed in the MND. BIO-1

The study properly identifies several sensitive resources and proposes mitigation; however, given the permanent nature of wetland loss and mature tree removal and the presence of nesting/roosting special-status species, the project presents residual, potentially significant ecological harms that warrant higher scrutiny and stronger, enforceable mitigation. The Planning Commission should consider requiring a focused EIR and stronger on-site avoidance before approving the project. BIO-2 BIO-3

The Vista Cove project would convert vital open hillside and wetland terrain into housing that provides no demonstrable public benefit other than market rate housing for those who can afford it while eliminating natural habitat, scenic views, and open space connectivity. The magnitude of ecological and visual impacts, and the project's reliance on outdated CEQA review create cause for concern. I would request the City reject the Mitigated Negative Declaration and require preparation of a full Environmental Impact Report (EIR) or make the choice to preserve the site as open space and integrate it into a regional habitat and recreation corridor adjacent to Benicia State Park while pursuing infill housing alternatives in the multitude of existing urbanized areas consistent with Vallejo's General Plan sustainability goals.

Thank you for allowing me to provide my concerns on this project.

Regards
Christine Gipson
116 Wildflower Ave, Vallejo

Subject: Vista Cove

Mr. Orozco,
I'm writing to you to voice my many concerns to the Vista Cove housing development. I am a resident of Glen Cove and have owned my house since 1986.
1. Robles Ave has no stop signs or speed bumps making it a speedway for drivers and a hazard to try & safely enter from Shady Lane. TRA-4
2. Visibility is limited from Shady Lane entering Robles; especially when vehicles are parked at the intersection. TRA-4
3. Shady Lane was not designed for an additional 100 car a day from the 51 new houses planned. TRA-5
4. There have been numerous studies done since the 1980's finding that building a structures would not be advised. GEO-1 GEO-2
5. With the building of 130 new houses on Rollingwood Ave. the traffic would increase in the areas and Safeway, the only supermarket in the area would already be overcrowded. TRA-5
6. With the Vallejo police department short staffed already, the safety of the Glen Cove area would suffer. I rarely see a police presence in Glen Cove & when they area called
It takes hours or days for them to show up. PS-1

Thank you for you time & consideration
Rick Zavatsky

SERIOUSLY??? Has there been a Traffic impact analysis (TIA) and mitigation planning with this mess? I can't imagine how these 100 or so more automobile trips roaring up little old peaceful Shady lane and then merging with Robles Way then another intersection with Honeydew then Peppercorn another at the shopping center and then congesting the Glen Cove Parkway traffic system will be good for anyone. Put the 50 homes somewhere else!!!! TRA-5

Hello,

This letter is to ensure that I am NOT supporting the Vista Cove addition.

I have been here for 44 years and have enjoyed a peaceful environment with nature and natural habitats. There has been low noise pollution and less traffic in this area. We need to keep this area as is. It will definitely affect all the animals and native plants in this area and take away from the Benicia state park. NOI-1 TRA-5 BIO-1

Congestion in our schools is not the answer. The issues will cascade and we as a community will suffer. PS-2

Again, I do NOT AGREE WITH THIS.

Thank you,
Sandra

Dear Mr. Orozco,

I'm a Glen Cove resident and I'm writing to express my concerns about the Vista Cove project. Our neighborhood is already very limited in terms of road access, and adding more homes will create more traffic and safety issues for families who walk, drive, and bike here every day. TRA-4

The area below Shady Lane and Silk Street is quiet, narrow, and not built to handle more cars or congestion. We already deal with speeding and cut-through traffic, and this would make it worse. TRA-5 The noise and extra activity would also change the character of a neighborhood that many of us chose because it borders open space and the State Park. NOI-1

I respectfully ask that the City reconsider moving this project forward and take into account the real day-to-day impacts it will have on the people who live here.

Thank you for your time and for including my comments in the record.

Sincerely,
Gina Blair
Glen Cove Resident

This Message Is From an External Sender
This message came from outside your organization.

Dear Mr. Orozco,

I'm writing as a longtime Glen Cove resident to share my concerns about the Vista Cove proposal. Our neighborhood simply isn't built to handle additional traffic or activity. With only one main road in and out, even a small increase in cars would make it harder and less safe for families to get around. TRA-4 TRA-5

The area near the State Park is quiet, natural open space that many of us walk, bike, and enjoy daily. Developing that land would bring noise, congestion, and permanent changes that don't match the character of this community. NOI-1 TRA-5 AES-1

I respectfully ask that the City take these issues seriously and reconsider moving this project forward.

Thank you for your time.

Sincerely,
Annette Hilts
Glen Cove Resident

Vista Cove: Development/Subsequent Mitigated Negative Declaration

(Inconvenient Truths)

A casual reader of the Vista Cove Subsequent Mitigated Negative Declaration (SMND) would walk away thinking that the proposed project (PP) was in the middle of an urban enclave, with nearby commercial and service buildings and easy access to public transportation.

In reality, the proposed project (PP) is to be located on a large open area bordering to the East on the Benicia State Recreation Area (BSRA) and to the west on the outer limits of a residential area where, apart from Shady Lane, streets are one block long (despite the grandiose name of Wildflower AVENUE). To the north the PP is bordered by State Highway 780, which separates the PP from all public services. From north to south, a wildlife corridor wanders until it reaches the Carquinez Strait. Public transportation is 0.6--1.0 miles away, up a rather steep incline. Having lived in Glen Cove for four decades, I can see clearly the many flaws in the PP.

One further general comment, the check-a-box system employed by SMNDs is flatly misleading and cannot be given much weight.

The following discusses four major areas of concern: Destruction of Wildlife, Detriment to Recreation /Benicia State Recreation Area, Uncontrollable Erosion/Degradation of Wetlands, Traffic Dangers. And Emergencies. Areas where MITIGATION IS NOT POIBLE.

Notes:

Words in red are quotations from SMND

Section numbers refer to the SMND report.

DISTRUCTION OF WILDLIFE

1.The PP will impact on the BIODIVERSITY of one of the remaining wildlife corridors in this area. It is visited by hare/rabbits, possums, lizards, snakes, wild turkeys, foxes, deer, coyotes, raccoons, skunks, owls, bats, ground squirrels, moles, migrating and nesting birds and more. Predators, like redtail hawks and turkey vultures, and small resident birds fly freely overhead. All depend on the biodiversity of this large open area to survive. Nowhere in the SMND is there a list of all affected wildlife. When this is complete and studied, it will be clear there is no possible mitigation. BIO-1

2. SMND/Section 4.44 acknowledges that "...these impacts could interfere with the local policies...protecting biological resources and is a potentially significant impact." These impacts do interfere with stated policies.

3.Those of us living in Glen Cove can attest to wildlife pathways which have been traced through open spaces where multiple species move to and from feeding areas, rest areas, nurseries, etc. These pathways will be interrupted. Parcel B, which is currently part of the wildlife corridor, will be cut off from the main corridor, isolating wildlife and/or forcing it on to unsafe corridors. BIO-4

4. The SMND itself recognizes that mitigation would be required "due in fact to a substantial reduction in habitat in the project area." That **substantial reduction** in habitat cannot be mitigated. BIO-1

5.The PP allocates only one acre, non-accessible to the public, for BIORETENTION, an insufficient space to mitigate harm that will be caused by the PP. HYD-2

6. Once again, the SMND suggests that the PP is WITHIN a much larger tract of housing development and acknowledges that ...wildlife moves freely on the periphery.' THIS IS MISLEADING. Remember that the PP is slated to be built on that very periphery of existing developments. If construction occurs on the periphery/wildlife corridor, causing irreversible damage, wildlife will no longer be able to move freely. BIO-4

7.The PP "could have a substantial adverse effect on special-status species, sensitive natural communities, protected wetlands, and native resident or migratory wildlife corridors and native wildlife nursery site." No mitigation can compensate for this adverse effect. BIO-1 BIO-2 BIO-4

8. Policy NBE-1-6 /SMND 4.4.1 states that the city of Vallejo, must "conserve and enhance natural open space areas in and adjacent to Vallejo". The PP does nothing to conserve or enhance natural open space. Policy NBE-1-2 requires assurance "that adverse impacts on sensitive biological resources...are avoided." This will not happen if the PP goes forward.
Policy NBE-5-6G6D/section 4.10.1 states as a goal to" Protect and enhance hillsides, waterways and aquatic and wildlife habitat." The PP completely opposes this policy. BIO-5

9. Section 4.21 advises that there will be degradation, causing wildlife to drop below self-sustaining levels. In other words, extinction. BIO-1

DETRIMENT TO RECREATION/BENICIA STATE RECREATION AREA (BSRA)

1. The PP is adjacent to the frequently visited BSRA, which is a peaceful natural preserve enjoyed by many people each day. Fifty-one additional dwellings, the anticipated traffic driving along the one access road overlooking the BSRA, increased nighttime lighting including bright security lights, will be an additional disruption to the nearby wildlife.

2. The SMND states that the BSRA is only 0.3 miles from the PP (*as the bird flies).* Access to the park, however, is only by driving from the PP up Shady Lane, Down Robles, to Glen Cove Parkway and onto Highway 780 to the park entrance where a fee paid. Hence the BSRA is not an easily accessible recreation area for the PP.

BIO-1

3. SECTION 4.16-3 enumerates "9.74 Acres of undisturbed open space and 355 acres of common open space including 2 bioretention areas, walkways, a loop walk and a vista overlook are part of the PP. THESE PRIVATE AMENITIES ARE ONL FOR RESIDENTS OF THE PROJECT AND NOT FOR PUBLIC ACCESS." **THIS IS NOT A GATED COMMUNITY.** This area is currently enjoyed by many hikers. The added amenities will attract more hikers, strollers, walkers and parkers.

PD-1

UNCONTROLLABLE EROSION/DEGRADATION OF WETLANDS

1." The current site consists entirely of pervious surface area. This pervious space will be reduced by nearly 20%." With reduced pervious surface area, damage from PP runoff can occur.

2. The PP will introduce a significant measure of impermeable surfaces, causing more than today's normal runoff from the existing open space. As mitigation, the SNMD suggests that homeowners will be requested to limit their choices of hardscaping. A "suggestion" is hardly mitigation. Many lawns in nearby neighborhoods are being paved over with concrete despite HOA restrictions, and this trend continues unchecked.

HYD-2

3. Potential slope erosion, exacerbated by rising sea levels and heavy rains, could have disastrous effects on the BSRA

HYD-3

4. 'Expected pollutants...include pathogens, nutrients, pesticides/herbicides, sediment...trash and debris, oil and grease." All of these will eventually find their way into the wetlands east of the PP, harming plants, wildlife and the functioning of the wetlands themselves. The runoff cannot be mitigated.

HYD-2

5." Because of the proximity of the riparian and freshwater marsh land...the PP could result in increased sedimentation to the freshwater marsh or damage to trees ...due to construction." No true mitigation is possible.

HYD-3

TRAFFIC DANGERS

1. Glen Cove Hills (immediately to the west of the PP) is a quiet neighborhood, with most streets having limited traffic, and many having no more than 5-6 houses per street. The residents of these new houses, using the planned one full access street will cause traffic congestion, particularly at commute/school hours. THERE IS NO WAY TO ADD AN ADDITIONAL OPENING TO THE PROJECT, AN ACTUAL AND WORKABLE MITIGATION — TRA-5

2. NO public transportation is readily available despite the oft-repeated assurance to the contrary in the SBMD where it is said that "public transportation would reduce the use of private vehicles." The only feasible mitigation would be to extend the bus route into the PP, but, even then, most residents would choose to drive their own vehicles. — TRA-6

3. The traffic pattern for the PP is a disaster waiting to happen. First, all vehicles (cars, emergency vehicles, fire engines, service vehicles, delivery vans, etc.) must enter the PP at the intersection of Shady Lane and Wildflower Avenue, a quiet residential corner. Next, all exiting vehicles must come to a complete stop at that intersection. Then these same vehicles must accelerate promptly to ascend the steep incline on Shady Lane. The projected high volume of traffic, particularly at commute hours, may cause congestion and hinder smooth exits. Any interruption in traffic would bring the whole system to a standstill. Furthermore, in any emergency, local traffic may have to come to a standstill, waiting for emergency vehicles to clear the intersection. In a worst-case scenario, the intersection may be totally blocked, trapping residents as there is **no** alternative exit. — TRA-5, TRA-4

4. PP housing is located on "alley ways" exiting to a single through street (the proposed extension of Shady Lane). In the event of an emergency, emergency vehicles may be unable to access the PP. Furthermore, alley ways and "private streets" provide limited direct access and/or space to maneuver emergency vehicles. — HAZ-1, TRA-4

5. A single blockage of Shady Lane could thus prohibit residents from escaping and emergency vehicles from entering. Nowhere in the SBMD is there an adequate response to this problem of evacuation/emergency. Safe evacuation may not be feasible.

6. A community mailbox with a single designated parking space for 51residences further exacerbates the parking problem. This could be mitigated by community mailboxes at the corner of each alley way. — NON-1

EMERGENCIES/DISASTERS

1.Major emergencies such as wildfires and earthquakes could cut off the PP from all assistance, virtually trapping the residents. Hiking out may be the only escape. — HAZ-1

2.With no alternative entrance, emergency vehicles could be delayed in their response particularly during times of heavy traffic — HAZ-1, TRA-4

3.Alley ways and "private streets" may not be able to accommodate multiple fire engines andallow maneuverability.

4.When faced with thee question "would the project result in inadequate emergency access?", SMND's response was "less than significant impact." This cannot be accepted. It is hard to imagine a more thoughtless /inaccurate answer. Policy MTC-2.3 in Section4.20.1 states: ensure adequate emergency vehicle access. Section 4.20.3 restated that the impact was less than significant. Has the fire department signed off on the PP? TRA-4

5.It *is* true that there is a fire department in Glen Cove. Unfortunately, it will be useless if access at the one entrance to the PP is compromised.

FOR THE ABOVE REASONS (AND PERHAPS MANY MORE)

We urge that this project not proceed.

Carol McKenzie, Glen Cove Resident

Re: Vista Cove Project

Comment Letter I-10

To: Cesar Orozco, Planning Manager

CC: Andrea.Source@cityofvallejo.net, Tonia.Lediju@cityofvallejo,net

December 8, 2025

I am writing this letter in express my concerns about the Vallejo, “Vista Cove” Project.

I am a retired senior and the owner of the home at 488 Robles Way. I have been a resident of the Glen Cove neighborhood in Vallejo for over 30 years.

I am frustrated that we are again addressing a proposed project for the property at the bottom of Shady Lane which as you may not know is a fairly steep street.

This is the third or fourth time that an idea has been proposed to build on this land. Each time, we the people who live in this neighborhood, have come together to sign petitions, raise objections and make it known that this area should remain open and unspoiled by housing.

Since we are currently talking about a “Vista Cove Project”, I take it that the other proposals must have failed, so why are we again, talking about building in this location?

My number one concern that I have with this project is that the “basic description of the property” in the Project **omits** that it is adjacent to and next to the Benicia State Park and Recreation Area therefore misleading anyone making a decision on this project and the Appendix findings.

Even in your Public Hearing Notice lists the “Project Location & APS(s)” incorrectly by omitting that it is next to the Benicia State Park and Recreation Area.

This project would have a significant impact not only on the State Park but on my area of Glen Cove.

BIO-1

If built Vista Cove would spoil the appearance of a natural, wild, setting that we all treasure and enjoy with having the Benicia State Park located in such close contact to busy cities. This is one of selling points for being in Glen Cove.

What ever happened to the plan to only have houses on the ridgeline around the Park? This I understand was the **ORIGINAL** plan for this area as it impacts the State Park.

Another basic argument I have against the Project is that there is **no** shortage of housing in the area. There is currently a large development underway and being populated with new homes just off Columbus Parkway and there is another project of houses planned for the Rollingwood Street location.

The homes planned for Vista Cove are not small and affordable housing. With planned footage of 2,494 to 2,674 square feet and two story structures these homes for large, wealthy families with numerous cars as well as other types of vehicles that will have a large impact on the amount of additional traffic in our small area.

TRA-5

And as for traffic, the only way out of the area is by going up Shady Lane, turning right onto Robles Way, driving past the only driveway entrance to the Safeway shopping center, continuing down the

street to Glen Cove Parkway and then turning right to access the freeway or left to access other streets. HAZ-1

This one way in and one way out is also a big safety hazard. Consider if a fire should break out and people get trapped down on their "private street". Perhaps fire trucks or ambulances will be unable to respond. Only one way in and one way out is very risky. TRA-4

And do they plan to make this a "gated" community and or have private streets?

The 25 mile an hour speed limit doesn't work well in our area. The neighborhood has already asked for speed bumps to try to slow traffic down on Robles Way. The intersection at Robles Way and Glen Cove Parkway is hazardous as too many impatient drivers on the Parkway, run the red light. TRA-8

This traffic configuration will also have a large impact during construction. This again will be the ONLY access to Vista Cove, which means heavy equipment will have to travel this route as well. Currently at various times of the day and week, traffic is backed up all the way to the bridge trying to turn left onto Robles Way. The Appendix doesn't seem to support this but I see this all the time. TRA-5

Also of concern, I don't see any information in the Appendixes that the Benicia State Park and Recreation people or that the City of Benicia has had any contact either. BIO-1

I also don't see any mention of the power towers that run through the Park area and are close to this property.

Other comments specific to the data presented;

Appendix A - CALLEEMOD Outputs – Page 66, "58,700 cubic yards of soil would be cut and 59,300 cubic yards would be used for fill, resulting in a total soil import of 600 cubic yards." This will generate a lot of dirt and dust frying into the air. I am very concerned about the impact on my asthma and the quality of life we can expect during construction.

Appendix B HRA – Data used is from **2013 – 2017**. **Out of date data**. Again I am concerned about the about of dust and dirt this project will generate. I am retired and I am home a large percentage of the time. This noise, traffic and dust will have a substantial impact on my quality of life. AIR-2

Appendix C - Biological Resources has flaws in it. There were only two days of study listed and they were **February 28 and July 14 of 2022**. **The data is not current.** 2022 was a VERY dry year. I have a weather station and I recorded only .11 inches of rainfall in all of February and 0 in July. BIO-1

Appendix C also omits that the property adjoins our State Park. But in many ways the findings within appendix C support my argument that this is a wildlife area and should not be disturbed.

There are many animals living, feeding, breeding and seasonally visiting this area and the park. This project will cause a loss of habitat.

I didn't see any reference in the study to our deer, raccoon, possum, skunk, coyote, geese, eagles or wild turkey population.

Appendix D – Cultural - Omits any mention that property is next to a State Park and there is no contact with any Indigenous Indian tribes listed. TCR-2

Appendix E – Geotechnical Investigation - Page 14, Item 11.0 states that "the professional opinions" are valid for a period of no more than **2 years** from the date of the report". The Date of the Report is **September 12, 2022**. **The report is out of date.** Page 15, Paragraph 2 has a disclaimer of what has not been cover which includes flood potential as well as other issues. GEO-2

Appendix F Environmental – Is dated **April 26, 2022** and is only a **DRAFT**. Table 2.4-1 Records reviewed. 1 out of 5 contacted provided useable feedback. HAZ-2

From what I read and see some of this grading, land rearranging leveling and vegetation removal will have to be done on property owned by residents of Wildflower. Has this been approved? GEO-2

Appendix G – Drainage - This appendix also omits the fact that Benicia State Park and Recreation Area adjoins the location. Report is from **May3**, **2023 and November 17, 2023** which makes it old information and it is **NOT** signed. It reports that the property is elevated between 75 and 155 feet. HYD-1

Shouldn't there be some concern for Global warming and the increase we are seeing in tides in the area? Are requirements still met for the Regional Water Quality Board? HYD-4

There also is no mention of the Vallejo Flood and Wastewater Unit located at 198 Wildflower. What do they plan to do with it?

There is also a creek that runs along Columbus Parkway and down into the Park. It floods Benicia Road almost yearly. HYD-4

Appendix H – Noise Impact - Sound walls will be built in various locations in the development mainly areas closest to the highway. So they know there are issues already with noise from the highway which traffic patterns have changed dramatically over the past year with added housing. NOI-1

Appendix I – Transportation Analysis – The report is dated **9/16/2024** and omits the existence of a State Park. It projects 481 new daily vehicle trips. All of these trips will be accessing the one way in and one way out route using the above described above route up the steep Shady Lane and down Robles Way. TRA-2

It also states that it was based on a Trip Generation Manual for 2021.

My comments on the Appendixes are solely based on my understanding in reading what was available at the designated website

This Project appears to be supported by a lot of misinformation and incomplete studies.

I invite you to come visit the site if you haven't already, so you can more thoroughly understand what my neighbors and myself are so concerned about and why this location and adjoining properties should remain undeveloped.

I feel for the nine people who hope to make a profit with this project but this project will impact a lot more than just 9 people.

Please reconsider this project. It is a bad idea and will always be a bad idea to think about building on this location. It should remain open and better yet, it should be part of the Park. And if this isn't an option right now, at least "REZONE" it and keep it open space.

Thank you for reading my concerns,

Linda Zupan-McKenna
488 Robles Way, Vallejo, CA 94591

Dear Mr. Orozco,

After reviewing the proposal for Vista Cove I decided to voice my families opposition to the development. We moved to Glen Cove becuase of its proximity to Benicia State Park and that it was removed from Vallejo proper. I have seen that hillside many times on my walks and cannot imagine putting a housing development there. That hill will not be easy to grade and the potential for earth movement is possible. I also feel like the amount of housing in such a small space feels forced not to mention the traffic it will add to our neighborhood. GEO-1 TRA-5

We don't want this built.

Regards, Sabrina Cardoso and David Ingalls

Hi Cesar,

Thank you very much for this information. The Tribe has some comments on the draft mitigation measures.

Measure TCR-1 is described as "Protocol for the Discovery of Native American Cultural Items" but then specifically describes human remains. The Tribe respectfully recommends that there be two separate mitigation measures, one for cultural items and one for human remains.

The Tribe's recommended language is as follows:

TCR-1 Inadvertent discovery of Tribal Cultural Resources: If cultural resources of Native American origin are identified during grading or excavation of the proposed project, all ground disturbing activities within 100 feet shall cease until a representative from the Confederated Villages of Lisjan Nation is consulted by the government agency. If the entity in consultation with the consulting Tribe(s), determines that the resource is a Tribal Cultural Resource and thus significant under CEQA, the entity shall retain a Tribal representative and, if applicable, a qualified archaeologist, at the applicant's expense, to prepare a mitigation plan, which shall be implemented in consultation with the consulting Tribe. The mitigation plan shall include avoidance of the resource or, if avoidance of the resource is not feasible, the plan shall outline appropriate treatment of the resource in coordination with the consulting Tribe. Examples of appropriate mitigation for Tribal Cultural Resources include, but are not limited to, protecting the cultural character and integrity of the resources, protecting traditional use of the resources, protecting the confidentiality of the resources, or heritage recovery.

TCR-2 Inadvertent discovery of human remains: If human remains are encountered during construction and ground disturbing activities, all work within 100 feet of the remains should be redirected and the County Coroner notified immediately. At the same time, an archeologist shall be contacted to assess the situation. If the human remains are of Native American origin, the Coroner must notify the Native American Heritage Commission (NAHC) within 24 hours of this identification. The NAHC will identify a Native American Most Likely Descendent (MLD) to inspect the site and provide recommendations for the proper treatment of the remains and any associated funerary objects. There shall be no pictures taken or testing done on the Native American human remains. All bone, until identified as not human, shall be treated as potential human remains and the appropriate protocols followed. The archaeologist shall record information, as appropriate and in accordance with the recommendations of the MLD and/or Tribal representative. Upon completion of the archeologist's assessment, a report should be prepared documenting methods and results, as well as the MLD's recommendations regarding the treatment of the human remains and any associated funerary objects. The report should be submitted to the lead government agency, the NWIC and the consulting Tribe. Tribal representatives will rebury the Native American human remains and associated funerary objects with the appropriate dignity either; in accordance with the recommendations of the MLD if available or in the project vicinity at a location agreed upon between the Tribe and the entity, where the reburial would be accessible to Tribal members in perpetuity and would not be subject to further disturbance. The discovery and reburial is to be kept confidential and secure to prevent any further disturbance.

TCR-1

The Tribe is not comfortable with including specific information concerning excavation of human remains at this time. As described above, the Tribe does not permit photography of human remains, even if the photographs are not published. The Tribe is also not comfortable with the mention of curation currently in the mitigation measures.

Please let us know if the City has any questions about the Tribe's proposed mitigation measures.

'Uni (Respectfully),

Lucy Beyhan, Cultural Resource Manager II
Confederated Villages of Lisjan Nation

Dear Cesar Orozco,

Thank you for your letter dated November 12, 2025, regarding the proposed project. Wilton Rancheria ("Tribe") is a federally recognized Tribe as listed in the Federal Register, Vol. 74, No. 132, p. 33468-33469, as "Wilton Rancheria of Wilton, California". The Tribe's Service Delivery Area ("SDA") as listed in the Federal Register, Vol. 78, No. 176, p. 55731, is Sacramento County. The Tribe's Trust Lands are in Sacramento County however, the Tribe's ancestral territory spans from Sacramento County to portions of the surrounding Counties.

TCR-2

Although your project is within the ancestral territory of the Wilton Rancheria, we do not have any comments and do not wish to open consultation at this time. We appreciate your continued outreach and/ or consultation for future projects and respectfully request that you contact us if there are any project updates or changes.

Thank you,

Wilton Rancheria

RE: Vista Cove Planned Development Project YD-09042024-03

Dear Mr. Orozco:

Thank you for the project notification regarding cultural information on or near the proposed Vista Cove Planned Development Project. We appreciate your effort to contact us and wish to respond.

The Cultural Resources Department has reviewed the project and concluded that it is within the aboriginal territories of the Yocha Dehe Wintun Nation. Therefore, we have a cultural interest and authority in the proposed project area and would like to initiate a formal consultation with the lead agency. At the time of consultation, please provide our Cultural Resources Department with a project timeline, detailed project information and the latest cultural study for the proposed project. TCR-1

To coordinate a date and time for the consultation meeting, please contact:

CRD Administrative Staff
Yocha Dehe Wintun Nation
Office: (530) 796-3400
Email: THPO@yochadehe.gov

Please refer to identification number YD–09042024-03 in any correspondence concerning this project.

Thank you for providing us the opportunity to comment.

Sincerely,

Signed by:

CLINT@CASSAFETYCONSULTING.COM

ROB GIORDANO
ROB@CASSAFETYCONSULTING.COM

1) Introduction & Qualifications

CAS Safety Consulting[1] is an independent public safety firm with extensive experience in wildfire evacuation planning, emergency response coordination, and Alert and Warning Notification practices. Serving as Sheriff and Assistant Sheriff of Sonoma County we had leadership roles during the 2017 Sonoma Complex Fires, one of the most destructive wildfire events in state history. These fires let us see first-hand the importance of evacuation preparedness and planning.

CAS Safety Consulting has developed evacuation assessments and wildfire mitigation plans for numerous projects across California, including residential, hospitality, and commercial/large-scale projects in fire prone areas. We also served as subject matter experts for post-incident After Action Reviews (AARs) on the 2025 Palisades and Eaton Fires assessing alert and warning performance, agency coordination, and public response during mass evacuations.

We were hired by the developer (Sancerra) of the Vista Cove project to provide a law-enforcement operations perspective on evacuation readiness for the proposed project. This is an operations-based opinion. It was not a requirement for the developer, not for CEQA purposes, and does not include traffic modeling or clearance-time estimates.

Our mission is not to advocate for or against any specific development, but to ensure that if a project does proceed, it does so with the highest regard to evacuation safety.

2) Project and Community Description

The project site[2] is at Shady Lane and Wildflower Avenue in the Glen Cove neighborhood of Vallejo, California. The property boundary comprises 20.13 acres zoned for residential land uses. This defined residential medium density zoning location allows for development of 500+ homes, but the proposed project is for the minimum allowed of 51 single-family homes. The site is bordered to the west by a 141-unit single-family residential subdivision within a mix of rolling hills and flat areas. The community's main thoroughfare, Glen Cove Parkway, is a four-lane divided corridor that traverses north/south bound, and the site is approximately 0.7 miles to I-780 access.

ROB GIORDANO
ROB@CASSAFETYCONSULTING.COM

The proposed plan calls for a total maximum parking of 228 vehicles. There is no gate at the entrance to the development. The project will be designed and built to comply with all applicable fire and life safety codes and prevailing standards.

This is the proposed site plan with the Primary and Alternate evacuations routes identified in red:

The site lies within evacuation zone VLJ-1236 and is proximate to Vallejo Fire Station 26 and the California Highway Patrol (CHP) - local area office.

3) Evacuation Hazard Assessment

Analyzing the hazard context for the area, CAL FIRE's FRAP[3] shows no on-site wildfire history. Current Solano/City mapping[4] places the location outside mapped wildfire hazard severity zones (non-WUI) and outside the tsunami hazard area. Based on publicly available mapping and regional climate conditions (hurricanes, etc.), the likelihood of a mass evacuation triggered by natural hazards is low at this location. That said, earthquakes, HAZMAT, large structure fires, or other all-hazards events can still require evacuations. However, such actions would likely be smaller in scale and incident specific.

4) Alert & Warning Readiness

Solano County OES operates Alert Solano[5] for countywide mass notification, coordinates WEA/IPAWS for time-critical, zone-based warnings and orders, and maintains official evacuation zones (e.g., VLJ-1236) on Know Your Zone / Genasys Protect so messages, maps, and checkpoints use the same identifiers. This framework supports phased, geographically targeted notifications and integrates cleanly with ICS field operations (TCPs, staging, responder ingress). Based on these capabilities, Solano County's Alert & Warning system appears well positioned to support alerting and evacuations for the Glen Cove area. Law enforcement employs hi-lo sirens as an audible evacuation notification redundancy.

5) Evacuation Assessment and Operations Viewpoint

CAS Safety's observations are informed by our drive-through inspection of the primary and alternate evacuation routes, and street-view imagery. The Glen Cove Center (northwest corner at the parkway) is a practical location for short-term staging of evacuation routes and a Traffic Control Point (TCP). Any use of lane reallocation or ramp controls remains incident-dependent and at the discretion of Vallejo PD/FD with CHP/Caltrans coordination; this report does not assume contraflow as a baseline tactic.

ROB@CASSAFETYCONSULTING.COM

Primary Evacuation Route:

From an operations viewpoint, the primary evacuation route runs from project entrance to Shady Lane; to Robles Way; to Glen Cove Parkway; to I-780 (approx. 0.7 miles total). This route is viable because:

1) the initial approximately 0.15-mile segment has no driveways and posted No Parking on the north side, so vehicles can enter the route with little traffic conflict.
2) mid-segments provide adequate width for two-way egress/ingress and fire apparatus.
3) Robles Way widens with a center turn lane approaching Glen Cove Parkway, allowing control of outbound flow, and temporary lane reallocation if needed.
4) movements are all right turns, which reduce crossing conflicts and avoid left-turn delays.

Alternate Evacuation Route

The alternate path (approximately 1.3 miles from the project entrance to the I-780 ramps) provides secondary egress/ingress if the primary route is compromised. It is less favorable due to additional turns across traffic and more residential side friction but remains a viable contingency.

As with any mass evacuation, some traffic congestion is inevitable during large evacuations and is anticipated and managed in planning. Police and fire typically conduct zone-based, phased evacuations, timing phases to the location and behavior of the threat. In rapidly evolving incidents, decisions are coordinated and executed under Unified Command (ICS) to align alerts, TCPs, and responder ingress. A significant event would also trigger mutual-aid through the County's EOC, bringing additional personnel to staff TCPs, conduct door-to-door notifications, and improve outbound flow.

6) Best Practices for Residents

Effective evacuations depend on residents who know their zone, understand how orders are issued, and are ready to act. CAS Safety proposes the developer, through the HOA, provide a Resident Orientation handout at move-in and refresh it annually. It should be concise (one page), all-hazards focused, and include:

- **Emergency contacts:** local police/fire, Alert Solano info line, property management/HOA.
- **Evacuation Zone:** VLJ-1236 reference and link/QR to Know Your Zone / Genasys Protect.

CLINT SHUBEL
CLINT@CASSAFETYCONSULTING.COM

ROB GIORDANO
ROB@CASSAFETYCONSULTING.COM

- **Alerts:** Alert Solano sign-up instructions and a brief WEA/IPAWS explainer (how wireless alerts appear and what "Warning" vs. "Order" means).
- **Routes:** Two outbound options to I-780 with a simple map (Route 1 as primary).
- **Redundant awareness:** Recommend a NOAA Weather Radio (tone-alert) and the Watch Duty app for situational awareness.
- **Preparedness resources:** Links to Ready.gov and CAL FIRE guidance (go-kit, defensible space, pets/meds checklist).
- **Early action guidance:** Encouraging early, voluntary departure if residents feel unsafe or need extra time (AFN[6], small children, pets).
- **Construction phase.** Provide the same orientation sheet to the General Contractor and require on-site subscription to Alert Solano. Keep public lanes open with 24/7 emergency access, and post a single emergency coordination POC at the job trailer.

7) Opinions & Conclusions

This is an operations-focused opinion based on public hazard mapping, site plans, personally driving primary and alternate routes, and law-enforcement/ICS experience. It does not quantify traffic capacity or evacuation clearance times. Any evacuation tactics during an evacuation, including TCP placement, lane use, ramp controls, etc. are incident-dependent and determined by responding agencies under Unified Command.

In this setting, the project does not present a substantial evacuation concern and is compatible for evacuation operations for the surrounding community, based on:

[6] In emergency planning, it refers to people who may need extra assistance to receive, understand, or act on warnings or to evacuate. This includes people with disabilities (mobility, sensory, cognitive), older adults, children, transportation-disadvantaged individuals, people who rely on electricity-dependent medical devices (oxygen, ventilators), those who are pregnant, and anyone with temporary injuries.

(707) 806-7628

CLINT SHUBEL
CLINT@CASSAFETYCONSULTING.COM

ROB GIORDANO
ROB@CASSAFETYCONSULTING.COM

- **Low likelihood of mass evacuation from natural hazards.** The site is outside mapped WUI fire-hazard areas, outside the tsunami hazard area, there is no wildfire history, and this area is not subject to other natural events that commonly trigger mass evacuations (e.g., hurricanes, etc.).

