Vallejo Police Department Cell Site Simulator (CSS) Deployment Log Calendar Year 2024

The Vallejo Police Department recognizes the public interest in ensuring that cell site simulator technology is appropriately used and monitored and seeks to be transparent with its usage. Please note that the cell site simulator is merely an investigative tool to find a cell phone. Results from the cell site simulator alone are never used establish probable cause for an arrest or search.

A deployment is defined as any time the cell site simulator is turned on and used to find a target phone. The cell site simulator might be deployed several times to find the same phone even if previously successfully located. Each deployment in the log is not necessarily a separate phone that was searched for. An arrest is not necessarily effected even if a phone is located. There are many factors that determine when and arrest will be effected.

Authorized Purpose Codes:

- (A) Locate missing persons
- (B) Locate at-risk individuals
- (C) Locate victims of mass casualty incidents
- (D) Assist in felony investigations
- (E) Apprehend fugitives

About Flock Safety Raven® Audio Detection Technology

Flock Safety has the same approach to privacy with every product.

1

HOW DOES FLOCK SAFETY'S RAVEN® TECHNOLOGY WORK?

Flock Safety Raven® devices help local law enforcement respond more quickly to potential instances of gun violence, and lead more effective investigations in firearm-related crimes. When a gunshot occurs, Flock Safety Raven® notifies the local police department in under one minute about the firearm discharge. These notifications include an audio recording, location coordinates within 90 feet of the alert, and the ability to search nearby License Plate Reader (LPR) cameras for potential suspect vehicles.

Flock Safety Raven® technology pairs with the Flock Safety Falcon® license plate reader system and/or other tools to help your police department develop investigative leads and deliver a more situationally-aware response to gunfire.

2

HOW DO GUNSHOT DETECTION SENSORS HELP THE COMMUNITY?

Nearly 80% of gunshots go unreported, meaning victims are left untreated and offenders remain at-large. When gunshots are reported, it often takes 5-10 minutes for a witness to call 911. Automated, near real-time alerts enable first responders to locate and treat victims, saving lives, and preserving critical evidence, like shell casings, that become more difficult to recover as more time passes after a shooting.

3

WHAT DATA DOES FLOCK SAFETY'S RAVEN® COLLECT?

Flock Safety Raven® devices are triggered by gunshots and record a 5-second audio clips. They are not triggered by voices. Flock Safety Raven® also gathers location data through triangulation by default.

Your police department can download the 5 second gunshot audio clip for their investigations.

All Flock Safety Raven® audio detection data is deleted from Flock Safety after 30 days.

4

HOW DOES FLOCK SAFETY KEEP DEVICES AND DATA SECURE?

Flock Safety holds itself to the highest level of security with the following policies:

- All data and footage is encrypted throughout its entire lifecycle and securely stored with our cloud provider, Amazon Web Services Cloud.
- On-device, data is only stored temporarily for a short time until it is uploaded to the cloud, at which point it is removed automatically from the local device. All data (both footage and metadata) is fully encrypted in a unique encryption key when stored on the cloud servers.
- Flock Safety defaults to permanently deleting all data after 30 days on a rolling basis, setting a new standard in the industry.

5

WHO HAS ACCESS TO DATA COLLECTED BY FLOCK SAFETY RAVEN® DEVICES?

Flock Safety's customers own 100% of their data and determine who has access. Flock Safety will never share or sell the data, per our Terms of Service.

6

WHAT FEATURES DO FLOCK SAFETY DEVICES HAVE THAT ENABLE AUDITS AND OVERSIGHT?

To perform a search on the Flock Safety platform, all law enforcement users must enter reason codes to verify the legitimacy of the search and create an audit trail.

Authorized users go through training to properly use the system and communicate with their dispatch teams.

Flock Safety customers commit not to use the data to work with third-party repossession companies, revenue collection, unpaid fines, or towing companies. The system does not contain facial recognition, voice recognition, or capture any personally identifiable information such as name, phone number, or address. The system does not contain facial recognition, voice recognition, or capture names, phone numbers, or addresses.