- **Two viable evacuation routes (primary and alternate).** The project sits near the front of the neighborhood outflow with a short, direct connection, to I-780. The primary route has a very low traffic conflict (no driveways and posted No Parking on the first segment), adequate width for two-way egress/ingress and fire apparatus, and a widened approach to Glen Cove Pkwy that supports outbound traffic flow. The alternate route is less favorable but remains a viable contingency if the primary route is compromised.

- **Alert & Warning Systems are in place.** Public notification of a disaster is paramount in evacuations. Solano County is well equipped with systems such as Alert Solano (with WEA/IPAWS) which supports phased, geo-targeted alerts. The County coordinates notifications for the City of Vallejo. Law enforcement employs hi-lo sirens as an audible redundancy.

- **Pre-determined evacuation zones.** The County's Emergency Operations Plan (including Evacuation Annex procedures) provides an established framework for zone-based operations.

- **Vehicle demand is operationally manageable.** The corridor is well suited for TCPs and short-term staging to manage outbound flow while preserving responder ingress when conditions allow.

- **Proximity of public-safety resources.** Vallejo Fire Department Station 26 (1335 Fulton Avenue) and CHP local area office (1551 Benecia Road) are nearby for coordination and support.

- **Scaled project = lower operational demand.** The current 51-unit proposal is substantially reduced and operationally favorable from an evacuation-management standpoint.

- **Mutual-aid depth.** Significant incidents can draw county/state mutual aid (and CHP/Caltrans for I-780) to staff TCPs, staging, and perimeters independent of day-to-day staffing levels.

ROB GIORDANO
ROB@CASSAFETYCONSULTING.COM

For the reasons above, and assuming resident preparedness and standard agency practice, it is our professional opinion that the project does not materially degrade evacuation operations and poses no substantial impediment to emergency egress/ingress.

If subsequent studies, approvals, or operational directives emerge, CAS Safety should be notified so we can review and supplement these findings as appropriate.

Resident Evacuation Orientation - Vista Cove (Zone VLJ-1236)

Your Address: _____

1) Sign up for Alerts - do these now: (Scan QR code with smartphone camera or use the links below.)

- **Enroll in Alert Solano** (county/Vallejo notifications). Keep your phone and address current. https://www.solanocounty.gov/government/office-emergency-services/alert-solano

- **Know your zone.** You are in Evacuation Zone VLJ-1236. Check live status on Genasys Protect / Know Your Zone before and during incidents. https://www.solanocounty.gov/government/office-emergency-services/prepare-emergency/evacuation-zones

2) Know your evacuation routes: (Maps Attached)

- **Primary (Route 1):** Exit → Shady Lane → Right on Robles Way → Right on Glen Cove Pkwy → I-780.
- **Alternate (Route 2):** Optional route if necessary: Exit → Left on Wildflower Avenue → Skilltree Lane → Left on Bluebell Place → Right on Redbud Lane → Left on Robles Drive → Right on Fairhaven Way → Left on Honeydew Drive → Right on Wellfleet Drive → Right on Glen Cove Pkwy → I-780.

3) Understand what to do:

- **Follow the alert message:** ***Warning*** = prepare to leave and ***Order*** = leave now.
- **Go early** if you need extra time (kids, pets, medical, etc.).
- **Travel light:** people, pets, meds, documents. Don't stop near intersections or block driveways.
- **Expect traffic:** obey officers and signage. Don't block lanes.

4) Be ready:

- Keep one vehicle fueled/charged during fire weather.
- Maintain a "go bag" (include pet supplies and copies of key documents).
- Keep the open-space edge lean/green; secure outdoor combustibles on red-flag days.
- **Redundant awareness:** install the Watch Duty app on smartphone and consider a NOAA Weather Radio for tone alerts and instructions if cell service is degraded.

5) Special Notes/Resources:

- **Hi-Lo siren** = evacuation notification. Look for zone messages and officer direction.
- **Check on your neighbors:** People might need help evacuating (elderly, medical etc.) or are not aware of alerts.
- **Vallejo Emergency Services (Police/Fire):** www.Vallejo.gov
- **www.Ready.gov:** Make a plan! Go the website for more information.

This handout is informational and does not replace official instructions. Always follow directives from police, fire, and Solano County OES.

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Smith:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Property), located in Vallejo, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Property.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 and the American Society for Testing and Materials (ASTM) Practice E1527-13. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-13.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

Jenna Keith, EIT

EXECUTIVE SUMMARY

ENGEO conducted a phase I environmental site assessment for the property located at Wildflower Avenue in Vallejo, California (Property). The Property is approximately 29 acres in area and is identified by Assessor's Parcel Numbers (APNs) 0079-171-170, 0079-120-100, and a portion of 0079-220-070.

The Property is presently vegetated open space. Review of historical records indicates that the Property has remained undeveloped land since at least 1937 (the first year of aerial photographic coverage). The eastern portion of the Property was historically used for dry farming (hay cultivation).

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps, and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs), no historical RECs, and no controlled RECs were identified for the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gaps were identified during this assessment.

- We did not receive a response to our file review request from Solano County Environmental Health prior to the publication of this report.

- We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

These data gaps do not affect the conclusions as to the presence or lack of presence of RECs at the Property.

This assessment has revealed no evidence of RECs in connection with the Property, and the property is suitable for residential development. ENGEO recommends no further environmental studies at this time.

1.0 INTRODUCTION

1.1 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT

This assessment was performed at the request of Sancerra for the purpose of environmental due diligence during property acquisition. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Property. As defined in the ASTM Standard Practice E1527-13, an REC is "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment."

1.2 DETAILED SCOPE OF SERVICES

The scope of services performed included the following.

- A review of publicly available and practicably reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practicably reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of the Property to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Interviews with owners/occupants and public sector officials.
- Preparation of this report with our findings, opinions, and conclusions.

1.3 SITE LOCATION AND DESCRIPTION

The Property is located at Wildflower Avenue in Vallejo, California (Figures 1 and 2). The approximately 29-acre Property is identified as APNs 0079-171-170, 0079-120-100, and a portion of 0079-220-070 (Figure 3) and is currently vacant, vegetated open space.

1.4 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES

The Property is vacant, but the vegetation has been plowed to create several dirt paths through the Property. The Property is bordered by the Benicia State Recreation Area to the east, Interstate 780 to the north, and the Glen Cove neighborhood homes to the west and south.

1.5 SITE AND VICINITY CHARACTERISTICS

The Property consists of a northern and southern hill separated by a creek, which both slope downhill toward the east. According to published topographic maps, the elevation of the northern area of the Property ranges from approximately 160 feet above mean sea level (msl) in the west to 100 feet in the east. The elevation of the southern area ranges from approximately 290 feet in the west to approximately 90 feet above msl to the east. Review of the Geologic Map and Map Database of Northeastern San Francisco Bay Region, California – Most of Solano County and

Parts of Napa, Main, Contra Costa, San Joaquin, Sacramento, Yolo, and Sonoma Counties (Graymer et al., 2002) found that the Property is underlain by the Great Valley Complex, consisting of sandstone and shale from the Late Cretaceous period.

Geocheck – Physical Setting Source Summary of the Environmental Data Resources, Inc. (EDR) report (Appendix A) indicated no Federal United States Geological Survey (USGS) and three State wells are located approximately ½ mile west-northwest of the Property. No groundwater level measurements are reported for these wells. We also reviewed the Department of Water Resources On-line Water Data Library for depth to water in the vicinity of the Property. However, the website did not identify any wells within 1 mile of the Property.

We reviewed EnviroStor, a website maintained by the State of California Department of Toxic Substances Control (DTSC), and GeoTracker, a website maintained by the State of California Water Resources Control Board, for nearby facilities with records that include depth-to-groundwater measurements. The following information was obtained regarding local groundwater conditions. The case closure summary report for the Big 4 Rents facility, located approximately 750 feet east-northeast of the Property, indicates that groundwater may be found at a depth of 15 to 25 feet below the ground surface (bgs) with a flow direction toward the southwest, toward the marshland in Benicia State Recreation Area. Based on the local topographic gradient, we expect an easterly groundwater flow direction at the Property, similarly directed toward the marshland.

The site-specific depth to groundwater and direction of groundwater flow was not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation, and other factors.

We reviewed the Department of Conservation, Geologic Energy Management (CalGEM), formerly the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR), website and map database to determine if any historic oil and/or gas wells were located within the Property. No wells were mapped within 1 mile of the Property.

2.0 RECORDS REVIEW

2.1 PROPERTY RECORDS

2.1.1 Title Report/Ownership

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources.

A Preliminary Title Report for the Property, prepared by First American Title Company and dated February 4, 2022, was provided for our review. The Property title is vested in The Timothy F. Wei Trust; The Terrence F. Wei Trust; The Tammy F. Dong Trust; The Tina T. Dong Trust; The Litton L. Chen Trust; The Tiffany L. Chen Trust; The Thomas L. Chen Trust; The Tyler C. Chuang Trust; and The Troy Chuang Trust. No references to environmental liens, deed restrictions, or other potential environmental issues were noted. This report is included in Appendix B.

2.2 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to develop a history of the previous uses or occupancies of the Property and surrounding area in order to identify those uses or occupancies that are likely to have led to RECs on the Property.

2.2.1 Historical Topographic Maps/Aerial Photographs/Sanborn Maps

Historical USGS topographic maps and aerial photographs were reviewed to determine if discernible changes pertaining to the Property had been recorded. EDR provided the following maps and photographs, presented in Appendices C and D. No Sanborn Fire Insurance Maps were identified for the Property; a copy of the Sanborn Map search report is presented in Appendix E.

TABLE 2.2.1-1: Historical Review Summary

HISTORIC MAP/PHOTOGRAPH	YEARS
Topographic Maps	1896, 1898, 1901, 1902, 1940, 1942, 1947, 1950, 1952, 1959, 1968, 1973, 1980, 2012, 2015, 2018
Aerial Photographs	1937, 1939, 1947, 1952, 1958, 1968, 1974, 1982, 1987, 1993, 2006, 2009, 2012, 2016
Sanborn Maps	N/A

In the 1896 topographic map, the Property is vacant, undeveloped land. Benicia Road is depicted north of the Property. Southampton Bay and Glen Cove are depicted south of the Property, and marshes and a creek extending into Southampton Bay are depicted just east of the Property. In the 1937 and 1939 aerial photographs, the southeastern portion of the Property appears to be used for dry farming (hay cultivation). In the 1940 topographic map, two creeks are depicted traveling eastward through the center of the Property. By 1950, only one creek was depicted. Between 1959 and 1968, the alignment of Benicia Road was adjusted and Interstate 680 (now Interstate 780) was constructed just north of the Property. The adjacent Glen Cove neighborhood development was constructed between about 1974 and 1993. No significant changes have appeared at the Property throughout its history.

2.2.2 City Directory

City Directories, published since the 18th century for major towns and cities, list the name of the resident or business associated with each address. A city directory search conducted by EDR is located in Appendix F. The Property is unlisted. Nearby listings show a variety of residential homes and commercial businesses along Benicia Road. No listings were identified which could be expected to pose an environmental concern to the Property.

2.3 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the Property and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

2.3.1 Environmental Records

2.3.1.1 Subject Property

The Property is not listed on Environmental Record source databases.

2.3.1.2 Other Properties

The following databases include facilities listed within the appropriate ASTM search distances of the Property on Environmental Records sources.

TABLE 2.3.1.2-1: Environmental Database Listings for Nearby Properties

FACILITY	STREET	DATABASES
Shady Lane Sanitary Pump Station	198 Wildflower Ave	CERS, CERS HAZ WASTE
California Highway Patrol #301 Golden Gate Division	1551 Benicia Road	CERS, CERS HAZ WASTE, CERS TANKS, RCRA NONGEN / NLR, UST
Ecolab, Inc.	1500 Benicia Road	RCRA NONGEN / NLR
St. Patrick St. Vincent High School	1500 Benicia Road	RCRA NOGEN / NLR
Big 4 Rents, Inc.	1600 Benicia Road	CA FID UST, CERS, CORTESE, ECHO, FINDS, HAZNET, HIST CORTESE, HIST UST, HWTS, LUST, RCRA-SQG, SWEEPS UST
Crusader Fence Company, Inc.	1600 Benicia Road	CERS, CERS HAZ WASTE, HWTS, RCRA NONGEN / NLR, UST
Siri Construction Company	1855 Benicia Road	HIST UST, UST
Greenmont Sanitary Pump Station	230 Greenmont Drive	CERS, CERS HAZ WASTE

Shadow Ridge	Glen Cove Road	CERS, ENVIROSTOR, HIST CAL-SITES, RESPONSE
Southampton/Company/Blake Court	Rose Drive/Blake Court	ENVIROSTOR, HIST CAL-SITES, RESPONSE
Weber Property	1100 Block of Warren Avenue	CERS, ENVIROSTOR, RESPONSE

Shady Lane Sanitary Pump Station – 198 Wildflower Avenue

The Shady Lane Pump Station is located at the corner of Shady Lane and Wildflower Avenue, next to the northwestern area of the Property. The station is operated by Vallejo Sanitation & Flood Control District and overseen by Solano County Environmental Health, and stores chemicals. This station is not expected to pose an environmental concern to the Property.

California Highway Patrol Golden Gate Division – 1551 Benicia Road

California Highway Patrol Golden Gate Division, located approximately 200 feet north of the Property, is listed in the CERS, CERS HAZ WASTE, CERS TANKS, RCRA NONGEN / NLR, and UST databases. The facility has received numerous violations from Solano County Environmental

Health pertaining to hazardous waste storage and UST operation. However, these violations are not indicative of large-scale releases of hazardous chemicals to the environment.

Big 4 Rents, Inc./ Crusader Fence Company, Inc. – 1600 Benicia Road

Big 4 Rents is listed in the CA FID UST, CERS, CORTESE, ECHO, FINDS, HAZNET, HIST CORTESE, HIST UST, HWTS, LUST, RCRA-SQG, and SWEEPS UST databases. This facility is listed as a closed cleanup case under GeoTracker case listing T0609500271, as of November 1995. According to the case closure summary, a 4,000-gallon gasoline UST, 2,000-gallon diesel UST, and 1,000-gallon diesel UST were removed from the site in May 1995 following spills. Reportedly, 468 cubic yards of impacted soil were removed and off-hauled for landfill disposal, and groundwater was not impacted. Residual concentrations of total petroleum hydrocarbons in soil ranged from non-detect to 1 part per million (ppm). Benzene, toluene, ethylbenzene, and xylenes (BTEX) concentrations in soil were non-detect. Crusader Fence Company is the current, or more recent, tenant at this property. This facility has received several administrative violations pertaining to hazardous materials storage. Based on this information, this facility is not expected to pose an environmental concern to the Property.

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that the above-stated database sites pose an environmental risk to the Property.

One property, Benicia State Recreation Area, was listed on the “Orphan Summary” list. This site is listed in the SWF/LF database. This listing does not represent a concern to the Property.

2.4 REGULATORY AGENCY FILES AND RECORDS

The following agencies were contacted pertaining to possible past development and/or activity at the Property.

TABLE 2.4-1: Regulatory Agency Records

NAME OF AGENCY	RECORDS REVIEWED
City of Vallejo Fire Department	We contacted the City of Vallejo Fire Department regarding hazardous materials and underground storage tanks. The City does not maintain these records.
City of Vallejo Building Department	We requested historical building permit records from the City of Vallejo Building Department. We did not receive a response to our request by the time of publication of this report.
Solano County Department of Environmental Health	We contacted Solano County Environmental Health regarding hazardous materials and underground storage tanks. We did not receive a response to our file review request by the time of publication of this report.
Solano County Assessor’s Office	We reviewed online parcel maps provided by Solano County Assessor’s Office. The parcel boundaries in the EDR radius map report are consistent with those provided by Solano County Assessor’s office.
California State Water Resources Control Board	We reviewed GeoTracker, the website maintained by the California State Water Resources Control Board, for records pertaining to the Property. The Property is not listed on GeoTracker.

NAME OF AGENCY	RECORDS REVIEWED
Department of Toxic Substances Control	We reviewed EnviroStor, the website maintained by the California Department of Toxic Substances Control, for records pertaining to the Property. The Property is not listed on EnviroStor.

2.5 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Public Health has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 13 tests were conducted within the Property zip code, with two tests exceeding the current EPA action level of 4 picocuries per liter (pCi/L)[1].

In accordance with ASTM E2600-15 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); there is one potential petroleum hydrocarbon source for vapor intrusion within 1/10 mile of the Property (California Highway Patrol Golden Gate Division) and no volatile organic compound (VOCs) sources within 1/3 mile of the Property. As discussed, the California Highway Patrol facility is not expected to pose a concern to the Property.

3.0 SITE RECONNAISSANCE

3.1 METHODOLOGY

ENGEO conducted a reconnaissance of the Property on April 13, 2022. The reconnaissance was performed by Jenna Keith, a Staff Engineer of ENGEO. The Property was viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The Property was also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Photographs taken during the site reconnaissance are presented in Figure 4.

The Property is vacant, vegetated land. Several unpaved paths have been constructed through the natural vegetation in the northern portion of the Property. The southern/southwestern portion of the Property was inaccessible due to natural marshy areas and barbed wire fencing.

3.2 EXTERIOR OBSERVATIONS

The following table summarizes our observations during the reconnaissance.

TABLE 3.2-1: Exterior Site Observations

FEATURE TYPE	OBSERVATIONS
Structures	No structures were observed during the site reconnaissance.

[1] California Department of Public Health – Radon Program– (https://www.cdph.ca.gov/Programs/CEH/DRSEM/CDPH%20Document%20Library/EMB/Radon/Radon%20Test%20Results.pdf).

FEATURE TYPE	OBSERVATIONS
Hazardous Substances and Petroleum Products in Connection with Identified Uses	No hazardous substances or petroleum products were observed within the Property during the site reconnaissance.
Storage Tanks (underground and above-ground)	No above-ground storage tanks or evidence of existing underground storage tanks was observed during the site reconnaissance.
Odors	No odors indicative of hazardous materials or petroleum material impacts were noted at the time of the reconnaissance.
Pools of Potentially Hazardous Liquid	No pools of potentially hazardous liquid were observed within the Property at the time of our reconnaissance.
Drums	No drums were observed on the Property at the time of the reconnaissance.
Polychlorinated Biphenyls (PCBs) Containing Equipment	No potential PCB-containing equipment, including transformers, were observed within the Property during our site reconnaissance.
Hazardous Substances and Petroleum Product Containers	No hazardous substance or petroleum product containers were observed on the Property at the time of our reconnaissance.
Pits, Ponds, and Lagoons	No pits, ponds, or lagoons were observed within the Property at the time of our reconnaissance. There are several natural marshy areas which collect water from concrete drainage channels.
Stained Soil/Pavement	No stained soil or pavement was observed within the Property at the time of our reconnaissance.
Stressed Vegetation	No signs of stressed vegetation were observed on the Property at the time of our reconnaissance.
Solid Waste/Debris	No disposal of solid waste was observed at the Property.
Stockpiles/Fill Material	No stockpiles or fill material was observed on the Property during the reconnaissance.
Wastewater	No wastewater conveyance systems were observed at the Property during the reconnaissance. The Shady Lane Pump Station is located at the corner of Shady Lane and Wildflower Avenue, next to the northwestern area of the Property. The station is operated by Vallejo Sanitation & Flood Control District and overseen by Solano County Environmental Health.
Wells	No wells were found within the Property during our site reconnaissance.
Septic Systems	No septic systems were found within the Property during our site reconnaissance.

3.3 ASBESTOS, LEAD, AND PCB-CONTAINING MATERIALS

An asbestos, lead, and PCB-containing building material survey was not conducted as part of this assessment. No structures are currently located on the Property.

4.0 INTERVIEWS

Mr. Adam Smith completed a Client-based environmental site questionnaire pertaining to applicable environmental information regarding the Property. In the questionnaire, Mr. Smith noted that the Property is unimproved, undeveloped land, and did not identify potentially environmentally related issues with the Property. A summary is provided below.

Mr. Smith is unaware of commonly known, reasonably ascertainable, or specialized knowledge indicative of releases or threatened releases that is material to the potential presence of RECs. Mr. Smith has indicated that the purchase price of the Property is reflective of fair market value of the Property. The questionnaire is presented in its entirety in Appendix G.

We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

5.0 FINDINGS AND CONCLUSIONS

This assessment included a review of local, state, tribal, and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources. A reconnaissance of the Property was completed to review site use and current conditions to check for the storage, use, production, or disposal of hazardous or potentially hazardous materials and to conduct written/oral interviews with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use or past use of the Property. A review of regulatory databases maintained by county, state, tribal, and federal agencies found no documentation of hazardous materials violations or discharge on the Property and did not identify contaminated facilities within the appropriate American Society for Testing and Materials (ASTM) search distances that would reasonably be expected to impact the Property.

Based on the findings of this assessment, no RECs, no historical RECs, and no controlled RECs were identified for the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312).

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC.

This assessment has revealed no evidence of RECs in connection with the Property, and the Property is suitable for residential development. ENGEO recommends no further environmental studies at this time.

6.0 LIMITATIONS

6.1 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE

There were no significant assumptions or deviations from the ASTM Standard Practice during preparation of this report.

6.2 OPINIONS AND DATA GAPS

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional appropriate investigation is required to identify the presence or likely presence of a REC. The following data gaps were identified during this assessment.

- We did not receive a response to our file review request from Solano County Environmental Health or the City of Vallejo Building Department prior to the publication of this report.

- We did not receive a completed Key Site Manager-based environmental questionnaire prior to the publication of this report.

These data gaps do not affect the conclusions as to the presence or lack of presence of RECs at the Property.

6.3 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports, and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. ENGEO assumes no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after completion of the report. Updates of portions of the assessment may be necessary after a period of 180 days after completion.

This phase I environmental site assessment is not intended to represent a complete soil, soil gas, or groundwater characterization, nor define the depth or extent of soil, soil gas, or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. A more extensive assessment that would include a subsurface exploration with laboratory testing of soil, soil gas, and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for the Property and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

6.4 SPECIAL TERMS AND CONDITIONS

ENGEO has prepared this report for the exclusive use of our client, Sancerra. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the Client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the Client.

Laboratory testing of soil, soil gas, or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), or a mold survey. A radon evaluation was not performed.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. ENGEO would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL ---------- National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS ---------- Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List

US INST CONTROLS Institutional Controls Sites List

Federal ERNS list

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there are 3 RESPONSE sites within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/25/2021 has revealed that there are 4 ENVIROSTOR sites within approximately 1 mile of the target property.

Lists of state and tribal leaking storage tanks

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 4 LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 5 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there are 2 HIST Cal-Sites sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA HIGHWAY PATROL GOLDEN GATE DIVISION (Continued) **S121793371**

	Chapter 16, Section(s) 2712(b)(1)(F)
Violation Description:	"Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Date:	02/15/1996
Comments:	Removal Action: Tires - Approximately 150 cubic yards of investigation accumulated waste (including leather scraps and associated soil) were transported to BFI Keller Canyon Landfill in Pittsburg, California. Approximately 1,100 cubic yards of leather and associated soil were transported to Altamont Landfill in Livermore, California. Additionally, 154 tires were removed from the excavation and transported to Big Sky Enterprises, in Benicia California for recycling. The completed excavation was approximately 134 feet long by 30 feet wide by 10 feet at its deepest point. Removal Activities continued until background levels were achieved. Confirmation samples were collected 2 feet beyond observed waste (in each direction). 22

SOUTHAMPTON/COMPANY/BLAKE COURT (Continued) **S100714944**

confirmation samples were collected (10 side wall samples and 12 bottom samples) and analyzed for total and hexavalent chromium.

Background Info: A portion of the Southampton community was formerly occupied by the Braito landfill, also referred to as the Solano County Sanitary Landfill. From about 1955 to 1978, the site was privately owned and operated, pursuant to permits issued by the Solano County Department of Environmental Management (SCDEM) and Bay Area Regional Water Quality Control Board (RWQCB), as a sanitary landfill. The landifll operated primarily in two areas: the 12.3 acre east canyon site and the 6.4 acre north canyon site. The area subject to this environmental investigation is the north canyon site.
Historically the landfill was not classified as a hazardous or toxic materials disposal site, but rather a Class III landfill. However, historical records show that hazardous wastes (e.g. tannery wastes) were also disposed at the site, and that several related enforcement actions were taken.
In the early 1980's, following transfer of site ownership to Southampton Comapny, excavation of most of the landfilled wastes, and RWQCB approved closure, houses were constructed at the site. Homes were never constructed on the Blake Court lots, however, apparently due to the high cost of stabilizing these prospective home sites, i.e., the costs of engineering measures to mitigate foundation conditions. During site excavation and grading activities, the decision had been made to leave wastes at Blake Court because the wastes appeared to be "substantially decomposed"
In June of 1991, the discovery of subsidence in the backyard of one of the homes (Lot 50), led to the discovery of a soft "black material" (believed to be tannery wastes) buired beneath that home and adjacent lots. In the widening investigation that ensued, it has become apparent that approximately 24,000cy of hazardous waste (i.e. 22,000 cy of refuse and 2,200 cy of black material) remained buried at the site.
Investigative work today has included soil and groundwater sampling and testing (for site characterization and waste classification purposes), soil gas testing, a geophysical survey, and slope stability study. The responsible parties completed the remedial investigation/feasibility study in March 1997.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

VALLEJO PROPERTIES - GLEN COVE
NOT REPORTED
VALLEJO, CA 94591

TARGET PROPERTY COORDINATES

Latitude (North):	38.081568 - 38ˆ 4’ 53.64’’
Longitude (West):	122.201037 - 122ˆ 12’ 3.73’’
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	570071.4
UTM Y (Meters):	4214960.5
Elevation:	117 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12008089 BENICIA, CA
Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

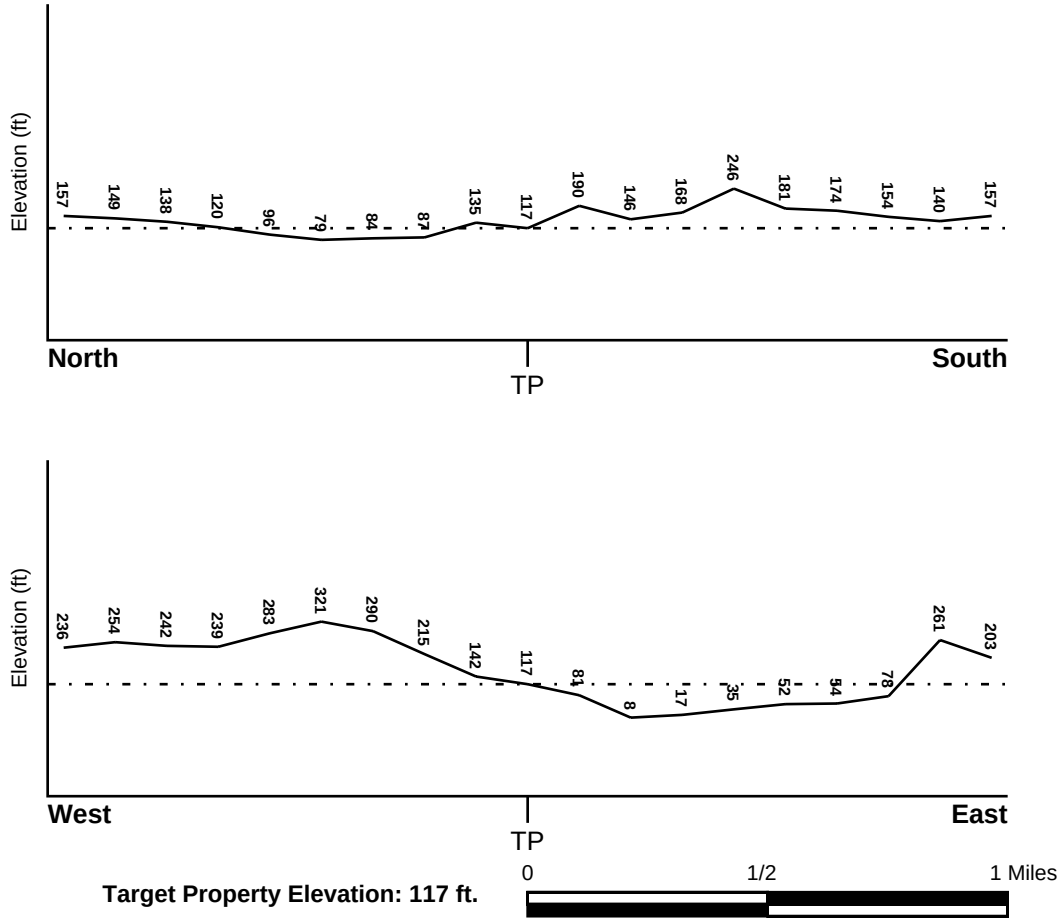
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 117 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06095C0630F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06095C0633E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
BENICIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/4 - 1/2 Mile ENE	WSW
2	1/2 - 1 Mile West	SSE
1G	1/4 - 1/2 Mile ENE	WSW
2G	1/2 - 1 Mile West	SSE

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Dibble

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
2	3 inches	20 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
3	20 inches	24 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:

Soil Map ID: 2

Soil Component Name: Dibble

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
2	12 inches	29 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:
3	29 inches	33 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 4 Min: 1.4	Max: Min:

Soil Map ID: 3

Soil Component Name: Dibble

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	12 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
2	12 inches	29 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:
3	29 inches	33 inches	weathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: Joice

Soil Surface Texture: muck

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 52 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	20 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:
2	20 inches	59 inches	muck	A-8	Highly organic soils, Peat.	Max: 141 Min: 42	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Chen Trust dated March 14, 2007 and The Tyler C. Chuang Trust dated December 31, 2008 and The Troy Chuang Trust dated December 28, 2012

PRELIMINARY REPORT

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties*. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.

Please be advised that any provision contained in this document, or in a document that is attached, linked or referenced in this document, that under applicable law illegally discriminates against a class of individuals based upon personal characteristics such as race, color, religion, sex, sexual orientation, gender identity, familial status, disability, national origin, or any other legally protected class, is illegal and unenforceable by law.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of February 04, 2022 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

To Be Determined

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

TIMOTHY WEI, AS TRUSTEE OF THE TIMOTHY F. WEI TRUST DATED APRIL 1, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TERRENCE F. WEI, AS TRUSTEE OF THE TERRENCE F. WEI TRUST DATED MARCH 18, 2007; AS TO AN UNDIVIDED 1/9 INTEREST; TAMMY F. DONG, AS TRUSTEE OF THE TAMMY F. DONG TRUST DATED MARCH 17, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TINA T. DONG, AS TRUSTEE OF THE TINA T. DONG TRUST DATED FEBRUARY 26, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; LITTON L. CHEN, AS TRUSTEE OF THE LITTON L. CHEN TRUST DATED MARCH 18, 2007, AS AMENDED, AS TO AN UNDIVIDED 1/9 INTEREST; TIFFANY CHEN HERRERO, AS TRUSTEE OF THE TIFFANY L. CHEN TRUST DATED APRIL 3, 2007, AS AMENDED, AS TO AN UNDIVIDED 1/9 INTEREST; THOMAS L. CHEN, AS TRUSTEE OF THE THOMAS L. CHEN TRUST DATED MARCH 14, 2007, AS TO AN UNDIVIDED 1/9 INTEREST; TYLER C. CHUANG, MIKE M. CHUANG AND MARIE W. CHUANG, AS CO-TRUSTEES OF THE TYLER C. CHUANG TRUST DATED DECEMBER 31, 2008, AS TO AN UNDIVIDED 1/9 INTEREST; TROY CHUANG, MIKE M. CHUANG AND MARIE W. CHUANG, AS CO-TRUSTEES OF THE TROY CHUANG TRUST DATED DECEMBER 28, 2012, AS TO AN UNDIVIDED 1/9 INTEREST; ALL AS TENANTS IN COMMON

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee as to Parcel(s) One and Two, an easement as to Parcel(s) Three.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

1. General and special taxes and assessments for the fiscal year 2022-2023, a lien not yet due or payable.

2. General and special taxes and assessments for the fiscal year 2021-2022.
   First Installment: $1,845.49, PAID
   Penalty: $0.00
   Second Installment: $1,845.49, OPEN
   Penalty: $0.00
   Tax Rate Area: 7016
   A. P. No.: 0079-120-100

   Affects: Parcel One

3. General and special taxes and assessments for the fiscal year 2021-2022.
   First Installment: $227.70, PAID
   Penalty: $0.00
   Second Installment: $227.70, OPEN
   Penalty: $0.00
   Tax Rate Area: 7047
   A. P. No.: 0079-171-170

   Affects: Parcel Two

4. The Land lies within the boundaries of proposed community facilities District No. 2014-1 (Clean Energy), as disclosed by a map filed August 27, 2015 in Book 0025, Page 55 of maps of assessment and community facilities districts and recorded August 27, 2015 as Instrument No. 201500078287 of Official Records.

5. The lien of supplemental taxes, if any, assessed pursuant to Chapter 3.5 commencing with Section 75 of the California Revenue and Taxation Code.

6. The fact that the land lies within the boundaries of the Southeast Vallejo Redevelopment Project Area, as disclosed by various documents of record.

7. Abutter's rights of ingress and egress to or from the freeway have been relinquished in the document recorded October 20, 1958 as Book 944, Page 392 of Official Records.

   Affects Parcel One

8. A waiver of any claims for damages by reason of the location, construction, landscaping or maintenance of a contiguous freeway, highway or roadway, as contained in the document recorded October 20, 1958 as Instrument No. 17024, Book 944, Page 392 of Official Records.

   Affects Parcel One

9. An easement for ingress and egress and incidental purposes, recorded August 6, 1973 as Book 1844, Page 331 of Official Records.
   In Favor of: City of Vallejo
   Affects: A Portion of Said Land

   The location of the easement cannot be determined from record information.

10. Covenants, conditions, restrictions and easements in the document recorded May 16, 1979 as Book 1979, Page 38579 of Official Records, which provide that a violation thereof shall not defeat or render invalid the lien of any first mortgage or deed of trust made in good faith and for value, but deleting any covenant, condition, or restriction, if any, indicating a preference, limitation, or discrimination based on race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, disability, handicap, veteran or military status, genetic information, national origin, source of income as defined in subdivision (p) of Section 12955, or ancestry, to the extent that such covenants, conditions or restrictions violate applicable state or federal laws. Lawful restrictions under state and federal law on the age of occupants in senior housing or housing for older persons shall not be construed as restrictions based on familial status.

    Document(s) declaring modifications thereof recorded October 25, 1979 as Book 1979, Page 91941 of Official Records.

    Affects Parcel Two

11. An easement shown or dedicated on the Map as referred to in the legal description

    For: Access, Landscape maintenance and incidental purposes.

    Affects: Parcel Two

12. Abutter's rights of ingress and egress to or from Shady Lane, have been dedicated or relinquished on the filed Map.

    Affects: Parcel Two

13. The terms and provisions contained in the document entitled Agreement To Maintain Area Within Landscape Maintenance District recorded May 29, 1987 as Page 71802 of Official Records.

    Affects Parcel Two

14. Any easements and/or servitudes affecting easement parcel(s) Three herein described.

15. Any right, title or interest of the spouse (if any) of Litton Chen, Tiffany Chen aka Tiffany Herrero and Timothy Wei.

16. Water rights, claims or title to water, whether or not shown by the Public Records.

17. Rights of parties in possession.

Prior to the issuance of any policy of title insurance, the Company will require:

18. A deed from the spouse (if any) of Litton Chen, Tiffany Chen aka Tiffany Herrero and Timothy Wei be recorded in the public records, or the joinder of the spouse named herein on any conveyance, encumbrance or lease to be executed by said married person.
    The deed should contain the following statement:
    "It is the express intent of the grantor, being the spouse of the grantee, to convey all right, title and interest of the grantor, community or otherwise, in and to the herein described property to the grantee as his/her sole and separate property."

19. With respect to the trust referred to in the vesting:
a. A certification pursuant to Section 18100.5 of the California Probate Code in a form satisfactory to the Company.
b. Copies of those excerpts from the original trust documents and amendments thereto which designate the trustee and confer upon the trustee the power to act in the pending transaction.
c. Other requirements which the Company may impose following its review of the material required herein and other information which the Company may require.

INFORMATIONAL NOTES

Note: The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than the certain dollar amount set forth in any applicable arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. If you desire to review the terms of the policy, including any arbitration clause that may be included, contact the office that issued this Commitment or Report to obtain a sample of the policy jacket for the policy that is to be issued in connection with your transaction.

1. The property covered by this report is vacant land.

2. According to the public records, there has been no conveyance of the land within a period of twenty-four months prior to the date of this report, except as follows:

   None

3. We find no outstanding voluntary liens of record affecting subject property. Disclosure should be made concerning the existence of any unrecorded lien or other indebtedness which could give rise to any possible security interest in the subject property.

The map attached, if any, may or may not be a survey of the land depicted hereon. First American expressly disclaims any liability for loss or damage which may result from reliance on this map except to the extent coverage for such loss or damage is expressly provided by the terms and provisions of the title insurance policy, if any, to which this map is attached.

NOTICE

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

EXHIBIT A
LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

CLTA STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
   (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
   (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
   (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
   (c) resulting in no loss or damage to the insured claimant;
   (d) attaching or created subsequent to Date of Policy; or
   (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
   Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the public records at Date of Policy.

CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)
EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
   a. building;
   b. zoning;
   c. land use;
   d. improvements on the Land;
   e. land division; and
   f. environmental protection.
   This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
   a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
   b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
   c. that result in no loss to You; or
   d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
6. Lack of a right:
   a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
   b. in streets, alleys, or waterways that touch the Land.
   This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$10,000
Covered Risk 18:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 19:	1% of Policy Amount Shown in Schedule A or $5,000 (whichever is less)	$25,000
Covered Risk 21:	1% of Policy Amount Shown in Schedule A or $2,500 (whichever is less)	$5,000

2006 ALTA LOAN POLICY (06-17-06)
EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

   (i) the occupancy, use, or enjoyment of the Land;
   (ii) the character, dimensions, or location of any improvement erected on the Land;

(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II,[t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

[PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
(a) created, suffered, assumed, or agreed to by the Insured Claimant;
(b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
(c) resulting in no loss or damage to the Insured Claimant;
(d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
(e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
(a) a fraudulent conveyance or fraudulent transfer, or
(b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:
[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material unless such lien is shown by the Public Records at Date of Policy.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to

(i) the occupancy, use, or enjoyment of the Land;
(ii) the character, dimensions, or location of any improvement erected on the Land;
(iii) the subdivision of land; or
(iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d),

14 or 16.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
   (a) created, suffered, assumed, or agreed to by the Insured Claimant;
   (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
   (c) resulting in no loss or damage to the Insured Claimant;
   (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
   (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
   (a) a fraudulent conveyance or fraudulent transfer, or
   (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

First American Title™

Privacy Notice

Effective: October 1, 2019

Notice Last Updated: January 1, 2022

This Privacy Notice describes how First American Financial Corporation and its subsidiaries and affiliates (together referred to as "First American," "we," "us," or "our") collect, use, store, and share your information with the exception that a subsidiary or affiliate has their own privacy policy, that policy governs. This Privacy Notice applies to information we receive from you offline only, as well as from third parties, when you interact with us and/or use and access our services and products ("Products"). For more information about our privacy practices, including our online practices, please visit https://www.firstam.com/privacy-policy/. The practices described in this Privacy Notice are subject to applicable laws in the places in which we operate.

What Type Of Information Do We Collect About You? We collect a variety of categories of information about you. To learn more about the categories of information we collect, please visit https://www.firstam.com/privacy-policy/.

How Do We Collect Your Information? We collect your information: (1) directly from you; (2) automatically when you interact with us; and (3) from third parties, including business parties and affiliates.

How Do We Use Your Information? We may use your information in a variety of ways, including but not limited to providing the services you have requested, fulfilling your transactions, comply with relevant laws and our policies, and handling a claim. To learn more about how we may use your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Share Your Information? We do not sell your personal information. We only share your information, including to subsidiaries, affiliates, and to unaffiliated third parties: (1) with your consent; (2) in a business transfer; (3) to service providers; and (4) for legal process and protection. To learn more about how we share your information, please visit https://www.firstam.com/privacy-policy/.

How Do We Store and Protect Your Information? The security of your information is important to us. That is why we take commercially reasonable steps to make sure your information is protected. We use our best efforts to maintain commercially reasonable technical, organizational, and physical safeguards, consistent with applicable law, to protect your information.

How Long Do We Keep Your Information? We keep your information for as long as necessary in accordance with the purpose for which it was collected, our business needs, and our legal and regulatory obligations.

Your Choices We provide you the ability to exercise certain controls and choices regarding our collection, use, storage, and sharing of your information. You can learn more about your choices by visiting https://www.firstam.com/privacy-policy/.

International Jurisdictions: Our Products are offered in the United States of America (US), and are subject to US federal, state, and local law. If you are accessing the Products from another country, please be advised that you may be transferring your information to us in the US, and you consent to that transfer and use of your information in accordance with this Privacy Notice. You also agree to abide by the applicable laws of applicable US federal, state, and local laws concerning your use of the Products, and your agreements with us.

We may change this Privacy Notice from time to time. Any and all changes to this Privacy Notice will be reflected on this page, and where appropriate provided in person or by another electronic method. **YOUR CONTINUED USE, ACCESS, OR INTERACTION WITH OUR PRODUCTS OR YOUR CONTINUED COMMUNICATIONS WITH US AFTER THIS NOTICE HAS BEEN PROVIDED TO YOU WILL REPRESENT THAT YOU HAVE READ AND UNDERSTOOD THIS PRIVACY NOTICE.**

First American Title™

For California Residents

If you are a California resident, you may have certain rights under California law, including but not limited to the California Consumer Privacy Act of 2018 ("CCPA"). All phrases used in this section shall have the same meaning as those phrases are used under California law, including the CCPA.

Right to Know. You have a right to request that we disclose the following information to you: (1) the categories of personal information we have collected about or from you; (2) the categories of sources from which the personal information was collected; (3) the business or commercial purpose for such collection and/or disclosure; (4) the categories of third parties with whom we have shared your personal information; and (5) the specific pieces of your personal information we have collected. To submit a verified request for this information, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097

Right of Deletion. You also have a right to request that we delete the personal information we have collected from and about you. This right is subject to certain exceptions available under the CCPA and other applicable law. To submit a verified request for deletion, go to our online privacy policy at www.firstam.com/privacy-policy to submit your request or call toll-free at 1-866-718-0097. You may also designate an authorized agent to submit a request on your behalf by going to our online privacy policy at www.firstam.com/privacy-policy to submit your request or by calling toll-free at 1-866-718-0097.

Verification Process. For either a request to know or delete, we will verify your identity before responding to your request. To verify your identity, we will generally match the identifying information provided in your request with the information we have on file about you. Depending on the sensitivity of the information requested, we may also utilize more stringent verification methods to verify your identity, including but not limited to requesting additional information from you and/or requiring you to sign a declaration under penalty of perjury.

Notice of Sale. We do not sell California resident information, nor have we sold California resident information in the past 12 months. To the extent any First American affiliated entity has a different practice, it will be stated in the applicable privacy policy. We have no actual knowledge of selling the information of minors under the age of 16.

Right of Non-Discrimination. You have a right to exercise your rights under California law, including under the CCPA, without suffering discrimination. Accordingly, First American will not discriminate against you in any way if you choose to exercise your rights under the CCPA.

Notice of Collection. To learn more about the categories of personal information we have collected about California residents over the last 12 months, please see "What Information Do We Collect About You" in https://www.firstam.com/privacy-policy. To learn about the sources from which we have collected that information, the business and commercial purpose for its collection, and the categories of third parties with whom we have shared that information, please see "How Do We Collect Your Information", "How Do We Use Your Information", and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Notice of Sale. We have not sold the personal information of California residents in the past 12 months.

Notice of Disclosure. To learn more about the categories of personal information we may have disclosed about California residents in the past 12 months, please see "How Do We Use Your Information" and "How Do We Share Your Information" in https://www.firstam.com/privacy-policy.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Certified Sanborn® Map Report

04/13/22

Site Name:

Vallejo Properties - Glen Cove
Not Reported
Vallejo, CA 94591
EDR Inquiry # 6938050.3

Client Name:

Engeo Inc.
2010 Crow Canyon Place
San Ramon, CA 94583
Contact: Jenna Keith

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Engeo Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # B899-4BA0-870E

PO # NA

Project 20164.000.001

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: B899-4BA0-870E

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Engeo Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE
FOR CLIENT

To evaluate the potential for possible environmentally related impacts and site contamination the following information is requested. This questionnaire is to be completed by the user of the phase one environmental site assessment, or their authorized representative.

PART I

1. Property address and Assessor's Parcel Number (APN):

   Property is located at the NEC of Shady lane and Wildflower Street.
   Assessor Parcels 0079-120-100 and 0079-171-170

2. Current property owner (name, address, voice/fax number):

   Susan Chen and Litton Chen for the Timothy Wei Trust
   3620 Ralston Avenue | Hillsborough, CA 94010

3. Date current property owner assumed title of property:

   Records indicate the Timothy Wei Trust assumed owership on 11/29/2013

4. Current property development/improvements:

   Property is undeveloped land.

5. Past property use, development/improvements:

   The property has remained unimproved, undelveoped land.

6. Neighboring property uses:

   Immediately adjacent to the subject site, to the west, is a residential subdivsion. Immediately adjacent, the the east, is Benicia State Park.

PART II

1.	Are you aware of any environmental cleanup liens against the *property* that are filed under federal, tribal, local or state law?	☐ Yes	☑ No
2.	Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state or local law?	☐ Yes	☑ No
3.	Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐ Yes	☑ No
4.	If a property transaction is occurring in conjunction with this environmental assessment, does the purchase price of this *property* reasonably reflect the fair market value of the *property*?	☑ Yes	☐ No
5.	If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property?*	☐ Yes	☑ No ☐ N/A
6.	Are you aware of any commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, (a) do you know of specific chemicals that are present or once were present at the *property*? (b) do you know of spills or other chemical releases that have taken place at the *property*? (c) do you know of any environmental cleanups that have taken place at the *property*?	☐ Yes	☑ No
7.	Based on your knowledge and experience related to the *property* are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?	☐ Yes	☑ No

If a "Yes" response was provided to any of the above questions, please provide details below:

I certify that the information herein is true and correct to the best of my knowledge as of the date signed below.

Name (Printed/Typed): Adam Smith

Signature: Adam Smith Date: 4/6/22

JEFFREY ADAMS, PHD, PE

Principal

Jeff joined ENGEO in 1999. He leads environmental assessment, characterization, remediation projects, and Geologic Hazard Abatement District (GHAD) formation. He has contributed to a wide range of remediation and development projects in high-density and low-density urban and suburban settings redeveloped for a variety of uses.

Jeff's research interests include green and sustainable remediation (GSR), resilient and sustainable infrastructure solutions, environmental applications, and emerging public/private financial mechanisms to mitigate flood-related losses. He has authored and co-authored numerous environmental remediation-related textbooks, instructional materials, and research papers that have been presented worldwide and published in a diverse group of academic and professional journals.

SELECT PROJECT EXPERIENCE

Howard Terminal—Oakland, CA
Lead Environmental Principal. Jeff has provided ongoing technical leadership during several environmental studies for the redevelopment of the Howard Terminal site. The approximately 62.1-acre Property is a former container terminal along the Port of Oakland's Inner Harbor. The Property was originally a bulk-break terminal dating back to the early 1900s, with a manufactured gas plant located in the eastern portion of the Property. The terminal was expanded and converted to a container terminal in the 1980s. Improvements will include a Major League Baseball stadium as well as mid-rise and high-rise buildings to provide a mix of residential, retail, and other commercial uses. ENGEO performed a Phase I Environmental Site Assessment (ESA), Phase II ESAs consisting of soil, soil gas, and groundwater sampling across the property, EIR preparation support, the preparation of a human health and ecological risk assessment (HHERA), and is developing a removal action work plan (RAW).

Google San Jose Downtown West—San Jose, CA
Project Manager. Jeff provided technical leadership and review for a comprehensive ESA for various industrial and commercial properties over approximately 50 acres in downtown San Jose considered for acquisition by Google. The purpose of the assessment was to identify known and unknown environmental concerns and recommended appropriate actions to quantify potential risks to inform due diligence efforts. The risk assessment utilized an innovative

Geographic Information System (GIS) digital interactive platform that provides additional data beyond typical environmental information and is scalable for future project plans.

The South Lathrop Commerce Center—Tracy, CA
Lead Environmental Principal. Jeff provided technical leadership and review for a Phase I ESA for the approximately 245-acre master-planned industrial development. The 4.2-million-square-foot development includes nine tilt-up concrete buildings, ranging in size from 282,000 square feet to over 1,000,000 square feet. Additional improvements for the logistics center include detention and retention basins, paved streets, parking, and drive lanes, a stormwater pump station and outfall, and a sewer lift station. Site development activities include grading operations, primarily consisting of minor cuts and fills, for individual pads and roadways, underground utility installation, pump station and outfall structure construction, flexible and rigid pavement construction, and vertical construction.

Crown Chevrolet Property—Dublin, CA
Project Manager. Jeff provided comprehensive environmental consultation services for the project. Working on behalf of the purchaser, Jeff collaborated with a multi-firm consulting team to characterize and mitigate environmental impacts resulting from previous on-site automotive maintenance activities and off-site businesses. Jeff designed and managed a site characterization program that definitively demonstrated that groundwater and soil gas impacts at the site were the result of off-site releases. He peer reviewed the design and implementation of a permeable reactive barrier (PRB), which serves to remediate an encroaching groundwater plume, as well as vapor intrusion mitigation systems for the site. He also completed a Phase I ESA for a remnant parcel subsequently developed for housing for veterans. The site consists of a multi-story commercial and residential apartment/condominium "transit village" complex.

3512 Clayton Road—Concord, CA
Lead Environmental Principal. Jeff provided technical leadership and review for a Brownfields redevelopment project in Concord. Following the Phase I and Phase II ESAs that identified soil and soil gas impacts, he assisted in the development of a remediation program that included a comprehensive pre-characterization program, accurately delineating soil impacts from past light-industrial uses and soil gas impacts from off-site businesses, allowing for accelerated field implementation. Following active soil remediation and post-remediation soil gas sampling, Jeff and the ENGEO team performed a vapor intrusion risk assessment that confirmed the site did not require long-term vapor mitigation systems. The site was granted case closure from the oversight regulatory agency within an accelerated review and approval timeframe. The project consists of a high-density residential development.

Blacow Road Project—Fremont, CA
Environmental Principal. Jeff has provided technical assistance for project remediation activities and prepared a Phase I ESA for site. The site is an active, open remediation site under the regulatory oversight of the San Francisco Bay Regional Water Quality Control Board (RWQCB). Impacts resulted from a variety of on-site and off-site commercial and industrial land uses dating back over 50 years. ENGEO has performed numerous characterization, remediation design, and monitoring services for the Site. Remediation activities are underway at the site to address groundwater and soil gas impacts from volatile organic compounds (VOCs) and petroleum hydrocarbons. The remediation approach consists of several remedial and mitigative technologies, including soil vapor extraction (SVE), in-situ enhanced bioremediation, and post-remediation vapor intrusion mitigation systems to be installed in future residential structures. The project consists of a residential development.

Eastvale 79—Eastvale, CA
*Environmental Principal***.** Jeff served in an Environmental Principal role for environmental studies at the site. ENGEO performed a Phase I ESA and a subsequent ESA update that included regulatory file reviews, interviews with property owners and regulatory agencies, a site reconnaissance, and preparation of a report documenting our findings. The approximately 16-acre site was historically associated with a portion of a dairy dating to at least 1967. During grading activities, a localized area of stained and odoriferous soil was observed in the southeast corner of the site. ENGEO coordinated and managed remediation efforts, confirmation sampling, and coordination with Riverside County DEH. Approximately 4,115 tons petroleum-impacted soil were removed and disposed. The DEH issued "No Further Action" status for the site.

Alameda Landing—Alameda, CA
Project Manager. Project Manager, Lead Environmental Principal. Jeff has provided comprehensive environmental consultation services for the Alameda Landing project. He has prepared and managed the completion of Phase I ESA and ESA Update studies for subunits of the greater project area. He directed environmental characterization operations for the site, which was suspected of having been affected by naturally occurring methane deposits within the subsurface. Working closely with innovative protocols, Jeff was able to demonstrate to regulatory oversight officials that expensive vapor intrusion mitigation systems were not necessary for proposed residential structures, potentially saving millions of dollars to the site developer. Additionally, he has prepared several Remedial Action Completion Reports (RACRs) of development phases to achieve regulatory case closure. The project consists of a multi-phased residential housing community built as part of a master-planned redevelopment of a former United States Navy facility.

VTA BART Silicon Valley Berryessa Extension Design-Build Project—San Jose, CA
Project Manager. As the lead project team member with respect to hazardous materials, Jeff provided a range of value engineering consulting services relating to existing soils, groundwater, and building materials. ENGEO provided a range of value engineering consulting services to address existing soils, hydrology resources, SWPPP, and building materials.

Following a complex right-of-way that extended through numerous developed areas and paralleled an existing rail line, the project generated hundreds of thousands of cubic yards of excavated soil with potential toxic and hazard concerns. The right-of-way intersected several groundwater plumes emanating from former industrial and commercial sources. Further, a number of structures in the project footprint harbored lead-based paint and asbestos-containing building materials. ENGEO led the effort to accurately quantify these materials and devise strategies to effectively manage and mitigate these materials to drive overall project cost savings.

Foster City Civic Center Lots—Foster City, CA
Assistant Project Manager. Jeff provided technical oversight for a Phase I ESA for the Foster City Civic Center site and environmental characterization operations for the site, which was suspected of having been affected by unauthorized petroleum hydrocarbon releases within the subsurface. Following the completion of a soil gas survey, Jeff and team demonstrated that vapor intrusion mitigation systems were not necessary for proposed development, providing a significant cost savings to the project. The project consists of a multi-use urban infill development.

Macedo Property Environmental Consultation—Livermore, CA
Project Manager. Jeff provided comprehensive environmental consultation services for a Brownfields redevelopment project in Livermore. The project included several challenges, including ongoing business activities at the site and complex contaminant conditions resulting

from a long history of site operation of an automotive service station. Following a comprehensive site characterization plan that he developed, Jeff developed a cost-effective remedial plan to address hydrocarbon-contaminated soil. Jeff worked closely with the design team to rapidly remediate the site contamination using a soil excavation program that minimized disturbance to the active businesses at the site. Through Jeff's project oversight, the characterization and remediation activities were completed on time and under budget. Because of his effective work with various project stakeholders, the site was granted case closure from the oversight regulatory agency within an accelerated timeframe, allowing redevelopment to occur on schedule. The project consists of a residential subdivision. The project consists of a residential subdivision.

1511 Jefferson—Oakland, CA
Project Manager. Jeff provided environmental and geotechnical consultation services for a Brownfields redevelopment project in downtown Oakland. The project included several challenges, including limited site access due to on-site business activities, environmental impact related to previous site use, and the presence of several adjacent mid-rise structures. Jeff developed efficient remedial value engineering solutions to mitigate the presence of geotechnical and environmental development constraints. Jeff worked with the design team to establish cost-effective retaining wall and foundation systems, designed and observed a subsurface environmental mitigation program, and assisted in the design of a structure-wide vapor barrier. The project, serving as a cornerstone of the revitalization of downtown Oakland, consists of a multi-story residential condominium structure.

Alamo Creek—Danville, CA
Project Manager. Jeff prepared guidance documents and helped to form a transit-focused County Service Area (CSA). The transit-focused CSA, believed to be the first in Contra Costa County, helped to establish commuter transit service for a recently constructed residential development. Utilizing market analysis research provided by other consultants, he prepared an Engineer's Report that outlined a three-part phased implementation of transit, beginning with vanpools and ultimately resulting in an airporter-style fleet of bus service to and from an existing Bay Area Rapid Transit station. Jeff also prepared a long-range budget and confirmed a yearly assessment to ensure financial solvency of the CSA over the lifetime of the development. The CSA serves the Alamo Creek development and vicinity in Contra Costa County, California.

Alcosta Boulevard/Interstate 680 Interchange Project—San Ramon, CA
Project Engineer. Jeff performed an Aerially Deposited Lead (ADL) assessment program for the Alcosta Boulevard/Interstate 680 Interchange Improvement. The purpose of the investigation was to determine existing lead levels in surface soils. The scope of services included the recovery of soil samples from the surface to a depth of 3 feet below the ground surface, analytical testing of the samples to determine hydrogen ion content (pH testing), total lead, STLC WET soluble lead, and STLC TCLP soluble lead analyses, and a statistical analysis to determine Confidence Intervals (CI) of soil lead concentrations. An innovative, risk-based statistical analysis was performed to assure site soils were suitable for on-site reuse in accordance with Caltrans/State of California regulations. The project consists of a rehabilitation and realignment of the interstate highway interchange.

Arroyo Crossing—Livermore, CA
Project Engineer. Jeff contributed to the award-winning project, which included an extensive scope of work, including supplemental geotechnical exploration, Phase I and II ESAs, underground storage tank removal and groundwater monitoring. Jeff provided environmental analysis of existing subsurface conditions, helping the design team to implement a comprehensive yet innovative geotechnical and environmental mitigation program. Following

completion of environmental remediation activities, Jeff was able to secure a substantial federal corporate income tax rebate on behalf of the client through the EPA's Brownfields Tax Incentive program. The project consists of a residential subdivision re-use of a former quarry.

Brookside - Guadalupe Mines Road—San Jose, CA
Senior Engineer. Jeff performed a review of existing environmental documents by others, consultation with the client, and peer review document preparation. This 16-acre commercial property is planned for redevelopment into a roughly 95-lot single-family residential development. Site challenges include pre-existing environmental impacts, existing fills, creek bank stability/meander, and faulting.

East Garrison Development - Operations and Maintenance Plan—Carmel, CA
Project Engineer. Jeff prepared an Operations and Maintenance Plan (OMP) that included an assemblage of projected capital and maintenance costs from a range of consultants into working 50-year budgets for both a County Service District (CSD) and a homeowner's association (HOA). He worked to reach agreement with a number of project stakeholders, including the developer, other consultants, and local government agencies. In addition to assisting in the preparation of capital expenditure projections, Jeff developed the two operating and maintenance budgets, maintenance activity schedules and checklists, and the governing document for the two maintenance entities. The project consists of a redevelopment from a former military facility to a residential subdivision.

Highlands Ranch, Unit 3 - Environmental T&O—Pittsburg, CA
Project Engineer. Jeff managed the remediation of a former petroleum tank farm located in a rural/exurban setting. The extensive remediation program was in support of a conversion of industrial site usage into residential site usage. At this prototypical Brownfield site, Jeff personally oversaw all field operations involving a series of subcontractors, including an innovative ex-situ enhanced bioremediation program of impacted soils. Following excavation, Jeff worked closely with California Department of Toxic Substances Control (DTSC) personnel to determine the suitability of the intended site reuse. Jeff implemented an innovative statistical procedure in accordance with State and Federal Environmental Agency Best Practices to assure the site was safe for residential use. The project consists of a large-scale residential subdivision.

Highway 4 Bypass - Lime Treatment Consultation—Brentwood, CA
Project Manager. Jeff served as Project Manager. He provided consultation services that consisted of a variety of forensic analyses pertaining to the lime treatment of sub-base soils. Jeff worked closely with the project contractor as well as a diverse range of stakeholders to determine if lime treatment materials used in construction had met project specification. Following several protocols, including ASTM methods, Jeff demonstrated the absence of a statistical correlation that would confirm the use of substandard materials. Jeff's work was used to produce an opinion on behalf of the project team that the treated materials would be expected to adequately perform over the design life of the project, saving significant cost overruns. The project consists of a multi-lane highway constructed within a rapidly growing region of Eastern Contra Costa County. The project consists of a multi-lane highway constructed within a rapidly growing region of Eastern Contra Costa County.

Lockheed Martin Storm Water Pond No 4—Sunnyvale, CA
Project Manager. Jeff provided permitting consultation services, including the federal and state permitting required for the maintenance of a stormwater detention system. Jeff has also provided geotechnical and environmental support to evaluate the geotechnical conditions of the site. He also determined the absence of environmentally impacted materials within the site area. The site

consists of a stormwater detention basin measuring approximately 4.5 acres in area and located adjacent to sensitive habitat.

New Farm Agricultural and Meteorological Assessment—Contra Costa County, CA
Project Manager. Jeff managed an agricultural suitability evaluation. As part of the project, a portion of hillside open space is to be devoted to cultivation as olive groves. Jeff led the effort to review USDA soil maps and to test onsite soils for the ability to support olive cultivation. The soils were compared to active olive orchards in other locations of Contra Costa County. The project consists of a residential development with agricultural-intensive open space. Jeff managed an agricultural suitability evaluation. As part of the project, a portion of hillside open space is to be devoted to cultivation as olive groves. Jeff led the effort to review USDA soil maps and to test on-site soils for the ability to support olive cultivation. The soils were compared to active olive orchards in other locations of Contra Costa County. The project consists of a residential development with agricultural-intensive open space.

San Ramon Village Plaza - Environmental Consultation—Dublin, CA
Project Manager. Jeff contributed to an environmental peer review of previous land uses, which included a former dry cleaner. Further investigation identified impact due to former site operations. Jeff assisted in a remediation program, closely collaborating with other consultants representing different parties of the property transaction. The site was efficiently remediated, allowing for redevelopment. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site.

Schaefer Ranch - GHAD Consultation—Dublin, CA
Project Engineer. Jeff assisted with the scoping, Plan of Control preparation, budget, and formation processes of a Geologic Hazard Abatement District (GHAD). The scope of the GHAD includes maintenance of slopes, water conveyance features, habitat, and other features. Proactive maintenance, assessment, repair and replacement are also the responsibility of the GHAD subject to the limitations of the Plan of Control. The project consists of a large-scale residential subdivision in the East Bay hills west of Dublin.

Sparklizing Cleaners and Laundry—Fremont, CA
Project Engineer. Jeff provided review and data analysis for this former dry cleaning facility that had released tetrachloroethylene (PCE) to site soil and groundwater. Work included site characterizations using direct push borings, soil gas surveys, well installations, and a remedial alternatives evaluation. He has also assisted in the development of a remedial program for the site. The project site consists of a dry-cleaning facility located within a commercial/retail center. Dry-cleaning operations occurred at the facility since 1974 and resulted in chlorinated solvent impacts to soil and groundwater beneath the site. As a result, the RWQCB opened a Spills, Leaks, Investigations, and Cleanups (SLIC) case and the site was referred to the Alameda County Water District (ACWD) for lead agency oversight. A series of soil and groundwater investigations identified a source area beneath the drycleaner suite and an adjoining retail suite. ENGEO prepared a Corrective Action Plan (CAP) and coordinated the in-situ chemical oxidation program that consisted of injecting 35,000 gallons of potassium permanganate to the subsurface to oxidize chlorinated solvents. The project is currently in the post-remediation monitoring phase.

Stone Lock District Development - Consulting Services—West Sacramento, CA
Project Engineer. Jeff prepared a pro forma analysis of infrastructure-related costs for a preliminary development concept of the property. The analysis included a cost estimate for all site improvements, grading, utilities, and non-structural facilities. Included in the analysis was an evaluation of the existing adjacent levee system. Jeff worked with other team members to provide

a preliminary assessment of the existing levee condition and prepared a cost estimate for levee rehabilitation and reconstruction. The project consists of a proposed mixed-use redevelopment as part of a city revitalization plan.

Torian Parcels - Additional Phase II Environmental Site Assessment—Newark, CA
Project Manager. Jeff served as Project Manager and Project Engineer. He provided comprehensive geotechnical and environmental evaluation. Several significant geotechnical and environmental conditions existed at the property, including compressible soils, liquefiable soils, and significant deposits of non-engineered fill and debris. Several areas of soil and groundwater environmental impact were present due to historic industrial use at and in the vicinity of the site. Jeff performed a financial analysis of several mitigation alternatives to identify the most cost effective remedial solution, one in which a single remedial program in several locations addressed both environmental and geotechnical impact. Additionally, Jeff worked closely with the environmental oversight agency to develop a work plan to assess potential environmental impact. In developing and implementing the work plan, Jeff was able to demonstrate that environmental impact at the property was not as extensive as previously believed. This allowed for an alteration of the proposed site plan to avoid areas of potential impact, saving significant projected redevelopment costs. The project consists of a residential redevelopment of a 40-acre property formerly used for industrial purposes. The project consists of a residential redevelopment of a 40-acre property formerly used for industrial purposes.

Los Banos Airport - Phase I ESA—Los Banos, CA
Project Engineer. Jeff provided a Phase I ESA, prepared a soil and groundwater characterization program, and developed a conceptual soil remediation work plan as part of a multi-phase development. The Los Banos Airport project measures approximately 112 acres in area.

Navlet's Garden Center Concord - Phase I ESA—Concord, CA
Project Manager. Jeff prepared a Phase I ESA for the site. Jeff was able to effectively navigate through the complex historic records and ownership legacy associated with the property. He prepared a report that satisfied the demands and deadline of both the ownership entity and the financial institutions associated with the property. The project consists of a Navlet's Garden Center.

Mare Island, 3rd and Connelly Utility Corridor Environmental Services—Vallejo, CA
Project Engineer. Jeff provided environmental consultation support. During excavation of the utility corridor, zones of impacted soil were identified and removed from an approximate 9,300-square-foot footprint area and depths from 5 to 10½ feet below existing grade. The project consisted of utility demolition and soil excavation activities required to prepare for construction of a 300-foot water and sewer utility corridor along Connelly Street between 3rd Street and Azuar Drive.

Maggiore Property - Soil Remediation—Brentwood, CA
Project Engineer. Jeff directed field remediation operations for the site, which had been affected by an unauthorized subsurface petroleum product release. He managed a site plume delineation and groundwater-monitoring program. Additionally, Jeff performed RBCA Tier I and Tier II assessments to determine feasibility of residential development of property. The project consists of a small residential subdivision.

Cree Court Slide Repair—San Ramon, CA
Project Engineer. Jeff assisted in the development and implementation of a custom-tailored "top-down" construction procedure, allowing the project to be constructed on time and under

budget. Additionally, Jeff helped develop an innovative non-structural grouting procedure to verify proper structural tieback performance. The project consisted of an integrated structural and grading-related repair for the mitigation of a large active landslide in proximity to existing homes. A 70-foot-high retaining wall is now in place to stabilize a major, active landslide.

Sequoia/Conifer Terrace - Structural Repair Design—Danville, CA
Project Engineer. Jeff assisted in the design of a structural repair system for a landslide remediation project within a residential setting. He provided recommendations to help optimize construction of system and lessen financial burden of project. The project consisted of a unique structural repair for the mitigation of a large active landslide in close proximity to existing homes.

CITY OF VALLEJO PLANNING COMMISSION

RESOLUTION NO. PC 26-XX

A RESOLUTION OF THE PLANNING COMMISSION RECOMMENDING CITY COUNCIL APPROVAL OF TENTATIVE MAP (TM23-0001), PLANNED DEVELOPMENT (PD24-0001), DEVELOPMENT REVIEW (DVR23-0017), DESIGN REVIEW (DR23-0006) AND LANDSCAPE REVIEW (LR23-0002) FOR THE DEVELOPMENT OF 51 SINGLE-FAMILY RESIDENCES ("VISTA COVE SUBDIVISION") ON A 20.13-ACRE SITE AT THE NORTHEAST CORNER OF SHADY LANE AND WILDFLOWER AVENUE (APNs: 0079-171-170 & 0079-120-100)

* *

WHEREAS, on August 29, 2017, the City Council adopted General Plan 2040 and certified the Environmental Impact Report (EIR); and

WHEREAS, on June 22, 2021, the City Council adopted a new Zoning Code and Zoning Map; and

WHEREAS, on November 29, 2022, Sancerra Vista Cove, LLC., the applicant, submitted for a Preliminary Review Application pursuant to California Senate Bill (SB) 330, "the Housing Crisis Act of 2019," for development of a vacant 20.13-acre site located near the intersection of Shady Lane and Wildflower Avenue (APNs:0079-171-170 and 0079-120-100) ("Subject Property"); and

WHEREAS, on December 28, 2022, the SB 330 Preliminary Review Application was found to satisfy the checklist as listed in California Government Code Section 65941.1; and

WHEREAS, the Subject Property has a current General Plan 2040 land use designation of Primary Single-Family (R-SF) and Mix of Housing Types/Medium Density (R-MH), and a zoning designation of Residential Low Density (RLD) and Residential Medium Density (RMD); and

WHEREAS, on February 13, 2023, the applicant formally submitted an application for Tentative Map (TM23-0001), Development Review (DVR23-0017), Design Review (DR23-0006), Landscape Review (LR23-0002) and Minor Use Permit (MUP23-0010), to develop 51 detached single-family homes on the Subject Property (the "Project"); and

WHEREAS, on December 18, 2023, after multiple rounds of review, the Project was deemed complete; and

WHEREAS, on May 16, 2024, the applicant revised the Project description to withdraw the Minor Use Permit application, and add a request for a Planned Development zoning map amendment (PD24-0001) to change the Project site's zoning districts from RLD and RMD Zoning to Planned Development (PD) with a proposed "Vista Cove Planned Development Plan"; and

WHEREAS, on July 24, 2024, the application for the revised Project was deemed complete; and

WHEREAS, on July 10, 2025, after giving all public notices required by State law and the City of Vallejo Municipal Code, the Design Review Board conducted a duly noticed public hearing and voted 3-0, with one absence, to adopt Resolution No. DRB25-02 recommending approval of Design Review (DR23-0006) and Landscape Review (LR23-0002) to the Planning Commission; and

WHEREAS, on November 10, 2025, a Subsequent Mitigated Negative Declaration for the proposed Project was published for a 30-day public review period; and

WHEREAS, on November 24, 2025, pursuant to Vallejo Municipal Code (VMC) Section16.602.08(A), notice of this hearing was published in the Times Herald and mailed to all active neighborhood groups and property owners within 500 feet of the Property, the property owners, the Vallejo City Unified School District and any other local agency expected to provide water, wastewater treatment, streets, roads, schools, or other essential facilities or services to the Project and electronically mailed to the members of the Planning Commission, to the applicant and interested parties; and

WHEREAS, the Planning Commission conducted a duly noticed public hearing on December 15, 2025, to consider the proposed Project, including the recommended environmental review determination prepared pursuant to CEQA; and

WHEREAS, the staff requested to continue the Project to the Planning Commission regular meeting date of January 21, 2026 and the Planning Commission voted 5-1 to continue the meeting; and

WHEREAS, the Planning Commission conducted a public hearing on January 21, 2026 to consider the proposed Project, including the recommended environmental review determination pursuant to CEQA; and

WHEREAS, by separate resolution adopted prior hereto, the Planning Commission recommended the City Council adopt a Subsequent Mitigated Negative Declaration for the Project, and did consider the IS/SMND prior to making a recommendation on the Project; and

NOW, THEREFORE, LET IT BE RESOLVED that the Planning Commission hereby finds, determines and resolves as follows:

Section 1. Recitals

The foregoing recitals are true and correct, and the same are incorporated herein by reference.

Section 2. Record

The Record of Proceedings ("Record") upon which the Planning Commission bases its recommendation on the Project includes but is not limited to: (1) the Initial Study/Subsequent Mitigated Negative Declaration and the appendices and technical reports cited in and/or relied upon in preparing same; (2) the staff reports, City files and records and other documents, prepared for and/or submitted to the City relating to the Initial Study/Subsequent Mitigated Negative Declaration and the Project; (3) the evidence, facts, findings and other determinations set forth in this resolution; (4) Vallejo General Plan 2040 and its certified final Environmental Impact Report [SCH]#20141120356)(“GP EIR”); the 2021 Zoning Code and its Initial Study and Mitigated Negative Declaration; the Vallejo 2023-2031 Housing Element, and the Addendum to the GP EIR dated September 2025 and prepared by Environmental Science Associates prepared therefor; the Vallejo Municipal Code; (5) all designs, plans, studies, data and correspondence submitted to the City in connection with the Project; (6) all documentary and oral evidence received at public meetings, hearings, or submitted to the City during the comment period relating to the Project; and (7) all other matters of common knowledge to the Planning Commission including, but not limited to, City state, and federal laws, policies, rules, regulations, reports, records, and projections related to development within the City of Vallejo and its surrounding areas.

The location and custodian of the records is the Planning and Development Services of the City of Vallejo, 555 Santa Clara Street, Vallejo, California 94590.

Section 3. Tentative Map Findings

1. **The project is consistent with the goals and policies of the Vallejo General Plan and any applicable specific plans.**

   Facts in support: The Project site is comprised of two parcels with different general plan land use designations. The smaller parcel has a general plan land use designation of P-SF, which applies to residential neighborhoods primarily characterized by detached single- family homes. The larger parcel has a land use designation of R-MH, which applies to residential neighborhoods largely characterized by single-family homes typically located in the central and more historic parts of Vallejo. The maximum permitted residential density in the P-SF is 9 units per acre. The maximum permitted residential density in the R-MH land use designation is 25 units per acre. As proposed, the Project would construct 51 additional single-family dwellings units on a vacant and underutilized infill site adjacent to existing residential development. The proposed residential density of the Project is 2.5 units per acre (or 4.9 units an acre on the 10.39-acres being developed), consistent with the maximum permitted density for the P-SF and R-MH designation. The Project is consistent with the goals and policies of the Vallejo General Plan, as shown in Exhibit B of this Resolution.

   There is no specific plan applicable to the Project.

2. **The project conforms with Title 15 of the Vallejo Municipal Code and the Zoning Ordinance.**

   Facts in support: The proposed Vesting Tentative Map proposes to subdivide two vacant parcels, totaling 20.8-acres, into 51 residential parcels and six open space, detention, and water quality treatment and street parcels. The Tentative Map is consistent with the proposed Planned Development and to the applicable standards of Chapter 15.08 (Tentative Maps) of Title 15 (Subdivisions) of the VMC.

   As proposed, the Tentative Map conforms to the applicable standards set forth in Title 15, as it is consistent with goals and policies of the Vallejo General Plan as described in Exhibit B of this Resolution and includes all of the elements required for a tentative map set forth in VMC Section 15.08.030.

3. **The project conforms with the Subdivision Map Act.**

   Facts in support: The California Subdivision Map Act (SMA) governs the division of land into smaller parcels, ensures orderly development and the provision of adequate infrastructure for new subdivisions. The SMA requires developers to submit maps showing how the land will be divided and ensures adequate access to utilities, drainage, and compliance with zoning and environmental regulations, thereby promoting public health, safety, and welfare.

   The Project and its accompanying Tentative Map have been reviewed for consistency with applicable General Plan and Housing Element policies, the Vallejo Municipal Code (Title 15 – Subdivisions and Title 16 – Zoning), and the SMA. As discussed above, the Tentative Map is consistent with the Vallejo General Plan policies, and the proposed Planned Development, as shown in Exhibit C of this Resolution, including those related to lot size, lot coverage, landscaping, and other relevant development standards. The Project will also have adequate access to utilities, drainage, and infrastructure by providing new streets, sidewalks, water, sanitary sewer, storm drain lines, and bioretention and water quality basins, and a detention basin.

Section 4. Planned Development

1. **The proposed development is consistent with the general plan, including the density and intensity limitations that apply;**

   Facts in support: The Project site currently has the General Plan Land Use Designations of Primarily Single-Family (P-SF) and Mix of Housing Types/Medium Density (R-MH). The P-SF applies to residential neighborhoods primarily characterized by detached single- family homes with a maximum permitted residential density of 9 units per acre. The R-MH allows single-family homes but with a mix of other housing types, including duplexes, triplexes, fourplexes, some smaller scale apartment buildings and small commercial spaces; or 2) primarily single-use, multi-family developments with common outdoor spaces and maximum permitted residential density of 25 dwelling units per acre. The Project includes 51 detached single-family residential units with a density of 2.5-units per acre. The proposed residential density of the Project is 2.5 units per acre (or 4.9 units an acre on the 10.39-acres being developed), consistent with the maximum permitted density for the P-SF and R-MH designation. The Project is consistent with the goals and policies of the Vallejo General Plan, as shown in Exhibit B of this Resolution.

2. **The subject site is physically suitable for the type and intensity of the land use being proposed;**

   Facts in support: The Project site is currently a vacant 20.18-acre site adjacent to an existing developed subdivision. The site has a steep topography towards the south end of the site and biologically sensitive areas to the west of the site that are being avoided to develop the Project. The areas make up approximately 9.74 acres that will be deed restricted to prevent any future development. The remaining 10.39-acres is physically suitable to accommodate the 51-unit subdivision, while providing new private streets, landscaping, adequate on-site circulation, emergency access and will be served by all required utilities needed for the Project.

3. **Adequate transportation facilities and public services exist or will be provided in accord with the conditions of development plan approval, to serve the proposed development; and the approval of the proposed development will not result in a reduction of traffic levels of service or public services so as to be a detriment to public health, safety, or welfare;**

   Facts in support: The Project will provide a new private road at the intersection of Shady Lane and Wildflower Avenue. The subdivision will have one main private street with five private alleys to access the 51-units. The new private street will have a 40-foot right-of-way, with sidewalk, curb and gutter and with approximately 24 on-street parking spaces and one mailbox bay parking space. The private streets will have two lanes, one for incoming traffic and one for outgoing traffic. The private alleys will have a 21-foot right-of-way with curb and gutters at each end.

   The Project site is located in an urban area that is currently served by existing utilities, including water, sanitary sewer, storm drainage, electricity, gas, and telecommunications infrastructure. The infrastructure to be provided would be a combination of public and private systems. A private new 8-inch water main line would connect to an existing 8-inch water main in Shady Lane at two locations, for a looped system. The Vallejo Flood and Wastewater District (VFWD) maintains existing sanitary sewer lines within the vicinity of the Project site. A new 8-inch sewer lateral would connect to the existing 8-inch public sanitary sewer main line located in Shady Lane at the northwestern corner of the Project site. The sanitary sewer would be designed and installed to VFWD standards. The Project would also include the replacement of the existing sewer lift station that currently serves the 141 single-family home development to the west of the proposed Project site with an upgraded system to serve both communities. The lift station would be owned and maintained by the VFWD. New utilities will be installed throughout the subdivision to support the Project that will not result in detriment to public health, safety and welfare of existing and future residents.

4. **The proposed development will not have a substantial adverse effect on surrounding land uses and will be compatible with the existing and planned land use character of the surrounding area;**

   Facts in support: The 51 new single family dwelling units have been designed to be in scale with existing development to the west of the Project site. The new homes have been designed to be compatible with the existing residential development to the west, such as overall scale of the units, similar roof pitches, and massing. The development will preserve approximately 13.25-acres of open space across four parcels, including approximately 2.5-acres of open space adjacent to the existing development to create a buffer between the two subdivisions. Therefore, the development as proposed, will not have a substantial adverse effect on the existing, nor planned surrounding land uses.

5. **The development generally complies with applicable adopted design guidelines; and**

   Facts in support: The Planned Development Plan includes separate design standards that relate to specific materials, colors, and development standards (e.g. setbacks, lot coverage, etc.) within the subdivision. The homes have been designed in the "Modern Farmhouse" architectural style. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations, thereby resulting in a development that will be consistent with the design standards included in the Planned Development Plan.

6. **The proposed development is demonstratively superior to the development that could occur under the standards applicable to the underlying base district, and will achieve superior community design, environmental preservation and/or substantial public benefit. In making this determination, the following factors shall be considered:**
   a. **Appropriateness of the use(s) at the proposed location.**
   b. **The mix of uses, housing types, and housing price levels.**
   c. **Provision of units affordable to persons and families of low and moderate income or to lower income households, if applicable.**
   d. **Provision of infrastructure improvements.**
   e. **Provision of open space.**
   f. **Compatibility of uses within the development area.**
   g. **Quality of design, and adequacy of light and air to the interior spaces of the buildings.**
   h. **Overall contribution to the enhancement of neighborhood character and the environment of Vallejo in the long term.**
   i. **Creativity in design and use of land; and**

   Facts in support: The Planned Development (PD) zoning and PD plan provide for a proposed development that is superior to a development that could occur under the standards applicable to the underlying RLD and RMD zoning districts. Unlike the underlying zoning districts, the PD plan allows less restrictive development standards, such as reduction in the minimum lot size, minimum lot widths and depths, maximum lot coverage, setbacks, etc. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations and including adequacy of light and air to the interior spaces of the buildings. The PD will preserve a total of 13.25-acres of open space of the total 20.18-acres. Overall, the development will contribute to

the enhancement of the existing neighborhood character and the environment of Vallejo for the long term by developing an underutilized site.

7. **The proposed PD rezoning and planned development plan has been reviewed in compliance with the California Environmental Quality Act, if applicable, and the requirements of this chapter.**

   Facts in support: An Initial Study/Subsequent Mitigated Negative Declaration and a Mitigation and Monitoring Report have been prepared for the Project in compliance with CEQA.

Section 5. Development Review Findings

1. **The project complies with all applicable specific standards and criteria of the Zoning Code.**

   Facts in support: The Project will rezone the Subject Property from RLD and RMD to Planned Development, as shown in Exhibit D of the Resolution. The Project is consistent with the Vista Cove Planned Development, as shown in Exhibit C of this Resolution,, such as setbacks, lot coverage, building height and design standards.

2. **The project is consistent with the General Plan and any applicable approved Specific Plan or Planned Development.**

   Facts in support: The Project site has a general plan land use designation of P-SF which applies to residential neighborhoods primarily characterized by detached single- family homes. Also has a land use designation of R-MH, which applies to residential neighborhoods largely characterized by single-family homes typically located in the central and more historic parts of Vallejo. The maximum permitted residential density in the P-SF is 9 units and acre and 25 units per acre in the R-MH land use designation. As proposed, the Project would construct 51 additional single-family dwellings units on a vacant and underutilized infill site adjacent to existing residential development. The proposed residential density of the Project is 2.5 units per acre (or 4.9 units an acre on the 10.39-acres being developed), consistent with the maximum permitted density for the P-SF and R-MH designation. The Project is consistent with the goals and policies of the Vallejo General Plan, as shown in Exhibit B of this Resolution.

   The proposed Project will add 51 additional single-unit dwellings to the available housing stock in the City on a vacant and underutilized infill site adjacent to existing residential development. The subdivision layout is compatible with the existing roadway network and existing residential development density in the surrounding area. The subdivision will have adequate vehicular and pedestrian access throughout the site and will feature of a mix of floor plan layouts to create an inviting neighborhood that will be complimentary to the existing neighborhoods in the vicinity of the Project.

   The Project also includes a rezone to Planned Development (PD).

   There is no specific plan applicable to the Project.

3. **The project complies with any design conditions, standards, or requirements imposed by a discretionary approval including but not limited to a Major or Minor Use Permit, Variance, Specific Plan, Planned Development, or tentative map applicable to the project or the location where it is proposed.**

   Facts in support: The Planned Development Plan include separate design standards that relate to specific materials, colors, and development standards (e.g. setbacks, lot coverage, etc.). The

homes have been designed in the "Modern Farmhouse" architectural style. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations, thereby resulting in a development that will be consistent with the design standards included in the Planned Development Plan.

There are no other discretionary approvals applicable to the Project or to the Project location.

4. **The project is in substantial compliance with any applicable adopted design guidelines.**

   Facts in support: The Project includes a rezoning to Planned Development with adoption of a PD Plan that includes site specific design and development standards. The Planned development Plan include separate design standards that relate to specific materials, colors, and development standards (e.g. setbacks, lot coverage, etc.). The homes have been designed in the "Modern Farmhouse" architectural style. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations, thereby resulting in development that will be consistent with the design standards included in the Planned Development Plan, as shown in Exhibit D of the Resolution .

5. **The project will serve to achieve groupings of structures that are well related one to another and which, taken together, will result in a well-composed urban design, with consideration given to site, height, arrangement, texture, material, color and appurtenances, the relation of these factors to other structures in the immediate area, and the relation of the development to the total setting as seen from key points in the surrounding area; only elements of design which have some significant relationship to outside appearance shall be considered;**

   Facts in support: The Project proposes to construct 51 new detached single-family dwellings with public streets, streetlights, and landscaping improvements. The Project proposes five different residential floor plans and three architectural styles to create visual interest throughout the subdivision.

6. **The project will be of a quality and demonstrates thoughtful site planning that will serve to protect the value of private and public investments in the area.**

   Facts in support: As described in the Planned Development, the architectural vision for Vista Cove subdivision is grounded in the principles of Wine Country Agrarian designs. Through thoughtful massing, material quality and variation, and detailed craftsmanship, the homes at Vista Cove subdivision would contribute to and enhance the aesthetic of the existing surrounding development.

   The proposed dwellings will be setback from the street to create landscape buffers adjacent to private sidewalks throughout the proposed subdivision. The proposed subdivision layout will provide an open space buffer between existing homes to the north and will incorporate new single-family dwellings that are oriented toward the street. Required detention and bioretention basins are grouped together and sited at the rear of the subdivision to provide a buffer from existing residential development to the west and to reduce visibility from public view. The proposed street pattern layout does not incorporate sharp curves and will promote safety for vehicles and pedestrians.

The project includes a total of 9.74 acres of undisturbed open space across two parcels: Parcel A (8.36-acres) and Parcel B (1.38-acres). These undisturbed open space areas would be fenced with access via private gates to facilitate maintenance activities only, and they would have signage installed to prevent trespassing. Future development would not be allowed on either of the two parcels. The project will also include 3.55 acres of common open space, across two parcels (Parcel C and D), that would include one bioretention area, walkways, a loop walk around a flexible use turf area, and a vista overlook for residents. The landscape design includes drought-tolerant and native landscaping to transition between the proposed residential area and adjacent open space.

7. **The project has been reviewed in compliance with the California Environmental Quality Act, if applicable, and the requirements of this Chapter.**

   Facts in support: See #7 in Section 4 above.

Section 6. Design Review Findings

Note: In accordance with VMC Section 16.604.02 the Design Review Board has reviewed and independently considered the applicable development standards (including the zoning adjustments proposed in conjunction with the Draft Planned Development Plan, as described in the staff report), the overall design, architecture, landscaping and Project aesthetics proposed, and the Design Review Board finds that all of the design elements are satisfactory as presented with no Project modifications recommended to the Planning Commission at this time.

A. **Is consistent with the purposes of this chapter, the design policies of the general plan and any applicable specific plan, any adopted applicable design guidelines.**

   Purposes of the Chapter

   1. **Establish regulations for an objective process that applies urban design principles to ensure that new construction supports the best of the city's architectural traditions.**

      Facts in support: As proposed, the Project meets objective process that applies urban design principles to ensure that new construction supports the best of the city's architectural traditions, as discussed in detail below.

   2. **Encourage new structures that show creativity and imagination, add distinction, interest, and variety to the community, and are environmentally sustainable.**

      Facts in support: The proposed home designs include 'Modern Farmhouse' architecture that will be constructed with a variety of high-quality building materials and painted with simple, neutral colors. Vertical and horizontal façade breaks, and appropriate building massing have been incorporated into the design of the subdivision and will create distinction in the context of the larger established neighborhood.

   3. **Promote architectural and design excellence in new construction and discourage poor quality development.**

      Facts in support: The Project details, colors, materials, and landscaping are integrated with one another in a way that ensures a visually consistent proposal. Each building elevation will consist of building features, materials, and colors typically associated with the Modern Farmhouse architectural style. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and

batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations. Overall, the Project architecture and landscaping propose high-quality, long-lasting material that will result in a quality development.

4. **Ensure that future development should:**
    a. **Reflect the values of the community.**
    b. **Enhance the surrounding environment.**
    c. **Visually harmonize with its surroundings and not unnecessarily obstruct scenic views; and**
    d. **Avoid nostalgic misrepresentations that may confuse the relationships among structures over time.**

    Facts in support: The Project reflects the promotion of development that targets underutilized sites, which is a policy identified in the General Plan. Due to its location, the Project will sit lower on the site as to not obstruct scenic views from existing residences to the east, and due to its nature and design, nor will it confuse the relationships among structures in the vicinity over time. The overall Project has been designed to wrap around the back side of the existing residential development in order to fit in with the existing development pattern.

5. **Ensure that decisions on housing development projects are based on objective design standards as required by the State Housing Accountability Act (Government Code Section 65589.5).**

    Facts in support: The Project complies with applicable, objective general plan and zoning standards. Therefore, in accordance with the provisions of the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), the city may not deny the Project or approve the Project at a reduced density without basing its decision on the written findings under Section 65589.5(j), which read as follows:

    1. The development would have a specific adverse impact on public health or safety unless disapproved, or approved at a lower density; and
    2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density

6. **Provide for new landscaping to create a visually pleasing setting for structures on the site.**

    Facts in support: Landscaping will be provided in the front yards, open spaces and around the bioretention basins. A total of 141 new trees, as well as shrubs and ground cover, will be planted within the Project to enhance the Project site. The new landscaping will create a visually pleasing setting for the homes to be constructed on the site.

7. **Promote the protection and retention of landmark, native, and specimen trees and if feasible mature canopy trees and other significant landscaping of aesthetic and environmental value.**

    Facts in support: The Project will remove a total of 69 on-site trees. An arborist report was prepared and a total of 83 trees were assessed, identifying seven different tree species, e.g. Coast Live Oak, Plum Cherry, Apple, Monterey Pine, Valley Oak, Toyon, and Strawberry Tree, with Coast Live Oak as the most common species. The trees ranged from poor to good

condition. A total of 47 significant trees will be removed and replaced with a total of 141 new trees, as part of the Project.

8. **Ensure that the design, quality, and location of signs are consistent with the character and scale of the structures to which they are attached and are visually harmonious with surrounding development.**

   Facts in support: As part of the Project, an entry monument sign, with an overall height of six feet and four inches, will be placed at the entrance of the new subdivision. The monument sign will be constructed of CMU blocks and will be precasted with board and batten veneer. The new sign will create a sense of place and is appropriately scaled with surrounding structures and is visually harmonious with the overall development. Additionally, new street and directional signage will be included.

9. **Promote the conservation, enhancement, preservation, and protection of historic resources.**

   Facts in support: Not applicable; there are no historic resources near this Project's location.

   Design policies of the General Plan

   Facts in support: The Project is consistent with the goals and policies of the Vallejo General Plan, as shown in Exhibit B of this Resolution.

   Adopted applicable design guidelines.

   Facts in support: The rezoning of the subject site from Residential Low Density and Residential Medium Density to Planned Development, will include adoption of the Vista Cove Planned Development Plan which includes design guidelines for residential development and design standards, landscaping, and fencing standards. As proposed, the Project is consistent with the proposed Vista Cove Planned Development Plan.

B. **Is consistent with any planning or zoning approvals by the director or the planning commission.**

   Facts in support: Not applicable; Neither the Director, nor the Planning Commission, have approved any previous entitlements at the site.

C. **Complies with any other relevant city policies or regulations.**

   Facts in support: The Project as proposed complies with VMC Chapter 16.202 – Residential Districts, as the Project has been designed to meet the requirements, as detailed in Table 3 and 4 of Attachment 2 of the staff report. The Planning Commission will act on the Development Review for the Project.

D. **Meets the following criteria:**
   a. **The aesthetic design, including its exterior design and landscaping, is appropriate to the function of the project and will provide an attractive and comfortable environment for occupants, visitors, and the general community.**

      Facts in support: The proposed Modern Farmhouse architectural style includes a variety of different building materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. With the application of neutral paint colors and installation of drought tolerant

front yard landscaping as proposed, all design elements will complement each other and provide an attractive and comfortable environment for occupants and visitors to the subdivision.

b. **Project details, colors, materials, and landscaping are fully integrated with one another and used in a manner that is visually consistent with the proposed architectural design.**

Facts in support: As described above, the proposed materials, colors and landscaping will be fully integrated with one another and will be used in a manner that is visually consistent with the proposed architectural design of a Modern Farmhouse style.

c. **The project has been designed with consideration of neighboring development.**

Facts in support: The Project has been designed with consideration of the existing neighborhood development to the east. The existing development is classified as detached, single- and two-story homes with hip and gable roofs, with a mixture of stucco, wood and batten siding. The proposed Project will incorporate two-story homes that include a variety of different building materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. With the application of neutral paint colors, and installation of drought tolerant front yard landscaping as proposed, all design elements will not only complement each other but will also complement the existing surrounding development to the west.

d. **The project contributes to the creation of an attractive and visually interesting built environment that includes well-articulated structures that present varied building facades, rooflines, and building heights and encourages increased pedestrian activity and transit use.**

Facts in support: The proposed detached single-family residences have been designed to be visually interesting, and they will be constructed with a variety of high-quality building materials and painted with simple, complementary colors. Vertical and horizontal façade breaks, and building massing have all been incorporated into the design of the homes. The building features wall articulation, and materials that are aesthetically pleasing and compatible with other newer developments in the community.

e. **Street frontages are attractive and interesting for pedestrians, address the street and provide for greater safety by allowing for surveillance of the street by people inside buildings and elsewhere.**

Facts in support: The proposed Project will activate an underutilized, vacant site by creating new roads and alleys for the subdivision. The street frontages have been designed to include a variety of different building materials, colors and landscaping to create an attractive streetscape and create an attractive street presence for pedestrians and passing motorists.

f. **The proposed design is compatible with the historical or visual character of any area recognized by the city as having such character.**

Facts in support: Not applicable; the subject site is not within any historic district of the city.

g. **The aesthetic design preserves significant public views and vistas from public streets and open spaces and enhances them by providing areas for pedestrian activity.**

Facts in support: The Project has been designed to take advantage of the views of vistas of the Carquinez Strait that will be visible from public streets and open spaces. To the extent feasible, the Project will preserve the views and vistas of the existing neighborhood to the west of the site. The Project will incorporate common open space to create a sense of place and provide an area for pedestrian activity.

h. **The proposed landscaping plan is suitable for the type of project and will improve the appearance of the community by enhancing the building, minimizing hardscape and softening walls; and the landscape plan incorporates plant materials that are drought-tolerant, will minimize water usage, and are compatible with Vallejo's climate.**

Facts in support: The proposed landscaping, including trees, shrubs and ground covering has been designed to improve the appearance of an underutilized site and minimize hardscape. The landscaping incorporates plant materials that are drought-tolerant, would minimize water usage, and are compatible with City of Vallejo's climate.

i. **The project has been designed to be energy efficient including, but not limited to, landscape design and green or eco-friendly design and materials.**

Facts in support: As required by the California Building Code, the Project has been designed to be energy efficient and will include features such as LED lighting and solar panels. The proposed landscaping has been designed to incorporate plant materials that are drought tolerant consistent with the California Water Efficient Landscaping Standards.

j. **The project design protects and integrates natural features including creeks, open space, significant vegetation, and geologic features.**

Facts in support: The Project will only develop approximately 10-acres of the vacant 20.13-acre site. The development has been designed to protect natural features and significant vegetation. The remaining 10.13-acre site will be left undeveloped and preserved as undisturbed open space.

Section 7. Decision.

BE IT FURTHER RESOLVED that the Planning Commission hereby recommends that the City Council approve Tentative Map (TM23-0001), Planned Development (PD24-0001), Development Review (DVR23-0018), Design Review (DR23-0006) and Landscape Review (LR23-0002) for the development of 51 single-family residences ("Vista Cove Subdivision"), subject to the conditions of approval in Exhibit A to the Resolution.

PASSED AND ADOPTED at a regular meeting of the Planning Commission of the City of Vallejo, State of California, on the 21st day of January 2026 by the following vote, to-wit:

AYES:
NOES:
ABSENT:
ABSTAIN:

_____
ANTHONY TAYLOR, CHAIRPERSON
City of Vallejo Planning Commission

Attest:

B. General Plan 2040 Policies
C. Planned Development Consistency
D. Vista Cove Planned Development Plan
E. Tentative Map – Dated June 2024

EXHIBT A

CONDITIONS OF APPROVAL

Tentative Map (TM23-0001)
Planned Development (PD24-0001)
Development Review (DVR23-0017)
Design Review (DR23-0006)
Landscape Review (LR23-0002)

Vacant Site at the northeast corner of Shady Lane and Wildflower Avenue
(APNs: 0079-171-170 and 0079-120-100)

PROJECT DESCRIPTION: The project includes a Tentative Map, Planned Development rezoning, Development Review, Design Review, and Landscape Review to allow the subdivision of two vacant parcels totaling approximately 20.13 acres into 57 parcels for the development of 51 detached single-family residences, and including four parcels dedicated to open space and bioretention areas, one parcel for a new private roadway network, and one for a new sewer pump station. The new single-family homes would include four distinct modern farmhouse-style floor plans ranging in size from 2,494 to 2,674 square feet, each featuring an attached two-car garage and driveway parking. The development also includes construction of a new private street, sidewalks, curbs and gutters, private alleys, street lighting, landscaping, and other related site improvements to support the proposed residential neighborhood.

A. PLANNING DIVISION

Pre-Building Permit

1. Prior to building permit issuance, Developer shall submit a numbered list to the Planning Division with a written response as to how each condition of approval contained in this report will be satisfied. The list should be submitted to the project planner who will coordinate continued development of the project. The conditions shall also be included in the permit set after the cover sheet with each condition listed.

2. Prior to issuance of any grading permit, building permit, or other discretionary or ministerial approval, and throughout project construction and operation, the applicant shall fully comply with and implement all applicable mitigation measures required by the Mitigated Monitoring and Reporting Program (MMRP) adopted by the City Council and incorporated herein by reference.

3. Pursuant to VMC 16.602.10.b, the site plan, floor plans, building elevations and/or any additional information or representations, whether oral or written, indicating the proposed structure or manner of operation submitted with an application or submitted during the approval process shall be deemed conditions of approval. Any approval may be subject to requirements that the applicant guarantees, warranties, or ensures compliance with the plans and conditions in all respects.

4. Prior to building permit issuance, Developer shall obtain a Temporary Use Permit from the Planning Division for any temporary office or construction trailer, as necessary.

5. Prior to building permit issuance, Developer shall obtain a Temporary Use Permit from the Planning Division for any subdivision signs during the time period of subdivision sales.

6. Prior to building permit issuance, Developer shall submit construction-level landscaping plans prepared by a registered landscape architect as part of the building plan set for review and approval. Landscape plans shall comply with Chapter 16.504 (VMC) and substantially comply with the landscape plans in the approved entitlements.

7. Prior to building permit issuance, Developer shall have recorded a deed restriction for Parcel A that restricts the development of future residential units in perpetuity. Said form of deed restriction shall be approved by the City Attorney prior to recordation.

8. Prior to final approval of the Final Map, Developer shall submit a copy of the draft CC&R's for the City's review and approval. City, as third-party beneficiary, shall have the power but not the obligation to enforce maintenance requirements and standards. The CC&Rs shall include a clause that there shall be no amendments without City approval.

<u>During Construction</u>

9. Construction activities shall be managed in compliance with the following requirements, as applicable:

    a. Site Watering. During the construction of a project, all portions of the site shall be watered as necessary to reduce emissions of dust and other particulate matter, and all stockpiles shall be covered.
    b. Maintenance. Streets and sidewalks shall be made dirt free at the completion of construction.
    c. Noise. All construction and transport equipment shall be muffled in accordance with state and federal laws.
    d. Emissions. Construction and transport equipment shall be operated so as to minimize exhaust emissions. During construction, trucks and equipment should be running only when necessary.
    e. Hours of Operation. Grading and pile driving operations within ¼ mile of residential units shall be limited to between 8:00 am and 5:00 p.m. on weekdays pursuant to Subsection 16.502.03.E.
    f. Water Run-off. All water run-off from construction sites shall be controlled. During construction, trucks and equipment should be running only when necessary, and shall comply with Chapter 12.41 of the Vallejo Municipal Code.

10. No person shall make, or cause to suffer, or permit to be made upon any public property, public right-of-way or private property, any excessive noise, annoying noise, amplified sound or vibrations that are physically annoying to reasonable persons of normal sensitivity or that are so harsh or so prolonged or unnatural or unusual in their use, time or place as to cause or contribute to the unnecessary and unreasonable discomfort of any persons of normal sensitivity located at the lot line of the property from which these noises emanate or that interfere with the peace and comfort of residents or their guests, or the operators or customers in places of business in the vicinity, or that may detrimentally or adversely affect such residences or places of business. (VMC Section 16.502.09 (C))

11. Construction, demolition, and related loading/unloading activities that may generate noise shall be limited to the following: 7 a.m. and 6 p.m. in Monday- Friday, Saturday 9 am- 6 pm and Sundays and holidays not allowed. (VMC Section 16.502.09 (D))

12. Fencing for construction sites shall not be installed until a building permit or grading permit has been issued and shall be removed prior to final inspection. In the event that the building permits expire before the construction is completed, the Director may issue a temporary use permit pursuant to Chapter 16.339, Temporary Uses, to allow the fencing to remain for a longer period of time. (VMC Section 16.505.08 (B))

Landscaping

13. Prior to operation/final building inspection, the landscape architect shall provide a complete Certificate of Completion and Certificate of Installation According to the Landscape Documentation in accordance with VMC Section 16.504.09 - Water Efficient Landscape Requirements. The documentation shall include the following:
    a. Certificate of Completion (VMC Section 16.504.09 (G.9))
    b. Irrigation Scheduling (VMC Section 16.504.09 (G.9.c))
    c. Schedule of Landscape and Irrigation Maintenance (VMC Section 16.504.09 (G.9.d))
    d. Landscape Irrigation Audit Report (VMC 16.504.09 (G.9.e))
    e. Soil Analysis Report (VMC Section 16.504.09 (G.9.f))

14. Prior to occupancy/final building inspection, Developer shall install landscaping and irrigation per approved plans. The landscape architect shall verify in writing that the landscaping and irrigation have been installed in accordance with the approved landscape plans with respect to size, health, number and species of plants, and the overall design concept.

15. Litter shall be removed from all landscaped areas in a timely fashion. (VMC Section 16.504.08 (B))

16. Turf areas shall be mowed on a regular basis and be kept green. Accumulation of leaves, twigs, bark, and other similar materials shall be removed on a regular basis. Planting areas shall be kept free of weeds at all times. (VMC Section 16.504.08 (C))

17. The Home Owners Association (HOA) shall ensure all landscaping shall be permanently maintained in a healthy and thriving condition at all times, in compliance with the approved landscape plan. Irrigation systems and their components shall be maintained in a fully functional manner consistent with the original approved design or upgraded to reflect current best practices for water efficiency. Regular maintenance shall include but is not limited to:
    a. Adjusting, checking, and repairing irrigation equipment; resetting automatic controllers; aerating and de-thatching turf areas; adding/replenishing fertilizer, mulch, soil amendments; insect control; the replacement of dead or diseased plants; pruning; watering; and weeding all landscaped areas.
    b. The trimming of vegetation is necessary to maintain the effective functioning of solar energy facilities and passive solar design features installed both on site and on adjacent properties.
    c. The trimming of vegetation is necessary to keep pedestrian and bicycle paths clear. (VMC Section 16.504.08 (A))
    d. Pruning, cultivating, weeding, fertilizing, replacement of plants, and watering on a regular basis.
    e. Pruning or removal of overgrown vegetation, cultivated or uncultivated, that may harbor rats, vermin, or other nuisances, or otherwise be detrimental to neighboring properties.
    f. The removal of dead, decayed, diseased, or hazardous trees, weeds and debris that create an unsightly appearance and may be dangerous to public safety and welfare or detrimental to neighboring properties or property values. Compliance shall be by removal, replacement, or maintenance.
    g. Landscaping (trees, shrubs, ground cover, turf, etc.) which, due to accident, damage, disease, lack of maintenance, or other cause, fails to show a healthy appearance and growth, shall be replaced. Replacement plants shall conform to all standards that govern the original planting installation, approved landscaping plan, or as approved by the director. (VMC Section 16.504.08 (D))

Fences and Screening

18. Prior to occupancy/final building inspection, Developer shall have installed all fencing per approved plans.

19. Maintenance. Fencing on site shall be continuously maintained with no sign of rust or disrepair. Graffiti shall be removed within forty-eight hours. (VMC Section 16.505.02 (B)).

20. General Requirements. All exterior mechanical equipment, whether on a roof, on the side of a structure, or located on the ground, shall be screened from public view. Exterior mechanical equipment to be screened includes, without limitation, heating, ventilation, air conditioning, refrigeration equipment, plumbing lines, ductwork, transformers, smoke exhaust fans, water meters, backflow preventers, service entry section, back-up and emergency generators, and similar utility devices.
    a. Screening shall be architecturally integrated into the main structure with regard to materials, color, shape, and size to appear as an integral part of the building or structure.
    b. Equipment shall be screened on all sides, and screening materials shall be opaque.
    c. When screening with plants, evergreen types of vegetation shall be planted and maintained. Plant material sizes and types shall be selected and installed so that, at the time of building occupancy, such plants effectively screen their respective equipment.
    d. The use of wood expanded metal lath, and chain link for the purpose of screening is prohibited. (VMC Section 16.505.10)

Lighting

21. Lighting shall be designed, located, and installed to be directed downward or toward structures, be shielded or fully shielded, and shall be well-maintained in order to prevent glare, light trespass (unwanted light on adjacent lots and public rights-of-way), and light pollution to the maximum extent feasible. No permanently installed lighting shall blink, flash, or be of unusually high intensity or brightness, as determined by the Director. (VMC Section 16.506.04 (B)) Time clocks or photo-sensor systems may be required as a condition of approval of a discretionary permit. (VMC Section 16.506.04 (D))

General Requirements

22. The development of the subdivision shall be subject to the development standards of the Vista Cove Planned Development.

23. All model homes that are landscaped shall use signs and written information to demonstrate the principles of water efficient landscapes described in VMC Chapter 16.504. Signs shall be used to identify the model as an example of a water efficient landscape featuring elements such as hydrozones, irrigation equipment, and others that contribute to the overall water efficient theme. Signage shall include information about the site water use as designed per this chapter; specify who designed and installed the water efficient landscape; and demonstrate low water use approaches to landscaping such as using native plants, graywater systems, and rainwater catchment systems.

24. Developer shall contact local postal authorities to obtain the requirements for mail facilities for the project. The design and location of mail receptacles shall be reviewed and approved by the Planning Division and shown on the Utility, Landscape, and Building Plans, prior to issuance of Building Permits. Mail facilities shall be installed prior to occupancy approval.

25. Developer shall submit a written request for new street names with a site plan showing their location to the Planning Division for review and approval, at the time of submittal of Improvement Plans and Final Map. Include a list of alternatives for each name, as some names may not be acceptable.

26. Pursuant to VMC Section 15.08.110, the approval of the Tentative Map shall automatically expire three years (36 months) (MONTH, XX, 202X) after its approval.

27. The entitlement of Planned Development, Development Review, Design Review, and Landscape Review shall automatically expire within three years (36 months) of the effective date of this approval, on Month XX, 202X, unless the use is exercised or extended (VMC Section 16.602.12 (A)). Issuance of a building permit shall constitute exercise of rights; provided, however, that, unless otherwise specified as a condition of project approval, the permit shall expire if:

    a. The building permit expires.
    b. Final inspection is not completed, or certificate of occupancy issued within the time specified as a condition of project approval.
    c. The rights granted under the permit are not exercised within one year following the earliest to occur of the following: issuance of a certificate of occupancy; or if no certificate of occupancy is required, the last required final inspection for the new construction. (VMC Section 16.602.11 (B))

28. The Director may approve a one-year extension of any permit or approval granted for a residential or non-residential project under the Zoning Code upon receipt of a written application and fees received fifteen calendar days before the expiration date with the required fee prior to expiration of the permit. (VMC Section 16.602.11 (C.1))

29. For new developments, utilities including, but not limited to, all electrical, telephone, cable television, fiber-optic cable, gas, water, sewer, irrigation/recycled water, and similar distribution lines providing direct service to a project shall be installed underground within the site. This requirement may be waived by the Director upon determining that underground installation is infeasible, or the electrical line is otherwise exempt from an under-grounding requirement. (VMC Section 16.501.10)

30. Within five business days after project approval, the Applicant shall pay the Notice of Determination filing fee (the latest fees in effect at the time of payment) for County Clerk processing, made payable to Solano County and submitted to the City of Vallejo Planning Division. If an in-person filing is required, such filing shall be completed by the Applicant, unless directed otherwise by the Planning Division. NOTE: If the fees are not paid and the Notice of Determination is not filed within five working days after approval of the project, it will extend time frames for California Environmental Quality Act (CEQA) legal challenges.

31. Developer shall obtain an inspection from the Planning Division prior to occupancy/final building inspection. All inspections require a minimum of 24-hour notice. Occupancy permits shall not be granted until all construction and landscaping is completed and finaled in accordance with the approved plans and required conditions of approval or a bond has been posted to cover all costs of the unfinished work as agreed to by the Planning and Development Services Director.

32. Developer shall indemnify, hold harmless, and defend City, its officers, officials, directors, employees, agents, volunteers and affiliates and each of them from any and all claims, demands, causes of action, damages, costs, expenses, actual attorney's fees, Developer's fees, expert fees, losses or liability, in law or in equity, of every kind and nature whatsoever arising out of or in connection with Developer's operations, or any subcontractor's operations, to be performed under this agreement for Developer's or subcontractor's tort negligence including active or passive, or strict negligence, including but not limited to personal injury including, but not limited to bodily injury,

emotional injury, sickness or disease, or death to persons and/or damage to property of anyone, including loss of use thereof, caused or alleged to be caused by any act or omission of Developer, or any subcontractor, or anyone directly or indirectly employed by any of them or anyone for the full period of time allowed by the law, regardless to any limitation by insurance, with the exception of the sole negligence or willful misconduct of the City. No modification of the project, any application, permit, certification, condition, environmental determination, other approval, change in applicable laws and regulations, or change in processing methods shall alter the Developer's indemnity obligation.

B. **BUILDING DIVISION**

1. Plans and permits required for Building, mechanical, plumbing, and electrical work per California Code of Regulations, Title 24, and applicable City Ordinance in effect at the time of completed Building Permit application date and required fees paid at time of application.

2. Soils Report shall be required for foundation plan design.

3. A separate permit shall be required for each structure.

C. **PUBLIC WORKS**

1. All public improvements shall be designed and constructed to current City of Vallejo Design Standards, unless otherwise noted within these conditions of approval.

2. All frontage improvements along Shady Lane and Wildflower Road shall be designed and constructed to City of Vallejo Design Standards, including but not limited to: curb, gutter, sidewalk, curb ramps, streetlighting, and pavement surface improvements including signing and striping.

3. All interior streets shall be designed and constructed per the Tentative Map. Street pavement sections shall be designed to City of Vallejo Design Standards.

4. Grading and drainage shall be designed so that surplus drainage is directed overland so as not to jeopardize existing or proposed buildings with flooding. All drainage shall be directed to existing or proposed streets or the proposed Bio-retention Basins.

5. The project shall comply with the requirements of the most current National Pollutant Discharge Elimination System (NPDES) permit issued to the City of Vallejo, which incorporates Low Impact Development (LID) Best Management Practices in the overall design to address the issue of ongoing post-construction stormwater quality for the project site. Stormwater Quality shall be designed for the entirety of the site.

6. Prior to beginning construction of public improvements, Developer shall enter into a Subdivision Improvement Agreement with the City. The Developer shall furnish the necessary insurance, bonds and pay all fees associated with the Agreement.

7. Existing public facilities damaged during the course of construction shall be repaired by the Developer, at his sole expense, to the satisfaction of the City Engineer.

8. The project Engineer shall coordinate grading design closely with the project Geotechnical Engineer. Specifically, the Geotechnical Engineer shall be consulted to evaluate and address issues related to:
    a. Geologic Hazards
    b. Retaining Wall Design Parameters

9. The developer shall retain a registered Geotechnical Engineer to conduct a Geotechnical Investigation of the project area. Two copies of the project Geotechnical Report shall be submitted to the Public Works Department prior to submittal of Construction Plans. The Geotechnical Report shall include details and recommendations regarding the following:
    a. Geologic Hazards
    b. Grading Limitations and Requirements
    c. Foundation Design
    d. Settlement
    e. Retaining Wall Design as Required
    f. Slope grading shall comply with the Geotechnical Report. Slopes steeper than 3H:1V shall not be allowed in the public right-of-way. Slopes steeper than 2H:1V shall not be allowed on-site.
    g. A grading plan shall be prepared by the Developer's Civil Engineer and approved by the City Engineer. The following information shall be shown on the Grading Plan:
    h. Geologic contours, landscaping, fences, buildings, or other improvements
    i. Existing trees to be saved in place or removed
    j. Furnish all necessary details to clearly convey recommendations outlined in the project geotechnical investigation
    k. Cut/Fill interfaces and limits of grading
    l. Limits of existing geologic hazards as identified by the Geotech. Engineer
    m. Lot boundaries and road rights-of-way
    n. Proposed pad elevations, finished contours and lot grading details
    o. Top of curb elevations
    p. Perimeter cross-sections along all sides of the project to show the proposed project's interface with abutting properties and streets
    q. Plan view of proposed drainage facilities including storm drains, catch basins, manholes and underdrains
    r. Parking lot surface drainage, pavement grades, ridge lines, etc.

10. Retaining walls over 18 inches tall shall be concrete or masonry. Retaining walls over four feet tall shall be designed by a Civil or Structural Engineer.

11. The developer shall prepare a Storm Water Control Plan and Report for the project, consistent with the City of Vallejo requirements. Please refer to the Stormwater C.3 Guidebook prepared by the Contra Costa Clean Water Program.

12. All stormwater treatment measures shall be adequately operated and maintained. Prior to the issuance of the first building permit, the property owner shall enter into a Stormwater Treatment Measures Maintenance Agreement with the City for all privately maintained treatment devices. This agreement is included in the document entitled "Storm Water Requirements for Development Projects- Packet for Project Applicants."

13. The Developer or any successor in interest shall obtain all necessary permits for storm water discharges, including but not limited to the State Water Resources Control Board Construction General Permit. Developers whose projects disturb one or more acres of soil or whose projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, shall obtain coverage under the General Permit for Discharges of Storm Water Associated with Construction Activity (State Water Resources Control Board Construction General Permit, 99-08-DWQ). Construction activity subject to this permit includes clearing, grading and disturbances to the ground such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility.

14. An erosion and sedimentation control plan shall be included and prepared by the Developer's Civil Engineer. The erosion control plan shall include protection measures such as:
    a. sedimentation basins,
    b. check dams
    c. straw wattles
    d. hydroseeding details.

15. Prior to the approval of the construction drawings, the Developer shall be responsible for developing and implementing a Storm Water Pollution Prevention Plan which shall be reviewed and approved by the City of Vallejo.

16. The project architect and engineer shall coordinate design closely with the project landscape designer. Specifically, they shall consult the landscape designer to evaluate and address issues related to:
    a. Fencing/wall layout and details
    b. Locations and sizes for irrigation services
    c. Sight distance constraints for fencing and landscaping
    d. Depth of cover and tree setbacks over water, sewer and storm drain lines in landscape areas.

17. Landscaping plans shall be prepared by a registered Landscape Architect and City-maintained landscaping shall be designed per City standards. Landscaping and irrigation plans shall be designed to comply with the City's Water Efficient Landscaping Ordinance. Use of turf and other water intensive landscaping shall be minimized.

18. A Homeowner’s Association (HOA) shall be formed and shall be responsible for the ownership, maintenance, repair, restoration, replacement, and management of proposed shared improvements such as the interior streets, onsite storm drain system, Open Space Lots (Parcels A, B, C, D, and F) and the Bio-Retention Basin. The HOA will be responsible for enforcing the CC&Rs and providing written notice of any violations to the property owners.

19. Prior to submitting improvement plans for City review, a Tentative Subdivision Map, including legal descriptions and plats, shall be submitted to the City for review and approval. The Subdivision Map shall be prepared in accordance with the State Map Act and all local ordinances. Construction shall not commence until a Final Subdivision Map has been approved by the City and recorded. Developer shall furnish to the City of Vallejo appropriate fees to garner a mylar copy of the County-recorded map.

20. A title report, current within the past 90 days, shall be submitted with the subdivision map. The title report shall include the entire legal boundary of the property being subdivided.

21. Closure calculations shall be submitted with the initial map. All calculated points within the map shall be based upon one common set of coordinates. All information shown on the map shall be directly verifiable by information shown on the closure calculation printout. The point of beginning shall be clearly identified and all lot acreage shall be shown and verifiable from information shown on the closure calculation printout. Additionally, the square footage of each lot shall be shown on the subdivision map. Appropriate easements shall be provided for public facilities located on private property.

22. A Public Utility Easement, Planting Easement, and Emergency Vehicle Access Easement shall be dedicated along the private streets, as shown on the Tentative Map.

D. **Fire Prevention**

Fire Code Requirements

1. Access roads shall be designed and maintained to support the imposed loads of fire apparatus weighing 70,000 lbs. with an all-weather driving surface. The turning radius shall be determined by the fire official. Please submit scaled drawings for review prior to building permit issuance.

2. A fire apparatus turn-a-round is required when buildings are more than 150 feet from a public roadway.

3. Access roads shall have an unobstructed width of not less than 20' (16' for single residential and (EVA) with a maximum grade of 15%. Access roads shall have a minimum of 13'-6" of vertical clearance, including trees, wires and overhead signs. Speed bumps or other vertical traffic calming devices are prohibited on routes of fire access.

4. All access roads shall be installed and maintained serviceable prior to and during combustible construction.

5. Access roads that are fire lanes shall either be posted with permanent all-weather signs constructed and installed in accordance with the Fire Department Fire Lane Marking Standards and shall all have curbs painted red and a sign posted at each entrance. Contact the Fire Prevention Bureau for further information and design templates. Location of such area's shall be determined prior to final inspection.

6. Fire flow shall be 1500 GPM for 2 hours. 2022 CFC Appendix BB. Please submit a flow test from the Vallejo Water Division.

7. Fire Hydrants shall be located in accordance with the 2022 California Fire Code Appendix C. Fire-Flow requirements for buildings shall be in accordance with the 2022 California Fire Code Appendix B Table B105.1. (1) (Fire mains shall be engineered as a grid system, connected at both ends, with isolation valves)

8. Fire hydrants must be installed and approved by the Fire Department prior to combustible construction. Fire hydrants shall be spaced a maximum of 500 feet apart and a maximum distance of 250 feet to any point fronting a street. Please indicate on the plans the location of all existing and proposed fire hydrants. If needed, approved impact protection shall be installed as necessary to

protect hydrants from vehicular damage. Please submit plans to the Fire Prevention Division to verify location of all fire hydrants for this project.

9. Access roads that are fire lanes shall either be posted with permanent all-weather signs constructed and installed in accordance with the Fire Department Fire Lane Marking Standards or shall all have curbs painted red and a sign posted at each entrance. Contact the Fire Prevention Bureau for further information and design templates. Location of such area's shall be determined prior to final inspection.

10. Prior to final inspection, in accordance with the 2022 California Fire Code, approved address numbers shall be placed on all new and existing buildings in such a position as to be plainly visible and legible from the street or road fronting the property. Said numbers shall clearly contrast with their background. The characters shall be a minimum of 4" high (6" for Commercial) with a 1/2" stroke. The size of the building and distance or location of the address numbers from the roadway may necessitate larger numbers.

11. An NFPA13D automatic fire sprinkler system is required for all residential buildings. Please submit 2 sets of plans and calculations for each house to the Fire Marshal's Office and obtain permit prior to installation. Fees are $580 each system, plus $6.71 per head.

12. Provide smoke detectors in all sleeping rooms and common hallways. Detectors shall be hardwired with battery backup. Electrical circuits supplying detectors shall be separate dedicated lines with no other devices on the circuits.

13. Carbon monoxide detectors shall be installed in accordance with the manufacturers recommendations.

14. This area does not fall under a fire hazard severity zone under the CSFM FHSZ maps. Although not required, it is recommended that all vegetation on the property shall be maintained to reduce the risk of damage from a vegetation fire in accordance with the VMC Chapter 7.56. This includes creating a "Defensible Space" area around the structure for a minimum of 100 feet, trimming overhanging tree branches to 6 -8 feet above ground, keeping dry fuels cut low to the ground, planting fire resistive plants, and keeping branches trimmed within 10 feet of all chimney(s). Please see the attached Weed Abatement Guidelines for more information.

15. All roof material shall be rated class "C" or better.

16. A final inspection from the Fire Prevention Division is required.

E. **Water Department**

1. CODE REQUIREMENTS. All code requirements as stated in Title 11 of the Vallejo Municipal Code (VMC) and Vallejo Standard Specifications and Standard Drawings adopted in 2011 (VSSSD) that apply to this project shall be conformed to. The project is being made aware of codes that require extra attention by the following items.
    a. WATER SYSTEM PLANS (VSSSD Section 4.1). All water system improvements shall be consistent with the latest Vallejo Water System Master Plan, prepared by Kennedy/Jenks Engineers. Prior to Improvement plan approval and building permit issuance, water system improvement plans shall be submitted to the Water Department for review and approval, and shall contain at least:
        i. Location and size of fire sprinkler service connection(s).

ii. Location and size of existing and proposed domestic service connection(s).
iii. Location and size of irrigation service connection(s), if any.
iv. Location of fire hydrants.
v. Location of structures with respect to existing public water system improvements, such as mains, meters, etc.
vi. Location and size of any new water mains.
vii. Location and size of backflow prevention devices (required on water service connections to irrigation systems, certain commercial water users, and to commercial fire sprinkler systems, per City Ordinance 922 N.C. (2d).

b. FIRE FLOW REQUIREMENTS (VSSSD Section 4.1). Fire flow requirements of the Fire department shall be complied with. Fire flow at no less than 25 psig residual pressure shall be available within 1,000 feet of any structure. One half of the fire flow shall be available within 300 feet of any structure.
   i. For single family residential units, the fire flow is 1,500 gpm.
   ii. For other developments, see the Vallejo Water System Master Plan, 2015, prepared by Kennedy Jenks.

c. HYDRAULIC CALCULATIONS (VSSSD Section 4.1). Prior to Improvement Plan and building permit issuance, hydraulic calculations shall be submitted to the Water Director demonstrating that the fire flow requirements are complied with.

d. FIRE PROTECTION SYSTEMS (VSSSD Section 4.1). Fire hydrant placement and fire sprinkler system installation, if any, shall meet the requirements of the Fire Department. For combined water and fire services, the requirements of both the Fire Department and the Vallejo Water System Master Plan, with latest revisions, shall be satisfied.

e. WATER EASEMENTS (VSSSD Section 4.1). Easements shall be granted for all water system improvements installed outside the public right-of-way in the City's Standard Form for Grant of Water Line Easement with the following widths:
   i. 15 ft. wide (minimum) for water mains.
   ii. 10 ft. wide (minimum) for fire hydrants, water meters, backflow preventers, double detector check valves, etc.
   iii. Other facilities will be reviewed by the Water Department.

f. WATER SERVICE BONDS AND FEES (VMC Sections 11.16, 11.18, 11.20 and 11.24). Water service shall be provided by the City of Vallejo following completion of the required water system improvements and payment of applicable fees. Performance and payment bonds shall be provided to the City of Vallejo prior to construction of water system improvements. Fees include those fees specified in the Vallejo Municipal Code including connection and elevated storage fees, etc., and fees for tapping, tie-ins, inspections, disinfection, construction water, and other services provided by the City with respect to the water system improvements. The Water Department may be contacted for a description of applicable fees. These fees have to be paid prior to issuance of the building permit.

2. Apply and pay for Fire Flow Test with the Water Department in order to determine operation of sprinkler system and final service size.

3. Provide water meter and service sizing calculations per most recent California Plumbing Code, include a water fixture count table.

4. As of January 1, 2018, all units in multi-family, commercial, or combination thereof, buildings shall be individually metered (if existing plumbing allows or is re-configured) by the City, additional meters at the owner/applicant's expense; or, master metered by the City, and sub-metered by the property owner, with approved/certified meters. Per California Senate Bill 7 (SB7).

5. Prior to occupancy or final building inspection, install water system improvements as required. Backflow device/s where required shall be installed in areas hidden from public view and/or shall be mitigated by landscaping.

6. Since this is a condominium development that has private streets the Water Facilities (mains, fire hydrants, pressure reducing facility, service laterals, etc.) shall be private and not owned or maintained by the City. The development shall have a master meter set in the existing right-of-way for Shady Lane to serve this development.

7. The on-site water facilities shall be owned and maintained by the HOA.

8. Based on the site-specific water master plan one 6-inch water service shall be installed to serve this development. (PHD + FF = 100 GPM + 1500 GPM = 1600GPM)

9. The site-specific water master plan prepared by Kennedy Jenks dated May 6, 2023 shall be updated to show the June 10, 2025 Development Plan for Vista Cove Development and these Conditions of Approval.

F. Vallejo Flood and Wastewater
PROJECT-SPECIFIC CONDITIONS OF APPROVAL

Storm Drainage

1. The HOA shall be responsible for owning and maintaining all the proposed storm drain infrastructure, including pipelines, collection structures, basins and ponds, and outfall structures. VFWD will require a maintenance manual and agreement that documents ownership and maintenance obligations by the HOA.

2. Based on the existing contours, EX DA 3 and EX DA 2 appear to have more contributing areas to the west. Revise the existing and developed conditions drainage areas accordingly. Update the drainage study calculations and confirm compliance with all VFWD Standards.

3. Submit design plans for the detention basin outfall (end wall and riprap apron structure) and ensure all weather access is available. Provide hydraulic design calculations showing that erosion control at the outfall structure is designed for the highest potential flow velocity. VFWD and the City of Vallejo will review for approval of the proposed outfall location, which shall be privately maintained.

4. Comply with the Regional Water Quality Control Board requirements for trash capture, for

developments larger than 10,000 square feet, pursuant to VFWD Engineering Standards, Section 4.12.

Sanitary Sewer

5. At low points in the proposed sanitary force main, install an appropriately sized blow-off valve, to clear accumulated solids.

6. Sanitary sewer laterals shall be installed away from driveways and in compliance with VFWD standards.

7. Connections from new gravity sewer lines to the existing SS shall be made at a SSMH per VFWD Standards.

8. VFWD shall own and maintain the public sewer system within the private streets and alleys, up to VFWD's District clean out, within dedicated easements.

9. Sewer Force Main material shall be Fusible HDPE. Confirm C-factor of 110 and provide total dynamic head calculations to confirm that the chosen pumps and design flow rate of 220 gallons per minute are still appropriate.

Sanitary Sewer Pump Station

10. The new Sanitary Sewer Pump Station shall conform to the requirements in the Basis of Design (BOD) - Shaaf & Wheeler dated 11/24/25, and details shall be provided on the Improvement Plans.

11. Demolition of the existing Sewer Pump Station shall be subject to approval of VFWD. Details shall be provided on the Improvement Plans.

12. The BOD has been reviewed by VFWD. It provides parameters for the pump station improvements, features, and anticipated operations. The current layout of all improvements and features is subject to review and approval by VFWD, during final design.

13. The Developer shall provide a hydraulic transient analysis during final design, to assess surge conditions. If surge protection is determined necessary to protect the lift station, Developer shall design and construct a surge protection system.

14. The site layout and pump station equipment shall be reviewed and approved by VFWD prior to approval of the plans.

15. VFWD requires a building over the MCC and other VFWD electrical components, and any variance from that is subject to VFWD approval.

16. An 8' tall wood good-neighbor fence shall be constructed between the pump station and Lots 31 and 51.

17. A truck turning template exhibit dated 11/24/25 in the BOD was reviewed by VFWD. Any changes to access based on the relocation of facilities must be approved by VFWD.

18. VFWD may request a letter signed by the Geotechnical Engineer stating that any adjacent slope will be stabilized in relation to the final location of the proposed wet well, and won't create future issues that decrease the integrity of the wet well.

Onsite Utilities/Easements

19. The Developer shall dedicate Parcel E to VFWD (fee title) for the new Sanitary Sewer Pump Station.

20. The 20-foot wide Private Access Easement proposed over Parcel E shall be eliminated if determined unnecessary. If an easement is required, it shall be relocated and/or reduced as necessary to accommodate the final design layout of the VFWD sewer lift station.

21. All easements over storm drainage infrastructure shall be dedicated to the HOA for maintenance of such infrastructure. The easements shall be identified in the maintenance manual and agreement.

22. No trees or other permanent structures will be allowed within a VFWD easement area without prior written approval.

23. The Developer shall dedicate access and maintenance easements to VFWD on the private roadways and alleys for the public sewer pipes. The easement shall be minimum 20 feet in width.

GENERAL CONDITIONS OF APPROVAL

24. The Developer shall size the storm drain lines to convey the peak 15-year, 24-hour design storm flows with the hydraulic grade line (HGL) at least 1.0 feet below the gutter flow lines and maintenance hole rims.

25. Prior to building permit issuance, a VFWD Sewer Connection Permit is required. The Developer shall pay all applicable fees prior to issuance of any permit.

26. The Developer shall design building pads at least 1.0 feet above the 100-year, 24-hour design storm water surface elevations (WSEs)

27. The Developer shall minimize the storm drainage system operations and maintenance (O&M) efforts and costs to the HOA.

28. All public improvements shall be designed and constructed to current VFWD Standards. If Conditions of Approval from VFWD, City of Vallejo or County of Solano call for differing standards of development, the higher standard shall apply.

29. Submit complete improvement plans and supporting documentation, for all proposed sanitary sewer and storm drainage construction, including the sewer pump station, to VFWD for review and approval. Plans shall be revised, as needed, at the discretion of VFWD and the City.

30. Provide construction details for all proposed connections to existing facilities for storm water and sewer pipes, and maintenance holes.

31. All sanitary sewer and storm drainage facilities shall be clearly labeled to distinguish ownership as either private or public on improvement plans.

32. All sewer laterals and cleanouts shall be in accordance with VFWD Standards.

33. The 100-year storm overland release location shall be shown on the grading plans. Provide a secondary (surface flow) drainage system to handle flows more than the capacity of the primary system (piped or channelized). Proposed building locations shall not be constructed within the

secondary drainage path. Determine the tributary area for the 100-year storm. This may differ from the 15-year tributary area.

34. The Developer shall submit grading and erosion control plans to VFWD for review. Do not block drainage from adjacent lands.
35. Bioretention/water quality basins shall be owned, operated, and maintained by the HOA.
36. "No Dumping Drains to Bay" markings shall be installed at each new storm water drain inlet per VFWD's Standards.
37. VFWD approval of public and private storm drainage and sanitary sewer system designs are a condition precedent to the approval of the improvement plans.
38. All storm drainage and sanitary sewer outside of building footprints shall be inspected by VFWD.
39. The Developer's engineer shall provide the Engineer's estimate of probable construction cost itemizing all sewer and storm drain improvements. The inspection fee shall be calculated and paid prior to VFWD approval of the improvement plans.
40. In the event any claim, action or proceeding is commenced naming VFWD or its agents, officers, and employees as defendant, respondent or cross defendant arising or alleged to arise from VFWD's approval of the project, the project Developer shall defend, indemnify, and hold harmless VFWD or its agents, officers and employees, from liability, damages, penalties, costs or expense in any such claim, action, or proceeding to attach, set aside, void, or annul an approval of the City of Vallejo, or any advisory agency to the City. The Developer shall defend such action at Developer's sole cost and expense which includes court costs and attorney fees. VFWD shall promptly notify the Developer of any such claim, action, or proceeding and shall cooperate fully in the defense. Nothing in this condition shall be construed to prohibit the VFWD from participating in the defense of any claim, action, or proceeding, if VFWD bears its own attorney fees and cost, and defends the action in good faith. Developers shall not be required to pay or perform any settlement unless the Developer in good faith approves the settlement, and the settlement imposes no direct or indirect cost on VFWD, or its agents, officers, and employees.
41. No public Sanitary sewer or storm drain infrastructure shall be located or installed in the rear of any private lot, unless otherwise approved by VFWD.
42. VFWD will use a consultant to provide plan review for new development. The Developer shall be responsible for all costs associated with the consultant's review, through the Reimbursement Agreement provisions.
43. The Developer shall provide electronic (AutoCAD) files of final sewer and stormwater infrastructure as a condition precedent to VFWD approval of the Improvement Plans.
44. The Developer shall be responsible for all costs and work necessary to relocate any existing VFWD facilities.
45. Developer shall contact VFWD at least 72 hours prior to beginning construction, for a pre-construction meeting.
46. Existing public and private VFWD facilities damaged during construction shall be repaired by the Developer, at his/her sole expense, to the satisfaction of VFWD.
47. The conditions set forth in this document are not all inclusive. The Developer shall thoroughly review all VFWD, City, State, and Federal planning documents associated with this map and comply with all regulations, mitigations, and conditions set forth.

EXHIBIT – B

GENERAL PLAN 2040 POLICIES

Policies and Actions	*Facts in Support*
POLICY NBE-1.6 **Open Space.** Conserve and enhance natural open space areas in and adjacent to Vallejo and its waterfront.	*The proposed project would preserve approximately 13.25-acres of the project site as natural open space and approximately, 9.86-acres of the 13.25-acres of the open space will be deed restricted in perpetuity to ensure it is maintained as natural open space.*
POLICY NBE-1.8 **Urban Forest.** Encourage planting of street trees and landscaping to beautify the city, encourage walking and biking, and create a stronger sense of identity.	*The project involves the planting of 141 trees, and many shrubs and ground covers contributing to the beautification of Vallejo and the cultivation of an urban forest. The construction of sidewalk improvements within the project will encourage walking within the subject site.*
POLICY NBE-2.3 **Inviting, Compatible Design.** Promote attractive development that is compatible with surrounding uses.	*The 51 detached single-family residences will incorporate a Modern Farmhouse style look, and the building height and massing of the structures will not be out of scale with those located in close proximity.*
Action NBE-2.3A: Continue to utilize development approval conditions to achieve compatibility between nearby uses and scale and style of buildings, and to establish limitations on activities that could create potential adverse effects.	*The scale and style of the residences is compatible with the scale and style of the nearby subdivision.*
Policy NBE-1.15 **Energy Efficiency.** Support measures to reduce energy consumption and increase energy efficiency in residential, commercial, industrial, and public buildings.	*The project would be required to comply with standards set forth in the California Building Code (CBC) Title 24, which would minimize the wasteful, inefficient, or unnecessary consumption of energy resources during operation. California's Green Building Standards Code (CBC Title 24, Part 11) requires implementation of energy efficient light fixtures and building materials into the design of new construction projects.*
Policy NBE-1.5 **Scenic Vistas.** Protect and improve scenic vistas, including views from Interstate 80 and State Route 37 in Vallejo.	*Although the project site is located approximately 0.85-mile northwest of the Carquinez Strait and 0.3-mile southeast of the Benicia State Recreation Area, these features are not identified as a scenic vista or significant visual resource in the City's General Plan. San Pablo Bay, Mare Island Strait, the Vallejo Waterfront, Sulphur Springs Mountain, Vaca Mountains, White Slough, Napa River Wetlands, and Sky Valley, the resources designated as scenic vistas, are not visible from the project site or nearby vicinity. These features are located over two miles from the project site and views of these resources are obstructed by intervening*

	development, topography, and mature trees. The project site and surrounding areas are not located within the residential view district and would not impact scenic vistas of designated views
Policy NBE-3.13 **Neighborhood Character.** Preserve the character of existing single-family residential neighborhoods.	*The project at the northeast corner of Shady Lane and Wildflower Avenue lies within a well-established, lower-density residential neighborhood of southeastern Vallejo. The proposed homes will be similar in scale and massing as those of the existing residential neighborhood to the west.*
Policy NBE-3.14 **Neighborhood Corridors.** Connect the community with mixed use corridors that function as neighborhood main streets for adjacent residential areas.	*The proposed development will connect the new subdivision with an existing residential subdivision that connects it to a mixed-use corridor along Glen Cove Way.*
Policy CP1.12 **Clean Air.** Protect the community from harmful levels of air pollution.	*The project will be required to comply with MMRPAQ-2b.1 which ensures the proposed project implements the Air District's Basic BMPs throughout all phases of construction. Measures include watering exposed surfaces, covering haul trucks, limiting vehicle speeds on unpaved roads, using wet power sweepers, and suspending work during high winds. Additional requirements involve paving surfaces promptly, washing vehicles before site exit, stabilizing unpaved access roads, and posting contact information for dust complaints. Implementation of MMRP AQ-2b.1 would further ensure that the proposed project would not disrupt or hinder implementation of a control measure from the Clean Air Plan.*
Action CP-1.12C: Provide information regarding advances in air-quality protection measures to schools, homeowners, and operators of "sensitive receptors" such as senior and child care facilities.	*See response to Policy CP-1.12: Clean Air above.*

Policy NBE-1.1 **Natural Resources.** Protect and enhance hillsides, waterways, wetlands, occurrences of special-status species and sensitive natural communities, and aquatic and important wildlife habitat through land use decisions that avoid and mitigate potential environmental impacts on these resources to the extent feasible.	*The project will preserve hillside areas as open space to prevent impact of the existing topography of the site. Prior to construction per the mitigation measures imposed by the MMRP and as described in the SMND,, preconstruction surveys will be required (such as roost surveys, nesting bird survey, etc.) to ensure protection of special-status species.* *Additionally, as required by the MMRP BIO-3a , compensatory mitigation for permanent loss of 0.49 acre of the seasonal wetland shall be required.*
Policy NBE-1.2 **Sensitive Resources.** Ensure that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, and wetlands are avoided and mitigated to the greatest extent feasible as development takes place.	*See Policy NBE-1.1: Natural Resources above.*
Action NBE-1.2D: Protect the remaining woodlands and native tree resources, and require replacement plantings where native trees must be removed.	*See Policy NBE-1.1: Natural Resources above.* Also, 47 of the 69 native trees proposed for removal are considered to be significant (as defined in VMC 16.701) and as such, are being required to be replaced at a three to one ratio.
Action NBE-1.3B: Work with landowners to facilitate assembly and retention of parcels of sufficient size to preserve valuable tidal marshes, seasonal marshes, managed wetlands and contiguous grassland areas for the protection of aquatic and wildlife habitat.	*See Policy NBE-1.1: Natural Resources above. A 9.86-acre parcel of the original 20.13-acre site will be deed restricted to prevent future development on the parcel in perpetuity.*
Policy NBE-1.7 **Green Infrastructure.** Encourage the installation of green infrastructure, including tools such as permeable pavement, rain gardens, constructed wetlands, grassy swales, rain barrels and cisterns, and green roofs, to treat stormwater, attenuate floods, increase groundwater recharge, and reduce urban heat islands.	*The project will include bioretention swells to treat stormwater from the new subdivisions. Additionally, a total of 141 new trees will be planted throughout the site, which will help reduce urban heat islands.*

Policy NBE-1.9 **Cultural Resources.** Protect and preserve archaeological, historic, and other cultural resources.	*The project will implement sensitivity training for all contractors prior to ground disturbance. If remains are found, the developer will implement Mitigation Measure CUL-1 (Unknow Discovery of Archaeological Resources, CUL-2 (Protocol for Human Ramins Discovery), TCR-1 (Protocol for Discovery of Native American Remains), and TCR-2 (Inadvertent Discovery of Tribal Cultural Resources).*
Action NBE-1.9A: Continue to require that land use activities comply with State requirements and follow best practices to ensure that cultural resources are not impacted and that appropriate agencies and technical experts are involved in the evaluation and protection of resources and sites.	See Policy NBE-1.9: Cultural Resources above.
Action NBE-1.9B: Maintain a dialogue with local Native American groups regarding sensitive cultural resources in Vallejo.	*See Policy NBE-1.9: Cultural Resources above.*
Policy NBE-5.3 **Health and Safety Codes**. Enforce development regulations and building code requirements to protect residents, businesses, and employees from flooding, liquefaction, earthquakes, fires, and other hazards.	The construction plans of the single-family residences will be reviewed to ensure the project meets applicable building code.
Action NBE-5.4A: Continue to require geotechnical studies for land use proposals to determine engineering measures that may be necessary to adequately mitigate any seismic, flooding, sea level rise, landslide, erosion, or related risk.	*See Policy NBE-5.4: Project Location and Design above.*
Action NBE-5.4B: Continue to require drainage and erosion control measures for landslide-prone or geologically hazardous hillside areas to minimize risks to downhill areas.	*See Policy NBE-5.4: Project Location and Design above.*
Action NBE-5.4C: Continue to use the development review process to ensure that development is planned and constructed to resist the encroachment of uncontrolled fire.	*See Policy NBE-5.3: Health and Safety Codes above.*
Action NBE-1.14C: Update the Green Building Standards Code to require the use of low flow plumbing fixtures, low volume irrigation systems, and drought-tolerant plant palettes.	*See Policy NBE-1.7: Green Infrastructure above.*
Action NBE-5.6D:	*See Policy NBE-5.4: Project Location and Design above.*

Continue to enforce City regulations that prohibit development, grading, and land modification activities that would adversely affect the local drainage system or create unacceptable erosion impacts.	
Policy CP-2.3 **Fire Prevention and Response Services**. Ensure the provision of fire prevention and emergency response services that minimize fire risks and protect life and property.	*The proposed project was reviewed by the City's Fire Prevention team and complies with [(ask Fire)_]. The site is located within an urbanized area and is not designated as a Very High Fire Hazard Severity Zone. Compliance with local building codes, defensible space requirements, and fire codes, will minimize risks to protect life and property.*
Policy MTC-2.1 **Safety First.** Prioritize pedestrian, bicycle, and automobile safety over traffic flow.	*The proposed project would include new internal residential streets that would be a 40-foot right-of-way, with a 28-foot-wide travel lane from curb-to-curb with parking on one side and a 4.5-foot-attached sidewalk. The project would also include private alleys which would be smaller in scale than the private residential streets and would include shared vehicular access to houses with garages fronting them. Private alleys would include a 33-foot public utility easement/planting easement, and a 10.5-foot travel way in each direction with no parking allowed.*
Policy MTC-2.7 **Complete Streets.** Increase accessibility for and use of streets by pedestrians, bicyclists, and transit riders.	*The new private streets will incorporate a 40-foot right-of-way with sidewalk, curb and gutters to increase accessibility for the use by pedestrians.*
Action MTC-2.8C: As part of the site plan approval process, require development to provide services from a menu of transportation demand management (TDM) strategies that will reduce VMT.	*See policy MTC-2.7: Complete Streets above.*
Policy MTC-2.11 **Sustainable Transportation.** Ensure that circulation improvements can be operated and maintained within existing and future resource limitations.	*See policy MTC-2.7: Complete Streets above.*
Policy MTC-3.1 **Coordinated Transportation Planning.** Ensure that improvements to the transportation network support a land use pattern that connects the community and facilities travel among Vallejo's neighborhoods.	*The project will include a new private roadway that will connect the new subdivision to the existing developed subdivision to the west of the subject site. This will connect the two neighborhoods to support a local network.*
Housing Element Policy A.2: The project will convert vacant infill land into single-unit residences that are compatible with the surrounding area	*The project will develop an underutilized site into a subdivision with detached single-family residences that are compatible with the*

which includes existing single-unit residences to the north, east, and west.	*surrounding single-family residences that are to the west.*
Housing Element Policy H.3 Protect the character of the existing neighborhoods by developing objective standards to facilitate infill projects to be compatible with the existing neighborhoods.	*The project will protect the existing character of the existing neighborhood to the west by ensuring the new homes are similar in scale and massing.*
Housing Element Policy I.1 The City of Vallejo will promote energy efficiency in residential development within the city, including reduction of energy use through better design and construction in individual homes and through energy-efficient urban design.	*See Policy NBE-1.15 - Energy Efficiency above.*

SECTION 9: CONCLUSION 32

DRAFT

SECTION 1: INTRODUCTION

1.1 PLANNED DEVELOPMENT (PD)

Vista Cove is a single-family residential project. The project is currently zoned as Residential Low Density (RLD) and Residential Medium Density (RMD) on the City of Vallejo's zoning map and will be rezoned to Planned Development (PD). The General Plan 2040 land use designation map identifies the subject properties as "primarily single-family and Mix of Housing Types/Medium Density". The proposed project is compatible with the General Plan and the surrounding land uses as described in Section 1.5.

Development standards have been established to provide a high quality of design and continuity throughout the Vista Cove project. Design requirements such as street widths, building setbacks, architectural guidelines and landscape materials are included in the standards.

The development standards are broken down into multiple sections addressing roadway standards, proposed utilities, residential standards, community-wide landscape standards, community-wide architecture standards, and Open Space requirements with the final section concluding the Planned Development. All development within the Vista Cove Planned Development Plan is intended to conform to the development standards which are presented in this document.

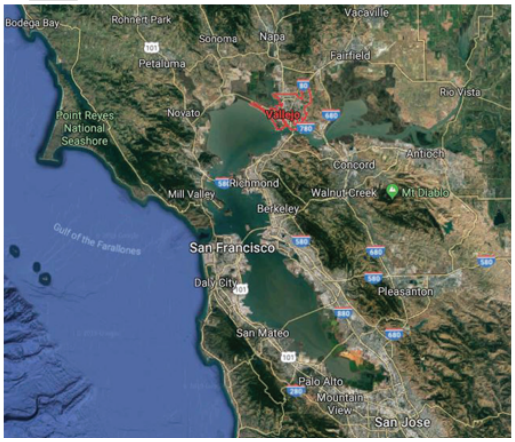
1.2 PROJECT CONCEPT

Vista Cove is a single-family residential community that includes areas of preserved Open Space. This community is walkable and connected by private streets. The project is thematically accented to create a Modern Farmhouse character that draws on the proximity to California's wine country and the area's natural topography. The landscape design for Vista Cove emphasizes drought tolerance and native landscaping and provides abundant trees for beauty, definition of spaces, and habitat enhancement. A Common Open Space shall be located central to the neighborhood providing an overlook into the preserved open space as well as passive reaction opportunities.

1.3 PROJECT LOCATION

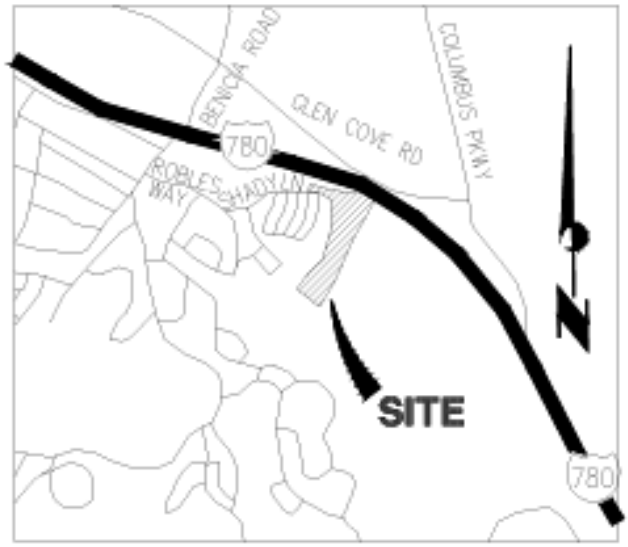
1.3.1 Regional Context

Vista Cove is in the City of Vallejo. Vallejo provides access to multiple freeways and transit systems and has a popular and widely used ferry system that connects directly to the City of San Francisco and other parts of the Greater Bay Area. The region continues to experience continued growth, creating strong demand for more housing in Vallejo. See Figure below.



1.3.2 Site Location

Vista Cove is a 20.13-acre vacant project site located in the northeast intersection of Shady Lane and Wildflower Avenue. It occupies two assessor parcel numbers (APN: 0079-171-170 and 0079-120-100). The site lies west of Benicia State Park and directly east of an existing subdivision. The site is partially visible from Interstate 780 to the north. See Figure below.



VICINITY MAP

DRAFT

1.4 EXISTING CONDITIONS AND TOPOGRAPHY

The subject property comprises 20.13 acres of undeveloped land designated by the City of Vallejo for Residential land uses. A low-lying area with a jurisdictional wetland can be found in the middle part of the site. The wetland width varies and is created from regional flows from the neighboring developed residential properties. There are 83 existing trees surveyed on the site. Of these trees a total of 69 require removal. Of the 69 trees, 47 are significant trees protected under local ordinance. Significant trees shall be replaced at a ratio of 3 new trees for every tree removed, minimum size of replacement tree shall be 15 gallons.

The project is currently zoned as Residential Low Density and Residential Medium Density and will be rezoned to Planned Development (PD). The General Plan 2040 designates the Property as “Primarily Single-Family” and “Mix of Housing Types/Medium Density”. The proposed project is compatible with the surrounding land uses as described in Section 1.5.

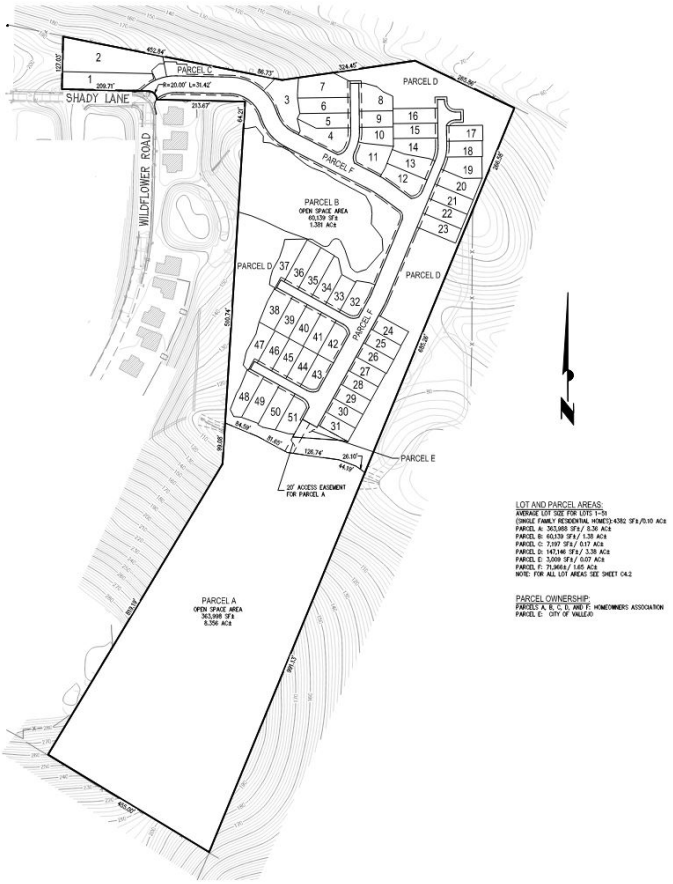
1.5 SURROUNDING LAND USES

The project site is in a suburban environment and is bordered by existing development.

The project site is primarily surrounded by residential areas, open spaces, and transportation corridors, including Interstate 780 and nearby roadways. Interstate 780 runs directly to the north of the site. To the east lies Benicia State Park, where an undeveloped parcel is situated to the south. West of the site is the established Glen Cove #2 subdivision, consisting of 141 single-family homes. Specifically, the site is located east of the existing Shady Lane and Wildflower Avenue residential community.

1.6 PARCELS IN SITE PLAN

Vista Cove would be subdivided into 57 parcels: 51 residential single-family; lots and four common area parcels: Parcels A (8.36 acres), B (1.38 acres), Parcels C (0.17 acres) and D (3.38 acres) that are HOA-maintained common open space parcels. The enhanced sewer pump station would be located on Parcel E (0.07 acres) and Parcel F (1.65 acres) is a parcel for the private roadways.



1.7 PROJECT DESCRIPTION

Under existing conditions, the Property boundary comprises 20.13-acres of undeveloped land designated by the City of Vallejo for Residential land uses. The developed project site (Lots 1-51, Parcels C, D, E, and F) included as part of this application is approximately 10.39-acres with the remainder open space of Parcel A and B being 9.73-acres. The discretionary approval associated with the Project includes a Tentative Map, Planned Development, Development Review, Design Review and Landscape Review. Approval of the Tentative Map, Planned Development, Development Review, Design Review and Landscape Review would allow for development of 51 single-family residential dwelling units.

The Project site encompasses Assessor's Parcel Numbers (APNs) 0079-171-170 and 0079-120-100 located in the City of Vallejo, CA. The General Plan designates the approximately 1-acre western parcel, (APN 0079-171-170) Primarily Single Family. The parcel is zone Residential Low Density. The General Plan designates the second parcel (0079-120-100) Mix of Housing Types/Medium Density. The parcel is zoned Residential Medium Density. The Project site is currently undeveloped with elevations ranging between approximately 70-190 feet above mean sea level (amsl).

The Project application consists of a Planned Development Review for the purposes of implementing the project in accordance with the Tentative Tract Map for a 10.39-acre property. The Project would provide for development of 51 single-family residential homes at a density of 4.9 dwelling (51 units /10.39ac) units per acre (du/ac). The proposed 51 dwelling units are comprised of four floor plans with three elevations each. For parking, 102 covered garage spaces (2/unit), 102 driveway stalls (2/unit), 24 on-street stalls and 1 mailbox stall are provided. Grading proposed by the project would disturb 10.39-acres. Access to the Project would be provided by one (1) full access driveway through an established residential community to the west.

1.7.1 Residential

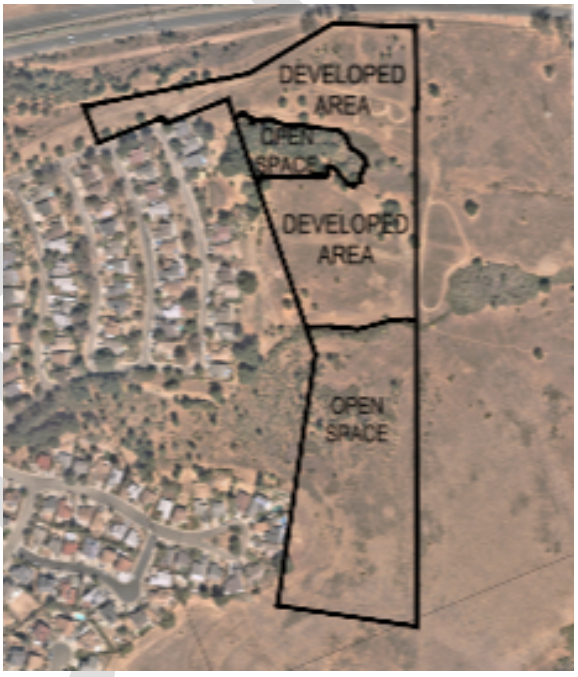
The residential component will be located within the entirety of the project site on the future developed 10.395 acres. The project proposes 51 single-family detached units with four floor plans. These homes will also come in three different elevation styles with subtle variations among the designs. A conceptual design of a Single-Family home is shown in Section 6.2.2: Single Family Home Typical Example. The average density for the residential uses will be 4.9 units per gross acre.

The alleys would be accessed from north-south-trending 40-foot-wide right-of-way interior private streets. Between the interior residences, landscaped paseos would provide access to the front of the homes. The 51 residential units will be traditional single-family detached units on lots with a 35-foot minimum width and an 80-foot minimum depth. The traditional residential units would feature a front driveway and front entry way facing the streets and be generally oriented to the interior of the residential area. The residential component of the project will be accessed from a drive aisle off the

intersection of Shady Lane and Wildflower Ave as shown on the Tentative Map Cover Sheet, Page C4.0.

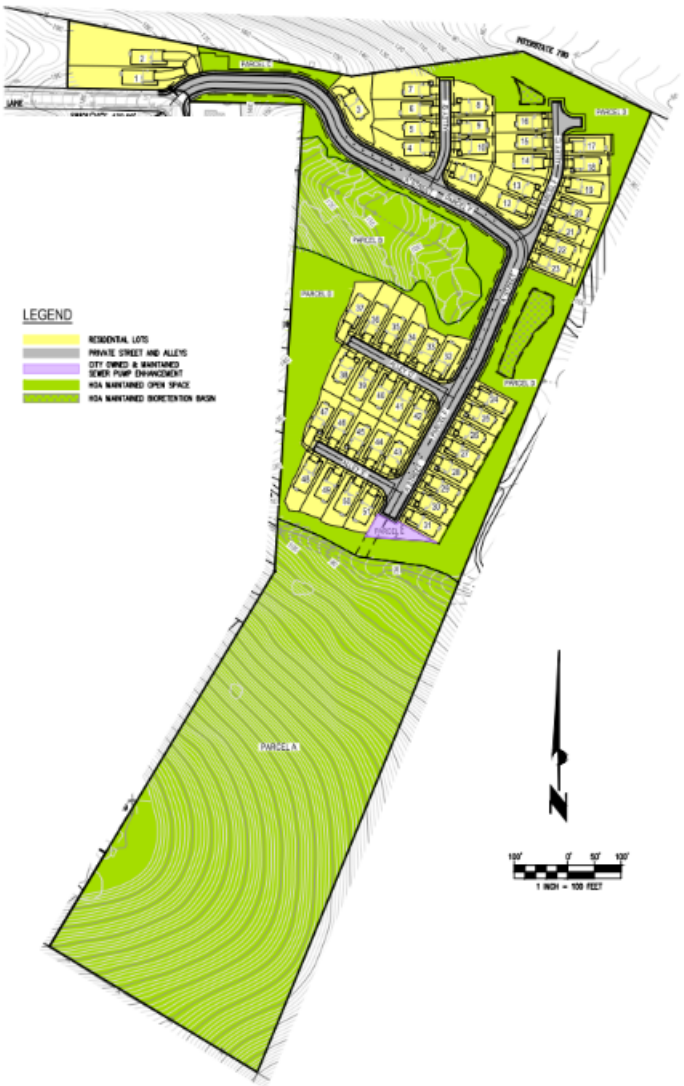
1.7.2 Open Space

The central portion of the proposed residential project site will be preserved as open space and would consist of 1.38 acres. Future development would be precluded from this area. This area drains the existing off-site residential development (east of the proposed project site) into low lying areas that will continue to be directed east and off the property. This area will be subject to protective restrictions that would not allow public or private use. The open space would only be accessible via private gates to facilitate maintenance activities. The proposed project anticipates that the open space would be owned, managed, and maintained by a homeowner's association (HOA) created in connection with the residential component.



1.8 LAND OWNERSHIP DESCRIPTION

Vista Cove is a 20.13 (10.39-acres developed) acre proposed residential project. The 10.39 developed acres representing residential portions will be privately owned by one or more parties, except for the public sewer main line and lift station**.** The remainder acreage will remain as undeveloped and undisturbed open space. The Residential portion is 10.39 acres and includes 51 residential lots, private streets and alleys, passive park, and water quality basins. Within the residential areas, the individual lots, passive park, and water quality basin will be privately owned. The streets and aleys that serve the residential lots shall be dedicated to the HOA for private ownership and maintenance. The Open Space will be privately owned and will ultimately be transferred to a future private homeowner's association**.**



SECTION 2: ROADWAY DEVELOPMENT STANDARDS

2.1 ROAD STANDARDS

Roadway cross sections have been created for the Vista Cove development project. The following standards describe each roadway and their typical mid-block cross section.

2.2 RESIDENTIAL STREET STANDARDS

2.2.1 Private Residential Streets

Residential streets will provide access to houses fronting onto it. City of Vallejo Standards have been applied to the streets planned for the Vista Cove residential development. These streets are internal to the project and connect to the local streets of Shady Lane and Wildflower Ave.

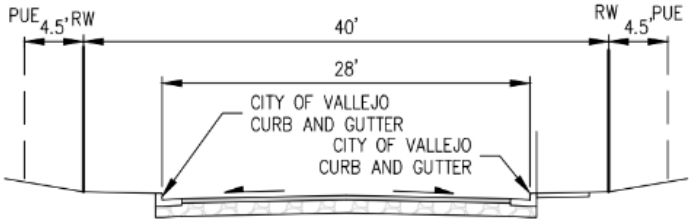
Street Standards:

a. 40-foot Right-of-Way
b. 28-foot curb-to curb
c. Parking on one side
d. Lighting to meet City of Vallejo Public Improvements Standards

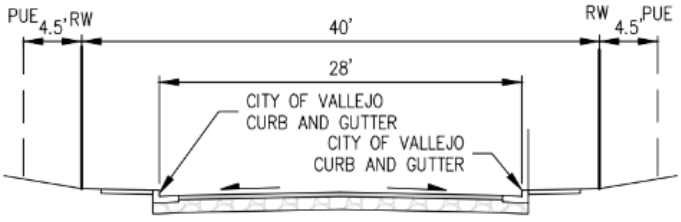
Landscaping:

a. 4.5-foot attached walk
b. Street trees to be planted in private yards

Residential Streets – SECTIONS



TYPICAL PRIVATE STREET W-E
SECTION A1
(STANDARD - STANDARD CURB)
NOT TO SCALE



TYPICAL PRIVATE STREET N-S
SECTION A2
(STANDARD - STANDARD CURB)
NOT TO SCALE

2.2.2 Private Alleys

Alleys provided include shared vehicular access to houses with garages fronting them. These are private and the lot lines will go to the back of the curb. These alleys are small in scale and connect to the private residential streets. Private alleys will be owned and maintained by the HOA.

Private Alley Standards

a. 33-foot PUE/PE (Public Utility Easement, Planting easement)

b. 10-foot travel way in each direction

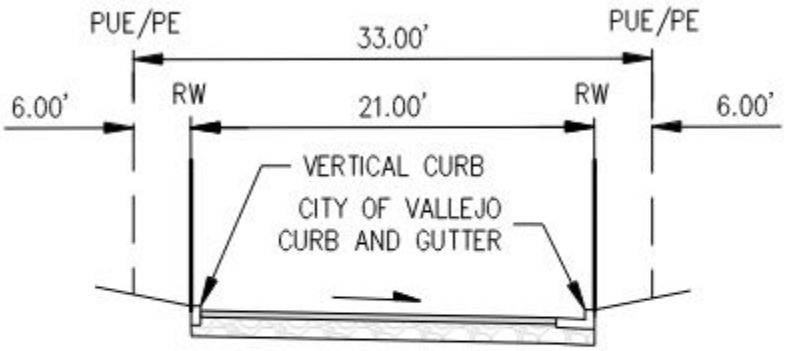
c. No parking on the Alleys

d. Garage lighting to meet safety standards

Landscaping:

a. Street trees to be planted in private yards

Private Alley - SECTION



TYPICAL PRIVATE ALLEY
SECTION B
(VERTICAL - STANDARD CURB)
NOT TO SCALE

SECTION 3: PROJECT UTILITIES

3.1 RESIDENTIAL

This Section provides information on the proposed utilities needed for the residential development of the Vista Cove Planned Development. The project will be designed, developed, and constructed with all utility infrastructure (water, electric, gas, sanitary sewer, storm water, cable/internet) required for the operation of the proposed residential project improvements. The proposed project will connect to existing utility infrastructure located in the right-of-way (i.e. Shady Lane and Wildflower Ave). An overview of the

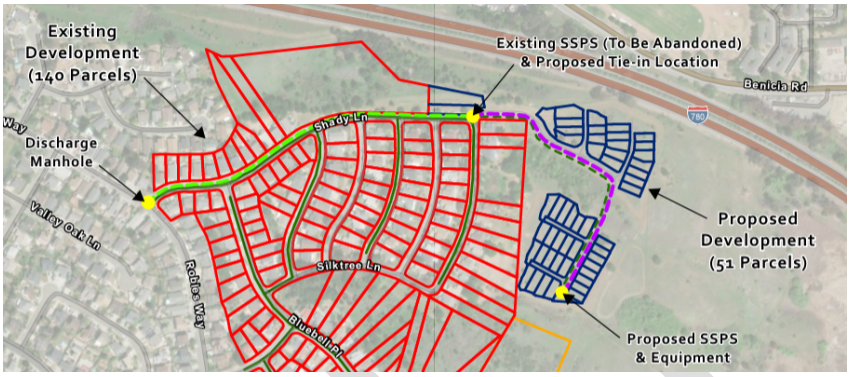
project utilities is below, detailed graphics will follow in the section. The infrastructure to be provided will be a combination of public and private systems. Infrastructure located within the private streets will be owned and maintained by the HOA, except for the sewer sanitary and sewer sanitary force main that will be dedicated and maintained by Vallejo Flood and Wastewater District (VFWD). Infrastructure located within the private alleys/paseos will be owned and maintained by the future Homeowners Association to be established. The water will connect to the existing water line in Shady Lane at two locations for a private looped system. The sanitary sewer will tie into the existing sewer line in Shady Lane. The proposed storm drain system will convey runoff to two basins. These basins will be installed in the northwest corner of the site and the middle east border of the site. These basins will provide both water quality and hydro-modification meeting current City standards before discharging to Parcel D.

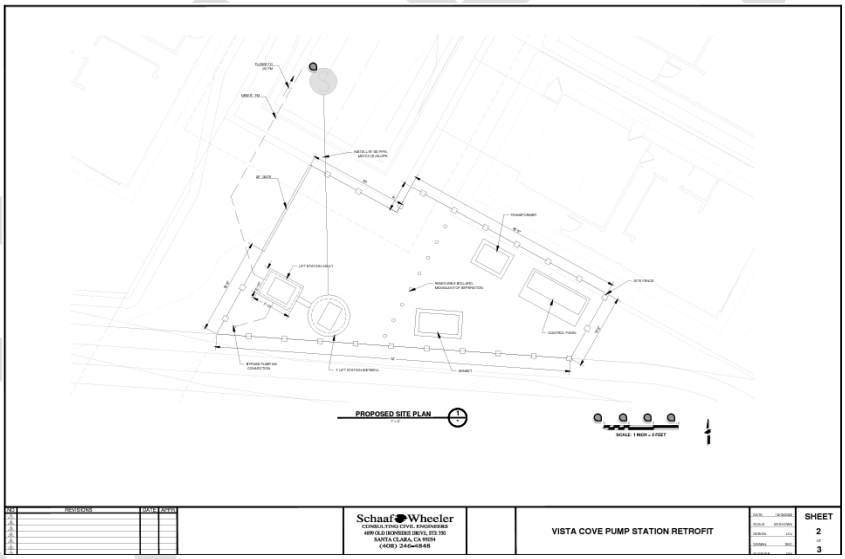
3.1.1 Residential Sanitary Sewer

The Sanitary Sewer shall be designed and installed to VFWD standards. The system will be of publicly owned by VFWD, connecting to the existing sanitary sewer system located in Shady Lane.

a. Lift Station

The Vista Cove project will replace the existing sewer lift station that currently serves the 141 single family home development to the west of the proposed project site with an upgraded system to serve both communities. The lift station will be owned and maintained by the VFWD. See Figures below.





3.1.2 Residential Storm Drain System

The Storm Drain System shall be designed and installed to VFWD standards and be privately owned and maintained by the HOA. The proposed storm drain system will convey runoff to two basins that will be installed in the northwest corner of the site and the middle east border of the site. These basins will provide both water quality and hydro-modification meeting current City standards before discharging to Open Space Parcel D.

3.1.3 Residential Water System

The Water System shall be designed and installed to City of Vallejo Water Department standards. The public system will tie into the existing water line in Shady Lane at two locations creating a private looped system that will be privately owned and maintained by the HOA.

SECTION 4: RESIDENTIAL DEVELOPMENT STANDARDS

This section provides development standards for the residential development of the Vista Cove Planned Development. These standards apply to the residential portion of the Planned Development which makes up approximately 10.39-acres of the Plan.

4.1 RESIDENTIAL STANDARDS

4.1.1 Primary Uses Permitted

Two-story single family detached residences.

4.1.2 Purpose and Intent

This zone allows for the development of homes within a single zone. 10.39-acres are going to be used for residential development.

4.1.3 Site Development Standards

a. Individual Lots

Each dwelling shall be located on an individual lot

b. Lot Area

Single Family lots shall be a minimum of 2,800 square feet

c. Maximum Lot Coverage

For single family lots no more than 85% of any lot shall be occupied by a residence or an accessory structure.

d. Lot Width

Single family lots shall be a minimum of 35 feet in width at the living setback

e. Lot Depth

Single family lots shall be a minimum of 80 feet in depth

f. Building Setbacks:

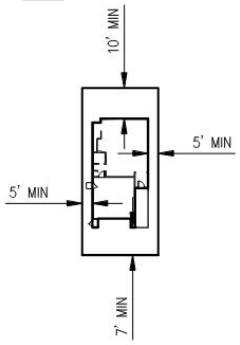
Each Single-Family dwelling shall have the following minimum setbacks to the property line:

- Front: 7’ (non-alley loaded)
- Front: 0’ from garage door (alley loaded)

Covered porches, balconies and stairways of non-alley loaded product may extend into required front yard setback not more than three feet.

- Rear: 10’ minimum
- Sideyards: 5’
- Corner Lots – street side: 5’

Allowable encroachments include but are not limited to architectural features such as cornices, canopies, greenhouse or windows, and chimneys may extend into required yards not more than two feet.



TYPICAL LOT SETBACKS
NOT TO SCALE

DRAFT

g. Maximum Height

The maximum height shall be 35 feet. No house shall be over two stories.

h. Garages

All garages will hold 2 cars.

i. Required Parking

Two parking spaces in a garage are required for every dwelling unit. Additional parking spaces shall be located on the private streets. On-street parking space minimum of 8 feet by 20 feet.

j. Fencing

Rear and Side property Lines shall have 6’ tall solid wood fence. Lots with views into the open space shall have a 6’ tall view fence in the rear and a 6’ tall solid wood fence on the side. See Section 5.3 for more detail.

k. Lighting

Lighting shall be of similar design throughout the development meeting City of Vallejo standards.

l. Accessory Structures

Accessory structures shall be allowed in the Single-Family portion and shall follow the Vallejo Municipal Code as defined in Chapter 16.202.

- Shall not encroach any setback
- Shall be under 14’ in height

4.1.4 Grading Standards

The objective of the preliminary grading concept is to use the existing terrain to define the development footprint while conforming to the existing surrounding land uses. The existing topography for the site is a gentle rolling downhill slope traveling west to east including a west-east running drainage swale. Using the City of Vallejo’s Hillside Grading Standards as a guide, the grading will be done in such a way as to create buildable lots and pads while providing for efficient and safe roadway network. The developed area will be graded to create pads and streets that will sit below the surrounding residential uses similar to the existing site conditions**.** Improvement of the grading concepts as proposed in the Master Plan would require approximately 60,000 cubic yards of material to be moved.

Where topography must be changed; various contour grading techniques will be employed to allow the affected area to blend in with the natural slope. Cut and fill will be constructed with rounded corners to eliminate sharp angles of slopes at the contour intersections. Contour grading will also be utilized to create rounded, undulating slopes

between street levels and building pads, and in transition areas from natural slopes to graded slopes. Slope gradients will vary, where feasible, to produce a more natural appearance.

4.1.5 Homeowners Association

There will be a Homeowner's Association for residential development. This entity will make and enforce rules for the properties within this residential development. Lot owners will automatically become members of the HOA Association.

4.1.6 Conditions, Covenants, and Restrictions (CC&Rs)

Within the residential neighborhood controls will be placed on each lot to guide the builder and homeowners during the construction of the neighborhood and throughout any subsequent changes in the future. No development will be allowed on the common areas HOA-maintained hillside open space. The CC&Rs are part of the purchase of a lot and are legally enforced.

SECTION 5: LANDSCAPE DEVELOPMENT STANDARDS

This section provides development standards for landscape as part of the Vista Cove Planned Development.

5.1 GENERAL GUIDELINES

The landscape concept for Vista Cove focuses on a drought tolerant native or adaptive plant palette designed to create a cohesive development with an attractive transition between the production housing and adjacent open space. Material shall be arranged to screen views of Interstate 780 while also highlighting views into undisturbed preserved open space.

DRAFT

5.2 PLANT SELECTION

5.2.1 Residential Plant Palette

TREES:

Acer rubrum 'Armstrong'	Armstrong Red Maple
Ginkgo biloba 'Autumn Gold'	Maidenhair Tree
Quercus agrifolia	Coast Live Oak
Quercus lobata	Valley Oak
Quercus robur 'Fastigiata'	Skyrocket English Oak
Tilia cordata 'Greenspire'	Greenspire Littleleaf Linden

Ginkgo biloba 'Autumn Gold'

SHRUBS AND GRASSES:

Acacia cognata `Cousin Itt'	River Wattle
Achillea spp.	Yarrow
Agave X `Blue Glow`	Blue Glow Agave
Anigozanthos spp.	Kangaroo Paw
Arctostaphylos spp.	Manzanita
Bouteloua g. 'Blonde Ambition'	Blue Grama Grass
Bulbine frutescens	Stalked Bulbine
Acacia cognata `Cousin Itt'	River Wattle
Achillea spp.	Yarrow
Agave X `Blue Glow`	Blue Glow Agave

DRAFT

5.3 EXTERIOR WALLS AND FENCES

Walls and fences provide separation and delineate property lines. A list is provided within this document. The attached images are conceptual and will be refined in final design.

5.3.1 Residential Fence Plan

Good Neighbor Fence

Six-foot-tall solid wood fence located between residential lots.

GOOD NEIGHBOR FENCE

View Fence

Six-foot-tall tube steel fence located between residential and open space views.

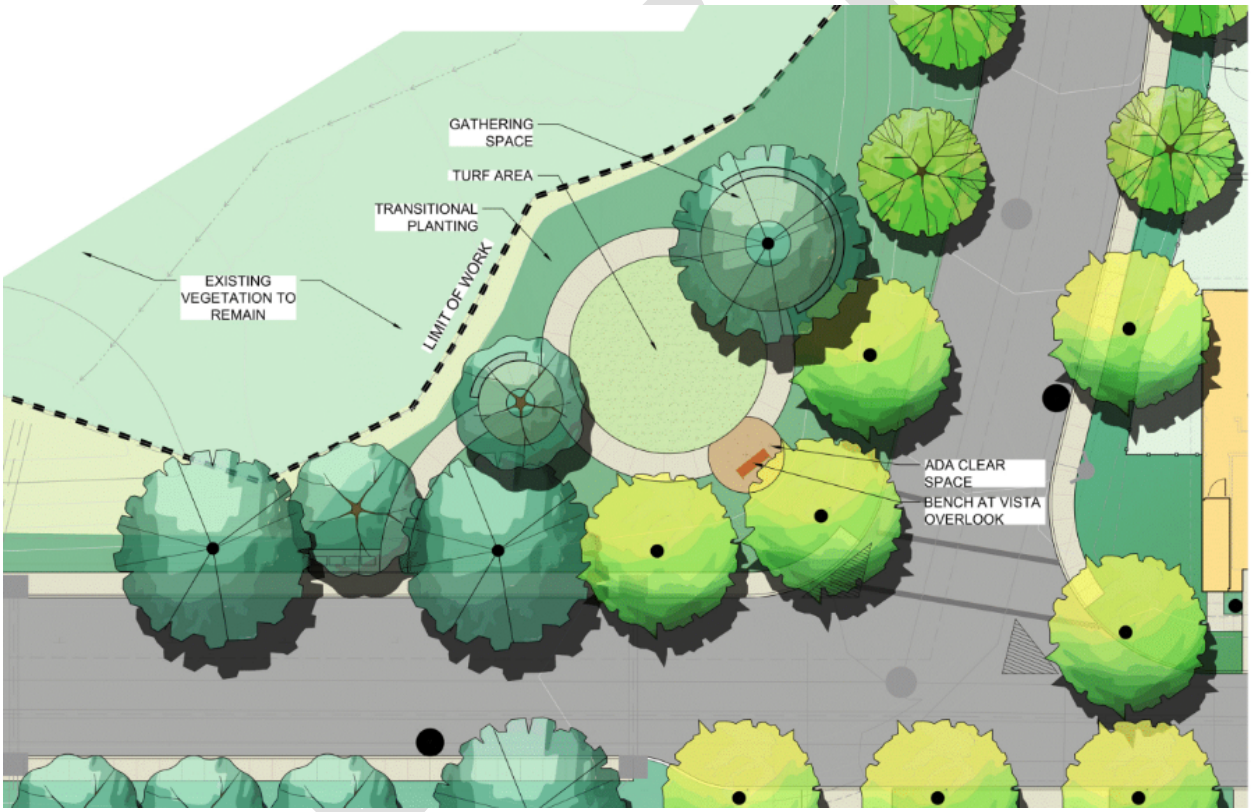
VIEW FENCE

5.4 WALKWAYS AND PATHS

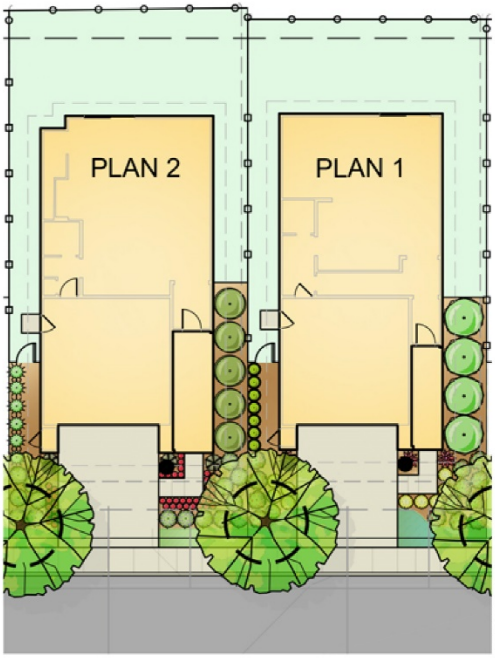
Walkways shall connect the residential lanes to the Common Open Space and adjacent neighborhood. Walkways shall be a minimum of 4 and a half feet wide.

5.5 PASSIVE OPEN SPACE

The Common Open Space, located centrally in the development, shall be designed to take advantage of views into the adjacent riparian area. A loop walk around a flexible use turf area and a vista overlook will provide passive recreation opportunities for residents. The plant palette shall be a combination of native and adaptive species selected to attract pollinators and create a smooth transition into the undisturbed open space.



5.6 FRONT YARD TYPICAL LANDSCAPE



NOTE:
PLANS SHOW ESTIMATED REPRESENTATION OF SHRUB MATERIAL WITHIN THREE YEARS

TYPICAL FRONT YARD PLANTING

Accent Tree:
Acer rubrum 'Armstrong' - Armstrong Red Maple
Ginkgo biloba 'Autumn Gold' - Maidenhair Tree

Screen Shrub:
Ceanothus spp. - Ceanothus
Dodonaea viscosa `Purpurea` - Hopseed Bush
Ligustrum japonicum `Texanum` - Waxleaf Privet
Loropetalum chinense - Fringe Flower
Prunus caroliniana `Compacta` - Carolina Laurel Cherry
Xylosma congestum 'Compacta' - Compact Xylosma

Foundation Shrub:
Arctostaphylos spp. - Manzanita
Callistemon viminalis 'Little John' - Bottlebrush
Escallonia X `Compacta` - Compact Escallonia
Grevillea spp. - Grevillea
Nandina domestica - Lemon Lime Nandina
Pittosporum spp. - Pittosporum
Rhamnus californica - Coffeeberry
Rhaphiolepis spp. - Indian Hawthorn
Westringia fruticose - Coast Rosemary

Secondary Shrub:
Acacia cognata `Cousin Itt' - River Wattle
Bulbine frutescens - Stalked Bulbine
Calandrinia spectabilis - Pink Calandrinia
Chondropetalum spp. - Cape Rush
Cistus spp. - Rockrose
Dietes iridioides - Fortnight Lily
Gaura lindheimeri - Siskiyou Pink Gaura
Polygala spp. - Sweet Pea Shrub
Rosmarinus officinalis - Tuscan Blue Rosemary
Salvia spp. - Sage

Accent Shrub:
Achillea spp. - Yarrow
Agave X `Blue Glow` - Blue Glow Agave
Anigozanthos spp. - Kangaroo Paw
Epilobium canum - California Fuchsia
Erigeron glaucus - Beach Daisy
Erigeron karvinskianus - Fleabane
Hemerocallis X `Evergreen Yellow` - Daylily
Hesperaloe parviflora - Yucca
Kniphofia uvaria - Torchlily
Lantana spp. - Lantana
Limonium perezii - Statice
Nepeta X faassenii `Six Hills Giant' - Catmint
Penstemon spp. - Beard Tongue
Rosa spp. - Rose
Tulbaghia violacea - Society Garlic

Grasses:
Bouteloua g. 'Blonde Ambition' - Blue Grama Grass
Calamagrostis X a. `Karl Foerster` - Feather Reed Grass
Carex divulsa - European Grey Sedge
Festuca spp. - Fescue
Helictotrichon sempervirens - Blue Oat Grass
Muhlenbergia capillaris - Pink Muhly

Groundcover:
Arctostaphylos spp. - Groundcover Manzanita
Ceanothus griseus horizontalis - California Lilac
Grevillea lanigera `Coastal Gem` - Coastal Gem Grevillea
Helianthemum n.`Henfield Brilliant` - Rock Rose
Myoporum parvifolium - Myoporum
Scaevola `Mauve Clusters` - Fan Flower
Senecio mandraliscae - Blue Finger
Verbena spp. - Verbena

SECTION 6: ARCHITECTURE DEVELOPMENT STANDARDS

This section provides the development standards for architecture as part of the Vista Cove Planned Development.

6.1 GENERAL GUIDELINES

6.1.1 Architectural Styles

Architectural Character: Modern Farmhouse

The architectural character of Vista Cove Planned Development draws on the project site's proximity to California's wine country and the community's natural topography. The guidelines and standards in the following sections are provided to help guide the development and maintenance of the future residential structures at Vista Cove.

6.2 SINGLE FAMILY HOMES

6.2.1 Development Guidelines and Standards

The following recommendations are encouraged when designing the residential homes at Vista Cove:

a. Building Massing

- Appropriately articulated wall planes (on all 4 sides) with recessed windows.
- Entry Porticos that are forward of the Garage plane.
- Varying projections that add interest by providing shadow and depth.
- Clean, simple forms that support the architectural characteristics of Modern Farmhouse.
- Complimentary exterior finish materials that are typical of the architectural character.

b. Main Entrances/Porches

Residential Entries, whether front or side facing, shall feature covered Porches or Porticos that are inviting and engage both the street and the sideyard. Elements may include:

- Covered Porch and/or Entry ways that open to the sideyard
- Trellis feature
- Recessed Entry

c. Roofs

The roof design and treatment should be varied but not overly complicated or "busy" - enough to provide visual interest to the neighborhood roofscape. Roof forms that may be considered include:

- Pitched roofs such as Gables, Hips, and Shed roofs (Gambrel, Mansard, and flat roofs are prohibited).
- Varying plate heights and roof pitches (min. of 4.5:12 for main roof and 3:12 for secondary roofs).
- Roof materials such as concrete tile and architectural shingles of differing colors.

d. Window Openings

Windows are important elements to the building design as they provide both elevation articulation and light and fresh air for the occupants. The following guidelines balance these priorities.

- Windows at stucco conditions should be recessed from the wall plane a minimum of 2".
- Window types may include Casements, Sliders, Single Hung, and fixed glass.
- Any window grids or divided lights should complement the architectural character of the home.
- The frame color should be appropriately colored to match or complement the home's selected color scheme.
- The shape and size of any shutters that may be proposed should match the window opening.
- Reflective glass is prohibited in all locations.

e. Garage Doors

The overall design of the home's street facing elevation should de-emphasize the garage door to better promote a pedestrian friendly, more engaging streetscape. Examples to consider are:

- Garages doors that are deeply recessed from the surrounding wall plane (min. of 0'-6").
- Additional articulation around the recessed opening at the garage entrance.
- A garage recessed/house forward design solution that brings an entry Porch, Portico, or habitable space forward of the garage plane.
- 2nd floor projections over the garage door below that provide additional shading and architectural interest.

f. Exterior Materials and Colors

Varying exterior materials and colors can provide an appealing street scene and further enhance the building's architectural design. To better ensure the homes in Vista Cove support the Modern Farmhouse style, the following guidelines and standards apply:

- Surface materials and treatments should be designed to appear as an integral part of the design and not merely applied. Materials shall wrap columns, porches, or balconies in their entirety.
- Color and/or material changes shall occur at inside corners. Materials applied to any elevation shall turn the outside corner of the building and end at a logical termination point that relates to rooflines, building masses, and/or fence/wall returns.
- Field color used at the base of a wall should continue down to finish grade. At masonry veneer conditions, the visible wall below the weep screed level should be painted a color that closely matches the veneer above.
- Exterior materials may include (but are not limited to) stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood.

g. Architectural Detailing

Detail elements such as shutters, eave brackets, corbels, exposed rafters/rafter tails, or beams should be used to provide visual interest and richness to the elevations where appropriate. Any trim used around windows, doors, and/or as belly bands at stucco conditions, shall be at least 1" thick.

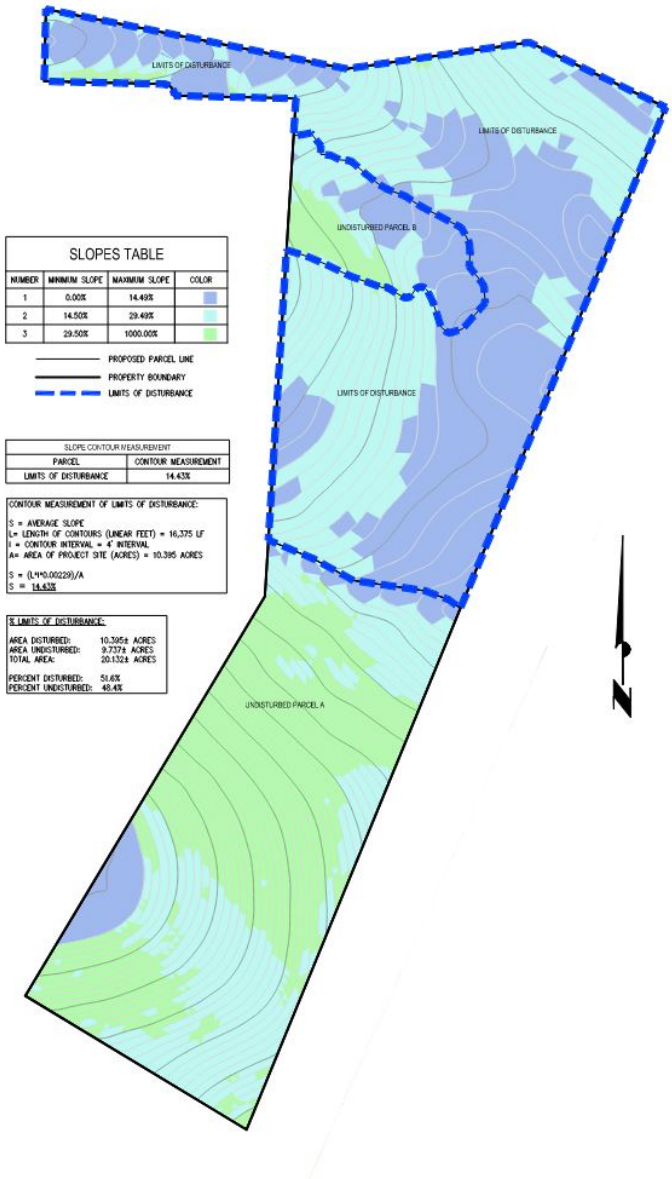
h. Exterior Light Fixtures

Exterior lighting both enhances the architectural character of the design while providing a much-needed sense of security and visual awareness at night. Exterior wall-mounted light fixtures should complement the architectural character of the home and be of the high efficiency, low voltage LED type. All exterior light fixtures must be dark-sky compliant and be aimed away from neighbors to avoid light trespass.

6.2.2 SINGLE FAMILY HOME TYPICAL ELEVATION EXAMPLE

SECTION 7: HILLSIDE DEVELOPMENT STANDARDS

The Vista Cove Planned Development will leave 48.4% of the site undisturbed. Development of the remaining 10.395 acres will follow the approved grading plan accordingly. See Figure below.



The project will use the most accurately available topographic information. The average slope of the proposed developed areas will be calculated using the contour measurement method as shown in Vallejo's Municipal Code due to the existence of varied slope conditions and topography. All measurements to be taken at four-foot increments for the vertical distance of contour lines.

SECTION 8: OPEN SPACE

The natural open space in Vista Cove is in two distinct areas of the proposed Visa Cove project. Parcel A is approximately 8.36 Acres and Parcel B is approximately 1.38 acres and both parcels will be fenced and have signage installed to prevent trespassing and will remain undisturbed and maintained by the HOA.

8.1 EROSION CONTROL

Erosion control standards shall be used on all disturbed lands during project development. Disturbance to the central open space shall be kept at a minimum. See Erosion Control Sheet C8.1 for hydroseeding limits.

8.2 FIRE MANAGEMENT

The open space can be accessed by fire from the residential street through the 20’ access easement for Parcel A through Parcels D and E, accessed by the roadways in Parcel F.

8.3 WILDLIFE MANAGEMENT

The open space site shall promote and protect wildlife.

8.4 PRESERVATION

The open space shall reasonably preserve existing vegetation in its current condition.

SECTION 9: CONCLUSION

Vista Cove will be a comprehensive development as laid out in this Planned Development narrative. It will be developed under the overall theme that has been established within this document.

F:\PROJECTS\2022\22-1008 VISTA COVE - VALLEJO\CIVIL\TENTATIVE MAP\C7.0 STORMWATER CONTROL PLAN.DWG 5/9/2024

EROSION CONTROL NOTES

1. TEMPORARY EROSION CONTROL DEVICES SHOWN ON PLAN WHICH INTERFERE WITH THE WORK SHALL BE RELOCATED OR MODIFIED WHEN THE INSPECTOR SO DIRECTS AS THE WORK PROGRESSES.

2. EXCEPT AS OTHERWISE DIRECTED BY THE INSPECTOR, ALL DEVICES SHOWN ON THE EROSION CONTROL PLAN SHALL BE IN PLACE THROUGHOUT THE DAY. ALL EROSION CONTROL FACILITIES MUST BE INSPECTED AND REPAIRED AT THE END OF EACH WORKING DAY DURING THE RAINY SEASON AND MAINTAINED AT ALL TIMES.

3. ALL EROSION AND SEDIMENT CONTROL MEASURES SHALL BE CONSTRUCTED AND MAINTAINED IN ACCORDANCE WITH THE PROVISIONS OF THE ASSOCIATION OF BAY AREA GOVERNMENTS (ABAG) "MANUAL OF STANDARDS FOR EROSION AND SEDIMENT CONTROL MEASURES" UNLESS OTHERWISE STATED WITHIN THESE GENERAL NOTES. THE EROSION AND SEDIMENT CONTROL MEASURES SHALL ALSO CONFORM TO THE REQUIREMENTS OF THE CALIFORNIA STORMWATER QUALITY ASSOCIATION (CASQA) STORMWATER BEST MANAGEMENT PRACTICE HANDBOOK. CONTROL MEASURES ARE SUBJECT TO THE INSPECTION AND APPROVAL OF THE CITY ENGINEER.

4. ALL LOOSE SOIL AND DEBRIS SHALL BE REMOVED FROM THE STREET AREAS UPON STARTING OPERATIONS AND PERIODICALLY THEREAFTER AS DIRECTED BY THE INSPECTOR. THE SITE SHALL BE MAINTAINED SO AS TO PREVENT SEDIMENT LADEN RUNOFF TO ANY STORM DRAIN SYSTEM.

5. ADDITIONAL CONTAINMENT METHODS MUST BE PROVIDED FOR ANY WASTE STORAGE AREA, STOCKPILE/MATERIAL STORAGE AREA AND/OR CONSTRUCTION TOILET AREA.

6. STAND-BY CREWS SHALL BE ALERTED BY THE PERMITTEE OR CONTRACTOR FOR EMERGENCY WORK DURING RAINSTORMS.

7. AS A PART OF THE EROSION CONTROL MEASURES, UNDERGROUND STORM DRAIN FACILITIES AND CONCRETE SHALL BE INSTALLED COMPLETE AS SHOWN ON THE PLANS.

8. ALL GRADED AREAS, INCLUDING, BUT NOT LIMITED TO, CUT AND FILL SLOPES, STREETS, PARKING AREAS, AND BUILDING PADS SHALL BE HYDROSEEDED PER ABAG. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE CITY ENGINEER.

9. IF ANY GRADING OPERATIONS ARE TO BE PERFORMED AN EROSION CONTROL PLAN MUST BE SUBMITTED AND THE PLAN MUST BE APPROVED BY THE CITY PRIOR TO THE COMMENCEMENT OF ANY SUCH GRADING OPERATIONS.

10. TO PREVENT EROSION OF GRADED BANKS, ALL GRADED BANKS STEEPER THAN 2% AND HIGHER THAN 3 FEET, SHALL BE HYDROSEEDED, LANDSCAPED, OR SEALED. IN ADDITION TO HYDROSEEDING, APPLICATION OF STRAW WITH A TACKIFIER OR MULCH MAY BE REQUIRED BY THE CITY ENGINEER. IF THE PERMANENT STORM DRAIN SYSTEM IS NOT INSTALLED, TEMPORARY DITCHES SHALL BE CONSTRUCTED TO CONTAIN THE STORM WATER AND DIRECT IT, IN A MANNER THAT AVOIDS EROSION OF THE BANKS, TO THE EROSION AND SEDIMENT CONTROL FACILITIES. HYDROSEEDING, STRAW MULCH, OR OTHER SUCH EROSION CONTROL DEVICES SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND SHALL MEET THE REQUIREMENTS OF THE CALIFORNIA STORMWATER QUALITY ASSOCIATION STORMWATER BEST MANAGEMENT PRACTICE HANDBOOK. POTENTIAL RECOMMENDATIONS FOR STRAW MULCH INSTALLATION MAY BE ANCHORED WITH A TACKIFIER STABILIZING EMULSION. THE SLOPES SHALL BE LANDSCAPED OR HYDROSEEDED AS SOON AS POSSIBLE AFTER THE GRADING OPERATION CEASES.

11. ALL CUT AND FILL SLOPES ARE TO BE PROTECTED TO PREVENT OVERBANK FLOW USING SILT FENCES.

12. BORROW AREAS AND TEMPORARY STOCKPILES SHALL BE PROTECTED WITH APPROPRIATE EROSION CONTROL MEASURES TO THE SATISFACTION OF THE CITY ENGINEER. TEMPORARY AND/OR PERMANENT STOCKPILES SHALL BE COVERED WITH PLASTIC SHEETING (I.E., VISQUEEN) AND SECURED AT THE PERIMETER BASE AT ALL TIMES OR AT THE END OF EACH WORK DAY IF IN USE.

13. SANDBAGS AND/OR STRAW WATTLES SHALL BE STOCKPILED ON SITE AND PLACED AT INTERVALS SHOWN ON EROSION CONTROL PLANS OR WHEN DIRECTED BY THE INSPECTOR.

14. SANDBAGS REFERRED TO IN THE PRECEDING ITEMS MUST BE FULL. APPROVED SANDBAG FILL MATERIALS ARE DECOMPOSED GRANITE AND/OR GRAVEL, OR OTHER MATERIALS APPROVED BY THE INSPECTOR.

15. THIS PLAN MAY NOT COVER ALL THE SITUATIONS THAT ARISE DURING CONSTRUCTION DUE TO UNANTICIPATED FIELD CONDITIONS. VARIATIONS MAY BE MADE TO THESE PLANS IN THE FIELD, SUBJECT TO APPROVAL OF THE CITY ENGINEER.

16. EROSION CONTROL STRUCTURES SHALL BE ADJUSTED AND UPDATED ON THESE MAPS BY THE CONTRACTOR TO REFLECT ALL CHANGES IN DRAINAGE AS STREETS AND BUILDING PADS ARE BEING INSTALLED.

17. STORM DRAIN TRENCHES THAT ARE OUT THROUGH BASIN DIKES OR BASIN INLET DIKES, SHALL BE PLUGGED WITH SANDBAGS FROM TOP OF PIPE TO TOP OF DIKE.

18. PROVIDE VELOCITY CHECK DAMS IN ALL UNPAVED GRADED CHANNELS AT THE INTERVALS INDICATED BELOW:

GRADE OF CHANNEL	INTERVAL
LESS THAN 3%	100 FEET
3% TO 6%	50 FEET
OVER 6%	25 FEET

VELOCITY CHECK DAMS SHALL BE CONSTRUCTED OF GRAVEL BAGS AND SHALL EXTEND 2/3 OF THE DISTANCE ACROSS THE STREET OR CHANNEL AT RIGHT ANGLES TO THE CENTERLINE. EARTH DIKES MAY NOT BE USED AS VELOCITY CHECK DAMS. THE GRAVEL BAGS SHALL BE INSTALLED PER MANUFACTURER'S RECOMMENDATIONS AND IN ACCORDANCE WITH THE PROJECT'S SWPPP.

19. SEDIMENT TRAPS SHALL BE CLEANED OUT WHENEVER SEDIMENT REACHES 6" FROM THE OUTLET. IT IS THE CONTRACTOR'S RESPONSIBILITY TO CLEAN THE DESILTING BASINS AND THE SEDIMENT TRAPS.

20. ALL OPEN UTILITY TRENCHES SHALL BE BLOCKED AT THE PRESCRIBED INTERVALS FROM THE BOTTOM TO TOP WITH A DOUBLE ROW OF SANDBAGS PRIOR TO BACKFILL. SANDBAGS ARE TO BE PLACED WITH ALTERNATE HEADER AND STRETCHER COURSES. THE INTERVALS PRESCRIBED BETWEEN SANDBAG LOCKING SHALL DEPEND ON THE SLOPE OF THE GROUND SURFACE, BUT NOT EXCEED THE FOLLOWING:

GRADE OF THE STREET	INTERVAL
LESS THAN 2%	AS REQUIRED
2% TO 4%	100 FEET
4% TO 10%	50 FEET
OVER 10%	25 FEET

21. AFTER STORM DRAIN AND UTILITY TRENCHES ARE BACKFILLED AND COMPACTED, THE SURFACES OVER SUCH TRENCHES SHALL BE MOUNDED SLIGHTLY AND COVERED OR HYDROSEEDED TO PREVENT CHANNELING OF WATER IN THE TRENCH AREA. CARE SHOULD BE EXERCISED TO PROVIDE FOR CROSS FLOW AT FREQUENT INTERVALS WHERE TRENCHES ARE NOT ON THE CENTER LINE OF A CROWNED STREET.

EROSION CONTROL NOTES (CON'T)

22. ALL EXISTING CATCH BASINS ON THE SITE OR IMMEDIATELY DOWNSTREAM FROM THE SITE SHALL BE PROTECTED WITH A CITY APPROVED STORM DRAIN INLET PROTECTION DEVICE. THE STORM DRAIN INLET DEVICE SHALL MEET THE MINIMUM REQUIREMENTS IN THE CALIFORNIA STORMWATER QUALITY ASSOCIATION STORMWATER BEST MANAGEMENT PRACTICE HANDBOOK AND INSTALLED PER MANUFACTURER'S RECOMMENDATIONS.

23. FOR THE DISPOSAL OF CONCRETE WASTE, A CONCRETE WASH OUT SHALL BE PLACED IN THE VEHICLE AND EQUIPMENT STORAGE AND MAINTENANCE AREA. THE CONCRETE WASH OUT SHALL MEET THE MINIMUM REQUIREMENTS IN THE CALIFORNIA STORMWATER QUALITY ASSOCIATION STORMWATER BEST MANAGEMENT PRACTICE HANDBOOK AND INSTALLED, USED, AND MAINTAINED PER MANUFACTURER'S RECOMMENDATIONS.

24. EROSION CONTROL MEASURES SHALL BE IMPLEMENTED DURING ALL CONSTRUCTION PHASES.

25. THE DEVELOPER SHALL POST DUST CONTROL SIGNAGE WITH A CONTACT NUMBER OF THE DEVELOPER, CITY STAFF, AND THE AIR QUALITY CONTROL BOARD.

26. FOR DETAILS NOT SHOWN ON THESE PLANS, REFER TO THE FOLLOWING CASQA BMP FACT SHEETS:

SE-1	SILT FENCE
SE-4	CHECK DAMS
SE-5	FIBER ROLLS
SE-6	GRAVEL BAG BERM
SE-10	STORM DRAIN INLET PROTECTION
WM-1	MATERIAL DELIVERY & STORAGE
WM-8	CONCRETE WASTE MANAGEMENT

27. THE EROSION AND SEDIMENT CONTROL MEASURES AS SHOWN ON THIS PLAN MAY NOT COVER ALL UNFORESEEN FIELD AND/OR WEATHER CONDITIONS. VARIATIONS OF DESIGNS MAY BE ALTERED TO FIT ACTUAL FIELD CONDITIONS. UNDER THE DIRECTIONS OF THE SITE QUALIFIED SWPPP PRACTITIONER (QSP), CONTRACTOR SHALL MAKE NECESSARY ADJUSTMENTS ACCORDINGLY.

AIR QUALITY CONTROL NOTES

AQ-1 – DURING CONSTRUCTION ACTIVITIES, THE PROJECT APPLICANT AND/OR ITS CONTRACTOR SHALL ENSURE THAT THE BAAQMD'S BASIC CONSTRUCTION MITIGATION MEASURES ARE IMPLEMENTED:

1. ALL EXPOSED SURFACES (E.G. PARKING AREAS, STAGING AREAS, SOIL PILES, GRADED AREAS, AND UNPAVED ACCESS ROADS SHALL BE WATERED TWO TIMES PER DAY.
2. ALL HAUL TRUCKS TRANSPORTING SOIL, SAND OR OTHER LOOSE MATERIAL OFF-SITE SHALL BE COVERED.
3. ALL VISIBLE MUD OR DIRT TRACK-OUT ON TO ADJACENT PUBLIC ROADS SHALL BE REMOVED USING WET POWER VACUUM STREET SWEEPERS AT LEAST ONCE PER DAY. THE USE OF DRY POWER SWEEPING IS PROHIBITED.
4. ALL VEHICLE SPEEDS ON UNPAVED ROADS SHALL BE LIMITED TO 15 MPH.
5. ALL ROADWAYS, DRIVEWAYS, AND SIDEWALKS TO BE PAVED SHALL BE COMPLETED AS SOON AS POSSIBLE. BUILDING PADS SHALL BE LAID AS SOON AS POSSIBLE AFTER GRADING UNLESS SEEDING OR SOIL BINDERS ARE USED.
6. IDLING TIMES SHALL BE MINIMIZED EITHER BY SHUTTING EQUIPMENT OFF WHEN NOT IN USE OR REDUCING THE MAXIMUM IDLING TIME TO 5 MINUTES (AS REQUIRED BY THE CALIFORNIA AIRBORNE TOXICS CONTROL MEASURE TITLE 13, SECTION 2485 OF THE CALIFORNIA CODE OF REGULATIONS).
7. ALL CONSTRUCTION EQUIPMENT SHALL BE MAINTAINED AND PROPERLY TUNED IN ACCORDANCE WITH MANUFACTURER'S SPECIFICATIONS. ALL EQUIPMENT SHALL BE CHECKED BY A CERTIFIED VISIBLE EMISSIONS EVALUATOR.
8. POST A PUBLICLY VISIBLE SIGN WITH THE TELEPHONE NUMBER AND PERSON TO CONTACT THE LEAD AGENCY REGARDING DUST COMPLAINTS. THIS PERSON SHALL RESPOND AND TAKE CORRECTIVE ACTION WITHIN 48 HOURS. THE AIR DISTRICT'S PHONE NUMBER SHALL ALSO BE VISIBLE TO ENSURE COMPLIANCE WITH APPLICATION REGULATIONS.

NOTES:

1. BEST MANAGEMENT PRACTICE (BMP) DESIGNATIONS ARE PER THE CASQA STORMWATER BMP HANDBOOK.
2. THE MATERIALS AND EQUIPMENT STORAGE AREA, VEHICLE MAINTENANCE/FUELING AREA, SANITARY FACILITY, AND CONCRETE/WASTE WASHOUT WILL BE PLACED AT THE QSP'S DISCRETION AND ARE SUBJECT TO CHANGE.

EXPLANATION OF EROSION CONTROL PLAN

SINCE IT IS NEVER KNOWN AT WHAT POINT IN THE CONSTRUCTION PROJECT THE RAINS WILL COME, THIS EROSION CONTROL PLAN IS A SNAPSHOT IN TIME, DEPICTING WHAT MEASURES SHOULD BE IMPLEMENTED ASSUMING THAT THE RAINS WILL ARRIVE WHEN THE PROJECT IS AT THE FOLLOWING DESCRIBED LEVEL OF COMPLETENESS:

- MASS GRADING IS COMPLETE;
- THE HARDSCAPE SUBGRADE IS GRADED PROPERLY, BUT REMAINS EXPOSED WITHOUT ANY GRAVEL OR CONCRETE;
- THE UNDERGROUND PORTION OF THE ENTIRE STORM DRAIN SYSTEM IS COMPLETE;
- THE MAJOR STORM DRAIN INLETS HAVE BEEN CONSTRUCTED;
- CURB INLETS HAVE BEEN CONSTRUCTED, BUT HAVE NOT BEEN "TOPPED OUT", I.E. THE OPEN TOP OF THE INLET IS APPROXIMATELY AT ROAD SUBGRADE ELEVATION;
- THE MINOR STORM DRAIN INLETS (YARD DRAINS, ETC.) HAVE NOT YET BEEN CONSTRUCTED.

THE CONDITION DESCRIBED ABOVE IS THE MOST CRITICAL TIME IN THE PROJECT FROM THE STANDPOINT OF EROSION AND SEDIMENT CONTROL. BECAUSE THE SITE HAS THE MAXIMUM AMOUNT OF EXPOSED SOIL, WHILE THE STORM DRAIN PIPES CA CONVEY SEDIMENT VERY RAPIDLY TO THE OUTFALL OR TO THE MUNICIPAL STORM DRAIN SYSTEM. THE EROSION CONTROL PLAN ASSUMES THIS WORST CASE CONDITION, BUT, SINCE IT IS VERY UNLIKELY THAT THE RAINS WILL ARRIVE PRECISELY AT THE ABOVE-DESCRIBED MOMENT, THE CONTRACTOR, AS DIRECTED BY THE QSP, MUST BE PREPARED TO PROTECT THE PROJECT SITE UNDER ANY OTHER CONDITIONS. THE CONTRACTOR MUST PLACE THE EROSION AND SEDIMENTATION CONTROLS AS AND WHERE NECESSARY FOR CONDITIONS OTHER THAN THAT DESCRIBED ABOVE, AND MOVE THEM AS NECESSARY AS CONSTRUCTION PROGRESSES.

IRRIGATION NOTES

1. THE IRRIGATION DESIGN FOR THE SITE SHALL COMPLY WITH THE STATE MANDATED MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO).
2. THE IRRIGATION SYSTEMS WILL BE AUTOMATICALLY CONTROLLED BY AN ET/'SMART' IRRIGATION CONTROLLER CAPABLE OF MULTIPLE PROGRAMMING AND INDEPENDENT TIMING OF INDIVIDUAL IRRIGATION SYSTEMS. THE CONTROLLER WILL HAVE A 24-HOUR CLOCK TO ALLOW MULTIPLE START TIMES AND REPEAT CYCLES TO ADJUST FOR SOIL PERCOLATION RATES.
3. THE IRRIGATION SYSTEMS WILL CONSIST PRIMARILY OF LOW VOLUME, LOW FLOW BUBBLERS FOR TREES, AND POINT SOURCE DRIP IRRIGATION FOR SHRUBS AND GROUNDCOVERS.
4. PLANTS WILL BE GROUPED ONTO SEPARATE VALVES ACCORDING TO SUN EXPOSURE AND WATER USE TO ALLOW FOR IRRIGATION APPLICATION BY HYDROZONE. THE IRRIGATION SCHEDULING WILL REFLECT THE REGIONAL EVAPO-TRANSPIRATION RATES. THE ENTIRE SITE WILL BE DESIGNED TO RUN DURING NIGHTTIME HOURS WHEN IRRIGATION IS MOST EFFICIENT.
5. ALL MWELO DOCUMENTATION INCLUDING IRRIGATION PLANS, WATER USE CALCULATIONS AND CERTIFICATES SHALL BE SUBMITTED WITH THE LANDSCAPE IMPROVEMENT PLANS FOR REVIEW AND APPROVAL.

PLANTING NOTES

1. THE PLANTING DESIGN FOR THE SITE IS DROUGHT TOLERANT AND CONSISTS OF A BALANCE OF EVERGREEN AND DECIDUOUS PLANTING AS WELL AS NATIVE AND ORNAMENTAL PLANTING.
2. PROPOSED TREE LOCATIONS ARE BASED ON STANDARD JOINT TRENCH LOCATIONS. FINAL TREE LOCATIONS TO BE DETERMINED WHEN FINAL UTILITY LOCATIONS ARE PROVIDED. TREE PLACEMENT MAY BE ADJUSTED AND FINAL TREE COUNT MAY CHANGE.
3. ALL SHRUBS AND GROUNDCOVER MATERIAL SELECTED HAVE A WUCOLS WATER USE RATING OF VERY LOW TO MODERATE.
4. PROPOSED TREE CANOPIES ARE SHOWN AT 85% MATURE GROWTH DIAMETER IN ORDER TO ENSURE THERE IS SUFFICIENT ROOM FOR TREE GROWTH AND HEALTH.

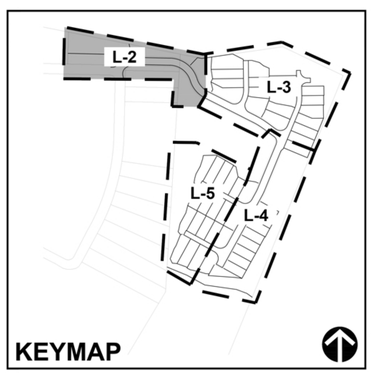
TREE CANOPY LEGEND

NOTE: ESTIMATED TREE CANOPY SIZE IS BASED ON GROWTH DATA AVAILABLE FROM SELECTREE (selectree.calpoly.edu) AND CURRENT AVAILABLE NURSERY STOCK



TREE LEGEND

TREES	BOTANICAL NAME	COMMON NAME	CONT	WUCOLS IV	QTY
	ACER RUBRUM 'ARMSTRONG'	ARMSTRONG RED MAPLE	15 GAL	MOD	26
	GINKGO BILOBA 'AUTUMN GOLD'	AUTUMN GOLD MAIDENHAIR TREE	15 GAL	MOD	31
	QUERCUS AGRIFOLIA	COAST LIVE OAK	15 GAL	LOW	13
	QUERCUS LOBATA	VALLEY OAK	15 GAL	LOW	9
	QUERCUS ROBUR 'FASTIGIATA'	SKYROCKET® ENGLISH OAK	15 GAL	MOD	23
	TILIA CORDATA 'GREENSPIRE'	GREENSPIRE LITTLELEAF LINDEN	15 GAL	MOD	39

NOTES:
- ALL PROPOSED TREES ARE MITIGATION TREES
- ALL TREES ARE STANDARD FORM UNLESS OTHERWISE NOTED

TOTALS
15 GAL = 141 TOTAL TREES

IRRIGATION NOTES

1. THE IRRIGATION DESIGN FOR THE SITE SHALL COMPLY WITH THE STATE MANDATED MODEL WATER EFFICIENT LANDSCAPE ORDINANCE (MWELO).
2. THE IRRIGATION SYSTEMS WILL BE AUTOMATICALLY CONTROLLED BY AN ET/SMART IRRIGATION CONTROLLER CAPABLE OF MULTIPLE PROGRAMMING AND INDEPENDENT TIMING OF INDIVIDUAL IRRIGATION SYSTEMS. THE CONTROLLER WILL HAVE A 24-HOUR CLOCK TO ALLOW MULTIPLE START TIMES AND REPEAT CYCLES TO ADJUST FOR SOIL PERCOLATION RATES.
3. THE IRRIGATION SYSTEMS WILL CONSIST PRIMARILY OF LOW VOLUME, LOW FLOW BUBBLERS FOR TREES, AND POINT SOURCE DRIP IRRIGATION FOR SHRUBS AND GROUNDCOVERS.
4. PLANTS WILL BE GROUPED ONTO SEPARATE VALVES ACCORDING TO SUN EXPOSURE AND WATER USE TO ALLOW FOR IRRIGATION APPLICATION BY HYDROZONE. THE IRRIGATION SCHEDULING WILL REFLECT THE REGIONAL EVAPO-TRANSPIRATION RATES. THE ENTIRE SITE WILL BE DESIGNED TO RUN DURING NIGHTTIME HOURS WHEN IRRIGATION IS MOST EFFICIENT.
5. ALL MWELO DOCUMENTATION INCLUDING IRRIGATION PLANS, WATER USE CALCULATIONS AND CERTIFICATES SHALL BE SUBMITTED WITH THE LANDSCAPE IMPROVEMENT PLANS FOR REVIEW AND APPROVAL.

PLANTING NOTES

1. THE PLANTING DESIGN FOR THE SITE IS DROUGHT TOLERANT AND CONSISTS OF A BALANCE OF EVERGREEN AND DECIDUOUS PLANTING AS WELL AS NATIVE AND ORNAMENTAL PLANTING.
2. PROPOSED TREE LOCATIONS ARE BASED ON STANDARD JOINT TRENCH LOCATIONS. FINAL TREE LOCATIONS TO BE DETERMINED WHEN FINAL UTILITY LOCATIONS ARE PROVIDED. TREE PLACEMENT MAY BE ADJUSTED AND FINAL TREE COUNT MAY CHANGE.
3. ALL SHRUBS AND GROUNDCOVER MATERIAL SELECTED HAVE A WUCOLS WATER USE RATING OF VERY LOW TO MODERATE.
4. PROPOSED TREE CANOPIES ARE SHOWN AT 85% MATURE GROWTH DIAMETER IN ORDER TO ENSURE THERE IS SUFFICIENT ROOM FOR TREE GROWTH AND HEALTH.

CITY OF VALLEJO DESIGN REVIEW BOARD

RESOLUTION NO. DRB 25-02

RESOLUTION RECOMMENDING THE PLANNING COMMISSION APPROVE DESIGN REVIEW (DR23-0006) AND LANDSCAPE REVIEW (LR23-0002) FOR A 51-UNIT SINGLE FAMILY RESIDENTIAL SUBDIVISION ("VISTA COVE"), LOCATED ON A VACANT SITE NEAR THE INTERSECTION OF SHADY LANE AND WILDFLOWER AVENUE (APNs: 0079-171-170 & 0079-120-100)

* *

WHEREAS, on August 29, 2017, the City Council adopted General Plan 2040; and

WHEREAS, the property has a General Plan 2040 land use designation of Primarily Single-Family (PSF) and Mix of Housing types/Medium Density (R-MH); and

WHEREAS, on July 22, 2021, the City Council adopted a new Zoning Code and Zoning Map; and

WHEREAS, the property is located in the Residential Low Density and Residential Medium Density Zoning Districts; and

WHEREAS, on November 29, 2022, Sancerra Vista Cove, LLC., the applicant, submitted for a Preliminary Review Application pursuant to California Senate Bill (SB) 330, "the Housing Crisis Act of 2019; and

WHEREAS, on December 28, 2022, the Preliminary Application SB330 was found to satisfy the checklist as listed in California Government Code Section 65941.1; and

WHEREAS, on February 13, 2023, the applicant formally submitted an application for Tentative Map, Development Review, Design Review, Landscape Review and Minor Use permit, to develop 51 detached single-family homes on a vacant 20.13-acre site located near the intersection of Shady Lane and Wildflower Avenue (APN:0079-171-170 and 0079-120-100); and

WHEREAS, the project went through multiple rounds of completeness review and on December 18, 2023, the project was deemed complete; and

WHEREAS, on May 16, 2024, the applicant revised the project description to withdraw the Minor Use Permit application, and add a request for a Planned Development and Zoning Map amendment to change the project site's zoning districts from Residential Low Density and Residential Medium Density Zoning to Planned Development with a proposed "Vista Cove Planned Development Plan"; and

WHEREAS, on July 24, 2024, the application for the revised project was deemed complete; and

WHEREAS, the Vallejo Municipal Code (VMC) Section 2.59.020(A), states that the Design Review Board shall "advise the Planning Commission when requested or when required by an applicable local ordinance;" and

WHEREAS, VMC Sections 16.604.01(K) and 16.604.03.B, require either the Director or the Design Review Board to make a recommendation to the Planning Commission for any Design Review (including Landscape Review) entitlement involving 50 or more residential units; and

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

WHEREAS, on June 26, 2025, a notice of this hearing was published in the Times Herald and mailed to all active neighborhood groups and property owners within 500 feet of the subject property, the Vallejo City Unified School District and any other local agency expected to provide water, wastewater treatment, streets, roads, schools, or other essential facilities or services to the project, and electronically mailed to the members of the Design Review Board, to the applicant and to all interested parties; and

WHEREAS, on July 10, 2025, the Design Review Board considered testimony and evidence, both written and oral, provided at the public hearing, as well as other documents contained in the record of proceedings relating to the project, which are maintained in the offices of the City of Vallejo Planning Division; and

NOW, THEREFORE, based on evidence received in the staff report and at the public hearing, the Design Review Board makes the following factual findings:

I. FINDINGS RELEVANT TO THE SCOPE OF DESIGN REVIEW (VMC 16.604.02)

A. In accordance with VMC Section 16.604.02 the Design Review Board has reviewed and independently considered the applicable development standards (including the zoning adjustments proposed in conjunction with the Draft Planned Development Plan, as described in the staff report), the overall design, architecture, landscaping and project aesthetics proposed, and the Design Review Board finds that all of the design elements are satisfactory as presented with no project modifications recommended to the Planning Commission at this time.

II. FINDINGS RELEVANT TO THE APPROVAL OF THE DESIGN REVIEW PERMIT (VMC Section 16.604.03.B)

In accordance with VMC Section 16.604.03.B, the Design Review Board finds that the application:

A. Is consistent with the purposes of this chapter, the design policies of the general plan and any applicable specific plan, any adopted applicable design guidelines.

Purposes of the Chapter

1. **Establish regulations for an objective process that applies urban design principles to ensure that new construction supports the best of the city's architectural traditions.**

   As proposed, the project meets objective process that applies urban design principles to ensure that new construction supports the best of the city's architectural traditions, as discussed in detail below.

2. **Encourage new structures that show creativity and imagination, add distinction, interest, and variety to the community, and are environmentally sustainable.**

   The proposed home designs include 'Modern Farmhouse' architecture that will be constructed with a variety of high-quality building materials and painted with simple, neutral colors. Vertical and horizontal façade breaks, and appropriate building massing have been incorporated into the design of the subdivision and will create distinction in the context of the larger established neighborhood.

3. **Promote architectural and design excellence in new construction and discourage poor quality development.**

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

The project details, colors, materials, and landscaping are integrated with one another in a way that ensures a visually consistent proposal. Each building elevation will consist of building features, materials, and colors typically associated with the Modern Farmhouse architectural style. The homes will incorporate different finished materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. The architectural detailing (shutters, eave brackets, corbels, exposed rafters/rafter tails, and/or beams) have been proposed to provide visual interest and richness to the elevations. Overall, the project architecture and landscaping propose high-quality, long-lasting material that will result in a quality development.

4. **Ensure that future development should:**
   a. **Reflect the values of the community.**
   b. **Enhance the surrounding environment.**
   c. **Visually harmonize with its surroundings and not unnecessarily obstruct scenic views; and**
   d. **Avoid nostalgic misrepresentations that may confuse the relationships among structures over time.**

   The project reflects the promotion of development that targets underutilized sites, which is a policy identified in the General Plan. Due to its location, the project will sit lower on the site as to not obstruct scenic views from existing residences to the east, and due to its nature and design, nor will it confuse the relationships among structures in the vicinity over time. The overall project has been designed to wrap around the back side of the existing residential development in order to fit in with the existing development pattern.

5. **Ensure that decisions on housing development projects are based on objective design standards as required by the State Housing Accountability Act (Government Code Section 65589.5).**

   The project complies with applicable, objective general plan and zoning standards. Therefore, in accordance with the provisions of the Housing Accountability Act (HAA), California Government Code Section 65589.5(j), the city may not deny the project or approve the project at a reduced density without basing its decision on the written findings under Section 65589.5(j), which read as follows:

   1. The development would have a specific adverse impact on public health or safety unless disapproved, or approved at a lower density; and
   2. There is no feasible method to satisfactorily mitigate or avoid the specific adverse impact, other than the disapproval, or approval at a lower density

6. **Provide for new landscaping to create a visually pleasing setting for structures on the site.**

   Landscaping will be provided in the front yards, open spaces and around the bioretention basins. A total of 141 new trees, as well as shrubs and ground cover, will be planted within the project to enhance the project site. The new landscaping will create a visually pleasing setting for the homes to be constructed on the site.

7. **Promote the protection and retention of landmark, native, and specimen trees and if feasible mature canopy trees and other significant landscaping of aesthetic and environmental value.**

   The project will remove a total of 69 on-site trees. An arborist report was prepared and a total of 83 trees were assessed, identifying seven different tree species, e.g. Coast

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

Live Oak, Plum Cherry, Apple, Monterey Pine, Valley Oak, Toyon, and Strawberry Tree, with Coast Live Oak as the most common species. The trees ranged from poor to good condition. A total of 47 significant trees will be removed and replaced with a total of 141 new trees, as part of the project.

8. **Ensure that the design, quality, and location of signs are consistent with the character and scale of the structures to which they are attached and are visually harmonious with surrounding development.**

   As part of the project, an entry monument sign, with an overall height of six feet and four inches, will be placed at the entrance of the new subdivision. The monument sign will be constructed of CMU blocks and will be precasted with board and batten veneer. The new sign will create a sense of place and is appropriately scaled with surrounding structures and is visually harmonious with the overall development. Additionally, new street and directional signage will be included.

9. **Promote the conservation, enhancement, preservation, and protection of historic resources.**

   Not applicable; there are no historic resources near this project's location.

Design policies of the General Plan

The project is consistent with applicable General Plan 2040 design policies such as:

NBE-2.3 (Inviting, Compatible Design. Promote attractive development that is compatible with surrounding uses)

The 51 detached single-family residences incorporate a Modern Farmhouse style home, and the building height and mass are not out of scale with existing structures located in proximity.

NBE-1.8 (Urban Forest. Encourage planting of street trees and landscaping to beautify the city, encourage walking and biking, and create a stronger sense of identity)

The project involves the planting of many trees, shrubs, and ground covers contributing to the beautification of Vallejo and the cultivation of an urban forest. The construction of sidewalk improvements within the project would encourage walking and contribute to the pedestrian realm within the subject site.

POLICY NBE-1.6 (Open Space. Conserve and enhance natural open space areas in and adjacent to Vallejo and its waterfront)

The proposed project would preserve approximately 9.74-acres of the project site as natural open space.

Policy NBE-1.15

Energy Efficiency: Support measures to reduce energy consumption and increase energy efficiency in residential, commercial, industrial, and public buildings.

The project would be required to comply with standards set in the California Building Code (CBC) Title 24, which would minimize the wasteful, inefficient, or unnecessary consumption of energy resources during operation. California's Green Building Standards Code (CBC Title 24, Part 11) requires implementation of energy efficient light fixtures and building materials into the design of new construction projects. The project includes sustainable

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

and energy-efficient features, including solar panels and an all-electric design, each provided at or exceeding City requirements.

Adopted applicable design guidelines.

The rezoning of the subject site from Residential Low Density and Residential Medium Density to Planned Development, will include adoption of the Vista Cove Planned Development Plan which includes design guidelines for residential development and design standards, landscaping, and fencing standards. As proposed, the project is consistent with the proposed Vista Cove Planned Development Plan.

B. Is consistent with any planning or zoning approvals by the director or the planning commission.

Not applicable; Neither the Director, nor the Planning Commission, have approved any previous entitlements at the site.

C. Complies with any other relevant city policies or regulations.

The project as proposed complies with VMC Chapter 16.202 – Residential Districts, as the project has been designed to meet the requirements, as detailed in Table 3 and 4 of Attachment 2 of the staff report. The Planning Commission will act on the Development Review for the project.

D. Meets the following criteria:

a. The aesthetic design, including its exterior design and landscaping, is appropriate to the function of the project and will provide an attractive and comfortable environment for occupants, visitors, and the general community.

The proposed Modern Farmhouse architectural style includes a variety of different building materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. With the application of neutral paint colors and installation of drought tolerant front yard landscaping as proposed, all design elements will complement each other and provide an attractive and comfortable environment for occupants and visitors to the subdivision.

b. Project details, colors, materials, and landscaping are fully integrated with one another and used in a manner that is visually consistent with the proposed architectural design.

As described above, the proposed materials, colors and landscaping will be fully integrated with one another and will be used in a manner that is visually consistent with the proposed architectural design of a Modern Farmhouse style.

c. The project has been designed with consideration of neighboring development.

The project has been designed with consideration of the existing neighborhood development to the east. The existing development is classified as detached, single- and two-story homes with hip and gable roofs, with a mixture of stucco, wood and batten siding. The proposed project will incorporate two-story homes that include a variety of different building materials such as stucco, stone or brick veneer, cementitious lap siding or panels, cementitious board and batten siding, and naturally decay resistant wood. With the application of neutral paint colors,

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

and installation of drought tolerant front yard landscaping as proposed, all design elements will not only complement each other but will also complement the existing surrounding development to the west.

d. The project contributes to the creation of an attractive and visually interesting built environment that includes well-articulated structures that present varied building facades, rooflines, and building heights and encourages increased pedestrian activity and transit use.

The proposed detached single-family residences have been designed to be visually interesting, and they will be constructed with a variety of high-quality building materials and painted with simple, complementary colors. Vertical and horizontal façade breaks, and building massing have all been incorporated into the design of the homes. The building features wall articulation, and materials that are aesthetically pleasing and compatible with other newer developments in the community.

e. Street frontages are attractive and interesting for pedestrians, address the street and provide for greater safety by allowing for surveillance of the street by people inside buildings and elsewhere.

The proposed project will activate an underutilized, vacant site by creating new roads and alleys for the subdivision. The street frontages have been designed to include a variety of different building materials, colors and landscaping to create an attractive streetscape and create an attractive street presence for pedestrians and passing motorists.

f. The proposed design is compatible with the historical or visual character of any area recognized by the city as having such character.

Not applicable; the subject site is not within any historic district of the city.

g. The aesthetic design preserves significant public views and vistas from public streets and open spaces and enhances them by providing areas for pedestrian activity.

The project has been designed to take advantage of the views of vistas of the Carquinez Strait that will be visible from public streets and open spaces. To the extent feasible, the project will preserve the views and vistas of the existing neighborhood to the west of the site. The project will incorporate common open space to create a sense of place and provide an area for pedestrian activity.

h. The proposed landscaping plan is suitable for the type of project and will improve the appearance of the community by enhancing the building, minimizing hardscape and softening walls; and the landscape plan incorporates plant materials that are drought-tolerant, will minimize water usage, and are compatible with Vallejo's climate.

The proposed landscaping, including trees, shrubs and ground covering has been designed to improve the appearance of an underutilized site and minimize hardscape. The landscaping incorporates plant materials that are drought-tolerant, would minimize water usage, and are compatible with City of Vallejo's climate.

i. The project has been designed to be energy efficient including, but not limited to, landscape design and green or eco-friendly design and materials.

Docusign Envelope ID: 14B5CAF5-1B63-4EAB-B92C-6667DDF9CC2C

As required by the California Building Code, the project has been designed to be energy efficient and will include features such as LED lighting and solar panels. The proposed landscaping has been designed to incorporate plant materials that are drought tolerant consistent with the California Water Efficient Landscaping Standards.

j. The project design protects and integrates natural features including creeks, open space, significant vegetation, and geologic features.

The project will only develop approximately 10-acres of the vacant 20.13-acre site. The development has been designed to protect natural features and significant vegetation. The remaining 10.13-acre site will be left undeveloped and preserved as undisturbed open space.

NOW, THEREFORE, LET IT BE RESOLVED that the Design Review Board hereby recommends that the Planning Commission approve Design Review (DR23-0006) and Landscape Review (LR23-0013), as presented, based on the above findings.

PASSED AND ADOPTED at a regular meeting of the Design Review Board of the City of Vallejo, State of California, on the 10th day of July 2025 by the following vote:

Dear Mr. Orozco,

I am writing to express my opposition to the proposed Vista Cove development currently under review. My primary concern—and a significant reason this project should be denied—is the substantial traffic impacts it will create on the already overburdened Robles Way.
The surrounding streets are operating near or at capacity during peak hours. Residents regularly experience congestion, and delays that compromise safe travel for both drivers and pedestrians. With the additional 130 homes currently underway near Rollingwood, our roads will face increased pressure. Adding the Vista Cove development will introduce hundreds of additional daily vehicle trips, placing an unsafe and unsustainable burden on Shady Lane and Robles Way.

If this project moves forward, congestion will worsen, commute times will increase, and overall frustration among residents will grow. More importantly, these conditions raise significant safety concerns that cannot be ignored.
Given these serious traffic and safety issues, I strongly urge the Planning Division to deny approval of the proposed Vista Cove development.

Thank you for your attention to this important matter and for your ongoing commitment to protecting public safety and preserving the quality of life for all residents.

Sincerely,
Mrs. Sherry Dunbar

Dear Planning Committee:

I strongly opposed to the building of new homes near the Benicia State Recreation Area. This project poses significant and irreversible risks to the environmental integrity of the park, the safety of the surrounding community, and the long-term preservation of one of our region's most valued natural resources.

The Benicia State Recreation Area provides essential habitat for wildlife, serves as a natural buffer for the surrounding neighborhoods, and offers residents a rare opportunity to experience open space and quiet recreation. Building homes in such close proximity to the park would undermine these values. Increased noise, lighting, and human activity will disrupt sensitive species and degrade habitat that cannot be replaced once it is disturbed.

I have witnessed firsthand the importance of this natural corridor. Wildlife depends on the surrounding open space to forage, migrate, and survive. Once the land is developed or paved, these animals will be displaced into ever-shrinking areas, creating additional stress on the ecosystem and diminishing the overall health of the park.

In addition to the environmental impacts, constructing homes so close to a state park threatens to overwhelm existing infrastructure, increase traffic on already burdened roadways, and erode the quiet character of the surrounding community. The long-term consequences of such development far outweigh any short-term housing gains.
For these reasons, I strongly urge the Planning Committee to deny this proposal. Protecting the Benicia State Recreation Area and the surrounding open space is essential for maintaining the ecological health, livability, and natural heritage of our community.
Thank you for your attention and for your commitment to responsible land-use planning.

Sincerely,
Alison Axworthy

Dear Planning Division:

I am writing to express my opposition to the proposed Vista Cove homes currently under review. After learning more about the proposed homes being built and considering their potential impacts, I believe this development would have serious negative consequences for the surrounding community, local infrastructure, and the adjacent Benicia State Recreation Area.

As someone who regularly walks in the state park, I am deeply concerned about the development's proximity to this protected natural space. The area supports wildlife and offers one of the few remaining open spaces in town. Any encroachment on this boundary would significantly disrupt habitat, increase noise pollution and human disturbance, and diminish the natural experience that residents and visitors rely on for recreation and well-being.

I urge you to disapprove of this project. We need open space preserved for the future.

Thank you,
Kulpreet Kaur

Dear Mr. Orozco,

The Glen Cove Vista development poses significant environmental risks that cannot be overlooked. The proposed project threatens to disrupt local ecosystems and wildlife habitats, leading to irreversible damage to the delicate balance of the area's natural environment. Increased construction and human activity will result in heightened pollution levels, including noise, air, and water contamination. Moreover, the expansion of impervious surfaces such as roads and buildings will exacerbate stormwater runoff issues, leading to flooding and erosion, while also endangering nearby Benicia State Park. The long-term implications of such development jeopardize not only the regional biodiversity but also the health and well-being of the community that relies on these natural resources. Prioritizing economic growth over ecological preservation could lead to severe environmental degradation that future generations will be forced to grapple with.
I want to emphasize my opposition to the development not only for the above stated environmental reasons, but also for the sake of future Vallejo. We have essentially no wilderness left and this drainage into the Benicia state park really is very important, not only for the health of the state park, but also for the present and future residents of the city.
Thank you for your consideration of this important matter.

Respectfully,

Brian Meineche

Just say NO!!
We need to clean up what's wrong in our city before building more homes the average family cannot afford!

You want to make some good changes around here, clean up downtown, where the hookers walk in broad daylight and drug deals are done in front of your eyes. Shame on Vallejo for aiming to enrich the few without helping the many!!

Hello Mr. Orozco,

My family and I have lived at 157 Silverpine Lane in Glen Cove since 1988. The land behind our lot is open space. It was intended to be a public park. When I attended a public meeting concerning the first Vista Cove development in 1989 a resident questioned where that park would be built. The city planner curtly replied that this was "unstable land." This "unstable land" has been subjected to Loma Prieta, the South Napa earthquake, plus many smaller shakes including the the most recent one south of Vallejo.

This is my NIMBY response to another proposed development. This potential development comes close to this "unstable land."

Now I would like to respond to the effect this development would have on the Benicia State Recreation Area. There are many animals who would say NIMBY including deer, coyotes, foxes, squirrels, lizards, skunks, racoons, jack rabbits, and more. The added light and noise pollution would affect not only these animals but also the birds. Bald eagles, red tailed hawks, white tailed kites, wild turkeys and many other smaller birds. Have you seen the bald eagles? They say NIMBY to any more development.

Sincerely,
Jeanne and Bruce Layne

Mr. Orozco, I'm against this project for the following reasons:

1. The character of the hillside viewed from walking along the road leading into the Benicia State Recreation Area and out to Dillon Point will be forever negatively impacted. Why can't we leave the few open spaces we have - and so much need - untouched? Wildlife will be displaced and harmed by this development. Has your adjoiner, the State of California - Parks, been informed about planned destruction of wildlife habitat and the marsh? Is the City's assessment objective when they decide that there is no significant impact on visual character of the area and the biological/natural resources? Or what are the exact mitigation measures, please? Already on the northside of I-780 the new development off of Columbus Parkway ruined the character of the scenic hillside.
2. Removing 69 mature trees for the project should not be allowed. We need trees to stay healthy and to cool the planet. Only mature ones provide shade from the sun. Replacement trees take many years before they can provide shade or habitat for animals.

Thank you.
Christina Haldenwang

Good evening: I am against the project. Plain and simple. We already have traffic, we do not need trucks, dirt, noise, and a hillside taken out.
We live here for the beauty. Not to be crammed with more housing and disrupting the people that would have to live with this construction.

I am certain I do not need to go on. Not a good idea.

Dear Mr. Orozco,

I'm writing as a Glen Cove resident who cares deeply about the safety, character, and natural environment of our community. I am strongly opposed to the proposed Vista Cove development planned for the Glen Cove area. After reviewing the project details and considering its impacts, I'm convinced that moving forward with this development would have serious consequences for traffic, emergency service access, and the fragile wildlife habitats that make Glen Cove such a special place to live.

Glen Cove already experiences traffic bottlenecks during commuting hours, especially along Glen Cove Parkway and the connecting roads leading toward I-780. In addition, increased traffic along Shady Lane and Robles would further affect residents' ability to safely and efficiently exit the neighborhood. These routes were never designed to absorb the significant increase in vehicles this development would bring. With limited entry and exit points, Glen Cove is particularly vulnerable to congestion and potential gridlock during peak hours.

When speaking with my neighbors, there is also a growing concern about the additional homes being constructed along Rollingwood, which will add even more strain to Glen Cove traffic heading toward Safeway and increase

pressure along Robles Drive.

This contributes to a more pressing concern: emergency-service access. With only a few main routes in and out of Glen Cove, any added congestion could delay fire, medical, or police responders when every second counts. Residents rely on the assurance that emergency vehicles can reach them quickly, and introducing a development that strains these pathways poses an unacceptable risk.

Additionally, the Vista Cove development is planned near Benicia State Park—an area that supports a diverse range of wildlife, including birds, deer, bobcats, small mammals, and species that depend on the surrounding open space for survival. Further development would fragment these habitats, disrupt migration and nesting areas, and permanently alter the environment that both wildlife and residents cherish. Once these spaces are lost, they cannot be replaced.

For all these reasons, I respectfully urge the Planning Commission to deny the Vista Cove Development. Glen Cove deserves thoughtful planning that protects residents' safety and preserves the natural beauty and biodiversity that define our neighborhood. This development has been proposed twice before, and the same concerns raised in the past remain unresolved. Nothing has changed, and these issues still exist today.

Thank you for your time, attention, and service to Vallejo. I hope you will give serious consideration to the long-term impacts this development would have on Glen Cove.

Sincerely,

Wendy Meineche

I am writing to express my opinion as a 30 year resident of Glen Cove. We live at 513 Fairhaven Way which is located near the proposed Vista Cove Development. The proposed 51 residential lots would have a severe impact on the traffic flow near the Safeway Shopping Center, with only one way in and out of the neighborhood. It could be a catastrophe if a fire or earthquake evacuation was needed in an emergency.
The proposed project would also severely impact the wildlife and their environment. I have witnessed deer, bobcats, hawks, coyotes, raccoons, wild turkeys in the neighboring open space. It is a buffer between Highway 780 and a refuge to the wildlife. Once the land is developed, this will be gone forever.
I understand almost seventy mature trees would be removed from the area. This is detrimental to all the hawks, owls, crows, blue jays and other birds living in the trees. The character and habitat would be lost. Please do not allow this to be destroyed.
My neighbors and I are concerned about property values, the views being lost, and the reason we chose this neighborhood to live, as being destroyed.
Sincerely,
Eileen and Richard Resavy

Dear Mr. Orozco,

I am 84 years old and have lived in my home on Wildflower Ave. for over 30 years. My home overlooks the State Park and the Carcuinez Straights. On Thursday evenings in summer I watch the sail boats from my kitchen window. To think That I would have to endure 6 months or more of machines and building going on right down from my house disturbs me and causes me such grief I can't even explain it. We will be the victims of mouse, grey squirrel and rat infestations and worse. Also Animals who have made their home in the state park and the whole property beneath Wildflower Ave. will have WHERE to go? It feels criminal to deny them all the home they have had living in the wild right next to humanity. Where will the deer, turkeys, peacocks, skunks, racoons, frogs, mice, rats, squirrels, coyotes, birds, and others go? Please do what you can to stop this invasion of our privacy, and then joy we experience living so close to nature. This is why we bought our houses on Wildflower……to be close to nature! How will we you. Don't let this happen!!!

Wildflower Ave. Homeowner,

Julie Lake

Vallejo Planning Division
City of Vallejo
555 Santa Clara Street
Vallejo, CA 94590

Dear Members of the Vallejo Planning Division,

I'm writing as a deeply concerned Vallejo resident to express my strong opposition to the proposed housing development near Shady Lane, known as Vista Cove. While I recognize the importance of thoughtful, responsible growth, this project raises serious concerns about the well-being, safety, and long-term character of our community.
To begin with, the cumulative impact of recent and upcoming developments—including the already approved Rollingwood homes and now the Vista Cove proposal—would place additional
strain on Vallejo's already overextended public-safety infrastructure. The city of Vallejo continues to face significant challenges with police response times for 911 calls. Adding hundreds of new residents without a corresponding expansion of emergency services will only worsen an already critical situation.

I also want to highlight the direct neighborhood impact. My home is located on Georgia Street,
and the increased traffic from the new Benicia Road and Rollingwood homes will heavily affect
daily access to one of the closest grocery stores, Safeway. The parking lot is already at capacity, and entering from Robles Way is frequently difficult and congested. This development
would compound those issues for current residents who rely on that location for essential needs.

Additionally, I am deeply troubled by the environmental consequences of the Vista Cove proposal. The project site, located near the Benicia State Recreation Area, contains rare and valuable natural habitat that supports wildlife dependent on the remaining open spaces in this part of Vallejo. Once this land is disturbed or paved over, the ecological loss is permanent. I walk the State Park regularly, and I've seen firsthand how many species rely on these areas for food, shelter, and safe movement. If Vista Cove is built, displaced wildlife will have nowhere else
to go and will be forced deeper into the State Park, intensifying pressure on the habitat that remains and disrupting the delicate ecological balance that makes this area so special.

For all these reasons, I strongly urge the Planning Division to reject the Vista Cove proposal.
Thank you for your attention to this important issue. I truly hope you will stand with all

Vallejo
residents who are committed to preserving safety, balance, and environmental integrity.

Sincerely,
Emil Meineche
